

**PRELIMINARY SITE PLAN**

**PROSPECTING ACTIVITIES ON THE REMAINING EXTENT OF THE FARM ROOIFONTEIN NO 1722 (FORMERLY KNOWN AS SPECULATIE NO 217), BOSHOF MAGISTERIAL DISTRICT, FREE STATE PROVINCE**

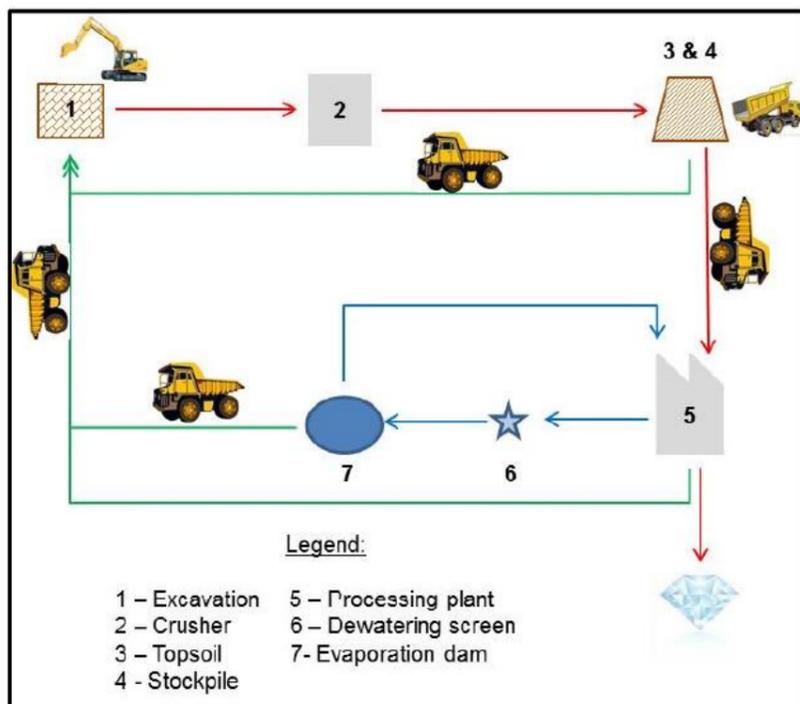

FS 30/5/1/1/2/10261 PR

**NOTES:**

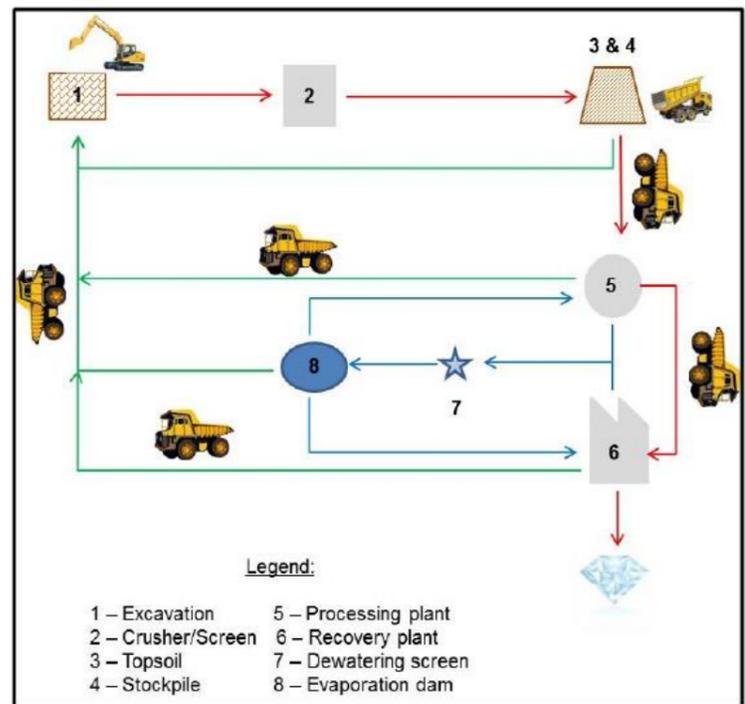

1. Phase 1: Geological desktop studies to establish whether or not other kimberlite bodies and/or alluvial gravel beds are present on the application area. The geological report will include recommendations and suggestions on the locality of the boreholes to be drilled during Phase 2 (337.9299 ha).
2. Phase 2: RC/DC drilling on determined possible diamond carrying bodies (within 333.0435 ha).
3. Phase 3: Bulk sampling will follow once the results of Phases 1 & 2 were analysed and the bulk sampling locations established (within 333.0435 ha).
4. Phase 4: Drafting of detailed geological models and a -report using the prospecting results.
5. An updated Site Plan will be submitted to the DMRE once the position of the drill- and bulk sampling sites were determined.
6. Should the S102 application be approved invasive prospecting will be done within the approved 333.0435 ha, and non-invasive prospecting will be done within the additional 4.8864 ha area.
7. No prospecting may be allowed over existing infrastructure.
