**LAND CLAIM IN TERMS OF THE RESTITUTION OF LAND RIGHTS
AMENDMENT ACT 2014 (ACT NO 15 OF 2014).**

**PROPERTY DESCRIPTION: PTN OF PTN 7 OF THE FARM ROODEKRANS 457 IS
REFERENCE NUMBER: R6/142/278/115058**

We refer to the land claim enquiry on the **3rd of July 2024** on land claims lodged with the Department.

Please note that there is a new land claim lodged against the farm based on the Restitution, the Restitution of Land Rights Amendment Act, (Act no 15 of 2014).

The Commission is empowered to investigate all land claims and where applicable issues a Government Gazette to interested and affected parties if such land claims has been approved as valid claims.

The above claim was lodged in terms of the Restitution of Land Rights Amendment Act, 2014 (Act No 15 of 2014) ("the Amendment Act") which, amongst others, reopened the lodgement of claims for a period of five years.

The validity of the Amendment Act was challenged in the Constitutional Court.

The Constitutional Court found the Amendment Act to be invalid because of the failure of Parliament to facilitate public involvement as required by the Constitution.

The Amendment Act ceased to be law on 28 July 2016 and the Commission is no longer allowed to accept lodgement of new claims from that date.

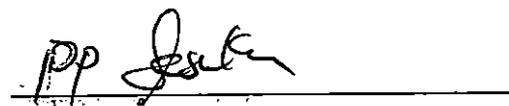

The Constitutional Court ordered that the claims that were lodged between 1 July 2014 and 27 July 2016 are validly lodged, but it interdicted the Commission from processing those claims until the Commission has finalised the claims lodged by 31 December 1998 or until Parliament passes a new law providing for the re-opening of lodgement of land claims. Parliament was given until 27 July 2018 to pass such a law.

The Commission will therefore not be processing these new claims until it finishes claims lodged by 31 December 1998 or until Parliament passes a new law providing for re-opening of lodgement of claims.

We apologise for the inconvenience caused.

Please quote the claim reference number in all correspondence with the Commission.

Yours sincerely,

MR E.S. NKOSI

Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), and the Environmental Impact Assessment Regulations 2014 (as amended), that Inzalo Crushing and Aggregates (Pty) Ltd applied for:

- environmental authorization to mine aggregate from a portion of Portion 7 of the farm Roodekrans 457, Administrative district IS, Mpumalanga Province

NOTICE OF MINING PERMIT APPLICATION AS WELL AS ENVIRONMENTAL AUTHORISATION APPLICATION

Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), and the Environmental Impact Assessment Regulations 2014 (as amended), that Inzalo Crushing and Aggregates (Pty) Ltd applied for:

- environmental authorization to mine aggregate from a portion of Portion 7 of the farm Roodekrans 457, Administrative district IS, Mpumalanga Province
- environmental authorization in terms of regulation 16(1) of the EIA Regulations to stockpile material on the above-mentioned property.
- a mining permit in terms of Section 27 of the MPRDA;

The proposed mining footprint will be 4.9 ha and will be developed over an undisturbed area of the farm. The mining method will make use of blasting in order to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles. The aggregate will be stockpiled until it is transported from site using tipper trucks. All mining related activities will be contained within the approved mining permit boundaries.

In addition to the mining permit application, the applicant proposes to establish a 13.6 ha area for stockpiling and crushing of the material mined from the quarry on the same property. The material will be transported from the quarry into the stockpile area where it will be screened/crushed and stockpiled until removed from site.

The proposed two projects trigger the following listed activities in terms of NEMA, and the EIA Regulations 2014 (as amended):

- GNR 983 Listing Notice 1 Activity 21 as amended:
Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as continued in this Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.
- GNR 983 Listing Notice 1 Activity 27 as amended:
The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.
- GNR 983 Listing Notice 1 Activity 28 as amended:
Residential, mixed, retail, commercial, industrial or institutional developments where such land was used for agriculture, game farming, equestrian purposes or afforestation on or after 01 April 1998 and where such development:
 - ii) *will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.*
excluding where such land has already been developed for residential, mixed, retail, commercial, industrial or institutional purposes.
- GNR 985 Listing Notice 3 Activity 12 as amended:

The clearance of an area of 300 square metres or more of indigenous vegetation.

a. Mpumalanga

- i. Within any critically endangered or endangered ecosystem listed in terms of section 52 of the NEMBA or prior to the publication of such a list, within an area that has been identified as critically endangered in the National Spatial Biodiversity Assessment 2004;*
- ii. Within critical biodiversity areas identified in bioregional plans;*

Greenmined Environmental was appointed by Inzalo crushing and Aggregates (Pty) Ltd to undertake an Environmental Authorisation (EA) application for the proposed Stockpile, Crushing and Screening Area on Portion 7 of Farm Roodekrans 457 within the Lekwa Local Municipality, Mpumalanga.

A draft Basic Assessment Report (dBAR) was submitted in terms of the National Environmental Management Act, Act 107 of 1998 (NEMA) and the Environmental Impact Assessment Regulations, 2014 as amended (EIA). The proposed development includes the clearance of site and removal of topsoil, stockpiling of dolerite product, crushing and screening infrastructure, temporary containers for office and storage utilization, as well as ablution facilities. The total development footprint is 13.6 ha/136 000 m².

Interim Comment:

The SAHRA Development Applications Unit (DAU) is making the following comments in terms of section 38(8) of the National Heritage Resources Act as contemplated by the EIA process in terms of section 24(4)b(ii) of NEMA:

- The SAHRA DAU is requesting a field-based Heritage Impact Assessment study for the proposed developments in terms of section 38(8) of the NHRA.
- The report must comply with the SAHRA 2007 Minimum Standards: Archaeological and Palaeontological Components of Impact Assessment Reports (see www.asapa.co.za or www.aphp.org.za for a list of qualified archaeologists);
- The proposed development is located within an area of largely negligible and a small portion of high Palaeontological Sensitivity as per the SAHRIS PalaeoSensitivity map. As such, a desktop Palaeontological Impact Assessment (PIA) must be undertaken by a qualified palaeontologist. (See <https://www.palaeosa.org/heritage-practitioners.html> for a list of qualified palaeontologists). The

report must comply with the 2012 Minimum Standards: Palaeontological Components of Heritage Impact Assessments. The Minimum Standards refer to a Letter of Recommendation for Exemption for further studies should the specialist deem it appropriate. SAHRA reserves the right to insist on a field-based assessment should the Letter of Recommendation not provide ample information to make an informed comment.

- Furthermore, appendices to the DBAR for the proposed development are required.

Final Comment

In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Inzalo Crushing and Aggregates (Pty) Ltd (hereafter referred to as the applicant) proposes to establish an area for stockpiling and crushing/screening (if needed) of mined material, on 13.6 hectares on a portion of Portion 7 of the farm Roodekrans 457, Administrative district IS, Mpumalanga Province. The infrastructure to be used on site will all be of temporary and mobile nature. Containers will be used for office and storage purposes and a weigh bridge will be established (temporary). The storage of fuel (if any) will be below the threshold of the NEMA EIA listed activities. The proposed stockpile area, and the plant will be powered with generators. The ablution facilities will be chemical toilets that will be serviced by registered suppliers. The office and storage containers, weigh bridge and ablution facilities will most likely be placed at the entrance to the site, while the crushing equipment will be of mobile nature, moving around the site as needed.

Beyond Heritage (Pty) Ltd was appointed to undertake a specialist Heritage Impact Assessment for input in the EIA process in terms of section 24(4)b(ii) of NEMA and section 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA).

Kraljevi?, L., 2025. Heritage Impact Assessment for the Proposed Roodekrans Mining Permit and Stockpile Near Morgenzon, Mpumalanga Province.

On Stockpile 1, the assessment identified a burial ground containing approximately 35 graves (RD001) considered to be of high heritage significance. Furthermore, sites RD002, RD003 and RD004 were identified, however, they have not had their age, purpose or significance confirmed due to the overgrown vegetation and there is uncertainty of whether an archaeological deposit exists. No heritage resources were identified on Stockpile 2. All these sites will be affected by the proposed development on the preferred Stockpile 1. No studies required for Palaeontology as the proposed development footprint lies on the negligible PalaeoSensitivity in terms of the SAHRIS PalaeoSensitivity Map.

Recommendations made by the specialist report:

- A buffer zone of a 100 m around site RD001 containing identified graves.
- Buffer zones of 30 m must be observed around RD002, RD003 and RD004 with the layout plan adjusted to incorporate such no-go areas.

A letter of request for the relaxation of the recommended buffer zone around site RD001 has been submitted.

Norval, Z. 2025. Letter from Zoë Norval to the SAHRA DAU. [Letter]. Request for Approval of 40 m Buffer-Zone Around Identified Graves on Portion 7 of the Farm Roodekrans 457 Administrative District IS, Mpumalanga Province.

Greenmined Environmental is requesting for a reduction of the recommended 100m buffer zone to 40m around the graves identified on the proposed mining permit and stockpile application areas. The request was supported by a Blasting Report prepared by BME Blasting Solutions.

The normal tolerable vibration for graves is stipulated as 150mm/s. However, in this case, the maximum limit will be reduced to 50mm/s due to the condition of the graves. The maximum generated vibrations at 40m distance from RD001 are calculated as 91.5mm/s, which is higher than the 50mm/s tolerable limit. This then introduces a concept of decking, which is the separation of explosive charge within a blast that will fire at different delays.

The current blast designs may be applicable to a distance of 60m from the graves, or decking may be introduced between 60m to 40m, and a crushed aggregate must be used as a suitable stemming material. Scaled Depth of Burial (SDOB) is used to estimate the Flyrock range which confirmed that it may impact on RD001 and it is estimated to travel beyond a 100m radius.

Final Comment:

The following comments are made as requirement in terms of section 3(4) of the NEMA Regulations and section 38(8) of the NHRA in the format provided in section 38(4) of the NHRA and must be included in the final EIA and EMPr.

- 38(4)a – The SAHRA Development Applications Unit (DAU) has no objections to the proposed development.
- 38(4)b – The recommendations of the specialists are supported and must be adhered to. Further additional specific conditions are provided for the development as follows:
- Based on the Blasting Report, the SAHRA DAU is approving the reduction of the 100m buffer zone around site RD001 to 40m with decking due to the number of graves and unknown SDOB of all graves, and to mitigate the impacts of Flyrock. If the implementation of this condition is not possible, a permit in terms of section 36 of the NHRA for the Grave Relocation Process must be obtained and process completed prior to construction activities.
- 38(4)c(i) – If any evidence of archaeological sites or remains (e.g. remnants of stone-made structures, indigenous ceramics, bones, stone artefacts, ostrich eggshell fragments, charcoal and ash concentrations), fossils or other categories of heritage resources are found during the proposed development, SAHRA DAU (John Pakwe 0638941979 / jpakwe@sahra.org.za) must be alerted as per section 35(3) of the NHRA. Non-compliance with this section of the NHRA is an offence in terms of section 51(1)e of the NHRA and item 5 of the Schedule;
- 38(4)d – See section 51 of the NHRA regarding offences;
- 38(4)e – The following conditions apply with regards to the appointment of specialists: If heritage resources are uncovered during the course of the development, a professional archaeologist or

palaeontologist, depending on the nature of the finds, must be contracted as soon as possible to inspect the heritage resource. If the newly discovered heritage resources prove to be of archaeological or palaeontological significance, a Phase 2 rescue operation may be required subject to permits issued by SAHRA;
