Good day

Please find attached notification that the Draft Basic Assessment Report (DBAR) and Environmental Management Programme Report (EMPR) for the proposed Mining Permit for the mining of aggregate, 4.9 ha, on a portion of Portion 15 on Farm Rietspruit nr 437, IS Msukaligwa Local Municipality, Mpumalanga Province is now available for your perusal. A electronic copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at [www.greenmined.com](http://www.greenmined.com) during the course of the day.

*By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application*

**Subject:** DBAR Ermelo MP 30/5/1/3/2/13080 MP - GERHARD SCHEEPERS TRUST  
**Attachments:** Notice DBAR.pdf

Good day

Please find attached notification that the Draft Basic Assessment Report (DBAR) and Environmental Management Programme Report (EMPR) for the proposed Mining Permit for the mining of aggregate, 4.9 ha, on a portion of Portion 15 on Farm Rietspruit nr 437, IS Msukaligwa Local Municipality, Mpumalanga Province is now available for your perusal. A electronic copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at [www.greenmined.com](http://www.greenmined.com) during the course of the day.

*By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application*

**Letter of Objection: SUBMISSION OF DRAFT BASIC ASSESSMENT REPORT FOR ENVIRONMENTAL AUTHORIZATION (BASIC ASSESSMENT PROCESS) FOR MINING PERMIT APPLICATION IN TERMS OF SECTION 27 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT NO 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS OF 2014 (AS AMENDED BY GNR 326 EFFECTIVE 7 APRIL 2017) BY INZALO CRUSHING AND AGGREGATES (PTY) LTD, FOR THE MINING OF STONE AGGREGATE/ GRAVEL, 4.9 HA ON A PORTION OF PORTION 15 ON THE FARM RIETSPRUIT NR 437, IS MSUKALIGWA LOCAL MUNICIPALITY, MPUMALANGA PROVINCE.**

Dear Madam/Sir

The purpose of this communication is to lodge our objection to mining permit applications currently being evaluated by the Department of Mineral Resources (DMR) in the Ermelo area.

Rietspruit Crushers and Construction ('**RC**') is a miner and supplier of aggregate gravel and sand products based in Ermelo and has been in operation for more than 40 years. We have a long and proud record of creating jobs and empowering the community and intend on doing so for another 40 years.

Rietspruit Crushers and Construction hereby register their objection to the mining permit applications made by Inzalo Crushing and Aggregates (Pty) Ltd for "Stone Aggregate and Gravel" on Portion 15 of the farm Rietspruit 437 IS, in the magisterial district of Ermelo, Mpumalanga. The proposed mining permit area is situated on the farm portion adjacent to Rietspruit Crushers and Construction mining licence area.

Rietspruit Crushers and Construction has registered as an interested and affected party with Greenmined (the environmental consultant used by Inzalo Crushing and Aggregates (Pty) Ltd) and has provided the applicant with our comments.

RC is not in favour of the application and hereby oppose it. The basis of our objection is as follows:

**1. Detailed Description of Activities, and Required Environmental/Specialist Studies:**

In the notification the applicant stated that they will not apply for a water use license in terms of section 40 of the National water Act, 36 of 1998, but will use water under a General Authorisation (GA). We disagree that a GA will be sufficient. A WUL will be required, due to the fact that the applicant's proposed pit, as per the general map provided, will be within 500m from the delineated riparian and/or wetland zone pertaining to a water body (be it a wetland, pan, perennial or non-perennial water course or the like). Note, that under the latest DWS requirement the 500m is not from the centre of the relevant water body, but from the edge of the delineated riparian and/or wetland zone as defined by the relevant regulation. On their own version, the applicants' activities are **130m** from a delineated wetland. Furthermore, the applicant's notification failed to indicate any maps or diagrams with the relevant/applicable buffer zones around the relevant water bodies and/or delineated features.

The above is a fatal flaw in their application.

The applicant has omitted the fact that a full Environmental Impact Assessment will have to be conducted due to the fact that the activities on the applicant's mining premises will trigger GNR 984 Listing Notice 2 Activity 21 IN ADDITON TO GNR 983 Activities 21, 22 and 35 listing Notice 1. The applicant did not state in the applicant's notification, that this process will be followed and that all the mandatory specialist studies will be conducted. This point emphasizes the fact that the applicant is failing to afford interested and affected parties the opportunity to provide informed comments to the application.

**2. Basic Assessment Report versus full EMP complete with EIA**

By virtue of the listed activities (i.e., mining as well as crushing and screening to be performed within 500m from the riparian zone/delineated wetland feature) and the proximity to the water bodies, the applicant failed to inform the authority that a full EIA with EMP needs to be performed and have in fact premised the application on a Basic Assessment Report. This is a fatal flaw, as this is the incorrect process and procedure.

We can only conclude that this is an attempt to bypass the more rigorous requirements under a full EIA with EMP, as well as the need for a WUL that also includes the required (i) and (j) water use aspects.

**3. Socio-economic Impact**

The necessary socio-economic impact studies have been omitted from the mining permit application. These studies should include:

- Social and labour impact study
- Marketing survey and analysis

A basic screening on the social and labour impacts have been performed, but this is clearly insufficient by virtue of a full EIA with EMP as well as the triggering of the listed activities under NEMA.

Failure to conduct such studies indicates that the applicant has not considered the financial feasibility of a second quarry in the Msukaligwa area, especially in close proximity to an already established quarry, and if such a quarry will be able to operate profitably in an already constrained market. The applicant also has not considered the effect that their quarry will have on Rietspruit Crushers and the potential job losses which Rietspruit Crushers will be facing. In all respects, the applicant has not considered the negative impact their operation will have on the local employment in the area.

It should be noted that Rietspruit Crushers has been mining and producing aggregates for over 40 years and over that timespan Rietspruit Crushers has experienced the full swing of the volatility in the market. The failure of the applicant to conduct and make these studies available, amplifies the point that that the applicant is not affording interested and affected parties the opportunity to comment on all their impacts.

It is lastly noted, and expanded upon below, that this is an abuse of the mining permit system, to by-pass the more rigorous requirements of a mining authorisation, and more specifically of the Social and Labour plan requirements. A full SLP study that included the aforementioned studies listed above, will clearly indicate that this project is not viable, and in fact will have a detrimental effect on the local economy. Instead of stimulating healthy competition, it allows the applicant an artificially reduced requirement (i.e., by abusing the mining permit system) to compete with an established mine and undermine the market and viability of an operation that has been operating for a few decades.

#### **4. Abusing of the mining permit system**

Further to the above, Rietspruit Crushers and Construction note the fact that this application is the 5<sup>th</sup> application for a mining permit in the specific area over the last eight years. This is and remains a clear abuse and violation of the intent behind the mining permit application of the Department of Mineral Resources and Energy.

As per feedback from previous objections lodged to the DMRE, the DMRE has indicated that it seeks to promote mining permits to allow NEW ENTRANTS (i.e., specifically emerging BEE entrants) easy access to the mining industry. The applicant, being Inzalo Crushing and Aggregates (Pty) Ltd, clearly is NOT a new BEE entrant, thus does not qualify under this policy. **The applicant is in fact an affiliate of B&E, as clearly stated in the applicant's documentation.** Attached please find correspondence from Inzalo which specifically cites them as c/o (care of B&E International); furthermore, you will notice that Mr C Weideman is a director of B&E as well as the consultants Greenmined Environmental. It is evident that B&E wish to extract aggregates from a 'borrow pit' or permit for road building purposes, by way of permit. This at the expense of the local businesses. Furthermore, the property has had 3 permits previously thus fully exhausting the legally allowed number on the same property.

As per the MRPDA, a mining permit is valid for the period specified in the permit which may not exceed a period of two years and may be renewed for three periods each of which may not exceed one year. This means a mining permit is generally applicable for 2-5 years.

A mining right/authorisation is granted for larger operations and longer periods (more than 5-25 years).

As per previous feedback received from the DMRE in regards to the referred policy, these new entrants will be expected to apply for a Mining Right/Authorisation after the initial Mining Permit has lapsed. However, and as mentioned, the above mining permit application is the fifth in a series of Mining Permits applied in the area (3 have been previously granted). We also point out that, prior to these mining permits, illegal sand mining operations were conducted on this area by the surface owner. It follows that the only instrument that could be legally contemplated on this property is a fully fledged mining right application.

From the historic facts and the current application before us and as stated elsewhere, RC can only conclude that the applicant is using the Mining Permit process in an attempt to by-pass the requirements of a mining authorisation, most notably a full Social and Labour Plan. The DMRE should only allow further mining authorisation applications in the specific area, i.e., full-fledged mining right application that are based upon proper exploration and feasibility studies,

Please note that the points raised here are not exhaustive.

Should the applicant persist in their attempts to obtain a Mining Permit application in the area, at least they should follow the correct process that will be applicable under a Mining Permit, that triggers the stated listed activities (i.e., full EIA with EMP as well as WUL).

Furthermore, we will continue to object and oppose any mining permit application made in an attempt to circumvent the requirements of a mining authorisation application.

We have also engaged on this matter with other stakeholders, including the Rietspruit Crushers and Construction Employee Trust, and the relevant employees' trade unions.

Yours sincerely

## **BACKGROUND INFORMATION DOCUMENT**

To whom it may concern

9 December 2021

**RE: NOTICE OF APPLICATION IN TERMS OF SECTION 27 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED 2017).**

### **BACKGROUND INFORMATION**

Inzalo Crushing and Aggregates (Pty) Ltd (hereinafter referred to as "the Applicant") applied for a mining permit to mine stone aggregate/ gravel on a portion of Portion 15 on Farm Rietspruit 437, IS, Msukaligwa Local Municipality, Mpumalanga Province.

### **SITE DESCRIPTION**

The proposed mining footprint will be 4.9 ha and will be developed over an undisturbed area of the farm. The mining method will make use of blasting in order to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles. The aggregate will be stockpiled until it is transported from site using tipper trucks. All mining related activities will be contained within the approved mining permit boundaries. The proposed GPS coordinates of the area applied for are as listed below.

### LEGAL COMPLIANCE

The proposed project triggers the following listed activities in terms of the National Environmental Management Act, 1998 (Act 107 of 1998) and the Environmental Impact Assessment Regulations 2014 (as amended 2017) and therefore requires an environmental impact assessment (EIA) (basic assessment process) that assess project

## BACKGROUND INFORMATION DOCUMENT

specific environmental impacts and alternatives, consider public input, and propose mitigation measures, to ultimately culminate in an environmental management programme that informs the competent authority (Department of Mineral Resources and Energy ) when considering the environmental authorisation:

**GNR 327 Listing Notice 1 of 2017 Activity 21:**

*Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002), including –*

- a) *associated infrastructure, structures and earthworks, directly related to the extraction of a mineral resource; or*
- b) *the primary processing of a mineral resource including winning, extraction, classifying, concentrating, crushing, screening or washing.*

*but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource in which case activity 6 in Listing Notice 2 applies.*

**GNR 327 Listing Notice 1 of 2017 Activity 27:**

*The clearance of an area of 1 hectares or more, but less than 20 hectares of indigenous vegetation, except where such clearance of indigenous vegetation is required for—*

*(i) the undertaking of a linear activity; or*

*(ii) maintenance purposes undertaken in accordance with a maintenance management plan.*

**GNR 327 Listing Notice 1 of 2017 Activity 28:**

*Residential, mixed, retail, commercial, industrial or institutional developments where such land was used for agriculture, game farming, equestrian purposes or afforestation on or after 01 April 1998 and where such development:*

*(i) will occur inside an urban area, where the total land to be developed is bigger than 5 hectares; or*

*(ii) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare;*

*excluding where such land has already been developed for residential, mixed, retail, commercial, industrial or institutional purposes.*

**GNR 327 Listing Notice 1 of 2017 Activity 35:**

*The expansion of residential, retail, recreational, tourism, commercial or institutional developments on land previously used for mining or heavy industrial purposes, where the increased development footprint will exceed 1 000 square meters; excluding—*

*(i) where such land has been remediated in terms of part 8 of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) in which case the National Environmental Management: Waste Act, 2008 applies; or*

## **BACKGROUND INFORMATION DOCUMENT**

(ii) where an environmental authorisation has been obtained for the decommissioning of such a mine or industry in terms of this Notice or any previous NEMA notice; or

(iii) where a closure certificate has been issued in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) for such land.

• GNR 327 Listing Notice 3 of 2017 Activity 4(f)(i)(ee);

*Development of road wider than 4 metres with reserve less than 13.5 metres, in Mpumalanga geographical area, outside an urban area and within a critical biodiversity area as identified in systematic biodiversity plans adopted by the competent authority or in bioregional plans;*

### **OTHER LEGISLATION TRIGGERED BY THE PROPOSED PROJECT:**

An application for a Mining Permit in terms of Section 27 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) was submitted to the Department of Mineral Resources and Energy – Mpumalanga Province.

### **PROJECT DESCRIPTION**

The Applicant applied for a mining permit to mine stone aggregate/ gravel on a portion of Portion 15 on Farm Rietspruit nr 437, IS, Msukaligwa Local Municipality, Mpumalanga Province.

The proposed mining footprint will be 4.9 ha and will be developed over an undisturbed area of the farm. The mining method will make use of blasting in order to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles. The aggregate will be stockpiled until it is transported from site using tipper trucks. All mining related activities will be contained within the approved mining permit boundaries.

The applicant intends to win material from the area for at least 2 years with a possible extension of another 3 years. The aggregate to be removed from the quarry will be used local construction and building projects in the vicinity. The proposed quarry will therefore contribute to the upgrading / maintenance of road infrastructure and building contracts in and around the Ermelo area.

The mining activities will consist out of the following:

- Stripping and stockpiling of topsoil;
- Blasting
- Excavating;

## **BACKGROUND INFORMATION DOCUMENT**

- ✦ Crushing & Screening;
- ✦ Stockpiling and transporting;
- ✦ Sloping and landscaping upon closure of the site; and
- ✦ Replacing the topsoil and vegetation the disturbed area.

The mining site will contain the following:

- ✦ Drilling equipment;
- ✦ Excavating equipment;
- ✦ Earth moving equipment;
- ✦ Static crushing and screening plants
- ✦ Access Roads;
- ✦ Site Office (Containers);
- ✦ Site vehicles;
- ✦ Parking area for visitors and site vehicles;
- ✦ Vehicle service area;
- ✦ Wash bay;
- ✦ Workshop (Containers);
- ✦ Salvage Yard;
- ✦ Bunded diesel and oil storage facilities;
- ✦ Generator on bunded area;
- ✦ Ablution Facilities (Chemical Toilets);
- ✦ Weigh Bridge; and
- ✦ Demarcated general and hazardous waste area.

### **ACCESS ROUTE:**

Access to the proposed mining area will be via the R39, making use of the new internal/haul roads to access the mining area. Haul roads will be extended as the open cast mining progress, and will be rehabilitated as part of the final reinstatement of the area. Trucks delivering the materials to the destinations will take the R39 provincial route.

### **WATER USE:**

Any water required for the implementation of the project will be bought and transported to site.

### **ELECTRICITY:**

Generators will be used to power the plant on site, if a connection to the existing power infrastructure cannot be secured. Mobile containers will be placed inside the mining footprint that will serve as offices and storage units. A

## **BACKGROUND INFORMATION DOCUMENT**

weighbridge will be added to the site and the crushing and screening plant will operate within a designated processing area (within the 5 ha permit footprint).

### **BRIEF SITE DESCRIPTION**

#### **GEOLOGY:**

The geology of the study area is restricted to vertic clay soils derived from dolerite that is intrusive in the Karoo sediments of the Madzaringwe Formation in the north and the Volksrust Formation and the Adelaide Subgroup in the south. Dominant land type Ca, while Ea land type is of subordinate importance.

#### **HYDROLOGY:**

The proposed mining area falls within the C11F quaternary catchment which falls within the upper reaches of the Vaal River primary catchment that is situated in the Upper Vaal Water Management Area which is managed by the Department of Water and Sanitation (DWS). No open watercourses or drainage line is located in close proximity of the site according to the National Wetlands and NFEPA map of SANBI. However, there is an artificial wetland about 522m of the earmarked area which causes a high risk for mining and should be regarded as a no go zone.

#### **FAUNA AND FLORA:**

According to Mucina and Rutherford (2012) the area comprises of undulating grassland plains, with small scattered patches of dolerite outcrops in areas. The vegetation is comprised of a short closed grassland cover, largely dominated by a dense *Themeda triandra* sward, often severely grazed to form a short lawn.

#### **LAND USE:**

The project area is located in the jurisdiction of the Msukaligwa Local Municipality, with Ermelo being the nearest town. The land use of the earmarked property is undisturbed area and the surrounding properties are mainly used for a variety of mixed agricultural purposes as well as mining and industrial purposes.

#### **AIR AND NOISE QUALITY:**

The wind patterns in Ermelo are somewhat influenced by seasonal variations. According to worldweatheronline.com strong winds blow between August and December with an average of 12kmph and slowly decreases 7.5kmph between January and June. The ambient noise levels of the surrounding area are low with the noise levels of the greater surrounding area are low representing that of a rural area, with the noise levels of the study area (immediate surroundings) impacted by farming operations and the R39.

## BACKGROUND INFORMATION DOCUMENT

### HERITAGE:

The proposed mining footprint extends into an undisturbed area. According to SAHRIS, the PalaeoSensitivity Maps shows that the area has an insignificant/ zero sensitivity (please see map below). However, it is proposed that a chance-find protocol be incorporated in the EMPR to be adhered to for the duration of the site establishment, operational- and decommissioning phases.

Figure 2: Map showing the paleontological sensitive areas (image obtained from <https://sahris.sahra.org.za/map/palaeo>)

### **FINAL REHABILITATION**

Upon closure of the mining operation the entire footprint area will be rehabilitated so as to allow the affected area to return to agricultural use. At this stage the following baseline rehabilitation actions are proposed from which a detailed closure plan will be developed:

- ▣ Rehabilitation of all the disturbed surface areas shall entail landscaping, levelling, sloping, top dressing, land preparation, seeding (if required), and weed / alien clearing.
- ▣ All infrastructures, equipment, and other items used during the mining period will be removed from the site in accordance with section 44 of the MPRDA, 2002.
- ▣ Waste material of any description, including receptacles, scrap, rubble and tyres, will be removed entirely from the mining area and disposed of at a recognized landfill facility. It will not be permitted to be buried or burned on the site.

## **BACKGROUND INFORMATION DOCUMENT**

- The rehabilitation area will be cleared of weeds and invader plant species. Priority will be given to species regarded as Category 1a and 1b invasive species in terms of NEM:BA (National Environmental Management: Biodiversity Act 10 of 2004 and regulations applicable thereto).
- Final rehabilitation shall be completed within a period specified by the Regional Manager.

### **APPLICATION FOR CLOSURE**

Once the full mining area was rehabilitated the mining permit holder will submit a closure application to the Department of Mineral Resources and Energy in accordance with section 43(4) of the MPRDA, 2002 that states: "An application for a closure certificate must be made to the Regional Manager in whose region the land in question is situated within 180 days of the occurrence of the lapsing, abandonment, cancellation, cessation, relinquishment or completion contemplated in subsection (3) and must be accompanied by the prescribed environmental risk report". The Closure Application will be submitted in terms of Regulation 62 of the MPRDA, 2002, and Government Notice 940 of NEMA, 1998.

### **PUBLIC INVOLVEMENT**

This document is to inform you about the proposed activity and to determine whether there are any concerns or objections from interested and affected parties (I&AP's) that need to be considered.

As interested and affected party you are kindly requested to complete the comments form and give any comment/concern or input with regard to the current land use of the area, the environment as well as socio-economic conditions that you feel might be affected by the proposed activity. When submitting response please provide suggestions to mitigate the anticipated impact of each identified activity.

Please contact Sonette Smit at the contact details as presented in the letterhead or at [comments@greenmined.co.za](mailto:comments@greenmined.co.za) through any means should you need more information, have additional language requirements, have concerns or comments that need to be considered or if you want to be registered as an interested and/or affected party and would like to receive a copy of the Draft Basic Assessment (DBAR) on or before 31 January 2021. If we do not receive any comments from you on or before 31 January 2021, it will be accepted that you do not have any objections/comments with regard to the project and do not require any further documentation.

A register of interested and affected parties (I&AP's) will be opened and maintained containing the names, contact details and address of all persons who have submitted written comments, attended meetings or have in writing requested to be registered and all organs of state which have jurisdiction in respect of the activity. Please note that only registered I&AP's and stakeholders will be entitled to comment on reports and plans to be submitted to the

## **BACKGROUND INFORMATION DOCUMENT**

Department provided that the party provide its name, contact details and address and discloses any direct business, financial, personal or other interest which he/she may have in the approval or refusal of the applications.

Please use MP 30/5/1/3/2/13080 MP as the reference when submitting comments.

The Draft Basic Assessment Report (DBAR) will be submitted to the Department of Mineral Resources and Energy – Mpumalanga (DMRE) for review purposes. This report will also be made available to the public for a 30 days review period. An electronic copy of the report will be published on the Greenmined Environmental website ([www.greenmined.com](http://www.greenmined.com)). All registered I&AP's and stakeholders will be notified of the commenting period in advance as above.

The DBAR will then be updated to reflect the comments received during the public commenting period. Thereafter, the Final Basic Assessment Report (FBAR) will be submitted to DMRE for its consideration as part of the authorization process in terms of the NEMA, 2014 regulations (as amended 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal.

Dear Sonette

**Your notice of application in terms of section 27 of the Minerals and Petroleum Resources Development Act for Inzalo Crushing and Aggregates (Pty) Ltd – MP 30/5/1/3/2/13080 MP bears reference.**

Rietspruit Crushers, is a miner and supplier of sand and aggregate products based in Ermelo and has been in operation for more than 40 years. We have a long and proud record of creating jobs and empowering the community and intend on doing so for another 40 years.

Rietspruit Crushers would like to officially register as an interested and affected party and lodge our objection to the mining permit applications made by Inzalo Crusing and Aggregates (Pty) Ltd for "Dolerite, Gravel and Sand" on Portion 15 of the farm Rietspruit 437 IS, in the magisterial district of Ermelo, Mpumalanga. The proposed mining permit area is situated on the farm portion adjacent to Rietspruit Crushers mining licence area.

We are not in favour of your application and will oppose it. The basis of our objection is as follows:

## **1. Environmental Studies:**

In your notification you stated that the proposed project triggers listed activities and therefore requires full Environmental Impact Assessment (EIA) to be conducted. We agree with this point however, further in the document you kept referring to a draft Basic Assessment that will compiled for this project. Due to the listed activities that will be triggered a Basic Assessment will not be sufficient and a full EIA will need to be compiled. The full EIA which is required will be based on specialist studies that will have to be completed. In your Background Information Document, you do not mention what critical specialist studies will be conducted. In these studies, we are supposed to see what the impacts of your mine will have on the following categories:

- Air Quality
- Archaeology
- Surface Water
- Groundwater
- Ecology
- Land use & planning
- Waste management
- Economy
- Noise
- Soil

FK

- Visual
- Quality of life
- Nuisance

In your notification you do not state that you will apply for a water use license in terms of section 40 of the National water Act, 36 of 1998. We find this to be of concern due to the fact that your proposed pit will be within 500m from the delineated riparian and/or wetland zone pertaining to a water body (be it a wetland, pan, perennial or non-perennial water course or the like). Note, that under the latest DWS requirement the 500m is not from the centre of the relevant water body, but from the edge of the delineated riparian and/or wetland zone as defined by the relevant regulation. However, your notification omits the following critical studies which forms part of the application for a water use license. These studies include:

- Wetland delineation study
- Biodiversity and Ecology study
- Soil Study
- Geohydrological study

As interested and affected parties Rietspruit Crushers require to see what impacts have been identified by all the necessary specialist studies which you should have conducted and how will these impacts be addressed. In the absence of any specialist studies, Rietspruit Crushers will be lead to the conclusion that the impact of the mining and operational activities will be detrimental to the environment and also that the guidelines for applying for a water use license was not followed which will cause Rietspruit Crushers to further object to this application for mining permit. In your notification you failed to indicate any maps or diagrams indicating the relevant buffer zones around the relevant water bodies. Therefore, Rietspruit Crushers can only deduce that the required mandatory specialist studies have not been conducted therefore Rietspruit Crushers is not awarded the opportunity to comment on the impacts of the mine and what mitigation measures have or are proposed to minimise and reduce the impacts.

You have also omitted the fact that a full Environmental Impact Assessment will have to be conducted due to the fact that the activities on your mining premises will trigger GNR 984 Listing Notice 2 Activity 21 IN ADDITON TO GNR 983 Activities 21, 22 and 35 listing Notice 1. You do not state in the notification of Inzalo Crushing and Aggregates (Pty) Ltd's intention to apply for a mining permit that this process will be followed and that all the mandatory specialist studies will be conducted. This point also emphasizes the fact that you are failing to provided Rietspruit Crushers the opportunity to provide informed comments on your application.

## **2. Socio-economic Impact**

It is clear to Rietspruit Crusher that the necessary socio-economic impact studies have been omitted from the mining permit application. These studies should include:

- Social and labour impact study
- Marketing survey and analysis

Failure to conduct such studies indicates that you have not adequately considered the financial feasibility of a second quarry in the Msukwalikwa area, especially in close proximity to an already

established quarry, and if such a quarry will be able to operate profitably in an already constrained market. It also indicates that you have not considered the effect that a second quarry will have on Rietspruit Crushers and the potential job losses which Rietspruit Crushers may thenface as a consequence. Therefore, you have not considered the negative impact which your quarry will have on the local employment in the area.

It should be noted that Rietspruit Crushers has been mining and producing aggregates for over 40 years and over that span Rietspruit Crushers has experienced the full swing of the volatility in the market. Despite the necessary socio-economic studies not being conducted or the failure to even consider conducting these studies, this amplifies the point that you have not taken due care in considering the market in which you want to operate and that you are ill-informed on the sustainability of a second quarry in Ermelo.

### **3. Abusing of the mining permit system**

Further to Rietspruit Crushers' objection is the fact that you are the 5<sup>th</sup> application for a mining permit in the last ten years on this portion. This is a clear abuse and violation of the intent behind the mining permit application of the Department of Mineral Rights. A mining permit is valid for the period specified in the permit which may not exceed a period of two years and may be renewed for three periods each of which may not exceed one year. A mining right is granted for larger operations and longer periods (more than 2 years). For what you are planning it is clear that you do not want to apply for a full mining right and that you are attempting to by-pass the requirements by applying for a mining permit. This indicates that you do not want to compete on a level playing field with Rietspruit Crushers and comply with all the necessary regulations which you would need to comply with when you have a mining right. This is improper.

The points raised here are not exhaustive. Even so we feel it is sufficient reason for us to oppose your application in its current form. Should there be any change and/or amendment to your documentation arising from this process, please forward it to us. We would appreciate your formal acknowledgement of receipt of our comments as well as any feedback pertaining to it within 10 working days.

Kind regards

---

Rynard Brits (Mine Manager)

12 May 2022

Rietspruit Crushers (Pty) Ltd  
Farm Rietspruit Ermelo  
Amersfoort Road  
Ermelo  
2350

By email: [marie@rietspruitcrushers.co.za](mailto:marie@rietspruitcrushers.co.za);

Dear Sir,

**RE NOTICE OF APPLICATION IN TERMS OF SECTION 27 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT 28 OF 2002 (“MPRDA”) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT 107 OF 1998 (“NEMA”) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED 2017)**

We refer to the above matter and your letter dated 6 May 2022. We take note of the contents of your abovementioned letter, which content is quoted in italics below, with our response to your objections on a point-by-point basis.

*The purpose of this communication is to lodge our objection to mining permit applications currently being evaluated by the Department of Mineral Resources (DMR) in the Ermelo area.*

*Rietspruit Crushers and Construction (‘RC’) is a miner and supplier of aggregate gravel and sand products based in Ermelo and has been in operation for more than 40 years. We have a long and proud record of creating jobs and empowering the community and intend on doing so for another 40 years.*

*Rietspruit Crushers and Construction hereby register their objection to the mining permit applications made by Inzalo Crushing and Aggregates (Pty) Ltd for “Stone Aggregate and Gravel” on Portion 15 of the farm Rietspruit 437 IS, in the magisterial district of Ermelo, Mpumalanga. The proposed mining permit area is situated on the farm portion adjacent to Rietspruit Crushers and Construction mining licence area.*

**the goal isn't to live forever, it is to protect a planet that will**

Rietspruit Crushers and Construction has registered as an interested and affected party with Greenmined (the environmental consultant used by Inzalo Crushing and Aggregates (Pty) Ltd) and has provided the applicant with our comments.

RC is not in favour of the application and hereby oppose it. The basis of our objection is as follows:

- Objection noted, please also note the Department is referred to as the Department of Mineral Resources and Energy (DMRE)

**1. Detailed Description of Activities and Required Environmental/Specialist Studies:**

*In the notification the applicant stated that they will not apply for a water use license in terms of section 40 of the National water Act, 36 of 1998, but will use water under a General Authorisation (GA). We disagree that a GA will be sufficient. A WUL will be required, due to the fact that the applicant's proposed pit, as per the general map provided, will be within 500m from the delineated riparian and/or wetland zone pertaining to a water body (be it a wetland, pan, perennial or non-perennial water course or the like). Note, that under the latest DWS requirement the 500m is not from the centre of the relevant water body, but from the edge of the delineated riparian and/or wetland zone as defined by the relevant regulation. On their own version, the applicants' activities are **130m** from a delineated wetland. Furthermore, the applicant's notification failed to indicate any maps or diagrams with the relevant/applicable buffer zones around the relevant water bodies and/or delineated features.*

*The above is a fatal flaw in their application.*

- We take note of your comments above, please keep in mind that the Department of Water and Sanitation is the competent authority in this regard and said department will confirm whether a water use license is required, during their review period.
- Please note that a background information document serves as an information document to invite parties to register as interested and affected parties. The effects and impacts of the proposed activity as well as conducted studies are only assessed during the Draft Basic Assessment phase. All interested and affected parties were afforded ample opportunity to comment on the proposed activity and its possible impacts during the DBAR phase.
- As per the DBAR the proposed mining area falls within the C11F quaternary catchment which falls within the upper reaches of the Vaal River primary catchment that is situated in the Upper Vaal Water

**the goal isn't to live forever, it is to protect a planet that will**

Management Area which is managed by the Department of Water and Sanitation (DWS). A small wetland system is located 130m from the southern border of the site. According to the Risk Assessment conducted by DPR Ecologist, - mining within close proximity of the valley-bottom wetland is anticipated to have a low risk as long as a 100-meter buffer between the edge of the wetland as delineated and the quarry excavations, stockpile areas, chemical toilets, wastes and any hazardous materials (diesel, etc.) are maintained. A small artificial dam and wetland area forming in previous excavations occur approximately 450 meters to the west of the site. These artificial wetland areas also fall within a separate catchment, upstream of the site and therefore the proposed mining area will not be able to have any effect on these artificial wetland areas. Therefore, proposed project does require a General Authorisation in terms of Section 39 of the National Water Act, 1998 (Act No 36 of 1998) which will be submitted to DWS by the applicant prior to commencement of mining activities on this application.

Please note that the specialist study containing buffer zones as indicated in the DBAR was attached as Appendix M Wetland Assessment Report.

*The applicant has omitted the fact that a full Environmental Impact Assessment will have to be conducted due to the fact that the activities on the applicant's mining premises will trigger GNR 984 Listing Notice 2 Activity 21 IN ADDITION TO GNR 983 Activities 21, 22 and 35 listing Notice 1. The applicant did not state in the applicant's notification, that this process will be followed and that all the mandatory specialist studies will be conducted. This point emphasizes the fact that the applicant is failing to afford interested and affected parties the opportunity to provide informed comments to the application.*

- The Background Information Document clearly stipulates that provision will be made for the basic assessment process that assess project specific environmental impacts and alternatives, in line with the relevant legislation and regulations, consider public input and propose mitigation measures to ultimately culminate in an environmental management programme that provides the competent authority (the Department of Mineral Resources and Energy) with sufficient information when considering the environmental authorisation.
- Again, we reiterate that the Background Information Document merely serves as a means to provide background information for the purpose of the first phase of this proposed project. The effects of the

**the goal isn't to live forever, it is to protect a planet that will**

impacts of the proposed activity were assessed during the Draft Basic Assessment phase. Any further studies proposed during the initial phase were then conducted should it be found applicable by the specialist in the particular field of expertise.

- The proposed project triggers five listed activities in terms of the National Environmental Management Act (Act 107 of 1998) (hereinafter referred to as “NEMA”) and the Environmental Impact Assessment Regulations 2014 (as amended 2017) (hereinafter referred to as the “EIA Regulations”). These listed activities are: GNR 327 Listing Notice 1 of 2017 Activity 21, GNR 327 Listing Notice 1 of 2017 Activity 27, GNR 327 Listing Notice 1 of 2017 Activity 28, GNR Listing Notice 1 of 2017 Activity 35 and GNR Listing Notice 1 of 2017 Activity 4(f)(i)(ee).
- Furthermore, you state that the proposed project will trigger Listing Notice 2 Activity 21. **This is incorrect, considering that Listing Notice 2 Activity 21 has been repealed.**

## **2. Basic Assessment Report versus full EMP complete with EIA**

*By virtue of the listed activities (i.e., mining as well as crushing and screening to be performed within 500m from the riparian zone/delineated wetland feature) and the proximity to the water bodies, the applicant failed to inform the authority that a full EIA with EMP needs to be performed and have in fact premised the application on a Basic Assessment Report. This is a fatal flaw, as this is the incorrect process and procedure.*

*We can only conclude that this is an attempt to bypass the more rigorous requirements under a full EIA with EMP, as well as the need for a WUL that also includes the required (i) and (j) water use aspects.*

- The application was made in accordance with the identified listing notices, and therefore no need exists to burden the competent authority with the magnitude of a full EIA with EMP thereto.
- This application falls within the ambit of Listing Notice 1 Activity 21, as revised on 11 June 2021, which substituted activity reads as follows:

“21. Any activity, including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other

**the goal isn't to live forever, it is to protect a planet that will**

applicable activity as contained in this Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.”

- It should therefore be clear that the listing notices triggered as part of this application only requires a Basic Assessment to be conducted, which would have rendered a full EIA application superfluous in terms of expenditure and a waste of departmental resources, especially in light thereof that Listing Notice 2 Activity 21 has been repealed.
- Your allegations contained in your objections that this application is based on fatal flaws is therefore unfounded and should be disregarded as such.

### **3. Socio-economic Impact**

*The necessary socio-economic impact studies have been omitted from the mining permit application. These studies should include:*

- *Social and labour impact study*
- *Marketing survey and analysis*

*A basic screening on the social and labour impacts have been performed, but this is clearly insufficient by virtue of a full EIA with EMP as well as the triggering of the listed activities under NEMA.*

*Failure to conduct such studies indicates that the applicant has not considered the financial feasibility of a second quarry in the Msukaligwa area, especially in close proximity to an already established quarry, and if such a quarry will be able to operate profitably in an already constrained market. The applicant also has not considered the effect that their quarry will have on Rietspruit Crushers and the potential job losses which Rietspruit Crushers will be facing. In all respects, the applicant has not considered the negative impact their operation will have on the local employment in the area.*

*It should be noted that Rietspruit Crushers has been mining and producing aggregates for over 40 years and over that timespan Rietspruit Crushers has experienced the full swing of the volatility in the market. The failure of the applicant to conduct and make these studies available, amplifies the point that that the applicant is not affording interested and affected parties the opportunity to comment on all their impacts.*

**the goal isn't to live forever, it is to protect a planet that will**

*It is lastly noted, and expanded upon below, that this is an abuse of the mining permit system, to bypass the more rigorous requirements of a mining authorisation, and more specifically of the Social and Labour plan requirements. A full SLP study that included the aforementioned studies listed above, will clearly indicate that this project is not viable, and in fact will have a detrimental effect on the local economy. Instead of stimulating healthy competition, it allows the applicant an artificially reduced requirement (i.e., by abusing the mining permit system) to compete with an established mine and undermine the market and viability of an operation that has been operating for a few decades.*

- Your comments with regards to socio-economic impacts are noted, however, we disagree with your stance that this proposed project will have a detrimental impact on the local economy. In the event that this application is granted, this operation will not only increase employment opportunities in the area, which area suffers from extreme unemployment but will also boost the local economy.
- It is very clear from the objections that Rietspruit Crushers may well wish to maintain the existing monopoly in terms of mining & / or quarrying activities in the Ermelo area, with specific reference to the aggregate & building material production and supply market, which is in direct contradiction to the objectives of the Mineral and Petroleum Resources Development Act, 2002 (as amended), as well as the provisions of the Competition Act, 1998 (as amended).
- It is also clear from your objections that Rietspruit Crushers has an existing mining right, which we assume is valid and compliant. RC should thus be aware that the legislative provisions only require a mining right application to be accompanied by a Social and Labour Plan, therefore, in the premises, a Social and Labour Plan would have been superfluous as part of this mining permit application.
- It should be noted that the applicant is well aware of the requirements & differences in requirements, for a mining permit and a mining right.

#### **4. Abusing of the mining permit system**

*Further to the above, Rietspruit Crushers and Construction note the fact that this application is the 5<sup>th</sup> application for a mining permit in the specific area over the last eight years. This is and remains a clear*

**the goal isn't to live forever, it is to protect a planet that will**

*abuse and violation of the intent behind the mining permit application of the Department of Mineral Resources and Energy.*

- Although we cannot comment on other mining permit applications applied for within the area, it should be noted, that the area lends itself to prospecting and mining, and the MPRDA is clear that mining should be promoted. Inzalo Crushing and Aggregates (Pty) Ltd has no intention of mining in the area for a period longer than five years and in an area above its approved area, if this application is approved.

*As per feedback from previous objections lodged to the DMRE, the DMRE has indicated that it seeks to promote mining permits to allow NEW ENTRANTS (i.e., specifically emerging BEE entrants) easy access to the mining industry. The applicant, being Inzalo Crushing and Aggregates (Pty) Ltd, clearly is NOT a new BEE entrant, and thus does not qualify under this policy. **The applicant is in fact an affiliate of B&E, as clearly stated in the applicant's documentation.***

- Inzalo Crushing and Aggregates (Pty) Ltd comply with all the relevant BEE provisions as prescribed in the MPRDA, the Mining Charter and all other relevant empowerment provisions. Once again it is evident from the objections that RC is against this application solely due to the monopoly that it wishes to maintain within the area.

*Attached please find correspondence from Inzalo which specifically cites them as c/o (care of B&E International); furthermore, you will notice that Mr C Weideman is a director of B&E as well as the consultants Greenmined Environmental. It is evident that B&E wish to extract aggregates from a 'borrow pit' or permit for road building purposes, by way of permit. This at the expense of the local businesses. Furthermore, the property has had 3 permits previously thus fully exhausting the legally allowed number on the same property.*

- Kindly note that Inzalo and B&E specialize in the mining of aggregate, crushing and the provision of material for road building & construction purposes. The objections are contradictory as it states that this application, if approved, will have a detrimental impact on the employment and economy of the area, but, on the other hand, it is inferred that the purpose of the permit is for road building purposes, which will not only boost the local economy and maintain the local infrastructure, but also ensure an increase in local employment for the next 5-years.

**the goal isn't to live forever, it is to protect a planet that will**

- We take note of your further comments and would like to request you to kindly provide us with the documentation in which the “legally allowed number of mining permits” are prescribed, as well as the formal policy published by the DMRE in terms of new entrants.

*As per the MRPDA, a mining permit is valid for the period specified in the permit which may not exceed a period of two years and may be renewed for three periods each of which may not exceed one year. This means a mining permit is generally applicable for 2-5 years.*

*A mining right/authorisation is granted for larger operations and longer periods (more than 5-25 years).*

*As per previous feedback received from the DMRE in regards to the referred policy, these new entrants will be expected to apply for a Mining Right/Authorisation after the initial Mining Permit has lapsed. However, and as mentioned, the above mining permit application is the fifth in a series of Mining Permits applied in the area (3 have been previously granted). We also point out that, prior to these mining permits, illegal sand mining operations were conducted on this area by the surface owner. It follows that the only instrument that could be legally contemplated on this property is a fully-fledged mining right application.*

- We take note of your comments, but please refrain from making assumptions or allegations. Inzalo cannot be held responsible for previous illegal mining activities which were conducted in the area, by surface owners, probably many years ago. This application indeed demonstrates Inzalo’s commitment to conducting legal mining activities.
- Kindly be advised that Inzalo will be guided by the competent authority in this regard, as you do not have the authority to instruct the application of a “fully-fledged mining right”.

*From the historic facts and the current application before us and as stated elsewhere, RC can only conclude that the applicant is using the Mining Permit process in an attempt to by-pass the requirements of a mining authorisation, most notably a full Social and Labour Plan. The DMRE should only allow further mining authorisation applications in the specific area, i.e., full-fledged mining right application that are based upon proper exploration and feasibility studies,*

*Please note that the points raised here are not exhaustive.*

**the goal isn't to live forever, it is to protect a planet that will**

*Should the applicant persist in their attempts to obtain a Mining Permit application in the area, at least they should follow the correct process that will be applicable under a Mining Permit, that triggers the stated listed activities (i.e., full EIA with EMP as well as WUL).*

- This application falls within the ambit of Listing Notice 1 Activity 21, as revised on 11 June 2021, which substituted activity reads as follows:

“21. Any activity, including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as contained in this Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.”

- Not only is the view of the applicable legislative provisions incorrect, but you are basing the objections on a repealed listing notice.

*Furthermore, we will continue to object and oppose any mining permit application made in an attempt to circumvent the requirements of a mining authorisation application.*

*We have also engaged on this matter with other stakeholders, including the Rietspruit Crushers and Construction Employee Trust, and the relevant employees' trade unions.*

- We take note of your further comments, all comments received as well as our response will be incorporated in the Final Basic Assessment Report to be submitted to DMRE for their consideration.
- . Kindly note that we will be guided by the competent authority in terms of any further matters.
- We thank you for your participation in this process and will keep you informed of the progress of this application.

We trust you will find this in order. Please do not hesitate to contact us in the event of any uncertainties.

  
Kind Regards,

Good day

Please find attached notification that the Draft Basic Assessment Report (DBAR) and Environmental Management Programme Report (EMPR) for the proposed Mining Permit for the mining of aggregate, 4.9 ha, on a portion of Portion 15 on Farm Rietspruit nr 437, IS Msukaligwa Local Municipality, Mpumalanga Province is now available for your perusal. A electronic copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at [www.greenmined.com](http://www.greenmined.com) during the course of the day.

*By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application*

**Attachments:** Notice DBAR.pdf

Good day

Please find attached notification that the Draft Basic Assessment Report (DBAR) and Environmental Management Programme Report (EMPR) for the proposed Mining Permit for the mining of aggregate, 4.9 ha, on a portion of Portion 15 on Farm Rietspruit nr 437, IS Msukaligwa Local Municipality, Mpumalanga Province is now available for your perusal. A electronic copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at [www.greenmined.com](http://www.greenmined.com) during the course of the day.

*By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application*

Good day

Please find attached notification that the Draft Basic Assessment Report (DBAR) and Environmental Management Programme Report (EMPR) for the proposed Mining Permit for the mining of aggregate, 4.9 ha, on a portion of Portion 15 on Farm Rietspruit nr 437, IS Msukaligwa Local Municipality, Mpumalanga Province is now available for your perusal. A electronic copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at [www.greenmined.com](http://www.greenmined.com) during the course of the day.

*By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application*

Kind Regards/Vriendelike Groete
