Dear Thandeka,

Thank you for your email. The contents are duly noted.

Kindly note that this application falls under the Biodiversity and Conservation Department. The relevant officials were copied on the previous correspondence and have been cc'd again for ease of reference.

Should you wish to be excluded from further communication relating to this project, please let us know.

We trust that you will find this in order.

Kind regards,
Anel

RE: NOTICE OF THE DRAFT BASIC ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR A MINING PERMIT APPLICATION IN TERMS OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) (MPRDA), THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), AND THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED) (EIA REGULATIONS) SUBMITTED BY BOETEKA DOLERIET (PTY) LTD. REFERENCE NUMBER: WC 30/5/1/3/2/10386 MP

The Draft Basic Assessment Report (DBAR) with Environmental Management Programme (EMPR), for the proposed mining of aggregate on a portion of Portion 4 of Farm Waai Kraal Nr 120, Magisterial District of Beaufort West, Western Cape province, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental (Pty) Ltd upon request or downloaded from the company website at <https://www.greenmined.com/mining-permits/>.

Should you be interested your comments are kindly requested on the DBAR & EMPR. A thirty-day commenting period, ending on 15 May 2026, will be allowed for comments. Your comments must be in writing and can be submitted via e-mail and/or post.

Please do not hesitate to contact us in the event of any uncertainties, kindly ensure that your contact details are included with your comments. Please contact Zoë Norval at on 072 759 9059 or Tel (021) 851 2673, (Fax) (086) 546 0579, (email) zoe@greenmined.co.za should you require any additional information.

Good day,

The application does not fall within our designated catchment area, as it is located within the Mzimvubu to Tsitsikamma region.

A water use licence or related process is not applicable, as the proposed activity involves sourcing water off-site for transport to the mining area. Furthermore, the development footprint does not intersect any drainage lines and is situated more than 100 m from any watercourse.

Kindly forward the application to the Mzimvubu to Tsitsikamma office for further processing.

Thank you for your assistance.

Regards,
Ngobeni Tshembhani

Good day,

Please see attached and below mining permit application notification for your information and reference.

The proposed project does not require a Water Use Authorisation in terms of Section 39 of the National Water Act, 1998 (Act No 36 of 1998).

No activity will take place in or within 1km radius of any water bodies. Any water required for the implementation of the project will be bought from a registered source and transported to on site.

We trust you find this in good order. Should you have any queries, please do not hesitate to contact us.

Kind Regards/Vriendelike Groete

PROOF OF UPLOAD ON SAHRIS

Proposed Aggregate / Gravel Mine on a Portion of Portion 4 of the Farm Waai Kraal 120, Reg...

[Add Additional Submission to Case](#) [Add Heritage Report to Case](#)

CaseDetails

Summary

Case ID: 28083

Case Status: SUBMITTED

Heritage Authority(s): HWC

Proposal Description

Boeteka Doeriet (Pty) Ltd, applied for environmental authorisation (EA) and a mining permit to mine gravel on a portion of Portion 4 of the Farm Waai Kraal 120, Registration Division of Beaufort West, Western Cape province.

The proposed mining footprint will be 4.9 ha and will be developed over an area that has been partially disturbed by adjacent mining activities. The mining method will make use of blasting in order to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles. The aggregate will be stockpiled until it is transported from site using tipper trucks. All mining related activities will be contained within the approved mining permit boundaries.

The proposed mining area is approximately 4.9 ha in extent and the applicant, intends to win material from the area for at least 2 years with a possible extension of another 3 years. The gravel to be removed from the quarry will be used for construction industry in the vicinity. The proposed quarry will therefore contribute to the upgrading / maintenance of road infrastructure and building contracts in and around the Beaufort West area.

The mining activities will consist out of the following:

- Stripping and stockpiling of topsoil;
 - Blasting
 - Excavating;
 - Crushing;
 - Stockpiling and transporting;
 - Sloping and landscaping upon closure of the site; and
 - Replacing the topsoil and vegetation the disturbed area.
- The mining site will contain the following:

- Excavating equipment;
- Earth moving equipment;
- Mobile crushing and screening plants;
- Access Roads;
- Site office (Container);
- Site vehicles;
- Parking area for visitors and site vehicles;
- Weighbridge;
- Abution facilities (Chemical toilet).

RE: NOTICE OF THE DRAFT BASIC ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR A MINING PERMIT APPLICATION IN TERMS OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) (MPRDA), THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), AND THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED) (EIA REGULATIONS) SUBMITTED BY BOETEKA DOLERIET (PTY) LTD. REFERENCE NUMBER: WC 30/5/1/3/2/10386 MP

The Draft Basic Assessment Report (DBAR) with Environmental Management Programme (EMPR), for the proposed mining of aggregate on a portion of Portion 4 of Farm Waai Kraal Nr 120, Magisterial District of Beaufort West, Western Cape province, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental (Pty) Ltd upon request or downloaded from the company website at <https://www.greenmined.com/mining-permits/>.

Should you be interested your comments are kindly requested on the DBAR & EMPR. A thirty-day commenting period, ending on 15 May 2026, will be allowed for comments. Your comments must be in writing and can be submitted via e-mail and/or post.

Please do not hesitate to contact us in the event of any uncertainties, kindly ensure that your contact details are included with your comments. Please contact Zoë Norval at on 072 759 9059 or Tel (021) 851 2673, (Fax) (086) 546 0579, (email) zoe@greenmined.co.za should you require any additional information.

Kind Regards/Vriendelike Groete

Dear Ms Zoë Norval

THE DRAFT BASIC ASSESSMENT REPORT FOR THE PROPOSED AGGREGATE/ GRAVEL MINE ON A PORTION OF PORTION 4 OF THE FARM WAAI KRAAL NO 120, BEAUFORT WEST LOCAL MUNICIPALITY, WESTERN CAPE.

DMRE Reference: WC 30/5/1/3/2/10386 MP

CapeNature would like to thank you for the opportunity to review the above report. Please note that our comments only pertain to the biodiversity related impacts and not to the overall desirability of the application. CapeNature wishes to make the following comments:

According to the Western Cape Biodiversity Spatial Plan (CapeNature 2024)¹ the property has Ecological Support Areas (ESA I: Aquatic) and Other Natural Areas. According to the South African Vegetation Map (Beta VegMap, 2024)², the vegetation units' area Gamka Karoo, Southern Karoo Riviere, and Upper Karoo Hardeveld which are all listed as Least Concerned (SANBI 2022)³. The property contains several non-perennial drainage lines, which align with the mapped Ecological Support Areas (ESAs), including one located to the west of the proposed mining footprint. CapeNature has reviewed the application and provide the following comments and recommendations:

- I. The mining footprint is situated within a mapped Natural Aquatic ESA. These areas are essential for maintaining ecological functioning, hydrological processes, and biodiversity targets.

¹ CapeNature. 2024. 2023 Western Cape Biodiversity Spatial Plan and Guidelines. Unpublished Report

² South African National Biodiversity Institute (2006-2024). The Vegetation Map of South Africa, Lesotho and Swaziland, Mucina, L., Rutherford, M.C. and Powrie, L.W. (Editors), Online, <https://bgis.sanbi.org/Projects/Detail/2258>, Version 2024.

³ Government of South Africa (2022) South African Red List of Terrestrial Ecosystems: assessment details and ecosystem descriptions. Technical Report #7664, SANBI Pretoria, South Africa.

2. Although no watercourses occur directly within the proposed mining footprint, the presence of nearby non-perennial drainage lines is noted. Appropriate buffer zones should be delineated and maintained around all drainage features, including non-perennial systems.
3. The dBAR indicates that a Water Use Licence in terms of the National Water Act (NWA)⁴ is not required. However, given the proximity of non-perennial drainage features, CapeNature recommends that written confirmation be obtained from the Breede-Olifants Catchment Management Agency (BOCMA) to verify this position.
4. The statement that faunal species will not be impacted as they can move away from the site is not supported. Mining-related activities, including blasting, noise, dust generation, and increased human presence, are likely to result in disturbance, displacement, and potential mortality of less mobile species such as reptiles and small mammals. This approach does not align with the precautionary principle as outlined in NEMA, which requires a risk-averse and cautious approach where impacts are uncertain. Mitigation measures should therefore be strengthened to address:
 - 4.1. Blasting impacts (noise and vibration);
 - 4.2. Dust suppression;
 - 4.3. Faunal rescue and relocation protocols; and
 - 4.4. Ongoing monitoring of faunal activity.
5. Karoo ecosystems recover slowly, and once destructed, restoration to functional ecological state is uncertain. It should be noted that once arid habitats are disturbed, it could take years to rehabilitate, even from temporary disturbances. CapeNature only considers a habitat to be rehabilitated until a comparable level of ecosystem functionality has been proven.
6. The proposed rehabilitation measures must demonstrate measurable outcomes. CapeNature recommends that the EMPr include clear and measurable rehabilitation success criteria aligned with pre-disturbance conditions; use of locally indigenous species; and consideration of active restoration interventions where necessary.
7. The proposed mining activity represents a change from the likely agricultural zoning of the property. The applicant/EAP must confirm whether the activity is consistent with the applicable municipal zoning scheme and SDF, or whether a land use application is required in terms of the Spatial Planning and Land Use Management Act, supported by input from the relevant local authority.
8. The broader Beaufort West area is subject to increasing development pressure, including mining and renewable energy developments. The potential cumulative impacts on biodiversity, ecological processes, and landscape connectivity have not been sufficiently assessed. Cumulative impacts must be considered holistically, considering existing and reasonably foreseeable developments in the area.

CapeNature reserves the right to revise initial comments and request further information based on any additional information that may be received.

Yours sincerely,

Megan Simons

5 May 2026

Attention: Manager: Conservation Intelligence – Ms. Megan Simons

Dear Madam

RE: COMMENTS ON THE DRAFT BASIC ASSESSMENT REPORT WITH RESPECT TO THE MINING PERMIT APPLICATION ON A PORTION OF PORTION 4 OF THE FARM WAAI KRAAL 120, REGISTRATION DIVISION OF BEAUFORT WEST, WESTERN CAPE PROVINCE (DMPR REF: WC 30/5/1/3/2/10386 MP).

The above matter as well as letter received from you dated 24 April 2026 refers. Please see responses to your comments listed below:

1. The mining footprint is situated within a mapped Natural Aquatic ESA. These areas are essential for maintaining ecological functioning, hydrological processes, and biodiversity targets.
 - *The Draft Basic Assessment Report acknowledges that the broader study area includes aquatic features; however, the proposed mining footprint itself is located on an already partially disturbed area (approximately 60–70% disturbed), characterised by low ecological sensitivity, low agricultural potential, and situated more than 100 metres from any watercourse. Based on the Cape Farm Mapper, and the Biodiversity Geographic Information System (BGIS: 2017 Western Cape Biodiversity Spatial Plan), the site is classified as an “Other Natural Area” and not over a mapped Ecological Support Area. Furthermore, the Department of Forestry, Fisheries and the Environment (DFFE) Screening Tool indicates that the site has low terrestrial biodiversity sensitivity. Collectively, these classifications reflect moderate biodiversity importance with low regional significance.*
 - *In this regard, it is noted that CapeNature’s comment states that the mining footprint falls within a mapped Ecological Support Area (Ecological Support Area 1: Aquatic). However, this is inconsistent with the spatial tools and datasets referenced above. The applicant therefore respectfully requests that CapeNature clarify the specific dataset, version, or spatial delineation used to support the assertion that the proposed mining footprint falls within an Ecological Support Area.*
 - *Notwithstanding the above, the impact on ecological functioning is considered to be low and localised, provided that the mitigation measures outlined in the Environmental Management Programme are implemented. The development footprint has been deliberately selected to avoid higher sensitivity areas and to utilise previously disturbed land, thereby aligning with biodiversity conservation principles.*

2. Although no watercourses occur directly within the proposed mining footprint, the presence of nearby non-perennial drainage lines is noted. Appropriate buffer zones should be delineated and maintained around all drainage features, including non-perennial systems.
3. The dBAR indicates that a Water Use Licence in terms of the National Water Act (NWA) is not required. However, given the proximity of non-perennial drainage features, CapeNature recommends that written confirmation be obtained from the Breede-Olifants Catchment Management Agency (BOCMA) to verify this position.

- *The presence of non-perennial drainage lines in the broader area is acknowledged. However, based on site-specific measurements, the nearest non-perennial drainage line is located approximately 341.22 m from the proposed mining footprint (please see figure below). This distance exceeds the 100 m regulatory threshold associated with Section 21(c) and (i) water uses in terms of the National Water Act, and therefore the proposed activity does not trigger a Water Use Licence Application (WULA). All mining-related activities will be strictly confined within the demarcated footprint, with no encroachment into surrounding drainage features. Standard environmental management measures included in the EMPr will ensure that indirect impacts are avoided and that the integrity of nearby drainage features is maintained. Written confirmation from the Breede-Olifants Catchment Management Agency will be obtained to verify this position.*

Figure 1: The distance between the proposed mining area and non-perennial drainage line.

4. The statement that faunal species will not be impacted as they can move away from the site is not supported. Mining-related activities, including blasting, noise, dust generation, and increased human presence, are likely to result in disturbance, displacement, and potential mortality of less mobile species such as reptiles and small mammals. This approach does not align with the precautionary principle as outlined in NEMA, which requires

a risk-averse and cautious approach where impacts are uncertain. Mitigation measures should therefore be strengthened to address:

- 4.1 Blasting impacts (noise and vibration);
- 4.2 Dust suppression;
- 4.3 Faunal rescue and relocation protocols; and
- 4.4 Ongoing monitoring of faunal activity.

■ *The DBAR acknowledges the presence of small mammals and reptiles on site, although initial impacts were considered low due to species mobility. In response to the comment, mitigation measures will be strengthened in the EMPr to adopt a precautionary approach. This will include:*

- *Blasting impacts: Controlled blasting schedules and minimisation of vibration.*
- *Dust suppression: Use of water and operational controls (speed limits, covering loads).*
- *Faunal rescue: Pre-clearing inspections and relocation of slow-moving species.*
- *Monitoring: Ongoing environmental monitoring.*

■ *These measures ensure alignment with the precautionary principle as outlined in NEMA.*

5. Karoo ecosystems recover slowly, and once destructed, restoration to functional ecological state is uncertain. It should be noted that once arid habitats are disturbed, it could take years to rehabilitate, even from temporary disturbances. CapeNature only considers a habitat to be rehabilitated until a comparable level of ecosystem functionality has been proven.

■ *The DBAR recognises that rehabilitation in arid Karoo environments is slow and that full ecological recovery is uncertain. Rehabilitation has therefore been designed to be progressive throughout the operational phase and focused on achieving a stable, non-polluting landform that is compatible with the surrounding environment and suitable for continued land use. It is acknowledged that restoration to pre-disturbance conditions may take extended periods, and rehabilitation success will be assessed based on functional ecosystem stability rather than immediate equivalence.*

6. The proposed rehabilitation measures must demonstrate measurable outcomes. CapeNature recommends that the EMPr include clear and measurable rehabilitation success criteria aligned with pre-disturbance conditions; use of locally indigenous species; and consideration of active restoration interventions where necessary.

■ *The DBAR acknowledges that Karoo ecosystems recover slowly and that full restoration to pre-disturbance conditions is uncertain. Rehabilitation will therefore be progressive and aimed at achieving a stable, functional landform compatible with the surrounding environment. The EMPr will be strengthened to include clear, measurable rehabilitation criteria, the use of locally indigenous species, and active restoration where necessary, with success assessed based on long-term ecosystem functionality.*

7. The proposed mining activity represents a change from the likely agricultural zoning of the property. The applicant/EAP must confirm whether the activity is consistent with the applicable municipal zoning scheme

and SDF, or whether a land use application is required in terms of the Spatial Planning and Land Use Management Act, supported by input from the relevant local authority.

- *The proposed mining activity is considered to be consistent with the applicable municipal planning framework. The Beaufort West Municipality has previously granted consent use approval for quarrying on the Remainder of Portion 4 (Portion of Portion 1) of Farm 120, Waaikraal, which relates to the existing adjacent mining operation on the same property.*
- *As the current application area forms part of the same property and is directly associated with the existing quarry operations, the existing consent use approval is regarded as applicable to the proposed activity. This indicates that quarrying is a permissible land use on the property in terms of the Municipal Land Use Planning By-law. Notwithstanding the above, formal confirmation will be obtained from the Beaufort West Municipality prior to the commencement of mining activities to verify that the proposed expansion is fully compliant with the applicable zoning scheme and land use requirements.*

8. The broader Beaufort West area is subject to increasing development pressure, including mining and renewable energy developments. The potential cumulative impacts on biodiversity, ecological processes, and landscape connectivity have not been sufficiently assessed. Cumulative impacts must be considered holistically, considering existing and reasonably foreseeable developments in the area.

- *The DBAR considers cumulative impacts in the context of existing adjacent mining activities and concludes that, due to the relatively small footprint of the proposed development, cumulative impacts are expected to be low at a regional scale. Potential cumulative impacts include increased dust, noise, and traffic, as well as incremental loss of natural land. With the implementation of mitigation measures, these impacts are considered to be of low significance. Notwithstanding this, the cumulative impact assessment will be expanded in the Final Basic Assessment Report to more explicitly consider existing and reasonably foreseeable developments in the Beaufort West area and their combined effects on biodiversity, ecological processes, and landscape connectivity.*

We thank you for taking part in the public participation process as well as your valuable contribution in providing comments. All comments received for you as well as our response will be incorporated in the Final Basic Assessment Report to be submitted to DMPR for their consideration.

We trust you will find this in order. Please do not hesitate to contact us in the event of any uncertainties.

APPLICATION FOR CONSENT USE: REMAINDER OF PORTION 4 (PORTION OF PORTION 1) OF FARM 120, WAAIKRAAL, BEAUFORT WEST FOR THE GRANTING OF A QUARRY

The Municipality's letters dated 25 July 2022 and 9 December 2022, refers.

The Authorized Official, on 25 January 2023 has **approved** the application for the **consent use** on the **Remainder of Portion 4** (Portion of Portion 1) of **Farm 120, Waaikraal, Beaufort West** in terms of Section 60 of the By-law on Municipal Land Use Planning for Beaufort West Municipality, as follows:-

1. That approval is granted for a consent use on a portion of the property known as Remainder of Portion 4 (Portion of Portion 1) of Farm 120, Waaikraal, Beaufort West in the Registration Division of Beaufort West, Western Cape to allow a quarry.
2. That the approval shall be taken to cover only the consent use applied for and shall not be construed as to depart from any other Council requirement or legal provision.
3. That the approval will lapse after five (5) years from the dated of approval if not implemented.
4. That the mined area be suitably rehabilitated in accordance with the environmental management plan approved by the National Department of Mineral Resources once mining activities ceases and / or the approval period of the mine lapses, whichever occurs first.
5. That his approval does not imply or give exemption from any other permission or approval, which may be required by any other law or authority.

Reasons for the decision taken are as follows:

1. No objections were received during the public participation process.
2. Provided that mitigating measures are complied with, the impact on the natural environment will be very low.
3. The impact on the agricultural resources of the subject property is low.

You are hereby informed of your right to appeal to the Appeal Authority in terms of Section 79(2) of the said legislation.

The **attached** appeal form must be completed and should be directed to the Appeal Authority and received by the Beaufort West Municipality, Private Bag 582, 112 Donkin Street, Beaufort West, 6970, within **21 days** of notification of this decision together with proof of payment of the appeal fee to the amount of **R8,989.00**.

The bank details are:-

Bank	: Nedbank
Branch	: Beaufort West
Branch Code	: 198765
Account Number	: 1074280318
Account type	: Cheque
Reference Number	10/1000/100/020110

You are requested to simultaneously serve notice of the appeal on any person who commented on the surrounding landowners as per the **attached** list. Proof of serving the notification must be submitted to the Municipality, within 14 days of serving the notification.

The notice must be served in accordance with Section 35 of the said legislation and accordance with the additional requirements as may be determined by the Municipality. The notice must invite persons to comment on the appeal within 21 days from date of notification of the appeal.

Kindly note that no appeal right exists in terms of Section 62 of the Local Government Municipal Systems Act, No. 32 of 2000.

Yours faithfully

Dr. B.R. Links
Acting Municipal Manager

**MINING APPLICATION: BOETEKRAAL DOLERIET (PTY) LTD: REFERENCE NUMBER WC
30/5/1/2/2/10386 MP**

We refer to your notice dated 09 April 2026 which calls for objections against the proposed mining permit on portion 4 of the farm Waaikraal 120, Beaufort West.

This application cannot be viewed in isolation and must be seen against the historical backdrop of the previous mining activities on farm Waaikraal 120, by Lombardskraal Doleriet (PTY) Ltd.

Clarity is needed on the new application and the existing permit that is in place, especially regarding old and new permit boundary areas and rehabilitation that must be done on the old quarry.

Further to the above, clarity is needed on:

- Landowner's Consent.
- Water Source for Dust Suppression.

OBJECTIONS / INFORMATION TO BE PROVIDED

1. New and Existing Permit Boundaries

In the DBAR it is stated that the new permit area is partially disturbed by adjacent mining activities.

Lombardskraal Doleriet (PTY) Ltd lies in an L shape facing North and turning towards the gravel road in the East.

From your provided Google earth photos and other information, it is quite clear that Lombardskraal Doleriet (PTY) Ltd operated outside its permitted boundaries, with several hectares affected.

The new application (Boeteka Doleriet (PTY) Ltd permit boundaries reach into this already disturbed area.

The questions that arise are:

- How/ when will rehabilitation be done to the old, permitted area, as well as to the affected, non-permitted areas
- Have the Department of Minerals and Energy been notified of these permit violations, as the new permit application partially falls within the said area and is an agreement in place to remedy the above?

2. Landowner consent

In your supporting documents to the DBAR you attached a letter by Crawfords Attorneys referring to Lombardskraal Doleriet (PTY) Ltd that exercised their option to renew the land use agreement with the landowner for a further 5 years.

It is noteworthy to place on record that this letter refers to Lombardskraal Doleriet (PTY) Ltd for the renewal of the land use, and not Boeteka Doleriet (PTY) Ltd.

The letter by Crawfords attorneys refers to rights that **Lombardskraal Doleriet (PTY) Ltd** might have or not have, but no reference to Boeteka Doleriet (PTY) Ltd, so no legal grounds was established for permission granted to the new permit application.

3. Dust Suppression / Water Use

It is noted that applicant will use between 5000 and 10 000 liters of water per day for dust suppression in summer times.

We note the following:

- No mention is made about the water source.
- Is it a registered water source, and is there an agreement in place?

Summary

- We as permit holders are kept to stringent Environmental Management rules, and this should apply to all stake holders.
- Responsible mining, as directed by the Department of Minerals and Energy, should apply to all permit holders.
- Can new applications be launched in areas where permitted legislation has been violated?
- Both the current permit holder (Lombardskraal Doleriet PTY Ltd) and the new applicant (Boeteka Doleriet PTY LTD) are owned by the same family

Yours faithfully

J Marais

19 May 2026

Dear Sir

RE: COMMENTS ON THE DRAFT BASIC ASSESSMENT REPORT WITH RESPECT TO THE MINING PERMIT APPLICATION ON A PORTION OF PORTION 4 OF THE FARM WAAI KRAAL 120, REGISTRATION DIVISION OF BEAUFORT WEST, WESTERN CAPE PROVINCE (DMPR REF: WC 30/5/1/3/2/10386 MP).

The above matter as well as the letter received from you dated 14 May 2026 refers. Please see responses to your comments listed below:

1. New and Existing Permit Boundaries

In the DBAR it is stated that the new permit area is partially disturbed by adjacent mining activities.

Lombardskraal Doleriet (PTY) Ltd lies in an L shape facing North and turning towards the gravel road in the East.

From your provided Google earth photos and other information, it is quite clear that Lombardskraal Doleriet (PTY) Ltd operated outside its permitted boundaries, with several hectares affected.

The new application (Boeteka Doleriet (PTY) Ltd) permit boundaries reach into this already disturbed area. The questions that arise are:

- How/ when will rehabilitation be done to the old, permitted area, as well as to the affected, non-permitted areas
- Have the Department of Minerals and Energy been notified of these permit violations, as the new permit application partially falls within the said area and is an agreement in place to remedy the above?

■ *Any matters relating to possible compliance issues associated with Lombardskraal Doleriet (Pty) Ltd constitute separate regulatory and compliance matters for consideration by the Department of Mineral and Petroleum Resources (DMPR) and are not relevant to the assessment of the current Boeteka Doleriet (Pty) Ltd application. The proposed mining permit application must be assessed independently in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002) (MPRDA) and the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA) requirements. The DBAR acknowledges that the proposed 4.9 ha footprint is partially disturbed by adjacent historical mining activities and specifically motivates the site as the preferred alternative due to the existing disturbance and low agricultural potential of the area.*

■ *The disturbed area located outside of the approved mining area does not constitute an expansion of the mining footprint or mining activities. This area is situated on land rented by the landowner specifically for the temporary storage/stockpiling of material that had already been mined and sold pending collection. The area*

was historically disturbed prior to its use for stockpiling and no additional vegetation clearing, excavation, or mining-related disturbance was undertaken in this location. The stockpiling activity is therefore considered ancillary storage on an already disturbed area and falls outside the active mining footprint and extraction activities.

2. Landowner consent

In your supporting documents to the DBAR you attached a letter by Crawfords Attorneys referring to Lombardskraal Doleriet (PTY) Ltd that exercised their option to renew the land use agreement with the landowner for a further 5 years.

It is noteworthy to place on record that this letter refers to Lombardskraal Doleriet (PTY) Ltd for the renewal of the land use, and not Boeteka Doleriet (PTY) Ltd.

The letter by Crawfords attorneys refers to rights that Lombardskraal Doleriet (PTY) Ltd might have or not have, but no reference to Boeteka Doleriet (PTY) Ltd, so no legal grounds was established for permission granted to the new permit application.

- *The MPRDA requires consultation with the landowner and lawful occupiers, which has been undertaken as part of the application and the public participation process. The DBAR confirms that the landowner was consulted regarding the proposed footprint and that a request was submitted to renew the landowner agreement. Any administrative clarification regarding entity references in historical agreements can be provided to the DMPR if required. Therefore, the current application complies with the consultation requirements of the MPRDA and Environmental Impact Assessment Regulations, 2014 promulgated in terms of the NEMA.*

3. Dust Suppression / Water Use

It is noted that applicant will use between 5000 and 10 000 liters of water per day for dust suppression in summer times.

We note the following:

- No mention is made about the water source.
- Is it a registered water source, and is there an agreement in place?

- *The DBAR confirms that water will only be used for dust suppression purposes and that approximately 5 000–10 000 litres per day may be required during dry periods. The report specifically states that water will be purchased from a registered lawful source and transported to site when required. No abstraction of groundwater or watercourse impacts are proposed, and no activities will occur within 1 km of a water body. The DBAR therefore concludes that a Water Use Authorisation is not required in terms of the National Water Act. Additional dust mitigation measures, including speed control, covered haul trucks, and minimising exposed surfaces, are included in the Environmental Management Programme report (EMPr) to reduce dust*

impacts and water consumption.

Summary

- We as permit holders are kept to stringent Environmental Management rules, and this should apply to all stake holders.
- Responsible mining, as directed by the Department of Minerals and Energy, should apply to all permit holders.
- Can new applications be launched in areas where permitted legislation has been violated?
- Both the current permit holder (Lombardskraal Doleriet PTY Ltd) and the new applicant (Boeteka Doleriet PTY Ltd) are owned by the same family.

■ *In conclusion, the concerns raised regarding permit boundaries, landowner consent, and dust suppression/water use have been adequately addressed within the DBAR and supporting application documentation for the proposed Boeteka Doleriet (Pty) Ltd mining permit application. The proposed mining area was selected due to its already disturbed condition and low agricultural potential, thereby limiting impacts on undisturbed areas. The application must be assessed independently in terms of the MPRDA and NEMA, and issues raised relating to historical or adjacent mining activities remain separate compliance matters for consideration by the DMPR. The Applicant has complied with the required consultation and public participation processes, and appropriate mitigation measures have been included in the EMPr to manage potential environmental impacts associated with the proposed operation.*

We thank you for taking part in the public participation process as well as your valuable contribution in providing comments. All comments received for you as well as our response will be incorporated in the Final Basic Assessment Report to be submitted to DMPR for their consideration.

We trust you will find this in order.

Subject: Mining Application BOETEKKA DOLERIET(Pty)Ltd Ref.no WC 30/5/1/2/2/10386 MP

Dear Sir,

We write to you on instructions of Mr A D Nigrini of the farm Rhenosterkop which is situate approximately 4 kilometres from the applicant's proposed site.

The house of our client is built on the same granite ridge which apparently has previously been pointed out by geologists.

During the applicant's previous operations our client's house developed some cracks which was caused directly as result of the blasting that took place.

Our client is also worried that some boreholes may be affected by the blasting.

Our client therefore objects to the granting of the mining permit unless his property is safeguarded against any structural damage which includes the operation of his current boreholes.

Please acknowledge receipt and confirm that the objection raised will be disclosed to the relevant authority.

Kind regards,

J. Rall

Importance: High

Good day Mr. Rall

The objection raised on 15 May 2026 via email by Mr A.D. Nigrini is acknowledged and will be included in the documentation submitted to the relevant competent authority for consideration as part of the application process.

It is noted that concerns have been raised regarding alleged structural damage and potential impacts on boreholes associated with previous blasting activities undertaken by former operators or contractors. As this application relates to a new proposed operation, the Applicant is not in a position to comment on or verify activities previously undertaken by other contractors.

For the proposed operations forming part of this application, it can however be confirmed that any blasting activities will be limited and undertaken strictly in accordance with applicable legal requirements, prescribed blasting specifications, and recognised industry best practices. Appropriate mitigation and control measures will be implemented to minimise potential vibration and associated impacts.

The Applicant remains committed to conducting operations responsibly and in compliance with all conditions that may be imposed by the relevant authority.
