**BACKGROUND INFORMATION DOCUMENT**

Other legislation triggered by the proposed project includes:

- An application for a Mining Right in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) has been submitted to the Department of Mineral Resource.

**PROJECT DESCRIPTION**

The proposed mining site will be an extension of the existing quarry pit previously distributed by stone aggregate mining activities. The mining methods will make use of blasting means of explosives in order to loosen the hard rock, the material is then loaded and hauled out of the excavation to the mobile crushing and screening plants. The aggregate will be stockpiles and transported to clients via trucks and trailers. All activities will be contained within the boundaries of the site.

The proposed mining area is approximately 25.4 ha in extent and the applicant, Inzalo Crushing and Aggregates (Pty) Ltd, intends to win material from the area for at least 20 years. The aggregate / stone gravel to be removed from the quarry will be used for road construction in the vicinity. The proposed quarry will therefore contribute to the upgrading / maintenance of road infrastructure in and around the Kroonstad / Parys area.

The mining activities will consist out of the following:

- Stripping and stockpiling of topsoil;
- Blasting;
- Excavating;
- Crushing;
- Stockpiling and transporting;
- Sloping and landscaping upon closure of the site; and
- Replacing the topsoil and vegetation the disturbed area.

The mining site will contain the following:

- Drilling equipment;
- Excavating equipment;
- Earth moving equipment; and
- Mobile crushing and screening plants.

## **BACKGROUND INFORMATION DOCUMENT**

### **DUST:**

- Speed on the access road will be limited to 30 km/h to prevent the generation of excess dust.
- Roads will be sprayed with water or an environmentally friendly dust-allaying agent that contains no PCB's (e.g. DAS products) if dust is generated above acceptable limits.
- All disturbed or exposed areas will be re-vegetated as soon as possible during mining to prevent any dust source from being created.
- Water from the existing pit will be pumped out of the quarry and reused for mineral processing and dust suppression.

### **NOISE:**

- It will be ensured that employees and staff conduct themselves in an acceptable manner while on site.
- All mining vehicles will be equipped with silencers and maintained in a road worthy condition in terms of the Road Transport Act.
- The noise generated from the mining machinery will be similar to noise generated along the N1 by public vehicles. Blasting noise will be instantaneous and of short duration. This will only occur once every two to three weeks.
- The type, duration and timing of the blasting procedures will be planned with due cognisance of other land users and structures in the vicinity.
- Surrounding land owners will be notified in writing prior to blasting occasions.

### **ACCESS ROUTE:**

- Informal roads already exist on site and no new roads will be constructed. Vehicular movement will be restricted to existing access routes to prevent crisscrossing of tracks through undisturbed areas.
- Should any other access roads to the mining area be required it will be established in consultation with the landowner however existing roads will be used as far as practicable.

### **SURFACE AND GROUND WATER:**

- The proposed activities are not expected to have a negative impact on any surface and ground water of the area.

### **VEGETATION:**

- Undulating plains supporting short grassland, in natural condition dominated by *Themeda triandra* while *Eragrostis curvula* and *E. chloromeles* become dominant in degraded habitats. Dwarf karoo bushes establish in severely degraded clayey bottomlands. Overgrazed and trampled low-lying areas with heavy clayey soils are prone to *Acacia karroo* encroachment.

**BACKGROUND INFORMATION DOCUMENT**

**GEOLOGY & SOILS:**

- Sedimentary mudstones and sandstone mainly of the Adelaide Subgroup (Beaufort Group, Karoo Supergroup) as well as those of the Ecca Group (Karoo Supergroup) found in the extreme northern section of this grassland, giving rise to vertic, melanic and red soils (typical forms are Arcadia, Bonheim, Kroonstad, Valsrivier and Rensburg)—typical of Dc land type (dominating the landscape). The less common intrusive dolerites of the Jurassic Karoo Dolerite Suite support dry clayey soils typical of the Ea land type.

**CLIMATE:**

- According to SA Explorer, the area normally receives about 467mm of rain per year, with most rainfall occurring mainly during mid summer. The chart below (lower left) shows the average rainfall values for the area per month. It receives the lowest rainfall (0mm) in July and the highest (85mm) in January. The monthly distribution of average daily maximum temperatures (centre chart below) shows that the average midday temperatures for the area range from 17°C in June to 28°C in January. The region is the coldest during June when the mercury drops to 0°C on average during the night. Consult the chart below (lower right) for an indication of the monthly variation of average minimum daily temperatures.

**BACKGROUND INFORMATION DOCUMENT**

**SENSITIVE LANDSCAPES:**

- No sensitive landscapes under statutory protection occur on the site.
- There are no protected areas (game parks/ nature reserves or monument) in close proximity to the proposed site.

**SITES OF ARCHAEOLOGICAL AND CULTURAL INTEREST:**

- No sites of archaeological or cultural importance were identified during the site inspection as the site has been extensively used for mining and sugar cane farming purposes.

**FAUNA:**

- No animals were spotted during the site inspection. Animals that may occur in the area will be very similar to those found around Koppies. The area was previously disturbed for the recovery of gravel. Small mammals, reptiles and insects will occur in the area.
- The fauna at the site will not be impacted by the proposed mining activity as they will be able to move away or through the site, without being harmed. Workers should be educated and managed to ensure that no fauna at the site is harmed.

**VISUAL EXPOSURE:**

- The mining area was identified to constitute the lowest possible visual impact on the surrounding environment. The surrounding area has previously been disturbed by mining activities, and this application entails the extension of the existing mining area.
- The site will be visible from the N1.
- The applicant should however ensure that housekeeping is managed to standard, as this will mitigate the visual impacts during the operational phase of the mine.
- Upon closure the site will be rehabilitated and sloped to ensure that the visual impact on the aesthetic value of the area is kept to a minimum.
- The site will have a neat appearance and be kept in good condition at all times.

**ABLUTION, WASTE WATER & WASTE DISPOSAL:**

- Ablution facilities will consist of chemical toilets hired from a contractor and serviced regularly.
- Any effluents containing oil, grease or other industrial substances will be collected in a suitable receptacle and removed from the site, either for resale or for appropriate disposal at a recognised facility.
- Spills would be cleaned up immediately to the satisfaction of the Regional Manager by removing the spillage together with the polluted soil and by disposing of them at a recognised facility.
- No mining waste will be generated. General waste will be disposed at the authorised Parys / Kroonstad / Koppies Disposal facility.

## **BACKGROUND INFORMATION DOCUMENT**

- Non-biodegradable refuse such as glass bottles, plastic bags, metal scrap, etc., will be stored in a container at a collecting point and collected on a regular basis and disposed of at a recognised landfill site.
- Biodegradable refuse generated will be handled as indicated above.
- No waste will be burned or buried on site.

### **FINAL REHABILITATION:**

- Rehabilitation of the surface area shall entail landscaping, levelling, top dressing, land preparation, seeding (if required), and weed / alien clearing.
- All infrastructures, equipment, and other items used during the mining period will be removed from the site (section 44 of the MPRDA).
- Waste material of any description, including receptacles, scrap, rubble and tyres, will be removed entirely from the mining area and disposed of at a recognised landfill facility. It will not be permitted to be buried or burned on the site.
- Weed / Alien clearing will be done in a sporadic manner during the life of the mining activities. Species categorised as weeds according to the National Environmental Management: Biodiversity Act (Act No. 10 of 2004) [NEMBA] Alien and Invasive Species Regulation GNR 598 and 599 of 2014 Species regarded as need to be eradicated from the site on final closure.
- Final rehabilitation shall be completed within a period specified by the Regional Manager.

The applicant will make use of temporary infrastructure during the mining operations. Workers will be transported to and from the site daily.

Dear Mr/Ms Lingenfelder

### LAND CLAIMS ENQUIRY:

- 1. THE REMAINING EXTENT BLOEMHOF 14, PARYS DISTRICT,  
FREE STATE PROVINCE  
IN EXTENT: 4.9 HECTARES**
- 2. THE REMAINING EXTENT OF THE FARM BLOEMHOF 14,  
KROONSTAD DISTRICT, FREE STATE PROVINCE**

We refer to your letter sent to our office on the 05 October 2017.

We confirm that as at the date of this letter no land claims appear on our database in respect of the Property. This includes the database for claims lodged by 31 December 1998; and those lodged between 1 July 2014 and 27 July 2016 in terms of the Restitution of Land Rights Amendment Act, 2014.

Whilst the Commission takes reasonable care to ensure the accuracy of the information it provides, there are various factors that are beyond the Commission's control, particularly relating to claims that have been lodged but not yet been gazetted such as:

1. Some Claimants referred to properties they claim dispossession of rights in land against using historical property descriptions which may not match the current property description; and
2. Some Claimants provided the geographic descriptions of the land they claim without mentioning the particular actual property description they claim dispossession of rights in land against.

The Commission therefore does not accept any liability whatsoever if through the process of further investigation of claims it is found that there is in fact a land claim in respect of the above property.

If you are aware of any change in the description of the above property after 19 June 1913 kindly supply us with such description so as to enable us to do a further search.

Yours faithfully

In addition:

The Contractor will see that there is no trespassing by his employees onto the property of the Owner. Such employees will also not be entitled to utilize any amenities of the Owner. The Contractor indemnifies the Owner for any damages in this regard.

The Contractor shall undertake all the activities referred to in this agreement and all costs in this regard shall be borne and paid by the Contractor.

3. The area will only be used for the purposes of crushing and stockpiling of aggregates. The asphalt plant will not be erected on the property.

Access to the quarry will only be through the existing access to the existing quarry.

4. In addition to its other responsibilities/duties as herein set out and as laid down by law, the Contractor shall at all times:

- 4.6 ensure that the Property is restored to a condition which is, according to the EMP, conducive to the safety and well-being of the animals and people on the property;
- 4.7 clean up all areas attended and remove all waste matter including wiring and rubble after completion of the agreement, should their operations cause stones/rocks to fall outside the quarry area, such stones/rocks shall also be removed by the Contractor at his costs after completion of the contract.

5. A royalty of R5.00 (Five Rand) exclusive of VAT, for each ton sold by the Contractor will be paid to the Owner for the rights to the land and tone. All amounts will exclude VAT. The actual quantity of material sold will be weighed over a weighbridge and the totals given to the Owner monthly in arrears. The Owner will then submit a Tax Invoice from a registered VAT vendor for payment within 7 (Seven) days.
6. The Contractor will pay compensation to the Owner in the amount of R70 000,00 (Seventy Thousand Rand) plus VAT to restock the quarry with fish at the end of the contract period. Payment of this amount shall be effected within 7 days after the Contractor having completed his crushing operations.

Upon payment of the amount set out herein, the Contractor will be exonerated of all liability regarding the handling and replacement of any fish that may reside in the water of the quarry.

7. This agreement will run concurrent with the Mining Licence/Mining Right. Once our project has been secured, a program may be agreed. The intent is to target projects in the area as they become available.

And also showed me her new business in Parys. I begged her to tell me her Secret, because of our friendship she told me about MAAMA MDAGALA the spiritual Woman & gave me her numbers. I called & was helped after following her quick instructions & that was the end of my long time suffering. For changing my life. I have told many people about MAAMA MDAGALA.

**Cancer Free Society Walk in celebration of World Cancer Month**

Cancer Free Home Foundation recently hosted their first annual Cancer Free Society Walk in Celebration of World Cancer Month. It was held at Jackpot Park in Tumahole, having more than 90 participants. The community of Tumahole and people from neighboring towns such as Potchefstroom, Vrededorf and Fochville came to support the Walk. One of the most important parts of the event was the "Candle Light" ceremony, which is a platform where cancer survivors are acknowledged, as well as remembering loved ones that have been affected by cancer and who died because of it. At the same time it was also an awareness opportunity letting the community know that the Cancer Free Home Society exists and is here as a supporting organization in Parys. The foundation was established to create a sense of belonging for people with cancer, or affected by cancer, in all age groups. Their aim is to eliminate stigmas existing within our society and promote a healthy lifestyle. The foundation appreciates the support of SABC Foundation, South African Breweries, Bryn Construction, Marvel Deeds, Mlaka Investment Group, Daniel Mlambo, Balling Fresh and Clean, CancerMustFall, Cancervive, PinkDrive, Wings of Hope, Lentswe Community Radio Station, Tumahole Arts Market and Ngwathle the local Municipality in supporting the day.

If you know of anyone suffering from cancer or who are affected by cancer, please phone the Free Home Foundation on 071 870 0914.

**NEVER GIVE UP TO LOOK FOR HELP BECAUSE LIFE IS TOO SHORT THE SMILE YOU SEE ON PEOPLE'S FACETS THERE'S A SECRET THEY CAN'T TELL EVERYONE.**

Early this year I was shocked when I met an old friend of mine who I used to work with 8 years ago. She was driving an expensive car. She took me to her house and her company. And also showed me her new business in Parys. I begged her to tell me her Secret, because of our friendship she told me about MAAMA MDAGALA the spiritual Woman & gave me her numbers. I called & was helped after following her quick instructions & that was the end of my long time suffering. For changing my life, I have told many people about MAAMA MDAGALA.

## Cancer Free Society Walk in celebration of World Cancer Month

Cancer Free Home Foundation recently hosted their first annual Cancer Free Society Walk in Celebration of World Cancer Month. It was held at Jackpot Park in Tumahole, having more than 90 participants. The community of Tumahole and people from neighboring towns such as Potchefstroom, Vrededorf and Fochville came to support the Walk. One of the most important parts of the event was the "Candle Light" ceremony, which is a platform where cancer survivors are acknowledged, as well as remembering loved ones that have been affected by cancer and who died because of it. At the same time it was also an awareness opportunity letting the community know that the Cancer Free Home Society exists and is here as a supporting organization in Parys. The foundation was established to create a sense of belonging for people with cancer, or affected by cancer, in all age groups. Their aim is to eliminate stigmas existing within our society and promote a healthy lifestyle. The foundation appreciates the support of SABC Foundation, South African Breweries, Bryn Construction, Marvel Deeds, Mlaka Investment Group, Daniel Mlambo, Baling Fresh and Clean, CancerMustFall, Cancervive, PinkDrive, Wings of Hope, Lentswe Community Radio Station, Tumahole Arts Market and Ngwathethe the local Municipality in supporting the day.

If you know of anyone suffering from cancer or who are affected by cancer, please phone the Free Home Foundation on 071 870 0914.

7. The use of explosives of any type within 500metres of Eskom Dx's services shall only occur with Eskom Dx's prior written permission. If such permission is granted the applicant must give at least fourteen working days prior notice of the commencement of blasting. No mechanical equipment, including mechanical excavators or high lifting machinery, shall be used in the vicinity of Eskom Dx's apparatus and/or services, without prior written permission having been granted by Eskom. If such permission is granted the applicant must give at least seven working days prior notice of the commencement of work. 11. No work shall commence unless Eskom Dx has received the applicant's written acceptance of the conditions specified in the letter of consent and/or permit.
12. Eskom Dx's rights and duties in the servitude shall be accepted as having prior right at all times and shall not be obstructed or interfered with. Note: Where an electrical outage is required, at least fourteen work days are required to arrange same.
13. Under no circumstances shall rubble, earth or other material be dumped within the servitude area. The applicant shall maintain the area concerned to Eskom Dx's satisfaction. The applicant shall be liable to Eskom Dx for the cost of any remedial action which has to be carried out by Eskom Dx.
14. The clearances between Eskom Dx's live electrical equipment and the proposed construction work shall be observed as stipulated by Regulation 15 of the *Electrical Machinery Regulations of the Occupational Health and Safety Act, 1993 (Act 86 of 1993)*.
15. Eskom shall be regarded electrically live and therefore dangerous at all times.
16. In spite of the restrictions stipulated by Regulation 15 of the *Electrical Machinery Regulations of the Occupational Health and Safety Act, 1993 (Act 86 of 1993)*, as additional safety precaution, Eskom Dx will not approve the erection of houses or structures occupied or frequented by human beings under the power lines or within the servitude area.
