

APPENDIX A – PUBLIC PARTICIPATION

AROAMS QUARRY (PTY) LTD INTENDS TO APPLY FOR A MINING RIGHT FOR THE MINING OF AGGREGATE, GRAVEL, GRANITE AND DOLERITE, 13.6 HA, ON A PORTION OF PORTION 2 (REMAINING EXTENT) OF THE FARM AROAMS 57, REGISTRATION DIVISION OF NAMAQUALAND RD, NORTHERN CAPE.

REF NO:

**EXAMPLE OF THE BACKGROUND INFORMATION DOCUMENT SENT TO
INFORM THE STAKEHOLDERS AND I&AP'S ON THE 3rd JULY 2019**

DMR Reference Number: NC 30/5/1/3/2/ MR

BACKGROUND INFORMATION DOCUMENT

Applicant:
Aroams Quarry (Pty) Ltd
PO Box 66192
Highveld
Centurion
Tel: 018 787 2010

To Whom It May Concern:

Dear sir/madam

3 July 2019

RE: NOTICE OF APPLICATIONS IN TERMS OF SECTION 22 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO. 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT NO. 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS OF 2014 (AS AMENDED BY GNR 326 EFFECTIVE 7 APRIL 2017)

Aroams Quarry (Pty) Ltd intends to apply for a Mining Right for the mining of aggregate, gravel, granite and dolerite, 13.6 ha, on a portion of Portion 2 (Remaining Extent) of the farm Aroams 57, Registration Division of Namaqualand RD, Northern Cape.

SITE DESCRIPTION

The on a portion of Portion 2 (Remaining Extent) of the farm Aroams 57, Registration Division of Namaqualand RD, Northern Cape is situated approximately 8.84 km East Aggeneys, 16.64km west of Pella and 38.78km west of Pofadder, Northern Cape Province. The area earmarked for the proposed mining falls on a section of the farm that was previously used as an existing quarry and the intention of this application is to increase the existing quarry on the left. The GPS coordinates of the proposed mining area are as follow:

Preferred Alternative	
Decimal Degrees	Degrees; Minutes: Seconds
➤ A – 29.169143°S; 18.994345°E	➤ A 29°10'8.91"S; 18°59'39.64"E
➤ B – 29.169018°S; 18.993913°E	➤ B 29°10'8.46"S; 18°59'38.09"E
➤ C – 29.169520 °S; 18.992853 °E	➤ C 29°10'10.27"S; 18°59'34.27"E
➤ D – 29.169720 °S; 18.991502 °E	➤ D 29°10'10.99"S; 18°59'29.41"E

LEGAL COMPLIANCE

The proposed project triggers the following listed activities in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998) [NEMA] and the Environmental Impact Assessment (EIA) Regulations (as amended by GNR 326 effective 7 April 2017), and therefore requires an environmental impact assessment (EIA) that assess project specific environmental impacts and alternatives, consider public input, and propose mitigation measures in cooperation with specialist, to ultimately culminate in an environmental management programme that informs the competent authority (Department of Mineral Resources) when considering the environmental authorization:

- GNR 325 Environmental Impact Assessment Regulations Listing Notice 2 of 2014 Activity 15 (Mining Right area):

The clearance of an area of 20 hectares or more of indigenous vegetation.

- GNR 325 Environmental Impact Assessment Regulations Listing Notice 2 of 2014 Activity 17 (Mining Right area):

Any activity including the operation of that activity which requires a mining right in terms of section 22 of the Mineral and Petroleum Resources Development Act, 2002 (act No. 28 of 2002), including associated infrastructure, structures and earthworks directly related to the extraction of a mineral resource or the primary processing of a mineral resource including winning, extraction, classifying, concentrating, crushing, screening or washing but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource in which case activity 6 in this Notice applies.

- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 14:

The development and related operation of facilities or infrastructure, for the storage, or for the storage and handling, of a dangerous good, where such storage occurs in containers with a combined capacity of 80 cubic metres or more but not exceeding 500 cubic meters.

- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 22:

The decommissioning of any activity requiring –

- (i) a closure certificate in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002); or*
- (ii) a prospecting right, mining right, mining right, production right or exploration right, where the throughput of the activity has reduced by 90% or more over a period of 5 years excluding where the competent authority has in writing agreed that such reduction in throughput does not constitute closure;*

but excluding the decommissioning of an activity relating to the secondary processing of a –

- (a) *mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource; or*
- (b) *petroleum resource, including the refining of gas, beneficiation, oil or petroleum products; – in which case activity 31 in this Notice applies.*

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 27:

The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 28:

Commercial and industrial developments where such land was used for agriculture or afforestation on or after 01 April 1998 and where such development

- (ii) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.*

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 35:

The expansion of residential, retail, recreational, tourism, commercial or institutional developments on land previously used for mining or heavy industrial purposes, where the increased development footprint will exceed 1 000 square meters; excluding—

- (i) where such land has been remediated in terms of part 8 of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) in which case the National Environmental Management: Waste Act, 2008 applies; or*
- (ii) where an environmental authorisation has been obtained for the decommissioning of such a mine or industry in terms of this Notice or any previous NEMA notice; or*
- (iii) where a closure certificate has been issued in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) for such land.*

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 56:

The widening of a road by more than 6 metres, or the lengthening of a road by more than 1 kilometre –

- ii) Where no reserve exists, where the existing road is wider than 8 metres.*

OTHER LEGISLATION TRIGGERED BY THE PROPOSED PROJECT INCLUDES:

- An application for a Mining Right in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) has been submitted to the Department of Mineral Resource –Northern Cape Province.
- An application for a Water Use License in terms of the National Water Act, 1998 (Act No. 36 of 1998) has to be submitted to the Department of Water and Sanitation.
- A heritage impact assessment and palaeontological impact assessment has to be submitted to Heritage Northern Cape in terms of the National Heritage Resources Act, 1999 (Act No. 25 of 1999).
- A land development application has to be submitted to the Department of Environmental Affairs and Development Planning in terms of the Land Use Planning Act, 2014 (Act No. 13 of 2014).

PROJECT DESCRIPTION

The proposed mining site will be an extension of the existing quarry pit previously distributed by stone aggregate mining activities. The mining methods will make use of blasting means of explosives in order to loosen the hard rock, the material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The granite will be stockpiled and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The proposed mining area is approximately 13.6 ha is extent and the applicant, Aroams Quarry (Pty) Ltd, intends to win material from the area for at least 30 years. The aggregate, gravel, granite and dolerite to be removed from the quarry will be used for road construction in the vicinity. The proposed quarry will therefore contribute to the upgrading / maintenance of road infrastructure in and around the Aggeneys area.

The mining activities will consist out of the following:

- Stripping and stockpiling of topsoil;
- Blasting;
- Excavating;
- Crushing;
- Stockpiling and transporting;
- Sloping and landscaping upon closure of the site; and
- Replacing the topsoil and vegetation the disturbed area.

The mining site will contain the following:

- Drilling equipment;
- Excavating equipment;

- Earth moving equipment;
- Mobile crushing and screening plants;
- Temporary office;
- Site vehicles;
- Parking area for visitors and site vehicles;
- Site storage containers;
- Generator or bunded area;
- Workshop; and
- Chemical ablution facilities.

DUST:

- Speed on the access road will be limited to 40 km/h to prevent the generation of excess dust.
- Roads will be sprayed with water or an environmentally friendly dust-allaying agent that contains no PCB's (e.g. DAS products) if dust is generated above acceptable limits.

NOISE:

- It will be ensured that employees and staff conduct themselves in an acceptable manner while on site.
- All mining vehicles will be equipped with silencers and maintained in a road worthy condition in terms of the Road Transport Act.
- The noise generated from the mining machinery will be similar to noise generated along the R33 by public vehicles. Blasting noise will be instantaneous and of short duration. This will only occur once every two to three weeks.
- The type, duration and timing of the blasting procedures will be planned with due cognisance of other land users and structures in the vicinity.
- Surrounding land owners will be notified in writing prior to blasting occasions.

ACCESS ROUTE:

- Access to the proposed mining area will be from the existing access road to the site will be used. No new roads will be needed for this activity. It is proposed that ±12 trucks will visit the mining area per day.
- The applicant will strive to make use of the existing farm roads as far as possible, however some new roads, or upgrading to existing roads will be required to reach allowable mining areas. The construction of new access roads will be in consultation with the landowner and will as far as possible be kept to already disturbed areas following fence lines or similar infrastructure. The applicant will be responsible for the maintenance of the road for the duration of the mining activities.

- Haul roads will be extended as the opencast mining progress, and will be rehabilitated as part of the final reinstatement of the area.

SURFACE AND GROUND WATER:

The proposed site falls within the Lower Orange Water Management Area (WMA), specifically in the Orange Sub Water Management Area (Boegoeberg Sub Catchment), in the D81G quaternary catchment area.

No drainage channels occur within the mining area and there is no dendritic system which could be disturbed. Given the variability of semi-arid rainfall, the calculation of the mean annual runoff (MAR) would be of no use. The MAR is very low given the low rainfall (less than 250 mm/year) occurring mainly in the winter months, high evaporation rates, and shallow grade of the slope toward the drainage channels and the permeability of the soils. The surface water quality (when available after severe rainstorms) is suitable for animal consumption but not as potable water. No natural wetlands exist in the area.

- The proposed mining area will be further than 100m from any natural water source.
- The proposed activities are not expected to have a negative impact on the ground water of the area.
- Currently it is proposed that the process water, needed on site, will be obtained from the borehole that is located on site at the workshop area. A Water Use License Application will be made for this proposed borehole. Approximately 20 000-40 000 liters will be needed per day for processing and dust suppression.

ELECTRICITY:

- Generators and solar power panels will be used to power the infrastructure on site. Future endeavours will dictate if or when an Eskom connection will be secured.

EMPLOYMENT:

- It is proposed that the project will create ± 45 employment opportunities.

VEGETATION:

The mining area is situated within the Nama-Karoo Biome. The vegetation consists of Bushmanland Arid Grassland vegetation type (NKb 3 according to Mucina and Rutherford, 2006) covering an area of 45478.96 ha that is rated as least threatened with little of the area transformed. Erosion in this vegetation type is deemed to range from very low (60%) to low (33%).

A large amount of pioneer species occurs within the proposed mining area due to previous disturbance dominated by *Galenia fruticosa* and *Tetragonia arbuscula*.

The dominant species outside the disturbed area is covered by sparse open grassland, with prominent *Stipagrostis* grass species, along with scattered drought resistant dwarf shrubs. No protected plant species could be identified at the time of the site inspection.

GEOLOGY & SOILS:

According to Mucina and Rutherford, 2006 a third of the geology of the area is covered by recent (Quaternary) alluvium and calcrete. Superficial deposits of the Kalahari group are present in the east. The extensive Palaeozoic Diamictite of the Dwyka group outcrops in the area as do gneisses and metasediments of Mokolain age. The soils of most of the area are red-yellow apedal soils, with a high base status and <300mm deep, typical of Ag and Ae land types. The soils are typically weakly structured with low organic content. These soils drain freely which results in a soil surface susceptible to erosion, especially wind erosion when the vegetation cover is sparse and gulley erosion in areas where storm-water is allowed to concentrate. The soils in the area are generally not suitable for dry land crop production therefore the pre-mining land capacity is categorized as Class III grazing land. The productivity of the area is very low at 8 – 10 Ha/SSU.

The area is characterized by an expansive, undulating landscape. The area is dominated by a plain of dry grasslands with scattered ancient rocky outcrops, named Inselbergs. The proposed mine will be established for the winning of granite to be used in the construction industry. The area was chosen as it is adjacent to the area previously disturbed for mining purposes and would therefore minimize the impact on the surrounding natural environment as well as consolidate the mining related impacts on the farm to one area.

CLIMATE:

Aggeneys normally receives about 34 mm of rain per year, with most of the rainfall occurring mainly during autumn. Figure 1 shows the average rainfall values for Aggeneys per month. It receives the lowest rainfall (0 mm) in December and the highest (9 mm) in March. The monthly distribution of average daily maximum temperatures in Figure 2 shows the average midday temperatures for Aggeneys range from 17.7 °C in July to 31.6 °C in January. The region is coldest during July when temperatures drops to 3 °C on an average during the night. Refer to Figure 3 below for an indication of the monthly variation of average minimum daily temperatures.

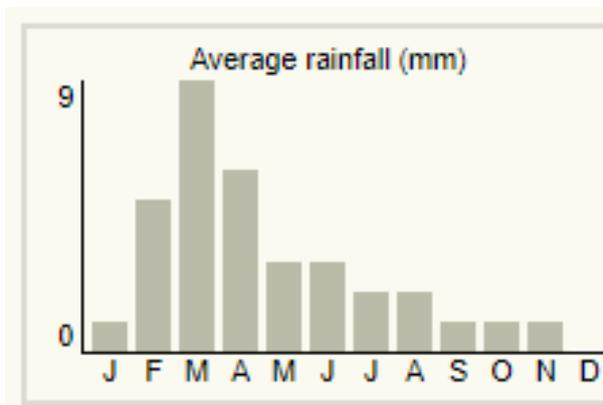

Figure 1: Average rainfall for Aggeneys

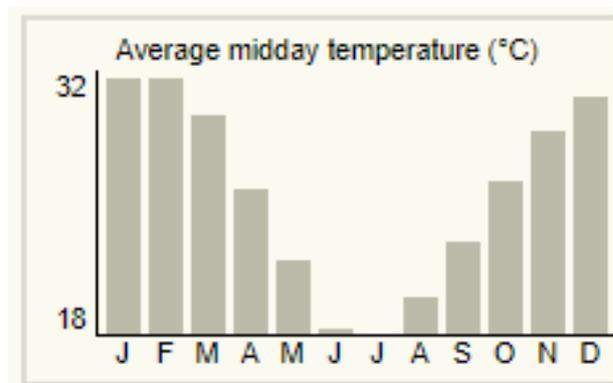

Figure 2: Average midday temperature

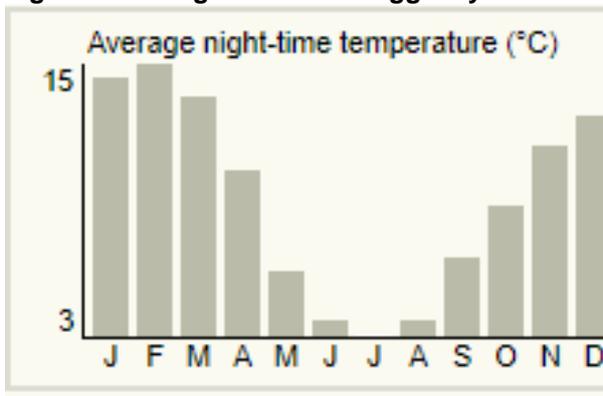

Figure 3: Average night-time temperature

SITES OF ARCHAEOLOGICAL AND CULTURAL INTEREST:

No sites of archaeological or cultural importance were identified during the site inspection. As the proposed mining activity will take place within an area previously utilized for mining purposes, the activity is not anticipated to have a negative impact on any archaeological or cultural aspects.

FAUNA:

Various small mammals and reptiles occur on the property. Larger herbivore species are very scarce or absent due to the conflicting land use.

The fauna at the site will not be impacted by the proposed mining activity as they will be able to move away or through the site, without being harmed. Workers should be informed and managed to ensure that no fauna at the site is harmed. Upon commencement of the proposed mining activities, a fence surrounding the mining area should be erected to prevent sheep entering the site.

- The fauna at the site will not be impacted by the proposed mining activity as they will be able to move away or through the site, without being harmed. Workers should be educated and managed to ensure that no fauna at the site is harmed.

LAND USE:

Portion 2 of the farm Aroams 57 is situated in an agricultural setting, with the land mainly used for small stock grazing purposes. Approximately 90% of the region is used for livestock grazing and production, with the remainder comprising of agriculture and mining.

The Gamsberg zinc mine will be established to the south approximately 6 km from the site, and the N14 passes the proposed mining site approximately 2.5 km to the south.

VISUAL EXPOSURE:

- The mining area was identified to constitute the lowest possible visual impact on the surrounding environment.
- The surrounding area has previously been disturbed by mining activities, and this application entails the extension of the existing mining area.
- The crusher plant and all stockpiling will be done on the area previously disturbed for mining purposes, and no new processing areas will need to be opened.
- The applicant should however ensure that housekeeping is managed to standard, as this will mitigate the visual impacts during the operational phase of the mine.
- Upon closure the site will be rehabilitated and sloped to insure that the visual impact on the aesthetic value of the area is kept to a minimum.
- The site will have a neat appearance and be kept in good condition at all times

ABLUTION, WASTE WATER & WASTE DISPOSAL:

- Ablution facilities will consist of chemical toilets hired from a contractor and serviced regularly.

- Any effluents containing oil, grease or other industrial substances will be collected in a suitable receptacle and removed from the site, either for resale or for appropriate disposal at a recognised facility.
- Spills would be cleaned up immediately to the satisfaction of the Regional Manager by removing the spillage together with the polluted soil and by disposing of them at a recognised facility.
- No mining waste will be generated. General waste will be disposed at the authorised Aggeneys Disposal facility.
- Non-biodegradable refuse such as glass bottles, plastic bags, metal scrap, etc., will be stored in a container at a collecting point and collected on a regular basis and disposed of at a recognised landfill site.
- Biodegradable refuse generated will be handled as indicated above.
- No waste will be burned or buried on site.

FINAL REHABILITATION

Upon closure of the mining operations the entire footprint area will be rehabilitated so as to allow the affected area to return to agricultural use. At this stage the following baseline rehabilitation actions are proposed from which a detailed closure plan will be developed:

- Rehabilitation of the surface area shall entail landscaping, levelling, top dressing, land preparation, seeding (if required), and weed / alien clearing.
- All infrastructures, equipment, and other items used during the mining period will be removed from the site (section 44 of the MPRDA).
- Waste material of any description, including receptacles, scrap, rubble and tyres, will be removed entirely from the mining area and disposed of at a recognised landfill facility. It will not be permitted to be buried or burned on the site.
- Weed / Alien clearing will be done in a sporadic manner during the life of the mining activities. Species categorised as weeds according to the National Environmental Management: Biodiversity Act (Act No. 10 of 2004) [NEMBA] Alien and Invasive Species Regulation GNR 598 and 599 of 2014 Species regarded as need to be eradicated from the site on final closure.
- Final rehabilitation shall be completed within a period specified by the Regional Manager.

Aroams Quarry (Pty) Ltd will make use of temporary infrastructure during the mining operations. Workers will be transported to and from the site daily.

APPLICATION FOR CLOSURE

Once the full mining area was rehabilitated the mining right holder will submit a closure application to the Department of Mineral Resources in accordance with section 43(4) of the MPRDA, 2002 that states: *“An application for a closure certificate must be made to the Regional Manager in whose region the land in question is situated within 180 days of the occurrence of the lapsing, abandonment,*

cancellation, cessation, relinquishment or completion contemplated in subsection (3) and must be accompanied by the prescribed environmental risk report”.

The Closure Application will be submitted in terms of Regulation 62 of the MPRDA, 2002, and Government Notice 940 of NEMA, 1998.

PUBLIC INVOLVEMENT

This document is to inform you about the proposed activity and to determine whether there are any concerns or objections from Interested and Affected Parties (I&AP's) that need to be considered.

As an Interested and Affected Party you are kindly requested to complete the comments form and give any comment, concern or input with regard to the current land use of the area, the environment as well as socio-economic conditions that you feel might be affected by the proposed activity. When submitting response please provide suggestions to mitigate the anticipated impact of each identified activity.

Please contact Yolandie Coetzee at the contact details as presented in the letterhead or at yolandie.c@greenmined.co.za through any means should you need more information, have concerns or comments that need to be considered or if you want to be registered as an interested and / or affected party and would like to receive a copy of the Draft Scoping Report (DSR). If we do not receive any comments from you on or before 3 August 2019, it will be accepted that you do not have any objections/comments with regard to the project and do not require any further documentation.

A register of interested and affected parties (I&AP's) will be opened and maintained containing the names, contact details and address of all persons who have submitted written comments, attended meetings or have in writing requested to be registered and all organs of state which have jurisdiction in respect of the activity.

Please note that only registered I&AP's and stakeholders will be entitled to comment on reports and plans to be submitted to the Department provided that the party provide its name, contact details and address and discloses any direct business, financial, personal or other interest which he / she may have in the approval or refusal of the applications.

The Draft Scoping Report (DSR) will be submitted to the Department of Mineral Resources – Northern Cape (DMR) for review purposes. This report will also be made available to the public for a 30 days review period. An electronic copy of the report will be published on the Greenmined Environmental website (www.greenmined.com). All registered I&AP's and stakeholders will be notified of the commenting period in advance as above.

The DSR will then be updated to reflect the comments received during the public commenting period. Thereafter, the Final Scoping Report (FSR) will be submitted to DMR for its consideration as part of the authorization process in terms of the NEMA, 2014 regulations (as amended 2017). A copy of the FSR will be made available on the Greenmined Environmental website. Once the Final Scoping

Report has been accepted by the DMR, the Draft Environmental Impact Assessment Report (DEIAR) will be prepared, inclusive of all the specialist studies, and also made available to the public for a 30-day commenting period. An electronic copy of the DEIAR report will also be published on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified of the commenting period in advance.

Upon expiry of the commenting period the DEIAR will be updated to reflect the comments received during the public commenting period. Thereafter, the Final EIAR will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA 2014 regulations (as amended by GNR 326 effective 7 April 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal.

REGULATION 2.2 MAP

PROOF OF LAND CLAIM RECEIVED ON 23RD OF MAY 2019

Enquiries: Ryan Oliver

Greenmined Environmental
Private Bag X15
Somerset West
7129

Dear Sir/ Madam

LAND CLAIMS ENQUIRY –

- 1. Portion of portion 2 (Remaining extent) of the Farm Aroams No. 57, Namaqualand District, Province Northern Cape.**

We refer to your letter received 23/05/2019

We confirm that as at the date of this letter that there is no land claims appearing on our database in respect of the property. This includes the database for claims lodged by 31 December 1998; and those lodged between 1 July 2014 and 27 July 2016 in terms of the Restitution of Land Rights Amendment Act, 2014.

Whilst the Commission takes reasonable care to ensure the accuracy of the information it provides, there are various factors that are beyond the Commission's control, particularly relating to claims that have lodged but not yet been gazetted such as:

1. Some Claimants referred to properties they claim dispossession of rights in land against using historical property descriptions which may not match the current property description; and
2. Some Claimants provided the geographic descriptions of the land they claim without mentioning the particular actual property description they claim dispossession of rights in land against.

The Commission therefore does not accept any liability whatsoever if through the process of further investigation of claims it is found that there is in fact a land claim in respect of the above property.

If you are aware of any change in the description of the above property after 19 June 1913 kindly supply us with such description so as to enable us to do a further search.

PROOF OF LAND OWNER CONSENT SIGNED ON THE 13TH OF SEPTEMBER

Interim Comment

In terms of Section 38(3), 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Mr Johan Le Roux
SPH Kundallia (Pty) Ltd
P O Box 257
MILNERTON
7435

Aroams Quarry (Pty) Ltd intends to apply for a Mining Right for the mining of aggregate, gravel, granite and dolerite, 13,6 ha, on a portion of Portion 2 (Remaining Extent) of the farm Aroams 57, Registration Division of Namaqualand RD, Northern Cape.

Thank you for notifying SAHRA of the Environmental Authorisation (EA) and Mining Right Application on portion of Portion 2 (Remaining Extent) of the farm Aroams 57, Registration Division of Namaqualand RD, Northern Cape Province (NC 3015/1/3/2/ MR).

As the proposed development is undergoing an EA Application process in terms of the National Environmental Management Act, 107 of 1998 (NEMA), NEMA Environmental Impact Assessment (EIA) Regulations for activities that trigger the Mineral and Petroleum Resources Development Act, No 28 of 2002 (MPRDA)(As amended), it is incumbent on the developer to ensure that a **Heritage Impact Assessment (HIA)** is done as per section 38(3) and 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA) as required by section 24(4)(b)(iii) of NEMA. This must include an archaeological component and any other applicable heritage components. The HIA must be conducted as **part of the EA Application** in terms of NEMA and the NEMA EIA Regulations.

The quickest process to follow for the archaeological component would be to contract a qualified archaeologist (see www.sahra.org.za or www.sph.co.za to provide an Archaeological Impact Assessment (AIA). The AIA must comply with the SAHRA 2007 Minimum Standards: Archaeological and Palaeontological Component of Impact Assessments.

No further assessment of the impact to palaeontological resources is required as the proposed mining right is located in an area of low sensitivity as per the SAHRIS Palaeo-Sensitivity map. A Fossil Finds Procedure must be developed by a qualified palaeontologist to be included in the EMPr (please see <https://www.palaeosa.org/heritage-purcellioners.html> for a list of palaeontological practitioners).

REGULATION 42 MAP REQUESTED FROM MR ABONGILE MDINGI FROM HOROMELO HOLE TRANSPORT SERVICES 1228CC ON THE 3RD OF JULY 2019

NOTICE OF MINING RIGHT APPLICATION

Notice is hereby given in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) [MPRDA] and the National Environmental Management Act, 1998 (Act No. 107 of 1998) [NEMA] as well as the Environmental Impact Assessment (EIA) Regulations of 2014 (as amended by GNR 326 effective 7 April 2017) of the intention of Aroams Quarry (Pty) Ltd ("Applicant") to undertake the following:

- Apply for environmental authorization to mine aggregate, gravel, granite and Dolomite from, the below property situated in the Namaqualand Magisterial District of the Northern Cape Province.
- An application for a Mining Right in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) has been submitted to the Department of Mineral Resource –Northern Cape Province.
- An application for a Water Use License in terms of the National Water Act, 1998 (Act No. 36 of 1998) has to be submitted to the Department of Water and Sanitation.
- A heritage impact assessment and palaeontological impact assessment has to be submitted to Heritage Northern Cape in terms of the National Heritage Resources Act, 1999 (Act No. 25 of 1999).
- A land development application has to be submitted to the Department of Environmental Affairs and Development Planning in terms of the Land Use Planning Act, 2014 (Act No. 13 of 2014).

The applicant, Aroams Quarry (Pty) Ltd intends to apply for a mining right to mine 13.6ha on a Portion of Portion 2 of the farm Aroams 57, Magisterial District of Namaqualand, Northern Cape. The applicant will increase the existing quarry. The mining method will make use of blasting means of explosives in order to loosen the hard rock. The material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The aggregate will be stockpiled and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The on a portion of Portion 2 (Remaining Extent) of the farm Aroams 57, Registration Division of Namaqualand RD, Northern Cape is situated approximately 8.84 km East Aggeneys, 16.64km west of Pella and 38.78km west of Pofadder, Northern Cape Province. The area earmarked for the proposed mining falls on a section of the farm that was previously used as an existing quarry and the intention of this application is to increase the existing quarry on the left. The proposed mining site will be an extension of the existing quarry pit previously distributed by stone aggregate mining activities. The mining methods will make use of blasting means of explosives in order to loosen the hard rock, the material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The granite will be stockpiled and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The proposed project triggers the following listed activities in terms of NEMA, 1998 and the EIA Regulations (as amended by GNR 326 effective 7 April 2017) and therefore requires an environmental impact assessment process to obtain environmental authorization:

- GNR 325 Environmental Impact Assessment Regulations Listing Notice 2 of 2014 Activity 15 (Mining Right area):

The clearance of an area of 20 hectares or more of indigenous vegetation.

- GNR 325 Environmental Impact Assessment Regulations Listing Notice 2 of 2014 Activity 17 (Mining Right area):

Any activity including the operation of that activity which requires a mining right in terms of section 22 of the Mineral and Petroleum Resources Development Act, 2002 (act No. 28 of 2002), including associated infrastructure, structures and earthworks directly related to the extraction of a mineral resource or the primary processing of a mineral resource including winning, extraction, classifying, concentrating, crushing, screening or washing but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource in which case activity 6 in this Notice applies.

- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 14:
The development and related operation of facilities or infrastructure, for the storage, or for the storage and handling, of a dangerous good, where such storage occurs in containers with a combined capacity of 80 cubic metres or more but not exceeding 500 cubic meters.
- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 22:
The decommissioning of any activity requiring –
 - (i) a closure certificate in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002); or
 - (ii) a prospecting right, mining right, mining right, production right or exploration right, where the throughput of the activity has reduced by 90% or more over a period of 5 years excluding where the competent authority has in writing agreed that such reduction in throughput does not constitute closure;
 but excluding the decommissioning of an activity relating to the secondary processing of a –
 - (a) mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource; or
 - (b) petroleum resource, including the refining of gas, beneficiation, oil or petroleum products; – in which case activity 31 in this Notice applies.
- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 27:
The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.
- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 28:
Commercial and industrial developments where such land was used for agriculture or afforestation on or after 01 April 1998 and where such development
 - (i) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.
- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 35:
The expansion of residential, retail, recreational, tourism, commercial or institutional developments on land previously used for mining or heavy industrial purposes, where the increased development footprint will exceed 1 000 square meters; excluding—
 - (i) where such land has been remediated in terms of part 8 of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) in which case the National Environmental Management: Waste Act, 2008 applies; or
 - (ii) where an environmental authorisation has been obtained for the decommissioning of such a mine or industry in terms of this Notice or any previous NEMA notice; or
 - (iii) where a closure certificate has been issued in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) for such land.
- GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 56:
The widening of a road by more than 6 metres, or the lengthening of a road by more than 1 kilometre –
 - i) Where no reserve exists, where the existing road is wider than 8 metres.

Interested and Affected Parties (I&AP's) are invited to provide written comments. I&AP's must provide their comments with their name and contact details to the environmental consultant indicated below by 3 Aug 2019. Should you require the documentation in another language or need additional information please contact Greenmined Environmental. A register of I&AP's that submitted written comments or requested to be registered will be opened. All organs of state having jurisdiction in respect of the activity will also be listed on the register. Please note that only registered I&AP's will be entitled to comment on reports and plans to be submitted to the Department, provided that the party provides its name, contact details and address and discloses any direct business, financial, personal or other interest which the party may have in the approval or refusal of the application. The registered I&AP's will, in writing, within 14 days of the date of the decision be notified of the outcome of the application including the reasons for the decision and the right to appeal.

The contact consultant is Greenmined Environmental, Suite 62, Private Bag X15, Somerset West, 7129 or contact Yolande Coetzee at (083) 734 5113 or Tel (011) 966 4390, Fax (086) 546 0579, E-Mail: yolande.c@greenmined.co.za

NOTICE OF MINING RIGHT APPLICATION

Notice is hereby given in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) (MPRDA) and the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) as well as the Environmental Impact Assessment (EIA) Regulations of 2014 (as amended by GNIR 326 effective 7 April 2017) of the intention of Ardens Quarry (Pty) Ltd ("Applicant") to undertake the following:

- 1. Apply for environmental authorisation to mine aggregate, gravel, granite and Dolerite from, the below property situated in the Namaqualand Magisterial District of the Northern Cape Province.
- 2. An application for a Mining Right in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) has been submitted to the Department of Mineral Resources – Northern Cape Province.
- 3. An application for a Water Use Licence in terms of the National Water Act, 1998 (Act No. 36 of 1998) has to be submitted to the Department of Water and Sanitation.
- 4. A heritage impact assessment and paleontological impact assessment has to be submitted to Heritage Northern Cape in terms of the National Heritage Resources Act, 1969 (Act No. 25 of 1969).
- 5. A land development application has to be submitted to the Department of Environmental Affairs and Development Planning in terms of the Land Use Planning Act, 2014 (Act No. 13 of 2014).

The applicant, Ardens Quarry (Pty) Ltd intends to apply for a mining right to mine 13.8ha on a Portion of Portion 3 of the farm Ardens 57, Magisterial District of Namaqualand, Northern Cape. The applicant will increase the existing quarry. The mining method will make use of blasting means of explosives in order to loosen the hard rock. The material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The aggregate will be stockpiled and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The on a portion of Portion 3 (Remaining Estate) of the farm Ardens 57, Registration Division of Namaqualand RD, Northern Cape is situated approximately 5.84 km East Aggenys, 16.84km west of Pella and 38.71km west of Potladder, Northern Cape Province. The area earmarked for the proposed mining falls on a section of the farm that was previously used as an existing quarry and the intention of this application is to increase the existing quarry on the left. The proposed mining site will be an extension of the existing quarry (it previously distributed by stone aggregate mining activities. The mining methods will make use of blasting means of explosives in order to loosen the hard rock, the material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The granite will be stockpiled and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The proposed project triggers the following listed activities in terms of NEMA, 1998 and the EIA Regulations (as amended by GNIR 326 effective 7 April 2017) and therefore requires an environmental impact assessment process to obtain environmental authorisation:

- 1. GNR 325 Environmental Impact Assessment Regulations (Act No. 1 of 2014) Activity 15 (Mining Right area):
The clearance of an area of 20 hectares or more of indigenous vegetation.
- 2. GNR 325 Environmental Impact Assessment Regulations (Act No. 1 of 2014) Activity 17 (Mining Right area):
Any activity including the operation of that activity which requires a mining right in terms of section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002), including associated infrastructure, structures and earthworks directly related to the extraction of a mineral resource or the primary processing of a mineral resource including mining, extraction, classifying, concentrating, crushing, screening or washing but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, casting or gasification of the mineral resource in which case activity 8 in this Notice applies.
- 3. GNR 327 Environmental Impact Assessment Regulations (Act No. 1 of 2017) Activity 14:
The development and related operation of facilities or infrastructure, for the storage, or for the storage and handling, of a dangerous good, where such storage occurs in containers with a combined capacity of 60 cubic metres or more but not exceeding 500 cubic metres.
- 4. GNR 327 Environmental Impact Assessment Regulations (Act No. 1 of 2017) Activity 20:
The decommissioning of any activity requiring –
(i) a closure certificate in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002); or
(ii) a prospecting right, mining right, mining right or exploration right, where the throughput of the activity has reduced by 80% or more over a period of 3 years excluding where the competent authority has in writing agreed that such reduction in throughput does not constitute closure
but excluding the decommissioning of an activity relating to the secondary processing of a –
(a) mineral resource, including the smelting, beneficiation, reduction, refining, casting or gasification of the mineral resource; or
(b) petroleum resource, including the refining of gas, beneficiation, oil or petroleum products; –
in which case activity 31 in this Notice applies.
- 5. GNR 327 Environmental Impact Assessment Regulations (Act No. 1 of 2014) Activity 21:
The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.
- 6. GNR 327 Environmental Impact Assessment Regulations (Act No. 1 of 2014) Activity 26:
Commercial and industrial developments where such land was used for agriculture or afforestation on or after 01 April 1996 and where such development
(a) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.
- 7. GNR 327 Environmental Impact Assessment Regulations (Act No. 1 of 2017) Activity 26:
The expansion of residential, retail, recreational, tourism, commercial or institutional developments on land previously used for mining or heavy industrial purposes, where the increased development footprint will exceed 1 000 square metres, excluding –
(i) where such land has been reclassified in terms of part 8 of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) in which case the National Environmental Management: Waste Act, 2008 applies; or
(ii) where an environmental authorisation has been obtained for the decommissioning of such a mine or industry in terms of this Notice or any previous NEMA notice; or
(iii) where a closure certificate has been issued in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) for such land.
- 8. GNR 327 Environmental Impact Assessment Regulations (Act No. 1 of 2017) Activity 29:
The widening of a road by more than 6 metres, or the lengthening of a road by more than 1 kilometre –
(a) Where no reserve exists, where the existing road is wider than 6 metres.

Interested and Affected Parties (I/A/P's) are invited to provide written comments. I/A/P's must provide their comments with their name and contact details to the environmental consultant indicated below by 3 August 2019. Should you require the documentation in another language or need additional information please contact Greenmined Environmental. A register of I/A/P's that submitted written comments or requested to be registered will be opened. All organs of state having jurisdiction in respect of the activity will also be listed on the register. Please note that only registered I/A/P's will be invited to comment on reports and plans to be submitted to the Department, provided that the party provides its name, contact details and address and declares any direct business, financial, personal or other interest which the party may have in the approval or refusal of the application. The registered I/A/P's will, in writing, within 14 days of the date of the decision be notified of the outcome of the application including the reasons for the decision and the right to appeal.

The contact consultant is Greenmined Environmental, Suite 62, Private Bag 310, Somerset West, 7129 or contact Yolande Coetzee at (022) 734 5113 or Tel (011) 498 4360, Fax (086) 548 0579, E-Mail: info@greenmined.co.za

NOTICE OF MINING RIGHT APPLICATION

Notice is hereby given in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) [MPRDA] and the National Environmental Management Act, 1998 (Act No. 107 of 1998) [NEMA] as well as the Environmental Impact Assessment (EIA) Regulations of 2014 (as amended by GNR 326 effective 7 April 2017) of the intention of Aroams Quarry (Pty) Ltd ("Applicant") to undertake the following:

- Apply for environmental authorization to mine aggregate, gravel, granite and Dolerite from, the below property situated in the Namaqualand Magisterial District of the Northern Cape Province.
- An application for a Mining Right in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) has been submitted to the Department of Mineral Resource –Northern Cape Province.
- An application for a Water Use License in terms of the National Water Act, 1998 (Act No. 36 of 1998) has to be submitted to the Department of Water and Sanitation.
- A heritage impact assessment and palaeontological impact assessment has to be submitted to Heritage Northern Cape in terms of the National Heritage Resources Act, 1999 (Act No. 25 of 1999).
- A land development application has to be submitted to the Department of Environmental Affairs and Development Planning in terms of the Land Use Planning Act, 2014 (Act No. 13 of 2014).

The applicant, Aroams Quarry (Pty) Ltd intends to apply for a mining right to mine 13.6ha on a Portion of Portion 2 of the farm Aroams 57, Magisterial District of Namaqualand, Northern Cape. The applicant will increase the existing quarry. The mining method will make use of blasting means of explosives in order to loosen the hard rock. The material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The aggregate will be stockpiled and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The on a portion of Portion 2 (Remaining Extent) of the farm Aroams 57, Registration Division of Namaqualand RD, Northern Cape is situated approximately 8.84 km East Aggeneys, 16.64km west of Pella and 38.78km west of Pofadder, Northern Cape Province. The area earmarked for the proposed mining falls on a section of the farm that was previously used as an existing quarry and the intention of this application is to increase the existing quarry on the left. The proposed mining site will be an extension of the existing quarry pit previously distributed by stone aggregate mining activities. The mining methods will make use of blasting means of explosives in order to loosen the hard rock, the material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The granite will be stockpiled and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The proposed project triggers the following listed activities in terms of NEMA, 1998 and the EIA Regulations (as amended by GNR 326 effective 7 April 2017) and therefore requires an environmental impact assessment process to obtain environmental authorization:

- GNR 325 Environmental Impact Assessment Regulations Listing Notice 2 of 2014 Activity 15 (Mining Right area):

The clearance of an area of 20 hectares or more of indigenous vegetation.

- GNR 325 Environmental Impact Assessment Regulations Listing Notice 2 of 2014 Activity 17 (Mining Right area):

Any activity including the operation of that activity which requires a mining right in terms of section 22 of the Mineral and Petroleum Resources Development Act, 2002 (act No. 28 of 2002), including associated infrastructure, structures and earthworks directly related to the extraction of a mineral resource or the primary processing of a mineral resource including winning, extraction, classifying, concentrating, crushing, screening or washing but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource in which case activity 6 in this Notice applies.

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 14:

The development and related operation of facilities or infrastructure, for the storage, or for the storage and handling, of a dangerous good, where such storage occurs in containers with a combined capacity of 80 cubic metres or more but not exceeding 500 cubic meters.

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 22:

The decommissioning of any activity requiring –

(i) a closure certificate in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002); or

(ii) a prospecting right, mining right, mining right, production right or exploration right, where the throughput of the activity has reduced by 90% or more over a period of 5 years excluding where the competent authority has in writing agreed that such reduction in throughput does not constitute closure;

but excluding the decommissioning of an activity relating to the secondary processing of a –

(a) mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource; or

(b) petroleum resource, including the refining of gas, beneficiation, oil or petroleum products; –

in which case activity 31 in this Notice applies.

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 27:

The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2014 Activity 28:

Commercial and industrial developments where such land was used for agriculture or afforestation on or after 01 April 1998 and where such development

(ii) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 35:

The expansion of residential, retail, recreational, tourism, commercial or institutional developments on land previously used for mining or heavy industrial purposes, where the increased development footprint will exceed 1 000 square meters; excluding—

(i) where such land has been remediated in terms of part 8 of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) in which case the National Environmental Management: Waste Act, 2008 applies; or

(ii) where an environmental authorisation has been obtained for the decommissioning of such a mine or industry in terms of this Notice or any previous NEMA notice; or

(iii) where a closure certificate has been issued in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) for such land.

■ GNR 327 Environmental Impact Assessment Regulations Listing Notice 1 of 2017 Activity 56:

The widening of a road by more than 6 metres, or the lengthening of a road by more than 1 kilometre –

iv) Where no reserve exists, where the existing road is wider than 8 metres.

Interested and Affected Parties (I&AP's) are invited to provide written comments. I&AP's must provide their comments with their name and contact details to the environmental consultant indicated below by 3 August 2019. Should you require the documentation in another language or need additional information please contact Greenmined Environmental. A register of I&AP's that submitted written comments or requested to be registered will be opened. All organs of state having jurisdiction in respect of the activity will also be listed on the register. Please note that only registered I&AP's will be entitled to comment on reports and plans to be submitted to the Department, provided that the party provides its name, contact details and address and discloses any direct business, financial, personal or other interest which the party may have in the approval or refusal of the application. The registered I&AP's will, in writing, within 14 days of the date of the decision be notified of the outcome of the application including the reasons for the decision and the right to appeal.

Subject: Aroams Quarry FSR - NC 30/5/1/2/2/10156MR (Stakeholders)

Dear sir/madam

RE: APPLICATION FOR A MINING RIGHT IN TERMS OF SECTION 22 OF THE MINERAL AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (AS AMENDED BY SECTION 18 OF ACT 49 OF 2006) AND ENVIRONMENTAL AUTHORIZATION IN TERMS OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT (AS AMENDED): A PORTION OF PORTION 2 (REMAINING EXTENT) OF THE FARM AROAMS 57, REGISTRATION DIVISION OF NAMAQUALAND, NORTHERN CAPE.

Please take notice that the Final Scoping Report in terms of NEMA for the mining of aggregate, gravel, granite and dolerite, 13.6 ha, on a portion of Portion 2 (Remaining Extent) of the farm Aroams 57, Registration Division of Namaqualand RD, Northern Cape Province has been updated to reflect comments received from interested and affected parties to date. The Final Scoping Report will now be submitted to the Department of Mineral Resources. A copy of the document can be obtained from Greenmined upon request or downloaded from the website at www.greenmined.com. Reference number: NC 30/5/1/2/2/10156MR.

We trust you will find this in order.

Please do not hesitate to contact us in the event of any uncertainties

Kind Regards/Vriendelike Groete
