DRAFT SCOPING REPORT AND –SOCIAL AND LABOUR PLAN NOTICE

To whom it concerns

Dear Sir/Madam 15 November 2024

RE: NOTICE OF THE DRAFT SCOPING REPORT FOR AN APPLICATION IN TERMS OF SECTION 22 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002), SECTION 24 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED), AS WELL AS THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT 59 OF 2008) SUBMITTED BY ASSMANG (PTY) LTD. REFERENCE NUMBER: NC 30/5/1/2/2/10255 MR.

Notice in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), the National Environmental Management Act, 1998 (Act No 107 of 1998) (NEMA), the Environmental Impact Assessment Regulations 2014 (as amended) and the National Environmental Management: Waste Act, 2008 (Act No 59 of 2008) that Assmang (Pty) Ltd ("Applicant") applied for:

- a mining right in terms of Section 22 of the MPRDA for Hematite, Magnetite, Goethite, Limonite, Siderite, Pyrolusite, Psilomelane, Rhodochrosite, Manganite, Braunite, Hausmannite, Manganese ore, Iron ore and Diamonds (general) on the below listed properties;
- environmental authorization in terms of the NEMA and the EIA Regulations, 2014 (as amended); and
- a waste licence in terms of the National Environmental Management: Waste Act, 2008 (Act No 59 of 2008) (NEM:WA), alongside the NEMA EA application.

An application for a water use authorisation to the Department of Water and Sanitation, in terms of the National Water Act, 1998 (Act No 36 of 1998) will follow in due course.

The application extends over 1 549.61 ha of Portion 2 (portion of Portion 1), Remainder Portion, Remainder Portion of Portion 1 and Portion 3 of the farm Makganyene No 667 in the Tsantsabane Local Municipality of the Northern Cape.

The proposed mining method will be representative of opencast mining. The first phase will focus on pre-stripping the top layer material. Then waste rock will be stripped to access the ore body followed by open cast mining. The mining technology will include drilling and blasting with associated truck and shovel operations. Ore from the pit/s will report to a crusher whereafter crushed ore will be stockpiled on-site from where it will be transported via road to the Beeshoek Mine processing facility (off-site). No processing will take place at the Makganyane Iron Ore Mine.

The proposed project triggers the following listed activities in terms of NEMA, 1998, the EIA Regulations 2014 (as amended) as well as the NEM:WA, 2008 and therefore requires an EIA process:

- **EIA Regulations GNR 984 of 2014 (as amended) Activity 17:**

  Any activity including the operation of that activity which requires a mining right in terms of section 22 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as contained in this Listing Notice, in Listing Notice 1 of 2014 or Listing Notice 3 of 2014, required to exercise the mining right.

- **NEM:WA Category A Activity 2:**

  The sorting, shredding, grinding, crushing, screening or bailing of general waste at a facility that has an operational area in excess of 1000 m².

- **NEM:WA Category A Activity 14:**

  The decommissioning of a facility for a waste management activity listed in Category A or B of this Schedule.

- **NEM:WA Category B Activity 9:**

  The disposal of inert waste to land in excess of 25 000 tons, excluding the disposal of such waste for the purposes of levelling and building which has been authorised by or under other legislation.

- **NEM:WA Category B Activity 10:**

  The construction of a facility for a waste management activity listed in Category B of this Schedule (not in isolation to associated waste management activity).

- **NEM:WA Category B Activity 11:**

  The establishment or reclamation of a residue stockpile or residue deposit resulting from activities which require a mining right, exploration right or production right in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002).

We refer to your letter received: **11 November 2024.**

We confirm that as at the date of this letter that no land claim appears on our database in respect of the Properties this includes the database for claims lodged by 31 December 1998; and those lodged between 1 July 2014 and 27 July 2016 in terms of the Restitution of Land Rights Amendment Act, 2014.

Whilst the Commission takes reasonable care to ensure the accuracy of the information it provides, there are various factors that are beyond the Commission's control, particularly relating to claims that have lodged but not yet been gazetted such as:

- Some Claimants referred to properties they claim dispossession of rights in land against using historical property descriptions which may not match the current property description; and

- Some Claimants provided the geographic descriptions of the land they claim without mentioning the particular actual property description they claim dispossession of rights in land against.

The Commission therefore does not accept any liability whatsoever if through the process of further investigation of claims it is found that there is in fact a land claim in respect of the above property.

If you are aware of any change in the description of the above property after 19 June 1913 kindly supply us with such description so as to enable us to do a further search.

Yours faithfully

PROOF OF AFRIKAANS AND ENGLISH ADVERT PLACED IN GEMSBOK NEWSPAPER ON 15 NOVEMBER 2024

Deurbraak vir Valke in ietermagoghandelsaak

GEMSBOK-KURUMAN: Die Valke en die Batebeslagleggingseenheid het ‘n finale beslagleggingsbevel vir ‘n Mercedes-Benz teen ‘n 59-jarige Noord-Kapenaar, na sy inhegtenisneming in ‘n operasie in Kuruman wat die onwettige handel in ietermagogge teiken, verkry.

Die Valke se eenheid vir gespesialiseerde ondersoek en batebeslaglegging vir prioriteitsmisdaad het ‘n finale beslagleggingsbevel vir ‘n Mercedes-Benz teen Neo Tongwane (59) suksesvol verkry.

Die hooggeregshof in Kimberley het die bevel op 6 November toegestaan. Volgens ao Nomthandazo Mnisi, woordvoerder van die Valke in die Noord-Kaap, volg die beslaglegging op Tongwane se inhegtenisneming in Julie 2023.

Die arrestasie het plaasgevind tydens ‘n intelligensie-gedrewe operasie deur die Kuruman Ernstige georganiseerde misdaadondersoek en taktiese reaksiespan (TRT), wat ‘n koop-en-arresteeroperasie in Kuruman ingesluit het.

In dié operasie is vier verdagtes vir onwettige handel in bedreigde spesies (spesifiek ietermagogge) aangekeer.

Die aangeleentheid is daarna na die Nasionale Vervolgingsgesag se Batebeslagleggingseenheid (AFU) verwys vir ‘n gedetailleerde batebeslagleggingsondersoek, wat daartoe gelei het dat die finale beslagleggingsbevel vir die Mercedes-Benz toegestaan is, wat na raming R150 000 werd is.

Die ietermagog is ‘n beskermde wilde dier weens die toenemende vraag na sy vleis en skubbe in Viëtnam en China. Foto: Armand Hough, African News Agency (ANA) Argief

SAPD lê beslag op dagga ter waarde van meer as R300 000

GEMSBOK-UPINGTON:Tydens die Noord-Kaapse polisie se voortgesette Veiliger Feesseisoen-operasies, het ‘n misdaadintelligensie-geleide optrede gelei tot die beslaglegging van ‘n groot hoeveelheid dagga en die inhegtenisneming van ‘n 41-jarige verdagte in Upington.

Provinsiale polisiewoordvoerder, sers. Molefi Shemane, het berig dat inligting deur misdaadintelligensie en die Upington-grenspolisie geoperasionaliseer is, wat gelei het tot ‘n soektog op ‘n geteikende plek op 3 November, waar beamptes dagga met ‘n geraamde straatwaarde van ongeveer R303 450 ontdek en beslag gelê het.

’n 41-jarige buitelander is daarna in hegtenis geneem op aanklag van dwelmhandel.

Die waarnemende distrikskommissaris van ZF Mgcawu, brigadier Peet Coetzee, het die beamptes toegejuig vir hul vinnige optrede om die dwelms uit die strate te verwyder en die verdagte vas te trek.

Hy het ook sy dankbaarheid teenoor gemeenskapslede uitgespreek vir hul volgehoue ondersteuning en waardevolle inligting wat met die polisie gedeel is.

- ‘n Mynregaansoek, ingevolge Artikel 22 van die MPRDA om Hematite, Magnetite, Goethite, Limonite, Siderite, Pyrolusite, Psilomelane, Rhodochrosite, Manganite, Braunite, Hausmannite, Mangaanerts, Ystererts en Diamante (algemeen) van die onderstaande eiendomme te ontgin.
- ‘n Omgewingsmagtigingaansoek ingevolge NEMA en die OIS (soos gewysig).
- ‘n Aansoek vir ‘n afvallisensie ingevolge die Wet op Nasionale Omgewingsbestuur: Afvalwet, 2008 (Wet No 59 van 2008) (NEM:WA), wat by die NEMA EA-aansoek ingesluit word.

‘n Aansoek sal ook binnekort by die Department van Water en Sanitasie ingedien word vir watergebruik-magtiging, ingevolge die Nasionale Waterwet, 1998 (Wet No 36 van 1998)

Die aansoek strek oor 1 549.61 ha van Gedeelte 2 (gedeelte van Gedeelte 1), Restant Gedeelte, Restant Gedeelte 1 en Gedeelte 3 van die plaas Makganyene No 667 in die Tsantsabane Plaaslike Munisipaliteit van die Noord-Kaap.

Die voorgestelde mynboumetode sal verteenwoordigend van oopgroefmynbou wees. Die eerste fase sal daarop fokus om die bogrond af te haal. Daarna sal die boonste kliplaag gestroop word om toegang tot die erts te verkry, gevolg deur oopgroefmynbou. Die mynboutegnologie sal boorwerk en skietwerk met gepaardgaande vragmotor- en graafoperasies insluit. Erts uit die put/te sal na ‘n klipbreekaanleg vervoer word, waarna die gebreekte erts op die perseel gestoor sal word vanwaar dit per pad na die Beeshoekmyn verwerkingsaanleg (buite-perseel) vervoer sal word. Geen verwerking van die materiaal sal by die Makganyane ysterertsmyn plaasvind nie.

Die voorgestelde projek lei tot die volgende gelyste aktiwiteite in terme van die NEMA en die OIS-regulasies 2014 (soos gewysig) sowel as die NEM:WA, 2008 en vereis dus ‘n OIB-proses:

NOTICE OF MINING RIGHT APPLICATION

Notice is hereby given in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), the National Environmental Management Act, 1998 (act 107 of 1998) (NEMA) and the Environmental Impact Assessment Regulations 2014 (as amended) that Assmang (Pty) Ltd (“Applicant”) applied for:

- a mining right in terms of Section 22 of the MPRDA for Hematite, Magnetite, Goethite, Limonite, Siderite, Pyrolusite, Psilomelane, Rhodochrosite, Manganite, Braunite, Hausmannite, Manganese ore, Iron ore and Diamonds (general) on the below listed properties;
- environmental authorization in terms of the NEMA and the EIA Regulations, 2014 (as amended); and
- a waste licence in terms of the National Environmental Management: Waste Act, 2008 (Act No 59 of 2008) (NEM:WA), alongside the NEMA EA application.

An application for a water use authorisation to the Department of Water and Sanitation, in terms of the National Water Act, 1998 (Act No 36 of 1998) will follow in due course.

The application extends over 1 549.61 ha of Portion 2 (portion of Portion 1), Remainder Portion, Remainder Portion of Portion 1 and Portion 3 of the farm Makganyene No 667 in the Tsantsabane Local Municipality of the Northern Cape.

The proposed mining method will be representative of opencast mining. The first phase will focus on pre-stripping the top layer material. Then waste rock will be stripped to access the ore body followed by open cast mining. The mining technology will include drilling and blasting with associated truck and shovel operations. Ore from the pit/s will report to a crusher whereafter crushed ore will be stockpiled on-site from where it will be transported via road to the Beeshoek Mine processing facility (off-site). No processing will take place at the Makganyane Iron Ore Mine.

The proposed project triggers the following listed activities in terms of NEMA, 1998 and the EIA Regulations 2014 (as amended) as well as the NEM:WA, 2008 and therefore requires an EIA process:

- **EIA Regulations GNR 984 of 2014 (as amended) Activity 17:**
  Any activity including the operation of that activity which requires a mining right in terms of section 22 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as contained in this Listing Notice, in Listing Notice 1 of 2014 or Listing Notice 3 of 2014, required to exercise the mining right.
- **NEM:WA Category A Activity 2:**
  The sorting, shredding, grinding, crushing, screening or bailing of general waste at a facility that has an operational area in excess of 1000 m².
- **NEM:WA Category A Activity 14:**
  The decommissioning of a facility for a waste management activity listed in Category A or B of this Schedule.
- **NEM:WA Category B Activity 9:**
  The disposal of inert waste to land in excess of 25 000 tons, excluding the disposal of such waste for the purposes of levelling and building which has been authorised by or under other legislation.
- **NEM:WA Category B Activity 10:**
  The construction of a facility for a waste management activity listed in Category B of this Schedule (not in isolation to associated waste management activity).
- **NEM:WA Category B Activity 11:**
  The establishment or reclamation of a residue stockpile or residue deposit resulting from activities which require a mining right, exploration right or production right in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002).

The Draft Scoping Report (DSR) will be available for public comment from **15 November 2024.** Copies thereof can be obtained from Greenmined upon request or downloaded from https://www.greenmined.com/mining-rights/. Interested and Affected Parties (I&AP’s) are invited to provide written comments. The closing date for submission of comments is **07 January 2025.** Should additional information be required it can be obtained from Greenmined. Please use **NC 30/5/1/2/2/10255 MR** as reference when commenting.

I think you know who i am, but let me introduce myself.
The owner of the farm Makganyene 667 where Assmang just finished their prospecting exercise. Not including portion 3.
When i received the news from your company i send a notice to their attorney Mr Pumezo David that we need to talk about unfinished business that they just left behind.
I also send them video clips of oil contamination done mainly by the Diamond Drills and to my mind are very serious and a video showing the oil contamination of the water in a drillhole done by Makganyane Resources around 2020.
They also are responsible for the removal of many young Witgat trees (Boscia Albitrunca), which is one of the most difficult trees to re-establish. Also a neighbouring fence that are poorly repaired.
Also very important for me and Assmang certain clauses of the Service Use Agreement must be solved.
I want to request you and any other interested institution or person to extend the date of 7/1/2025 a date that give us enough time to solve and rectify the above evidence.
I will welcome if we can visit the farm with ASSMANG and Yourself before the 1/12/2024 if possible.
I also picked up from your environmental report that you mention just one cemetery/ graveyard but there are two the family and a graveyard were black people were buried plus a solitary grave.
I want Assmang to be granted with the Mining Right but sanctity of the contract must be upheld and adhered too.
Thank you in advance.

Subject: Mining Right Application - NC 30/5/1/2/2/10255 MR

Importance: High

Dear Sir,

Thank you for your email regarding the mining right application submitted by Assmang (Pty) Ltd ("Applicant") over the Remaining Extent, Portion 1 (Remaining Extent), Portion 2 (Portion of Portion 1) and Portion 3 of the farm Makganyene No 667 with reference number NC 30/5/1/2/2/10255 MR.

In support of our telephonic discussion of Friday (22 November 2024), kindly receive our response to your comments as follows:

1. Can you please share the correspondence with Mr Pumezo David with us?

2. I confirm receipt of the video clips (also sent to me) showing some of the contaminated boreholes on the farm. This matter will be added to the agenda of the meeting (refer to Point 4) to be held between yourself, the Applicant, and Greenmined;

3. The other grievances listed in your email (removal of the Witgat trees, damages to fences, service use agreement matters) will also be added to the proposed agenda (Point 4);

4. During the EIA (environmental impact assessment) process there are at least two opportunities for I&AP's (interested and affected parties including landowners) to comment on the project and EIA documents. This project is now in its first phase where all I&AP's (including landowners) have the opportunity to register on the project and if interested comment on the draft Scoping Report (DSR). For this project the first phase commenting period ends on the 7th of January 2025 as the final Scoping Report (including all the registrations and comments received on the DSR) must be submitted to the DMRE by latest 10 January 2025 (departmental requirement).

   Once the final Scoping Report was submitted to the DMRE, the authority will consider the report and whether the EIA may be allowed to continue. Should the final Scoping Report be approved, we (Greenmined) will commence with the proposed specialist studies (as listed in the DSR) and the compilation of the draft Environmental Impact Assessment (DEIAR) and Environmental Management Programme (EMPR) that will then also be published for public perusal and commenting. This will present the registered I&AP's with another (second) opportunity to comment on the project.

   Considering the above, we would like to propose that Greenmined arrange a virtual meeting between yourself and the Applicant before the 12th of December 2024 where the grievances listed in your email will be discussed. Following the meeting, a minutes of the meeting will be distributed to all the attendees for approval. The agenda, attendance register, and minutes of the meeting will then be incorporated into the final Scoping Report (to be submitted to the DMRE by 10 January 2025).

   Should the DMRE approve the final Scoping Report and allow the EIA to continue, Greenmined will then arrange an inspection (in the new year) with yourself and representative/s of the Applicant to visit the farm and gather the site specific information that will be shared with the specialists and assessed as part of the EIA documents. The discussions/findings of the inspection, as well as the specialist input and impact assessment will all form part of the DEIAR & EMPR that will be available for your perusal and commenting before the final report is submitted to the DMRE.

In summary, can you please indicate if you would be able to attend a virtual meeting with the Applicant, and if so can you please indicate which of the following dates will suite you best?

- 03 December
- 04 December
- 05 December
- 06 December
- 11 December

5. We thank you for highlighting the additional gravesites on the farm. The matter will be amended in the final Scoping Report and upon approval of the document by the DMRE, the information will also be shared with the archaeologist that will have to visit the application footprint prior to the compilation of the DEIAR & EMPR.

We appreciate your input and look forward to facilitating the discussions as part of this application.

1.2	The meeting (05/12/2024) agreed that the prospecting related matters will be discussed in the separate meeting (referred to in 1.1), to be held on or before 13 December 2024 if possible. PD will contact JW to set up the meeting.	PD	
1.3	JW noted that an important aspect to be discussed (at the PR meeting) is the plastic liners of the drillhole. The contamination of drillholes and removal of Shepards Trees must also be discussed at this meeting.	PD / CK	
1.4	C Kuhl (CK) confirmed that he will also attend the PR meeting.	CK	
1.5	PD confirmed that CF will not attend the PR meeting as the matters to be discussed are mainly contractual matters between Assmang and JW.	PD	

ITEM	MATTER DISCUSSED	RESPONSIBLE PERSON	DUE DATE
1.6	PD requested that JW and/or Adv Gomolemo (KG) send a list of the matters of concern that must be discussed at the PR meeting, as this will allow the attendees to come prepared.	JW	Before PR meeting.
1.7	CK highlighted that the PR and mining right application matters are equally important. However, separating the two matters into different meetings ensures that the correct audience is present.	CK	-
1.8	CK confirmed that a site inspection will be arranged in the new year (2025) with JW to look at the prospected areas and matters of concern.	CK	January 2025
1.9	JW enquired whether the rental agreement continues even though the PR expired in November 2024. CK will discuss the matter with PD and revert to JW.	CK	On or before 13 December 2024
2.	**MINING RIGHT (MR) RELATED MATTERS**		
2.1	JW enquired what the life of the MR will be, and CF confirmed that Assmang applied for 30 years.	CF	-
2.2	JW noted that there are pangolin and hedgehogs on the farm that must be added to the fauna list in the scoping report (SR).	CF	By 10 January 2025
2.3	CK confirmed that the additional graves (on the farm) mentioned by JW will also be added to the SR.	CF	
2.4	CF explained that the draft SR (DSR) is now available for public comments until 07 January 2025, whereafter the final SR (FSR) must be submitted to the DMRE by 10 January 2025. The DMRE then has 43 days to accept/reject the report and should the FSR be accepted, the EIA process can continue. The specialists will then be appointed to assess their specific aspects. The specialists will also be supplied with the animal and graves information shared by JW. Once the specialist studies are done, all the findings will be incorporated into the draft environmental impact assessment report (DEIAR) that will also be available to the public for comments. The DSR commenting period is therefore not the only time I&AP's and/or landowners will have an opportunity to comment on the project. The DEIAR will also include a discussion on the alternatives that where considered, as well as the final maps and project layout. The final EIAR (FEIAR) must be submitted to the DMRE within 106 days from the acceptance of the FSR.	CF	-
2.5	JW enquired whether the Applicant will mine diamonds. CK confirmed that diamonds are part of the MR application although the focus will be on iron ore. JW raised a concern that the diamonds will be covered by the MR but not mined. CK proposed that the MR application must continue as presently applied for. However, once the MR application was granted / issued alternative options could be investigated regarding diamonds.	CK	-

ITEM	MATTER DISCUSSED	RESPONSIBLE PERSON	DUE DATE
2.6	KG confirmed there was no MR specific matters that he wanted to discuss. He will attend the PR meeting as those matters are more relevant to him.		
2.7	JW informed the meeting that Sishen Iron Ore (SIO) submitted a prospecting right application for gold, copper and other minerals on the same property. There is also another company that applied for a quartzite prospecting right over the property. CF confirmed that SIO was already informed of the project as they are a surrounding landowner. JW will share the details of the quartzite PR Applicant with CF.	JW	06 December 2024
3.	**CONCLUSION**		
3.1	PD will contact JW to set up the PR related meeting.	PD	Before 13 December 2024
3.2	CK will contact JW regarding a site visit in the new year.	CK	January 2025
3.3	CF will do the minutes of this meeting and distribute it to the attendees. The minutes will also be incorporated into the FSR.	CF	12 December 2024
3.4	JW will share the contact details of the quartzite PR Applicant.	JW	06 December 2024

1. n Water monster geneem by MEX 23 wat met olie besoedel is. Assmang kan ook die Diamant Myn water toets vir besmetting want hul twee pompe want aangedryf is deur diesel enjins het lank in die water gestaan voordat ek hulle daarop gewys het van olie lekke. Selfs toe dit na die kant van die water verwyder is het die drip panne oorgeloop met olie en genoodsaak het dat die besoedelde grond verwyder is.
Alle diamant boorgatte moet vir water besoedeling getoets word, al het Assmang bevestig dat die Boorolie nie skadelik vir die omgewing is nie.. maar besoedeling van water is n ander saak.
Die toets van water moet deur n onafhanklike onderneming gedoen word en die verslag moet ook aan Department van Water en Sanitasie gestuur word en Plaas eienaars (Wessels en Claasens).
2. Alle boorgatte moet behoorlik verseël word en bo die grond oppervlak verhoog word om verdere besoedeling te voorkom.
3. Die Witgatbome wat vernietig is moet hervestig word op area's wat nie deur Mynbou aktiwiteite geraak sal word.
4. Die heining wat plat gedruk was om deurgang te bied na Makganyene 3 vir prospekteer werk moet behoorlik herstel word.
5. Die boor van heelwat oor die 500 boorgatte op die plaas moet verwys word na die DMR vir ondersoek want geen verdere aansoek vir addisionele boorgatte is beskikbaar op die DMR stelsels. Assmang het +~ R165000.00 betaal vir n PWP waarvoor die boor van 197 boorgatte aangevra is. Nêrens kon n opgedateerde PWP gevind word, en Assmang by name van Mnr David Selemo het volstrek geweier om my met n opgedateerde PWP te voorsien.
Volgens wet moet die DMR inspeksie doen van die terrein om te bevestig dat die DMR tevrede is.
6. Dit blyk te wees dat Assmang geen of min belang met die ontginning van Diamante te doen wil hê. Die DMR en met n aanbeveling na die Minister kan die regte om diamante te myn weggeneem word van Assmang om voorsiening te maak vir benadeelde persone om die geleentheid te benut.
Daar moet onthou word gedurende 13 jaar van prospektering geen prospektering van Diamante gedoen is.. Hierdie is baie ernstig aangesien die geleentheid ontneem word van benadeelde delwers waarvan daar baie is.
7. Indien die DMR Assmang versoek het om prospekteer werk te stop in Mei 2024 vir watter rede ookal moet in n ernstige lig beskou word, as Assmang soveel onreg in 3 jaar gepleeg het met prospekteer werk wat gaan nie gebeur in 30 jaar van Mynbou wat veel erger sal wees.
8. Assmang dink niks van n kontrak..die geleentheid het vele kere ontstaan en geskep om die huidige kontrak te wysig om beide Wessels en Assmang te pas maar geen sukses. Assmang is nie bekend om oop kaarte te speel en verdraai woorde en stellings om hulle te pas.
8. Dit is onder Assmang se aandag gebring om behoorlike toilet geriewe te skep vir die sekuriteit personeel wat sedert Assmang die plaas ontruim het geen toilet geriewe en water het.. vir was asook die spoel van n toilet.
Die personeel maak maar broek los daar waar hulle betyds kan kom.
Daardie area's moet bepaal word en beveilig word van die uitskot.
Weet nie wanneer Assmang sal reageer om regstelling op te tree.

You must enjoy 2025 and i hope you everything of the best.
I already sent you my grievances regarding the expired prospecting right on my farm by Assmang.
I just want to add the following information regarding the Prospecting Right on Diamonds.
White paper 2008.
1.3.6 Goverment policy
1.3.6.1 Ownership of Mineral rights.
(iv) Government will promote minerals development by applying the USE IT/ LOSE IT: USE IT/ KEEP IT principle.
From my side in 13 year of prospecting only 2 months where spend mining the dumps and even Assmang since December 2021 has done no prospecting on Diamonds and they apply to mine diamonds which is absurd.
The mining right must be changed to only Iron ore and Manganese ore plus the other minerals included except Diamonds.
Applications from others were withdrawn even up to December2023 and the first come principle must apply.
The prospecting rights are available from DMR up to October 2018. They were withdrawn to make space for the application from Mr Chalton Rex.
Hope to meet you soon.

Subject: Comments on Draft Scoping Report - DSR Notice NC 30/5/1/2/2/10255 MR

Categories: Makganyane

Dear Christine,

I hope this email finds you well.

I am writing to formally request registration as an Interested and Affected Party (I&AP) regarding the draft scoping report for the mining right application on a portion of the farm Makganyane. I also want to make use of this opportunity to comment on the draft scoping report. As the landowner of this portion 3, I, have a direct and substantial interest in the activities proposed in the application.

In addition to my registration, I would like to request that the following aspects be addressed in the scoping report and the subsequent impact assessment:

1. **Blasting Activities**: The potential impacts of blasting on my agricultural activities must be evaluated and addressed.
2. **Dust Impacts**: Dust generated by mining activities and its effects on agricultural activities and veld conditions should be included.
3. **Water Use License Application (WULA)**: I must be kept informed about all developments regarding the WULA to provide relevant feedback as an I&AP.
4. **Noise Impact**: The impact of noise from mining activities on my property and operations must be assessed.
5. **Vibrations**: The effects of vibrations on my agricultural activities should be analyzed.
6. **Security Risks**: The potential for increased theft and poaching risks due to mining activities must be addressed. I would like to request a high fence to be erected between my portion and the mining activities to protect my farming activities from any security risks. I would also like to request for the possibility of security cameras to be installed for this purpose.
7. **Dewatering Impacts**: The effect of dewatering activities on my agricultural business and farm operations requires thorough evaluation.
8. **Water and Topsoil Storage**: The locations of water storage and topsoil storage areas are absent from the maps. Please ensure these are communicated.
9. **Fire Risks**: Firebreaks must be planned to prevent fire risks associated with mining activities.
10. **Continuous Rehabilitation**: Ongoing rehabilitation after mining is critical to mitigate impacts on agricultural activities.
11. **Prospecting Impacts**: Rehabilitation of all previous prospecting impacts on Portion 3 must be incorporated into the rehabilitation plan.
12. **Access Agreements**: Clear access agreements need to be established with the mining company.
13. **Waste Rock Dump Location**: The current proposed location of the waste rock dump will reduce grazing capacity on my farm. Since the farm is not for sale, alternative locations must be considered. If alternatives are not viable, land access agreements should be discussed to compensate for lost land and grazing capacity.

14. **Report Sharing**: Please ensure all scoping and impact assessment reports are shared with me directly.

I trust that these concerns will be taken into consideration and adequately addressed throughout the assessment and consultation process.

Thank you for your attention to this matter. I look forward to your confirmation of my registration as an I&AP and a response addressing the aspects highlighted above.

Kind regards,
AP Claassens

Subject: RE: Comments on Draft Scoping Report - DSR Notice NC 30/5/1/2/2/10255 MR

Dear Me Claassens,

Thank you for your email and taking part in the public participation process of this project.

Greenmined herewith acknowledges receipt of the email and confirm that you are registered as an I&AP's on the mining right application submitted by Assmang (Pty) Ltd over, amongst others, Portion 3 of Makganyene No 667 with reference number NC 30/5/1/2/2/10255 MR.

The matters listed in your email as well as our response will be incorporated into the final Scoping Report (FSR) to be submitted to the DMRE for decision making. Should the FSR be approved, and the EIA process be allowed to continue, the matters will be fully assessed and discussed as part of the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) that will also be available for your perusal and commenting. Also, please find our response to the individual matters as listed below.

1. **Blasting Activities**: The potential impacts of blasting on my agricultural activities must be evaluated and addressed.
   This matter will be referred to the soil scientist responsible for the Agricultural Impact Assessment and his findings will be incorporated into the DEIAR & EMPR.

2. **Dust Impacts**: Dust generated by mining activities and its effects on agricultural activities and veld conditions should be included.
   This matter will be referred to the soil scientist responsible for the Agricultural Impact Assessment, as well as the Air Quality Specialist. Their findings will be incorporated into the DEIAR & EMPR.

3. **Water Use License Application (WULA)**: I must be kept informed about all developments regarding the WULA to provide relevant feedback as an I&AP.
   Greenmined will be applying for the WULA on behalf of Assmang (Pty) Ltd and I have listed you as registered I&AP with the consultant responsible for the WULA. Mrs Murchellin Saal (copied into this email) will be in contact with you regarding the WULA as soon as the application commences.

4. **Noise Impact**: The impact of noise from mining activities on my property and operations must be assessed.
   The noise impact will be assessed during the EIA phase (after approval of the FSR) and discussed in the DEIAR & EMPR.

5. **Vibrations**: The effects of vibrations on my agricultural activities should be analyzed.
   The geotechnical specialist, geohydrologist and soil scientist will be tasked to assess this matter during the EIA phase, and their findings will be incorporated into the DEIAR & EMPR.

6. **Security Risks**: The potential for increased theft and poaching risks due to mining activities must be addressed. I would like to request a high fence to be erected between my portion and the mining activities to protect my farming activities from any security risks. I would also like to request for the possibility of security cameras to be installed for this purpose.
   This matter will be discussed with the Applicant and we will revert back to you regarding the outcome. All management measures will form part of the DEIAR & EMPR.

7. **Dewatering Impacts**: The effect of dewatering activities on my agricultural business and farm operations requires thorough evaluation.
   The hydrologist and geohydrologist will assess this matter and provide their findings that will be incorporated into the DEIAR & EMPR.

8. **Water and Topsoil Storage**: The locations of water storage and topsoil storage areas are absent from the maps. Please ensure these are communicated.
   These locations will be determined/finalised as part of the EIA phase and receipt of all the specialist inputs. The proposed locations will be communicated to you as soon as identified.

9. **Fire Risks**: Firebreaks must be planned to prevent fire risks associated with mining activities.
   Fire management measures will form part of the mitigation and management measures to be implemented by the mine (should the application be successful) and will be part of the EMPR to be approved by the DMRE.

10. **Continuous Rehabilitation**: Ongoing rehabilitation after mining is critical to mitigate impacts on agricultural activities.
    Continuous rehabilitation will be part of the rehabilitation objectives to be elaborated on in the Rehabilitation Plan that will form part of the DEIAR & EMPR.

11. **Prospecting Impacts**: Rehabilitation of all previous prospecting impacts on Portion 3 must be incorporated into the rehabilitation plan.
    We will convey this request to the Applicant, and if possible it will be incorporated into the rehabilitation plan of the mining right.

12. **Access Agreements**: Clear access agreements need to be established with the mining company.
    This request will be communicated with the Applicant (Assmang (Pty) Ltd) and incorporated as management measure into the DEIAR & EMPR.

13. **Waste Rock Dump Location**: The current proposed location of the waste rock dump will reduce grazing capacity on my farm. Since the farm is not for sale, alternative locations must be considered. If alternatives are not viable, land access agreements should be discussed to compensate for lost land and grazing capacity.
    We acknowledge your valuable input regarding the current location of the proposed waste rock dump and will assess the matter further and confer with the project team and specialists to identify possible alternative locations (if viable). The outcome of the assessment will be communicated to you and also form part of the DEIAR & EMPR.

14. **Report Sharing**: Please ensure all scoping and impact assessment reports are shared with me directly.
    We confirm that this will be done.

We trust you will find this in order. Please do not hesitate to contact me should you need further assistance/information. We look forward to working with you through the course of this application.
