DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME

To whom it concerns

Dear Sir/Madam 22 September 2025

RE: NOTICE OF THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR AN APPLICATION IN TERMS OF SECTION 22 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002), SECTION 24 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED), AS WELL AS THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT 59 OF 2008) SUBMITTED BY ASSMANG (PTY) LTD. REFERENCE NUMBER: NC 30/5/1/2/2/10255 MR

The draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the mining right application submitted by Assmang (Pty) Ltd over Portion 2 (a portion of Portion 1), Remainder Portion, Remainder Portion of Portion 1 and Portion 3 of the farm Makganyene No 667 in the Tsantsabane Local Municipal area is now available for your perusal. A copy of the documents can be obtained from Greenmined Environmental (Pty) Ltd upon request or retrieved from the company website at https://www.greenmined.com/mining-rights/.

Should you be interested your comments are kindly requested on the DEIAR & EMPR. A thirty-day commenting period, ending on **23 October 2025**, will be allowed for comments. Your comments must be in writing and can be submitted via e-mail and/or post. Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments.

By taking part in this process, you hereby consent, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of your personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining Right application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details and by taking part in this process you authorise such information to be shared for the purpose of this application.

Please contact Christine Fouché at 082 811 8514 (Cell) or 021 851 2673 (Tel), or christine.f@greenmined.co.za should you require any additional information.

If we do not receive any comments from you before the end of the comment period, it will be accepted that you do not have any additional objections/comments regarding the project. We trust that you find it in order and look forward to receiving your comments.

Your feedback is valued and will be addressed appropriately.

Kind Regards

Christine Fouché

KONSEP OMGEWINGSIMPAKBEOORDELINGSVERSLAG EN OMGEWINGSBESTUURSPLAN

Wie dit mag aangaan

Beste Meneer/Mevrou 22 September 2025

IS: KENNIS VAN DIE KONSEP OMGEWINGSIMPAKBEOORDELINGSVERSLAG EN OMGEWINGSBESTUURSPLAN VIR 'N AANSOEK INGEVOLGE ARTIKEL 22 VAN DIE MINERALE- EN PETROLEUMHULPBRONNEONTWIKKELINGSWET, 2002 (WET 28 VAN 2002) (MPRDA), ARTIKEL 24 VAN DIE NATIONALE OMGEWINGSBESTUURWET, 1998 (WET 107 VAN 1998) (NEMA), DIE OMGEWINGSIMPAKSTUDIE REGULASIES, 2014 (SOOS GEWYSIG) (OIS-), ASOOK DIE NASIONALE OMGEWINGSBESTUUR: WET OP AFVAL, 2008 (WET 59 VAN 2008) INGEDIEN DEUR ASSMANG (EDMS) BPK. VERWYSINGSNOMMER: NC 30/5/1/2/2/10255 MR.

Die konsep Omgewingsimpakbeoordelingsverslag (DEIAR) en Omgewingsbestuursprogram (EMPR) vir die mynregaansoek wat deur Assmang (Edms) Bpk ingedien is oor Gedeelte 2 ('n gedeelte van Gedeelte 1), Restant Gedeelte, Restant Gedeelte van Gedeelte 1 en Gedeelte 3 van die plaas Makganyene No 667 in die Tsantsabane Munisipale area is nou beskikbaar vir publieke kommentaar. 'n Afskrif van die dokumente kan op versoek van Greenmined Environmental (Edms) Bpk verkry word of van die maatskappy se webwerf afgehaal word by https://www.greenmined.com/mining-rights/.

Belanghebbendes en geaffekteerde partye word uitgenooi om skriftelik kommentaar te lewer. Die sluitingsdatum vir kommentaar is **23 Oktober 2025**. Sou u addisionele inligting benodig kan dit vanaf Greenmined verkry word. Gebruik asb. **NC 30/5/1/2/2/10255 MR** as verwysingsnommer.

Deur aan hierdie proses deel te neem, stem u in, in terme van die Wet op die Beskerming van Persoonlike Inligting 4 van 2013 ("POPIA"), tot die wettige verwerking van u persoonlike inligting deur Greenmined, welke persoonlike inligting as deel van dokumentasie gebruik kan word met betrekking tot die aansoekproses vir Omgewingsmagtiging. Deur u besonderhede te verskaf en deur aan hierdie proses deel te neem, magtig u dat sulke inligting gedeel mag word vir die doel van hierdie aansoek.

Kontak gerus vir Christine Fouché by 082 811 8514 (Cell), 021 851 2673 (Tel) of christine.f@greenmined.co.za indien u bykomende inligting verlang.

Indien ons geen kommentaar van u ontvang voor die einde van die kommentaarperiode nie, sal dit aanvaar word dat u geen bykomende besware/kommentaar rakende die projek het nie. Ons vertrou dat u dit in orde vind en wag op u kommentaar op hierdie verslag.

U terugvoer word waardeer en sal toepaslik aangespreek word.

Die Uwe

Christine Fouché

Dear Sir/Madam:

RE: NOTICE OF THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR AN APPLICATION IN TERMS OF SECTION 22 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002), SECTION 24 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED), AS WELL AS THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT 59 OF 2008) SUBMITTED BY ASSMANG (PTY) LTD. REFERENCE NUMBER: NC 30/5/1/2/2/10255 MR

The draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the mining right application submitted by Assmang (Pty) Ltd over Portion 2 (a portion of Portion 1), Remainder Portion, Remainder Portion of Portion 1 and Portion 3 of the farm Makganyene No 667 in the Tsantsabane Local Municipal area is now available for your perusal.

A copy of the documents can be obtained from Greenmined Environmental (Pty) Ltd upon request or retrieved from the company website at https://www.greenmined.com/mining-rights/.

Should you be interested your comments are kindly requested on the DEIAR & EMPR. A thirty-day commenting period, ending on **23 October 2025**, will be allowed for comments. Your comments must be in writing and can be submitted via e-mail and/or post. Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments.

Beste Meneer/Mevrou:

IS: KENNIS VAN DIE KONSEP OMGEWINGSIMPAKBEOORDELINGSVERSLAG EN OMGEWINGSBESTUURSPLAN VIR 'N AANSOEK INGEVOLGE ARTIKEL 22 VAN DIE MINERALE- EN PETROLEUMHULPBRONNEONTWIKKELINGSWET, 2002 (WET 28 VAN 2002) (MPRDA), ARTIKEL 24 VAN DIE NATIONALE OMGEWINGSBESTUURWET, 1998 (WET 107 VAN 1998) (NEMA), DIE OMGEWINGSIMPAKSTUDIE REGULASIES, 2014 (SOOS GEWYSIG) (OIS-), ASOOK DIE NASIONALE OMGEWINGSBESTUUR: WET OP AFVAL, 2008 (WET 59 VAN 2008) INGEDIEN DEUR ASSMANG (EDMS) BPK. VERWYSINGSNOMMER: NC 30/5/1/2/2/10255 MR.

Die konsep Omgewingsimpakbeoordelingsverslag (DEIAR) en Omgewingsbestuursprogram (EMPR) vir die mynregaansoek wat deur Assmang (Edms) Bpk ingedien is oor Gedeelte 2 ('n gedeelte van Gedeelte 1), Restant Gedeelte, Restant Gedeelte van Gedeelte 1 en Gedeelte 3 van die plaas Makganyene No 667 in die Tsantsabane Munisipale area is nou beskikbaar vir publieke kommentaar.

Dear Sir/Madam:

RE: NOTICE OF THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR AN APPLICATION IN TERMS OF SECTION 22 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002), SECTION 24 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED), AS WELL AS THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT 59 OF 2008) SUBMITTED BY ASSMANG (PTY) LTD. REFERENCE NUMBER: NC 30/5/1/2/2/10255 MR

The draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the mining right application submitted by Assmang (Pty) Ltd over Portion 2 (a portion of Portion 1), Remainder Portion, Remainder Portion of Portion 1 and Portion 3 of the farm Makganyene No 667 in the Tsantsabane Local Municipal area is now available for your perusal.

A copy of the documents can be obtained from Greenmined Environmental (Pty) Ltd upon request or retrieved from the company website at https://www.greenmined.com/mining-rights/.

Should you be interested your comments are kindly requested on the DEIAR & EMPR. A thirty-day commenting period, ending on **23 October 2025**, will be allowed for comments. Your comments must be in writing and can be submitted via e-mail and/or post. Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments.

Beste Meneer/Mevrou:

IS: KENNIS VAN DIE KONSEP OMGEWINGSIMPAKBEOORDELINGSVERSLAG EN OMGEWINGSBESTUURSPLAN VIR 'N AANSOEK INGEVOLGE ARTIKEL 22 VAN DIE MINERALE- EN PETROLEUMHULPBRONNEONTWIKKELINGSWET, 2002 (WET 28 VAN 2002) (MPRDA), ARTIKEL 24 VAN DIE NATIONALE OMGEWINGSBESTUURWET, 1998 (WET 107 VAN 1998) (NEMA), DIE OMGEWINGSIMPAKSTUDIE REGULASIES, 2014 (SOOS GEWYSIG) (OIS-), ASOOK DIE NASIONALE OMGEWINGSBESTUUR: WET OP AFVAL, 2008 (WET 59 VAN 2008) INGEDIEN DEUR ASSMANG (EDMS) BPK. Dear Sir/Madam:

RE: NOTICE OF THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR AN APPLICATION IN TERMS OF SECTION 22 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002), SECTION 24 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED), AS WELL AS THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT 59 OF 2008) SUBMITTED BY ASSMANG (PTY) LTD. REFERENCE NUMBER: NC 30/5/1/2/2/10255 MR

The draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the mining right application submitted by Assmang (Pty) Ltd over Portion 2 (a portion of Portion 1), Remainder Portion, Remainder Portion of Portion 1 and Portion 3 of the farm Makganyene No 667 in the Tsantsabane Local Municipal area is now available for your perusal.

A copy of the documents can be obtained from Greenmined Environmental (Pty) Ltd upon request or retrieved from the company website at https://www.greenmined.com/mining-rights/.

Should you be interested your comments are kindly requested on the DEIAR & EMPR. A thirty-day commenting period, ending on **23 October 2025**, will be allowed for comments. Your comments must be in writing and can be submitted via e-mail and/or post. Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments.

Beste Meneer/Mevrou:

Good day

This office acknowledges receipt of the draft Environmental Impact Assessment Report and Environmental Management Programme compiled for Assmang (Pty) Ltd dated September 2025, for the proposed mining right activities. Please note that I have already sent comments on the 18 November 2024, for this project during the notification of Scoping Report. Please lodge an application for a water use authorization via Electronic Water Use Licence Application and Authorisation (EWULAA) system (www.dws.gov.za/ewulaas). Thank you.

Kind Regards,
Mashudu Mudau

Good day,

Greenmined Environmental acknowledges and appreciates the comment provided by the Department of Water and Sanitation (DWS).

A client link for the Water Use Licence Application (WULA) associated with the proposed project was created on 03 December 2024 on the Electronic Water Use Licence Application and Authorisation System (e-WULAAS) of the DWS. The Department has assigned temporary reference number CT31224 to this application.

The Applicant and WULA Consultant will continue liaising with the DWS to ensure the timely submission, review, and processing of the final WULA documentation in accordance with the Department's procedural requirements.

Kind Regards / Vriendelike Groete

CC Claassens Trust

CC Claassens Trust
Mrs. A.P. Claassens

Date: 22 October 2025

To:
Greenmined Environmental (Pty) Ltd
Attention: Ms. Christine Fouché

Subject: Comments on EIA Report – Assmang (Pty) Ltd Draft Environmental Impact Assessment and Environmental Management Programme (Ref: NC 30/5/1/2/2/10255 MR)

Dear Ms. Fouché

I acknowledge receipt of your feedback dated 3 December 2024 in response to the comments submitted by CC Claassens Trust on the Draft Scoping Report for the proposed mining right over portions of the farm Makganyene No. 667. I also acknowledge receipt of the draft EIA report and would like to provide further comments.

I want to thank you for the detailed responses provided and to reaffirm the importance of the matters raised during the public participation process. I would like to request that these concerns remain fully considered and addressed throughout the Environmental Impact Assessment (EIA) and Environmental Management Programme (EMPr) process, with practical mitigation measures that protect both the environment and surrounding landowners.

I want to highlight the following key matters which remain of particular importance:

1. Security Risks and Boundary Fencing

I want to reaffirm the importance of implementing adequate security and boundary control measures between the mining area and the Claassens property. A well-constructed and properly maintained boundary fence is essential to prevent livestock from straying into neighbouring mining areas, which could result in injury, loss of animals, and liability concerns. I want to request that this requirement be clearly reflected in the EMPr and treated as a matter of priority in project implementation.

2. Position of the Waste Rock Dump and Grazing Loss Compensation

I remain concerned that the current proposed location of the waste rock dump will significantly reduce the available grazing capacity on my property, which continues to operate as a productive farming enterprise. I request again that all reasonable efforts be made to re-evaluate and, if possible, relocate the dump to an alternative area that will minimise the loss of grazing land.

If relocation is not technically or economically feasible, it is only fair and reasonable to establish formal agreements to compensate for the resulting loss of grazing capacity. It is also important to record that the farm (Portion 3) is not for sale, and any planning or layout assumptions should clearly reflect this fact.

3. Rehabilitation of Prospecting Areas

The Trust further requests confirmation that rehabilitation of all previous prospecting activities conducted on the property will be incorporated into the overall mining rehabilitation and closure plan. This will ensure that all past and future disturbances are managed consistently under one integrated rehabilitation framework.

4. Access to Monitoring Data

I also request that all monitoring data, particularly regarding dust and water quality, be shared with me throughout the duration of the project. Regular access to this information will allow me to stay informed of potential impacts on the property and agricultural operations, and to participate meaningfully in ongoing environmental management discussions.

I value the professional engagement received thus far and appreciate the opportunity to remain involved in the process. I trust that these concerns will continue to be treated with due consideration as the project progresses through its assessment and decision-making phases.

Yours sincerely

Mrs A.P. Claassens
CC Claassens Trust

Dear Mrs Claassens

28 October 2025

RE: RESPONSE TO COMMENTS RECEIVED ON THE MINING RIGHT APPLICATION SUBMITTED BY ASSMANG (PTY) LTD OVER PORTION 2 (A PORTION OF PORTION 1), REMAINDER PORTION, REMAINDER PORTION OF PORTION 1 AND PORTION 3 OF THE FARM MAKGANYENE NO 667, TSANTSABANE LOCAL MUNICIPALITY, NORTHERN CAPE. REFERENCE NUMBER: NC 30/5/1/2/2/10255 MR.

Greenmined Environmental hereby acknowledges receipt of your comments submitted on the Draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the mining right application submitted by Assmang (Pty) Ltd over the abovementioned properties.

We sincerely thank you for your participation in the public consultation process and for the time taken to review and provide input on the DEIAR and EMPR. Your comments and observations are valued and form an important part of ensuring a transparent and comprehensive assessment process.

Herewith please receive our response to your comments. All comments received have been incorporated into the Final Environmental Impact Assessment Report (FEIAR) and EMPR, which will be submitted to the Department of Mineral and Petroleum Resources (DMPR) for their review and decision-making.

1. Security Risks and Boundary Fencing

The protection of neighbouring properties, livestock, and community assets is recognised as a key operational and safety consideration. The mining area will be enclosed with a game-type boundary fence of at least 2.4 metres in height, designed and constructed to effectively restrict the movement of livestock into the active mining area and to enhance site security.

Furthermore, the EMPr already contains several measures to manage and mitigate potential security-related risks, including:

- Ensuring that access to surrounding properties by construction and/or mining employees is prevented.
- Strictly controlling access in and out of the construction and/or mining area.
- Implementing a method of communication for the local community to lodge complaints or grievances regarding the construction process.

Unit M01, Office No 36, AECI Site, Baker Square, Paardevlei, De Beers Avenue, Somerset West, 7130
Postnet Suite 62, Private Bag x15, Somerset West, 7129
Directors: S Smit; C Weideman | Reg No: 2012/055565/07 | VAT No. 4040263032

- Appointing a Community Liaison Officer (CLO) to maintain communication and address community concerns throughout the project.
- Signing Surface Use Agreements with affected landowners and providing written notice at least 21 calendar days prior to the commencement of activities.
- Establishing clear rules and regulations for site access to control loitering and unauthorised entry.

In addition to the above, the following additional mitigation measure have been incorporated into the EMPr:

- Install a game-type boundary fence around the active mining areas with a minimum height of 2.4 metres to effectively restrict livestock and unauthorised entry.
- Conduct daily patrols along the fence line to identify and repair any breaches or damage that could allow livestock or unauthorised persons to enter the mining area.
- Record all patrols in a Fence Inspection Logbook, documenting the date, time, patrol route, inspector's name, and details of any breaches or repairs undertaken.
- Designate specific entry and exit gates for the mining area and keep them locked when not in active use. Restrict access to authorised personnel only and maintain an access register or digital record of all entries and exits.
- Undertake periodic joint inspections of the fence with the adjacent landowners, particularly after major weather events or construction phases, to promote transparency and early identification of issues.
- Implement an Incident Response Procedure for instances where livestock or unauthorised persons are found within the mining area. The incident must be reported immediately to the Community Liaison Officer (CLO), documented, and the animals safely removed in coordination with the landowner.

These measure will ensure continuous monitoring and maintenance of the fencing system, thereby reducing the likelihood of incidents involving livestock or trespassers and upholding the safety and integrity of both the mining operation and neighbouring properties.

2. Position of the Waste Rock Dump (WRD) and Grazing Loss Compensation

As detailed in the DEIAR, the layout of the stockpile area and the WRD was amended (Layout Option 2) to accommodate the Ephemeral Drainage Lines (EDLs) identified in the western portions of the focus area. The initial configuration of the WRD extended across a ridge and drained towards one of the identified EDLs, which presented a possible environmental risk. The layout was therefore revised to avoid these sensitive features and subsequently reduced in size by ±3 hectares.

While the revised layout has significantly improved the environmental suitability of the design, it does still extend onto Portion 3 of Makganyene No. 667. Further amendment of the WRD footprint is considered

undesirable, as the current configuration represents the most feasible balance between operational requirements and environmental sensitivities, ensuring minimal disturbance to identified ecological constraints.

In recognition of the remaining land use impact, the Applicant has confirmed their commitment to enter into negotiations with the CC Claassens Trust to establish a formal compensation agreement for the loss of grazing capacity resulting from the proposed WRD footprint. These negotiations will be undertaken in good faith and in accordance with applicable legislative and contractual frameworks.

The following additional mitigation measure have been incorporated into the EMPr:

- Include compensation commitments and land access terms within the relevant Surface Use Agreements prior to commencement of mining activities.
- Monitor post-construction land use impacts in consultation with the affected landowners to ensure the agreed compensation and mitigation measures remain effective.

3. Rehabilitation of Prospecting Areas

The following has been added to the FEIAR to address the rehabilitation of prospecting areas:

- Part A(1)(n) Aspects for inclusion as conditions of authorisation:
    - The holder of the Environmental Authorisation must ensure that all areas previously disturbed by prospecting activities within the approved mining right boundary are identified, assessed, and incorporated into the overall mining rehabilitation and closure plan.

- Additional mitigation measures added to the FEIAR:

    - Conduct rehabilitation of areas previously disturbed by prospecting in accordance with the approved EMPr and the principles of integrated, progressive rehabilitation, ensuring that all historical and operational disturbances are managed under a single, cohesive rehabilitation framework.

    - Include in the Final Rehabilitation, Decommissioning and Mine Closure Plan:
        - The location, extent, and rehabilitation status of all previous prospecting disturbances;
        - Proposed measures for their remediation and integration into the broader mine closure strategy;
        - Monitoring and reporting commitments to verify completion and stability of rehabilitated areas.

    - Submit proof of rehabilitation progress for these areas to the DMPR as part of the annual Environmental Performance Assessment (EPA) or upon request.

- Notify all registered Interested and Affected Parties (I&APs) in writing within seven (7) calendar days of submission of the annual EPA to the DMPR, confirming that the report has been submitted and is available for review upon request.

4. Access to Monitoring Data

As a registered I&AP, the CC Claassens Trust will be included in all formal environmental communication and will receive copies or summaries of monitoring data related to dust fallout and water quality throughout the operational phase of the project. These results will be shared as part of the project's ongoing stakeholder engagement and reporting process.

In addition, the annual Environmental Performance Assessment (EPA) submitted to the DMPR will include the findings of the monitoring programmes. In accordance with the commitments outlined in the EMPr, all registered I&APs — including the CC Claassens Trust — will be notified in writing within seven (7) calendar days of submission of each annual EPA, confirming that the report and associated monitoring data are available for review upon request.

This approach ensures that the Trust remains informed of environmental performance, potential impacts, and corrective actions throughout the life of the project, and can meaningfully participate in ongoing environmental management discussions.

Greenmined Environmental trusts that the above responses provide the necessary clarity and assurance regarding the issues raised.

Once approved, the EMPr forms a legally binding document that must be implemented by the Mining Right Holder (the Applicant). All mitigation and management measures proposed therein will therefore become enforceable obligations, ensuring that the identified environmental and social impacts are appropriately managed throughout the lifecycle of the project in accordance with the conditions of the Environmental Authorisation.

We thank you once again for your constructive participation in the environmental assessment process.

Kind Regards

Christine Fouché

FORMAL CORRESPONDENCE

To:
The Chief Executive Officer
Assmang (Pty) Ltd
24 Impala Road, Chislehurston, Sandton, 2196
South Africa

Mr Pumezo David – *Legal Representative, Assmang (Pty) Ltd*
Mr Christo Kuhl – *Director, Assore Group (Holding Company of Assmang)*
Ms Christine Fouché – *Environmental Consultant / DMRE Liaison, Greenmined Environmental (Pty) Ltd*

Date: 21 October 2025

From:
Dr/Adv Navin Naidoo
Legal Representative for **Mr J.C. Wessels**
Makganyane Mine Landowner

Subject: Request for Meeting to Resolve Ongoing Disputes and Confirmation of Formal Objection Lodged with DMRE

Dear Sir / Madam,

I write in my capacity as **legal representative for Mr J.C. Wessels**, the landowner of **Portion 2 and associated sections of the farm Makganyene No. 667**, within the **Tsantsabane Local Municipality**, Northern Cape Province. This is the site of Assmang's proposed Makganyene Iron Ore Mine.

As you are aware, a number of **unresolved disputes** have arisen between my client and **Assmang (Pty) Ltd** relating to the following key matters:

Docusign Envelope ID: 28EFD524-4AF4-4C73-90A9-0F0B025E9E6B

The Main Point of Contention is the Fact that the Prospecting Right and SUA agreement that was in place before Assmang bought the SUA agreement in 2021 have now both elapsed.

There is no valid or representative SUA agreement in place, and neither is there a valid prospecting right over the property currently. Your current NOMR application is entirely dependent on agreement and consensus from the land owner, and such has not been obtained. The representation in your application as to landowner consensus is a deliberate misrepresentation which has been made by your agent as to

1. **Breach of the Surface Use Agreement (SUA):**
    - Failure to install plastic liners in accordance with **Section 9.2** of the SUA where water sources were exposed during drilling.
    - Incomplete or inadequate **rehabilitation of drillholes**, contamination of groundwater, and lack of steel casing or capping.
    - Damage to vegetation and boundary fencing, which remains unrepaired despite previous undertakings.
    - Updating the SUA to a figure that is market related and includes provisions for minerals, rights and compensation never formally agreed to previously by the landowner and the current NOMR applicant.
    - Discussing an all out sale agreement of R 330 000 000 (three hundred and thirty million rands) for the property, ending all disputes.
2. **Non-Compliance with Environmental and Contractual Obligations:**
    - Refusal to inspect or rectify oil-contaminated drillholes identified during the prospecting phase.
    - Failure to ensure that all rehabilitation works were completed in accordance with the **Mineral and Petroleum Resources Development Act (MPRDA)** and the approved **Environmental Management Programme (EMPR)**.
3. **Failure to Engage in Good Faith Resolution:**
    - Despite several requests for joint inspections and engagement meetings, my client's concerns have been either **minimised, dismissed** by representatives of Assmang, or threatened by Assmang's legal representatives.
    - This has resulted in a loss of confidence in the company's commitment to equitable land-use and environmental rehabilitation or respecting the rights of the surface holder.

Formal Notice of Objection to DMRE

Please be advised that, due to the ongoing non-compliance and absence of meaningful engagement, a **formal Letter of Objection** has been lodged, or is soon to be lodged, with the **Department of Mineral Resources and Energy (DMRE)- before 23.10.2025**.

This objection requests that the **DMRE suspend or withhold any decision** regarding the granting of a **New Order Mining Right** to Assmang (Pty) Ltd over the affected areas until:

- The outstanding disputes regarding the **SUA** are fully resolved.
- The DMRE conducts a **formal inspection** to verify rehabilitation and environmental compliance; and

Docusign Envelope ID: 28EFD524-4AF4-4C73-90A9-0F0B025E9E6B

- The **landowner's consent** is duly obtained in accordance with the **MPRDA** and applicable land-use legislation.
- The administrative process of Assmang's application for a New Order Mine Right is fully audited by the DMRE and the land owner, and all documents, including all drilling reports, Competent Persons Reports, geological logs of drill holes and recovery from such drill sites is made available to the DMR and the land owner in order to come to a fair and equitable resolution to the SUA and property damage issues, or a fair and equitable complete purchase of the property.

Legal Basis and Damages Arising from the New Order Mining Right Application

1. **Absence of Landowner Agreement and Procedural Defects**
   The current application for a New Order Mining Right (NOMR) was made **without lawful consent from the surface rights holder**, in direct contravention of **Sections 5(4)(c), 10, 16(4), 22(4), and 54** of the **Mineral and Petroleum Resources Development Act (MPRDA)**.
   The representation by Assmang or its agents to the **DMRE** that landowner consent had been obtained constitutes a **material misrepresentation**, rendering the administrative process **procedurally unfair** and **legally defective** under **Sections 6(2)(b)–(e)** of the **Promotion of Administrative Justice Act (PAJA)**.
2. **Consequences of Administrative Irregularity**
   The **granting of a NOMR over privately held land in the absence of genuine consultation** or fair process is **administratively reviewable** and potentially **void ab initio**.
   The DMRE's decision-making process, if based on incorrect or incomplete information, violates the **constitutional right to just administrative action (Section 33 of the Constitution)** and the **duty to act lawfully, reasonably, and procedurally fairly**.
   These irregularities therefore open the door for **judicial review and financial liability** on the part of both Assmang and the State for **unlawful deprivation of land use and enjoyment**.
3. **Nature and Scope of Damages Payable**
   Where a NOMR has been unlawfully processed or pursued without a valid Surface Use Agreement (SUA), the landowner is entitled to seek **comprehensive damages**, including:
   - **Restitutionary damages** for the unlawful occupation or interference with surface rights.
   - **Environmental remediation costs** for contaminated water, destroyed vegetation, and disturbed soil not rehabilitated to pre-mining condition.
   - **Loss of use and enjoyment** of the land, including interruption to farming, grazing, or development opportunities.
   - **Loss of economic opportunity**, including diminished land value, loss of potential buyers, and reputational harm associated with publicised disputes.
   - **General damages** for distress, reputational harm, and bad faith administrative conduct.

Docusign Envelope ID: 28EFD524-4AF4-4C73-90A9-0F0B025E9E6B

- **Punitive damages** or **constitutional damages**, in the event that bad faith or deliberate administrative misconduct by public officials or company agents is proven.

4. **Legal Foundations for Claiming Damages**
   - **Section 54(1)** of the **MPRDA** requires that, where the holder of a mining right causes loss or damage, **compensation must be paid** before mining may commence.
   - **Section 55(1)(b)** allows the **Minister** to suspend or cancel rights where a holder contravenes the Act or fails to comply with conditions relating to environmental management or landowner rights.
   - **Section 98(b)** further criminalises any act of misrepresentation or false declaration made to the Department in the course of an application.
   - **Section 38 of the Constitution** and **common law principles of delict** provide additional grounds for **civil damages** where unlawful administrative action has caused measurable harm.
5. **Quantum and Evaluation Principles**
   The damages payable must reflect not only direct repair costs but also **the fair market value of deprivation** and **loss of economic utility** over the duration of the invalid right.
   Independent **valuation experts, environmental scientists, and legal assessors** should be engaged to quantify:
   - The **replacement cost** of lost agricultural potential and rehabilitative expenses.
   - The **capitalisation rate** of income loss due to restricted access.
   - The **diminished capital value** of the land from reputational harm or contamination.

     These figures, taken collectively, are likely to justify **a global compensation settlement or purchase offer** consistent with the previously discussed figure of **R330,000,000**, which reflects both tangible and consequential losses.
6. **Remedial Pathway**
   To regularise the situation and avoid protracted litigation, the following actions are proposed:
   - Immediate **suspension of the current NOMR application** pending investigation.
   - **Joint inspection** of the affected land by DMRE, the landowner, and independent auditors.
   - **Disclosure of all relevant records**, including geological, rehabilitation, and environmental documentation.
   - **Negotiation of a global settlement** compensating the landowner fully for damage, loss, and deprivation.
   - If settlement fails, initiation of **administrative review proceedings** under PAJA and **civil claims for delictual and constitutional damages**.

History of the Property

The background information presented in your report does not accurately reflect the true sequence of events. It is therefore necessary to begin with the **Environmental Management Report (EMR)** originally submitted by **Mr. Charlton Rex**, together with an **application for**

Docusign Envelope ID: 28EFD524-4AF4-4C73-90A9-0F0B025E9E6B

Prospecting Rights lodged on **5 August 2010** over the farm **Makganyene No. 667**, portions **2 (a portion of portion 1), Portion 1, Remainder, and Portion 3**, for **Manganese, Iron Ore, and Diamonds (general)**, covering approximately **1,500 hectares**.

Mr. Rex initially operated under a **Mining Permit for 1.5 hectares** as prescribed under **Section 27 of the Minerals Act**, which was later amended to allow for **Prospecting Rights** and approved by the **Environmental Manager of the DMRE** (supporting documentation available).
The **same Environmental Management Report** was then **reused for a further five years**, from **10 April 2019 to 19 November 2024**.

As previously noted, **Mr. Rex applied on 5 August 2010**, and the application was **approved ("granted")** by **Minister Susan Shabangu** on **7 October 2011**.
That Prospecting Right therefore **expired on 6 October 2016**, and **no renewal** was lawfully submitted or approved thereafter.

The Prospecting Right number issued in 2011 was **NC 30/5/1/2/2/2292 PR**.

In **2018**, Mr. Rex again applied for a similar Prospecting Right as that granted in 2010, and the application was **approved on 10 April 2019** by the **Acting Environmental Manager**, utilising and referencing the **same documentation** issued in 2011 under the authority of the then Minister, **Ms. Susan Shabangu**, who had authorised the Environmental Manager to sign on her behalf.
The Prospecting Right number **remained unchanged** from the previous five-year term, namely **NC 30/5/1/2/2/2292 PR**.

It must be noted that, following the replacement of Minister Shabangu by **President Jacob Zuma in 2013**, a further **three Ministers** were appointed between 2013 and 2019.
In total, Prospecting Right **NC 30/5/1/2/2/2292 PR** was **utilised for approximately seven years** before being replaced with the **renewal number NC 30/5/1/2/2/12774 PR-R**, for a **further three years**.

This chronology clearly demonstrates that **collusion and corruption** likely occurred between the **applicants** and **certain DMRE officials**.
It is therefore highly probable that the **current Minister has no knowledge** of these irregularities. It is the **duty of the Environmental Manager** to **fully brief him** on the matter.

During a meeting held on **24 June 2025** with the Environmental Manager and his staff, this issue was **formally brought to his attention**.
The **prospecting activities have spanned nearly ten years**, and **all documents substantiating these assertions** will be attached for review.

Given that the **current Minister may be unaware of this background**, it is essential that he is **fully informed** of how these Prospecting Rights were processed and approved. Should he find that the process was lawful and proper, he may approve or decline the associated **Mining Rights** accordingly.

Contamination of Boreholes with Oil: Criminal Transgression, Liability, and Relief

In addition to the damages framework already provided, the contamination of groundwater or boreholes with oil (hydrocarbons, petroleum products) constitutes a serious **environmental criminal offence** under national law. Such contamination implicates both the **National Water Act** and **NEMA**, among other statutes, and may trigger both criminal sanctions and civil claims. Below is a breakdown of legal bases, possible relief, and potential criminal exposure.

- That the contamination of boreholes with oil (or hydrocarbons) is prima facie a **pollution offence under NWA Section 151** and a breach of **Section 28 / Section 34** of NEMA.
- That you are formally requesting the DJR authorities to initiate **criminal investigation** and remedial orders.
- That the landowner reserves the right to **interdict**, **claim civil damages**, and seek **personal accountability** of company officials.
- That the magnitude of the contamination, combined with historical irregularities, warrants **maximum punitive fines and custodial sentences** under statute, plus **aggravated damages** in civil claims.

Legal Bases: Offences and Enforcement

1. National Water Act 36 of 1998 ("NWA")

- **Section 151(1)(i) & (j)** make it an offence to **"unlawfully and intentionally or negligently commit any act or omission which pollutes or is likely to pollute a water resource"**, or which **detrimentally affects** a water resource.
- This is a **fault-based** offence, though courts have held that once the prohibited act is proved, the onus may shift to the accused to rebut absence of fault.
- The NWA permits **criminal penalties**, including fines and (in more serious instances) imprisonment, and enables authorities to issue **directives** and require remedial action.
- Moreover, under the NWA, the responsible authority may **remove or rectify the cause** of the pollution and recover costs from the polluter**. National Environmental Management Act 107 of 1998 ("NEMA")**

- Under **Section 28 (Duty of care and remediation of environmental damage)**, any person who causes environmental degradation (which includes groundwater pollution) must **prevent, minimize, contain or remediate** such damage.
- **Section 24** and associated regulations provide that **"activities which result in the pollution of water resources"** may require environmental authorisation; an unauthorised act is a breach.

Docusign Envelope ID: 28EFD524-4AF4-4C73-90A9-0F0B025E9E6B

- **Section 34** empowers criminal prosecution for contraventions of environmental obligations.
- Also, **Environmental Management Inspectors (EMIs)**, empowered under NEMA, can **investigate, enter premises, seize evidence, take samples, issue compliance notices, and refer for criminal prosecution**, although they do not themselves prosecute.
- Courts have also held that **directors, officers, or decision-makers** may be held personally liable under NEMA, via **vicarious liability or corporate liability doctrine** (see section 34(6)). **3. Municipal / Local Government Duties (Northern Cape / Local Municipality)**

- Municipalities have statutory obligations to maintain water quality and infrastructure; where municipal negligence contributes to borehole contamination (e.g. failure to maintain pipelines, leaks, inadequate stormwater/industrial effluent controls), the municipality may face **administrative, civil, or criminal liability**, depending on provincial environmental legislation or municipal by-laws.
- While there is no uniform municipal pollution statute, provincial environmental departments often adopt by-laws and environmental licensing schemes imposing penalties for discharge or pollution of groundwater.
- In recent precedent, municipalities have been fined heavily (e.g. R160 million in one case) under **NEMA** and **NWA** for water pollution offences.

Types of Relief and Remedies Available to the Landowner regarding the borehole contamination.

Given the above, my client is entitled to pursue a **comprehensive remedial strategy**, including:

1. **Criminal Prosecution / Referral to NPA**
    - Request that environmental authorities (EMIs, DFFE provincial branch, Department of Water & Sanitation) *open a criminal docket* for the borehole contamination.
    - Seek a **criminal conviction** with fines, imprisonment, or both, depending on severity.
2. **Directive / Remediation Order**
    - Under NWA or NEMA, request the issuing of **remedial orders**, compelling the polluter to **repair, clean up, and restore** the groundwater, including replacement borehole infrastructure, soil removal, decontamination of water, and long-term monitoring.
3. **Interdict / Injunction**
    - Seek a court **interdict** restraining further discharge or activity causing contamination, pending full remediation.
    - Courts in environmental law traditionally allow **structural interdicts** to oversee compliance.
4. **Civil Claims for Damages**
    - **Delictual claim** for loss, pollution damage, loss of use of water, diminution of land value, remediation costs.

Docusign Envelope ID: 28EFD524-4AF4-4C73-90A9-0F0B025E9E6B

- **Restitutionary damages** for the unauthorised interference with property rights in water.
- **Interest, costs, and punitive damages** for malice or gross negligence.
- **Constitutional damages** (if applicable) for infringement of rights (e.g. right to environment, property).

5. **Recovery of Costs**
   - The landowner may claim **costs of monitoring, scientific assessment, expert witnesses**.
   - Possibly recover **costs of prosecution** or **administrative enforcement costs** via NEMA or provincial equivalents.
6. **Forfeiture / Sequestration**
   - In severe cases, courts may order forfeiture of profit from illegal activity, or disgorgement of gains made by the polluter.
7. **Punitive / Aggravated Imposition**
   - Where bad faith, repeated conduct, or deliberate concealment is shown, my client will be entitled to ask for harsher penal orders, including **higher fines** or more severe custodial sentences.
8. **Criminal & Administrative Accountability of Individuals**
   - Seek **personal accountability** of directors, managers, or individuals who authorised or oversaw the contamination, under corporate liability or director liability provisions.
   - Request **disciplinary action**, removal from office, and public record of conviction.

Invitation to Resolve by Discussion

Notwithstanding the above, my client remains committed to **amicable and constructive engagement**.
We therefore formally invite representatives of **Assmang (Pty) Ltd** to attend a **resolution meeting** with Mr Wessels and his legal team to discuss and settle the matters in dispute.

Proposed Agenda:

1. Clarification of obligations under the previous Surface Use Agreement (SUA)
2. Environmental rehabilitation and verification of restoration work
3. Future operational planning and landowner consent
4. Compensation for damage and access terms moving forward
5. Framework for ongoing communication and compliance oversight
6. Updating the SUA to be representative of a fair and equitable value proposition for the landowner.

Proposed Date & Venue:
The meeting will be conducted via Zoom and will be recorded. All participants will receive the recording.

We trust that Assmang recognises the importance of resolving these matters **transparently and collaboratively**, in the spirit of mutual respect and in line with **Sections 43, 54 and 96 of the MPRDA**, which encourage resolution prior to litigation or ministerial intervention.

Docusign Envelope ID: 28EFD524-4AF4-4C73-90A9-0F0B025E9E6B

Next Steps

Kindly confirm in writing by **Tuesday 21 October 17:00 SAST** whether Assmang is willing to attend such a meeting and provide the contact details of your appointed representatives.

Please bear in mind the deadline for the landowner to submit his response to the DMRE about your New Order Mine Right application is 23.10.2025. My client has attempted engaging in meaningful dialogue with Assmangs' employees , to not only no avail, but to open hostility at times.

Should no constructive engagement occur, our client reserves the right to pursue **further legal and regulatory remedies**, including:

- A formal application for enforcement under **Section 93 of the MPRDA**,
- Civil proceedings for damages resulting from contractual and environmental breaches, and
- Referral to the **Office of the Public Protector** or **Environmental Commissioner** for investigation into administrative irregularities.
- Referral for criminal investigation of the borehole contamination.

Conclusion

My client wishes to reiterate that his preference remains for **resolution through discussion rather than confrontation**, but such resolution must occur within a framework of **good faith, legal compliance, and environmental accountability**.

We look forward to your prompt response and to the scheduling of the proposed meeting.

Yours faithfully,

Dr/Adv Navin Naidoo

Good afternoon Adv Naidoo,

My apologies for the delayed response.

Your correspondence dated 21.10.2025 has reference.
I/we hereby acknowledge receipt of the formal correspondence [as attached].
The formal correspondence has been shared / discussed with Assmang's legal representative, and a response will be forthcoming.

Please note that the email address used, for myself, in your correspondence dated 21.10.2025 is/was incorrect.
Please be sure to make use of the following email address, for any/all future correspondence – christokuhl@assore.com.

Sincerely,

Christo Kuhl
Group Consulting Mining Engineer
