APPENDIX E16

PUBLIC MEETING 17 APRIL 2021

APPENDIX E16.1

NOTIFICATION OF PUBLIC MEETINGS - 17 APRIL 2021

Dear Interested and Affected Party;

NOTIFICATION OF PUBLIC PARTICIPATION MEETING PERTAINING TO THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT ("DEIAR") FOR THE MINING RIGHT APPLICATION BY MONTE CRISTO COMMERCIAL PARK (PTY) LTD OVER THE REMAINING EXTENT, REMAINDER OF PORTION 1 AND PORTION 3 OF THE FARM WOODLANDS 407, NGWATHE LOCAL MUNICIPALITY, FREE STATE PROVINCE

- 1. The above matter as well as public participation process followed in terms of the above Mining Right Application, refers.
- 2. It has been brought to our attention, that some interested and affected parties (I&AP's), do not have the relevant resources and therefore will not have access to the virtual **Public Participation Meetings** to be held on **10 April 2021** and **17 April 2021**.
- 3. In view of the Regulations and other issues pertaining to the National State of Disaster, currently in place, and the Covid-19 pandemic, separate Public Participation meetings have been arranged, to discuss the contents of the DEIAR on 10 April 2021 (Virtual Meeting Only) as well as on 17 April 2021 (Virtual & Physical Meeting the physical meeting location shall be communicated to all IAP's shortly).
- 4. In the event that any I&AP is unable to attend the above meetings, or does not have the resources to attend the virtual meetings (or to travel to, the Physical Meeting on the 17 April 2021), both as above, additional Physical Meetings will be held on 24 April 2021 at the following locations, and at the following times:
 - 4.1. Barrage Informal Settlement On open Land in front of Barrage Primary School, located at Area 577
 Kaalplaats Barrage 1900 Gauteng Province, (open space approximately 100m South west from Barrage
 Police Station) GPS Co-ordinates 26.762991 27.678541 at <u>9:00 10:00</u>
 - 4.2. Lindequesdrift/Vaal Oewer Informal Settlement On open Land immediately adjacent to Lindequesdrift (Vaal Oewer) informal settlement, North West Province, on main road (Open Space approximately 750m south from the Vaal Oewer entrance - GPS Co-ordinates -26,7309250, 27,5842210 at <u>11:00 – 12:00</u>

the goal isn't to live forever, it is to protect a planet that will

Greenmined Environmental (Pty) Ltd |Tel: 021 851 2673 | Fax: 086 546 0579 Office No 37, Baker Square Block 1, De Beers Avenue, Paardevlei, Somerset West, 7130 Postnet Suite 62, Private Bag X15, Somerset West, 7129 Directors: S Smit; C Weideman | Reg No: 2012/055565/07 | VAT No. 4040263032

- 5. The above mentioned Additional Physical Meetings on the 24th of April 2021 have been arranged, solely for the purposes of accommodating Qualifying I&AP's, who may potentially be unable to attend the meetings on 10 April 2021 and 17 April 2021 and do not have access to computers or Wi-Fi. Accordingly:
 - 5.1. Please do not attend these meetings, if you are able to attend any of the previous meetings, as set out above.
 - 5.2. Please note that this request, is to provide an opportunity specifically for those I&AP's, who do not have access to the above mentioned resources (as set out more fully in clause 2 above), to participate in the process, and not be excluded due to a lack of resources.
 - 5.3. It is intended that these Additional Meetings, to be held on 24 April 2021 (as set out above) will enable said Qualifying Rural and Informal Settlement Dwelling I&AP's, to participate in the public consultation and information provision process. (Especially in light of the restrictions imposed on Gatherings by the COVID-19 Regulations).
- 6. We thank you in advance for your cooperation, look forward to interacting with you.

Kind Regards,

Sonette Smit Greenmined Environmental Sonette.S@greenmined.co.za

the goal isn't to live forever, it is to protect a planet that will

Dear registered I&APs

Monte Cristo Commercial Park (Pty) Ltd ("MCCP") Draft Environmental Impact Assessment Report ("DEIAR") and Environmental Management Programme ("EMPR") Notification

FS 30/5/1/2/2/10048MR

- 1. In order to accommodate I&APs, MCCP has arranged **Meetings** on **Saturday 17 April 2021**, which I&APs will be able to attend either Virtually, or Physically, subject to what is set out in detail hereunder.
 - 1.1 Participants attending the Meetings Virtually will be able to interact with participants attending the Meetings Physically, as well as the MCCP Representatives, Specialist Team, Greenmined and the Meeting Facilitator.
 - 1.2 Participants attending the Meetings Physically will be able to interact with participants attending the Meetings Virtually, as well as the MCCP Representatives, Specialist Team, Greenmined and the Meeting Facilitator, since the Physical Meeting will be livestreamed to Virtual Meeting Participants.

1.3 I&APs are respectfully requested to advise, whether they will be attending the Meetings, Virtually or Physically, and at what times.

Zoom Virtual Public Participation Meeting

2. In the event that you wish to attend either meeting Virtually, please find herewith the Zoom links to the Virtual Public Participation Meetings to be held on 17 April 2021 to discuss the Draft Environmental Impact Assessment Report ("DEIAR") and Environmental Management Programme ("EMPR") for the proposed Mining Right application by Monte Cristo Commercial Park (Pty) Ltd over the following three farm portions: The Remaining Extent of Portion 1 of the Farm Woodlands 407, Portion 3 of the Farm Woodlands 407 and the Remaining Extent of the Farm Woodlands 407 in the Ngwathe Municipal District, Free State Province.

Kindly confirm which one of the two (2) Virtual Meetings you would like to attend:

Meeting 1

Date: Saturday 17 April 2021

From: Sent: To: Subject: Sonette Smit 07 April 2021 08:58 AM Marlene Lingenfelder FW: MCCP DEIAR Notification

Dear Sonette

I confirm my preference for 17th April 2021 for the same reasons cited by others. I am happy with the online version but do believe that you should possibly convene an in -person session for persons with poor connectivity (limited to Covid 19 Regulations) as such online sessions require a lot more connectivity than email and Whatsapp messages so cannot be compared.

Also, what is the capacity of the online system that you plan to use as that may be a challenge for all in one session as well, so you might have to be a bit more flexible in your arrangements anyway.

Thanks & Regards

Chris Campbell

Subject: RE: MCCP DEIAR Notification

Dear Sonette

Please see emails below from Gavin Aboud and Claire Wannenburgh regarding the clashing of dates.

As some of us had committed to attend the Digby Wells meeting, the notification of which was sent out before Greenminded's notification I feel your argument that if we did not reply to attend we forfeit our rights as I&AP's as your email suggests.

How can we commit to attending 2 different meetings on the same date.

As this was brought to your attention by Mr Aboud prior to your deadline I would assume in the interest of all parties to engage regarding this mining application in a fair and transparent manner all parties should try to negotiate a fair compromise.

Subject:	Request for invitation for 17 April virtual meeting RE: Notice of Public	
-	Participation Meeting	

Good morning Sonette,

Thanking you kindly for the notes from both you and Marlene – unfortunately a number of your emails have landed up in the Quarantine area at the JSE so I have missed a few of the notices. Please would you be so kind and add my email address to the virtual meeting invite for 17 April 2021.

As resident of Vaaloewer and directly affected by noise, animal reaction and impact to recreational Vaal river water due to additional mining activity literally across from where I live I would like to attend. Since I work from home I hear the sound that trucks make when they reverse constantly with sand mining activity in the area and naturally would like to understand by how much this is going to increase.

Kind regards

Hanlie Stander

3. Please ensure

3.1 You are online and connected 10 minutes before the meeting starts.

3.2 You have the most recent version of Zoom, as with an older version you may have connection or audio/video issues and be unable to participate effectively or at all.

3.3 That the device you are logging in with has a registered name to permit access.

Physical Public Participation Meeting – Eden Manor situate at Plots 1 & 2 Natures Valley On Vaal (Access off Vaal Eden Road).

- 4. In the event that any I&AP does not have the resources to attend the Meetings Virtually, the following provisions have been made, for attending the Meeting on the 17 April 2021 Physically at the following times, at the location set out hereunder:
 - 4.1 <u>7:00 9:00</u> Eden Manor situate at Plots1 & 2 Natures Valley On Vaal (Access off Vaal Eden Road), District Parys GPS Coordinates - 26.771611S, 27.642725E
 - 4.2 <u>13:00 15:00</u> Eden Manor situate at Plats 1 & 2 Natures Valley On Vaal (Access off Vaal Eden Road), District Parys GPS Coordinates 26.771611S, 27.642725E
- 5. The arrangement for Qualifying I&APs to attend the Meetings on 17 April 2021 Physically has been scheduled, solely for the purposes of accommodating Qualifying I&AP's, to facilitate their participation in the Meetings, in the event that such I&APs do not have access to computers or Wi-Fi. Accordingly:
 - 5.1 Please do not attend the Meetings Physically, if you are able to attend any of the **meetings Virtually**.
 - 5.2 Please note that this request, is to provide an opportunity specifically for those I&AP's, who do not have access to the above mentioned resources (as set out more fully in clause 2 above), to participate in the process, and not be excluded due to a lack of resources.

- 5.3 It is intended that the ability of I&APs to attend the meetings be held on **17 April 2021** (as set out above) Physically will enable said I&AP's, to participate in the public consultation and information provision process. (Especially in light of the restrictions imposed on Gatherings by the COVID-19 Regulations).
- 6. We thank you in advance for your cooperation, look forward to interacting with you.
- If you are experiencing problems on the day, please be kind enough to send a message via WHATSAPP to 084 585 5706, as we will be unable to take calls while administering a meeting.

Kind Regards/Vriendelike Groete Sonette Smit Managing Director

APPENDIX 16.6

ARRANGEMENTS FOR THE PHYSICAL MEETINGS - 17 APRIL 2021

DELIVERY REPORTS

READ REPORTS

From:	Sonette Smit
Sent:	14 April 2021 06:32 PM
Subject:	FW: Public Meeting to discuss the MCCP Draft Environmental Impact Assessment
	Report

Good Day Registered I&APs,

- 1. We refer to the above application as well as the proposed Public Participation Meetings to be held on Saturday 17 April 2021, at 07h00 as well as at 13h00.
- 2. We further wish to refer you to paragraph 4 and 5 of our email dated 12 April 2021, which was sent at 20h11, copied hereunder for ease of reference:
 - 4. "In the event that any I&AP does not have the resources to attend the Meetings Virtually, the following provisions have been made, for attending the Meeting on the **17 April 2021** Physically at the following times, at the location set out hereunder:
 - 4.1 <u>7:00 9:00</u> Eden Manor situate at Plots 1 & 2 Natures Valley On Vaal (Access off Vaal Eden Road), District Parys GPS Coordinates 26.771611S, 27.642725E
 4.2 <u>13:00 15:00</u> Eden Manor situate at Plots 1 & 2 Natures Valley On Vaal (Access off Vaal Eden Road), District Parys GPS Coordinates 26.771611S, 27.642725E
 - 5. The arrangement for Qualifying I&APs to attend the **Meetings** on **17 April 2021** Physically has been scheduled, solely for the purposes of accommodating Qualifying I&AP's, to facilitate their participation in the Meetings, in the event that such I&APs do not have access to computers or Wi-Fi. Accordingly:
 - 5.1 Please do not attend the Meetings Physically, if you are able to attend any of the **meetings** *Virtually*.
 - 5.2 Please note that this request, is to provide an opportunity specifically for those I&AP's, who do not have access to the above mentioned resources (as set out more fully in clause 2 above), to participate in the process, and not be excluded due to a lack of resources.
 - 5.3 It is intended that the ability of I&APs to attend the meetings be held on **17 April 2021** (as set out above) Physically will enable said I&AP's, to participate in the public consultation and information provision process. (Especially in light of the restrictions imposed on Gatherings by the COVID-19 Regulations)."
- 3. We further draw your attention to our email sent to Messrs Gavin Aboud and Martin Struwig on Saturday 3 April 2021. We understand that our aforementioned email has been circulated by the aforesaid gentlemen to many of the I&APs, however, we copy the relevant portions thereof hereunder for ease of reference:
 - 5 "We take note of your comments pertaining to the desirability of a physical Public Participation Meeting. We must however, clearly bring the following (respectfully but firmly), to your attention:
 - 5.1 We take both the COVID regulations, and the health and wellbeing of all I&AP's registered in respect of this Project, very seriously;
 - 5.2 As has been previously clearly indicated by yourself, we have to date, had in excess of **1200** people registered as I&AP's in respect of this project;
 - 5.3 The applicable COVID regulations, most certainly do not make provision for any public meeting (indoor or outdoor), that will lawfully accommodate so many potential attendees;

- 5.4 Please bear in mind that the purpose of a public meeting is to inform and address concerns of I&AP's. We believe, that the steps and measures proposed by ourselves will fully and properly achieve this purpose, without:
 - 5.4.1 Jeopardizing the health and safety of any I&AP (many of the I&AP's are essentially the neighbors of the Farm over which the Mining Right is being sought);
 - 5.4.2 Breaking any of the Covid Regulations or any other Legislative Enactment.
- 5.5 After careful consideration, we have therefore decided to deal with specific requests received from individual I&AP's, <u>who do not have the requisite access to facilities for a virtual meeting</u>, in order to accommodate each such I&AP's specific circumstances and requirements"
- 4. Having regard to the aforegoing, we request that any I&APs who are desirous of attending a Meeting Physically, confirm, in writing to us, that they do not have the above mentioned resources, in order for us to make provision for such I&APs to attend the meeting Physically (Especially in light of the restrictions imposed on Gatherings by the COVID-19 Regulations).

Access to the MCCP Public Participation Physical Meetings to be held at Eden Manor on Saturday 17 April 2021 at 07h00 and 13h00, respectively.

- In order to give sensible effect to the above, and to enable us to implement same, particular with regards to the Covid Regulations and the wellbeing of I&APs, the following shall apply to the Meetings to be held on Saturday 17 April 2021 at 07H00 and 13H00, respectively.
 - 5.1 The attention of I&APs is again respectfully drawn to the potentially lethal nature and effect of Covid 19.
 - 5.2 All I&APs are again respectfully but firmly urged to avail themselves of the opportunity to attend the above mentioned meetings via Zoom.

Arrangements for the physical meetings at Eden Manor on Saturday 17 April 2021 at 07H00 and 13H00, respectively.

- 5.3 Any I&AP wishing to attend the Physical Meeting must ensure that they are at the venue at least 45 minutes before the time at which the Meeting is scheduled to start, in order to complete the Covid register, sanitize their persons, obtain refreshments (bottles of water) and take their seats.
- 5.4 Any I&AP who voluntary elects to attend the Meeting in person, as opposed to the Virtual meeting, by such election and attendance fully and hereby acknowledges and understands that their attendance, in person, is solely at their own risk, and hereby indemnifies and holds both Greenmined and the Applicant, MCCP, harmless against any and all actual or contingent claims, costs, damages, expenses, harm, injury, liabilities, losses and/or penalties of any nature whatsoever which the I&AP may incur, suffer or sustain as a result of, or in connection with their Physical attendance of the Meeting, whether direct or indirect.
- 5.5 We again record our repeated advice, given on various occasions, that I&APs safeguard their wellbeing by availing themselves of the Virtual meetings arranged by Greenmined.
- 6 Notwithstanding all of the above, should I&APs nonetheless elect to attend the Meetings Physically, the following provisions shall apply:
 - 6.1 The provisions of any applicable Covid legislation and Regulations will be strictly enforced;
 - 6.2 All chairs will be placed at least 1.5m apart;
 - 6.3 The above spacing between chairs will ensure that the prohibition against exceeding 50% of the capacity of the venue is not contravened;
 - 6.4 Additional and adequate shaded, external seating will be provided should the number of I&APs attending the Meeting Physically, exceed the capacity of the venue having regard to Covid Regulations on capacity;
 - 6.5 I&APs shall be required to wear masks for the full duration of the Meeting, observe social distancing, bring and utilize sanitizer, although sanitizer will be also be provided.
- 7 We again stress that all arrangements set out herein are:

- 7.1 For the protection of I&APs in light of Covid; and
- 7.2 Intended to ensure compliance with the Covid Regulations.
- 8. We trust that the above is in order and look forward to engaging with all I&APs in a safe and sensible manner.

Kind Regards/Vriendelike Groete Sonette Smit Managing Director

Subject:	Monte Cristo Commercial Park Draft Environmental Impact Assessment Report ("DEIAR") and Environmental Management Programme ("EMPR") Notification – Public Participation
Attachments:	210410 1st Pub Participate.pdf; Greenmined MCCP Presentation 17.04.21 MSC.pdf

Dear Interested and Affected Party,

Monte Cristo Commercial Park Draft Environmental Impact Assessment Report ("DEIAR") and Environmental Management Programme ("EMPR") Notification – Public Participation Meeting

- 1. The above matter as well as the Public Participation Meeting scheduled to take place Virtually and Physically on 17 April 2021 at 07h00 refer.
- 2. We must, at the outset, apologise profusely for the technological difficulties experienced by us at the aforementioned scheduled Meeting, which resulted in many I&APs electing to leave such Meeting.
- 3. In the event that any I&APs that intended to attend the aforementioned Meeting scheduled to be held on 17 April 2021 at 07h00, wish to attend the additional Meeting to be held today, 17 April 2021, at 13h00, we invite such I&APs to do so, Physically or Virtually.
 - 3.1. For the avoidance of any doubt, we confirm that the aforementioned technological difficulties, have been rectified, and the Meeting Scheduled to take place today, 17 April 2021, at 13h00, is expected to proceed without difficulty and/or delay.
 - 3.2. We shall, via SMS and Telephone Call, attempt to contact all such I&APs that intended to attend the aforementioned Meeting scheduled to be held on 17 April 2021 at 07h00, in order to notify and invite such I&APs to the Meeting scheduled to take place today, 17 April 2021 at 13h00, and to the further Meetings on 21 April 2021 and 24 April 2021.
- 4. Nevertheless, we invite all I&APs, that intended to attend the aforementioned Meeting scheduled to take place on 17 April 2021 at 07h00, Physically or Virtually, to also attend the further Meetings to be held by us, on 24 April 2021, as follows:
 - 4.1. Barrage Informal Settlement On open Land in front of Barrage Primary School, located at Area 577 Kaalplaats Barrage 1900 Gauteng Province, (open space approximately 100m South west from Barrage Police Station) - GPS Co-ordinates 26.762991 - 27.678541 at 9:00 – 10:00;
 - 4.2. Lindequesdrift/Vaal Oewer Informal Settlement On open Land immediately adjacent to Lindequesdrift (Vaal Oewer) informal settlement, North West Province, on main road (Open Space approximately 750m south from the Vaal Oewer entrance GPS Co-ordinates -26,7309250, 27,5842210 at **11:00 12:00**.

5. We wish to again re-iterate and stress that the well-being of the I&APs, is of utmost concern to us.

Additional Virtual Meeting To Be Held 21 April 2021 At 17h00

- 6. We have accordingly arranged a further Meeting, to be held Virtually on Wednesday 21 April 2021, at 17h00, which I&APs that intended on taking part in the Meeting scheduled to take place 17 April 2021 at 07h00 may attend, in the event that are unable to attend the Virtual and Physical Meetings scheduled to take place on 17 April 2021 at 13h00 and/or 24 April 2021.
 - 6.1. A Zoom link, to the aforementioned meeting to be held on 21 April 2021 at 17h00, shall be sent to such I&APs that were present, at the Meeting scheduled to take place on 17 April 2021 at 07h00, which did not proceed.
 - 6.2. We are, however, not in a positon to arrange any further Meetings, in addition to the Meetings to be held on 21 April 2021 and on 24 April 2021.
 - 6.3. We respectfully urge all relevant I&APs to attend one of the four abovementioned Meetings as again set out hereunder:
 - 6.3.1.the Meeting to be held on 17 April 2021 at 13h00;
 - 6.3.2.the Meeting to be held on 21 April 2021 at 17h00;
 - 6.3.3.the Meeting to be held on 24 April 2021 at 09h00; and
 - 6.3.4.the Meeting to be held on 24 April 2021 at 11h00.
- 7. In addition to the Meetings to be held, and in the interests of transparency, we attach hereto the Transcription of the Meeting held on 10 April 2021, together with the Presentation Material used in the Public Participation Meetings, in order for I&APs to have access to all relevant information, which I&APs may require, in order to provide Greenmined with comments in relation to the DEIAR.
 - 7.1. We shall, in due course and upon receipt of same, distribute the Transcription of the Meeting scheduled to take place today, 17 April 2021 at 13h00.
 - 7.2. We wish to point out that the Presentation Material herewith provided, has been produced from, and in accordance with, the DEIAR and Specialist Studies as attached thereto, and as such, does not constitute any new Material, which was not included in the DEIAR.
 - 7.3. The Presentation Material, is provided to I&APs, in order to provide I&APs with a concise and succinct summary of the Material Facts of MCCP's Application.
- 8. We trust that you find the above in order and once again thank you for your valued engagement with Greenmined.

Kind Regards/Vriendelike Groete Sonette Smit Managing Director

Г

	Page 1		Page 3
1	[PROCEEDINGS ON 17 APRIL 2021]	1	you would. Thank you.
2	[13:01] MR VAN WYK: Hi, Leon.	2	MS SMIT: I believe Mr Richardson has
3	MR ROETS: Hi, Mark. How are you?	3	joined. Let's – are we still waiting for anyone else?
4	MR VAN WYK: Very well, thanks, Leon.	4	MS FREDERICKS: Hi. This is Gia Lynn
5	Yourself?	5	Fredericks from Vaal Oewer. Can you hear me?
6	MR ROETS: I'm also well, thank you.	6	MS SMIT: I can hear you. Thank you.
7	MR VAN WYK: Good, Leon. Thanks for	7	MS FREDERICKS: Okay. My husband's also
8	coming to help.	8	here. His name's Fay Fredericks.
9	MS SMIT: I've got everyone -	9	MS SMIT: Thank you.
10	CHAIRPERSON: Sonette?	10	CHAIRPERSON: Great. You'll tell me when
11	MS SMIT: Everyone's in, David.	11	I can start?
12	CHAIRPERSON: Okay. We don't have	12	MS SMIT: I think we're ready. We were
13	anybody this side yet. Just for procedural purposes, may I	13	waiting for Mr Richardson and I can see that he's joined so
14	suggest that we just wait five minutes before we start just	14	from my side I think we're ready unless there's anyone that
15	to make sure that we're seen as reasonable?	15	still wants to wait for someone to join.
16	MS SMIT: You've got the floor. Everyone	16	CHAIRPERSON: All right. Let's start
17	on the Zoom side has been admitted, so you are welcome to –	17	then. Good morning, ladies and gentlemen. Or sorry, good
18	CHAIRPERSON: Okay. Ladies and gentlemen	18	afternoon. My name is David De Waal. I've been asked by
19	on the Zoom side – it sounds funny. So would you mind if	19	the applicant – I've been appointed to chair this meeting.
20	we just wait another few minutes to see if there's anybody	20	Welcome to everybody. Thank you for the time you've made
20	coming on this side or should we start the meeting? All	20	available. It's much appreciated. Just a few words as to
22	right. Hoe laat het julle? Goed. Ladies and gentlemen,	21	where I fit in. I'm not part of the project. I'm not
22	with your agreement I'd then like to start this meeting.	22	involved in environmental assessment. My only interest is
23 24	Sonette, is it okay with you and the team that side?	23 24	
			I've been asked to chair today's meeting, so I arrived here
25	MS SMIT: I'm fine. Can I just ask if	25	and hopefully tonight I'll go home in one piece. So I'm
	Page 2		Page 4
1	everyone can see the screen? Everyone under the –	1	not involved in the project. I'm not involved in the
2	MS LIEFFERINK: Sonette, daar's 'n	2	planning. I'm not involved in the assessment. I've no
3	message. En hulle vra ons moet net bietjie wag. Iemand	3	interest or shares or whatever in any other these
4	wil join.	4	processes.
5	CHAIRPERSON: Met plesier. In fact let's	5	The second question is always who pays you? Are
6	wait five minutes. We'll start at five past.	6	you a paid man? So let me put that on the table. The
7	MR VAN WYK: Sonette, I think it's	7	applicant pays me. He asked me – I would normally write a
8	important. That's Craig Richardson. And Ms Liefferink has	8	proposal. He asked to facilitate a meeting. I'd write a
9	asked just wait for him.	9	proposal and accept it and at the end of the meeting I
10	MS SMIT: Yes. No problem, Mark. Can I	10	would then invoice them. So I'm independent. I have no
11	in the meantime just ask if everyone can see the screen on	11	interest and I want to make it clear my only purpose is one
12	the Zoom side?	12	for – is to make sure that we have a legitimate meeting
13	MR VAN WYK: Yes.	13	where everybody gets a fair chance to raise their
14	MR ROETS: Yes.	14	viewpoints and their opinions and to make sure that these
15	MS SMIT: Thank you.	15	points are captured accurately and form part of the minutes
16	MR ROETS: I can see a sign up, public	16	and these minutes will then reflect in the report and they
17	participation.	17	will also be attached to the reports going to the
18	MS SMIT: That's correct. Thank you very	18	department. Are there any questions at this stage?
19	much.	19	MR VAN WYK: No.
20	CHAIRPERSON: Sonette, if people ask	20	CHAIRPERSON: Right. Shall I continue?
1.24		21	MR VAN WYK: Carry on.
21	questions or raise hands, will I be able to see them on the		
21	questions or raise hands, will I be able to see them on the screen or will you indicate to me?	22	CHAIRPERSON: I'd like to introduce or go
	-	22 23	CHAIRPERSON: I'd like to introduce or go through a list of people. Sonette, everybody's going to
22	screen or will you indicate to me?		-
22 23	screen or will you indicate to me? MS SMIT: I will rudely interrupt you	23	through a list of people. Sonette, everybody's going to

1	Page 5 MS SONETTE: Indeed. You're right.	1	Page 7 MS SMIT: I'm fine with everyone just for
2	CHAIRPERSON: That there are three teams		, , ,
3	today, well two large teams. Forget about me. The first	2 3	the sake of time going down the line and introduce themselves.
		_	
4	one is there's the applicant. The applicant is then	4 5	
5	typically the individual that wants to launch the activity	5	up we have Dr Willie Van Niekerk. Willie, wys jou gesig
6	and he has a team and then in terms of legislation the	6	daar êrens.
7	applicant has to appoint an independent environmental	7	MR VAN NIEKERK: Thank you. Thank you,
8	assessment practitioner which in this case is Sonette and	8	Mr Chair. I'm the managing director of Infotox based in
9	her team to implement the assessment. This is in terms of	9	Pretoria. We are specialists in health sciences. I have
10	law. You can't assess your own project. The second	10	in my company Dr Marlene Fourie who is a registered
11	question is that people often ask is are these consultants	11	toxicologist in South Africa. I'm an environmental
12	independent? And the assumption is because the applicant	12	toxicologist and I'm registered in the United States. We
13	pay them, therefore they must be bought people. And this	13	specialise in health risk assessment and we've been doing
14	assumption is incorrect.	14	this for many years. We follow standard international
15	In terms of regulation legislation the	15	protocols for health risk assessment and we work
16	environmental assessment practitioner which we call EAP in	16	internationally. That's I think all, Mr Chair.
17	the future must be independent and independent is	17	CHAIRPERSON: All right. Willie, before
18	practically defined as the follows. This – you cannot have	18	we continue after you, I see Rene's hand has been raised.
19	any interest or a business interest or a commercial	19	Rene, if you'd like to take the floor.
20	interest or even personal interest, in other words shares	20	MS HUNTLEY: Hi. Thanks so much. No.
21	or so in the business or the operation of the proposed	21	Is Mariette Liefferink who has her hand raised.
22	project that you're assessing. Secondly, you – this cannot	22	CHAIRPERSON: Ekskuus. Mariette. Dis
23	be your only work. In other words if I have one client	23	jou beurt.
24	only and this client pays me and that is my sole source of	24	MS LIEFFERINK: Thank you. I just want
25	income, that would then imply that I'm not independent. So	25	to add – I apologise. I was rather late in responding to
1	Page 6 the EAP – in other words this is one project of many and	1	Page 8 Dr David De Waal's explanation of the independency of the
2	therefore this particular project or the decision or the	2	(inaudible). I am in full agreement. We accept the fact
3	pressure on them to come to a decision cannot be influenced	3	
5			that the FAP according to legislation is notionally
4	by the payment they receive and the next one is that the		that the EAP according to legislation is notionally independent but if I may just and I've put also in writing
4	by the payment they receive and the next one is that the law says that the applicant has to pay for the	4	independent but if I may just and I've put also in writing,
5	law says that the applicant has to pay for the	4 5	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South
5 6	law says that the applicant has to pay for the environmental impact – the environmental assessment	4 5 6	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court
5 6 7	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the	4 5 6 7	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally
5 6 7 8	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is	4 5 6 7 8	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not
5 6 7 8 9	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any	4 5 6 7 8 9	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are
5 6 7 8 9 10	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them?	4 5 6 7 8 9 10	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the
5 6 7 8 9 10 11	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top.	4 5 6 7 8 9 10 11	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation
5 6 7 8 9 10 11 12	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally	4 5 6 7 8 9 10 11 12	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on
5 6 7 8 9 10 11 12 13	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment.	4 5 6 7 8 9 10 11 12 13	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on record. And then if I may just ask at this point in time
5 6 7 8 9 10 11 12 13 14	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment. As I said I work for a company called Golder which is part	4 5 7 8 9 10 11 12 13 14	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on record. And then if I may just ask at this point in time whether the EAP is registered with ICASA.
5 6 7 8 9 10 11 12 13 14 15	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment. As I said I work for a company called Golder which is part of the WSP Group. We're an international company of I	4 5 7 8 9 10 11 12 13 14 15	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on record. And then if I may just ask at this point in time whether the EAP is registered with ICASA. CHAIRPERSON: Sorry, Ms Liefferink, I
5 6 7 8 9 10 11 12 13 14 15 16	 law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment. As I said I work for a company called Golder which is part of the WSP Group. We're an international company of I think about 47 000 people and this meeting – the payment 	4 5 6 7 8 9 10 11 12 13 14 15 16	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on record. And then if I may just ask at this point in time whether the EAP is registered with ICASA. CHAIRPERSON: Sorry, Ms Liefferink, I missed you. The quality was bad. I didn't hear your last
5 6 7 8 9 10 11 12 13 14 15 16 17	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment. As I said I work for a company called Golder which is part of the WSP Group. We're an international company of I think about 47 000 people and this meeting – the payment for this meeting is a small part of our annual turnover	4 5 6 7 8 9 10 11 12 13 14 15 16 17	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on record. And then if I may just ask at this point in time whether the EAP is registered with ICASA. CHAIRPERSON: Sorry, Ms Liefferink, I missed you. The quality was bad. I didn't hear your last sentence. If you would please repeat that?
5 6 7 8 9 10 11 12 13 14 15 16 17 18	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment. As I said I work for a company called Golder which is part of the WSP Group. We're an international company of I think about 47 000 people and this meeting – the payment for this meeting is a small part of our annual turnover which is about in the order of about \$17-billion. So it –	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on record. And then if I may just ask at this point in time whether the EAP is registered with ICASA. CHAIRPERSON: Sorry, Ms Liefferink, I missed you. The quality was bad. I didn't hear your last sentence. If you would please repeat that? MS LIEFFERINK: May I ask, Dr De Waal, if
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment. As I said I work for a company called Golder which is part of the WSP Group. We're an international company of I think about 47 000 people and this meeting – the payment for this meeting is a small part of our annual turnover which is about in the order of about \$17-billion. So it – I consider myself – therefore I consider myself independent	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. It was found that the EAP – well, is notionally independent. It was assessed that they were not institutionally part of the applicant. But they are employed by the applicant to act as the agent and the purpose of the engagement is to obtain the authorisation the applicant is seeking. So I just want to put that on record. And then if I may just ask at this point in time whether the EAP is registered with ICASA. CHAIRPERSON: Sorry, Ms Liefferink, I missed you. The quality was bad. I didn't hear your last sentence. If you would please repeat that? MS LIEFFERINK: May I ask, Dr De Waal, if the EAP is registered with ICASA.
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	law says that the applicant has to pay for the environmental impact – the environmental assessment practitioner. So the fact that they're paid by the applicant is not an indication of non-independence. It is what the law says. This is how the regulations work. Any questions up to this stage before I introduce them? All right. I'm going to start right at the top. I said my name is David De Waal. I work for a totally different company who is not involved in the assessment. As I said I work for a company called Golder which is part of the WSP Group. We're an international company of I think about 47 000 people and this meeting – the payment for this meeting is a small part of our annual turnover which is about in the order of about \$17-billion. So it – I consider myself – therefore I consider myself independent as well and I am.	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	independent but if I may just and I've put also in writing, just perhaps to also record that in terms of Earth South Africa, the (inaudible) DG of EAP and Eskom had a court case. 17th April 2021

Public Participation Meeting

	Page 13		Page 15
1	CHAIRPERSON: And then last but by far	1	welcome.
2	not least, Mr Peter Roux.	2	MS HUNTLEY: Thank you, Chair. While
3	MR ROUX: (inaudible).	3	you're trying to find the agenda I would like to ask where
4	CHAIRPERSON: Thank you very much. And	4	in the agenda is the public participation phase? How do
5	next up we have a proposed agenda. If we can change the	5	the public actually give input into this?
6	slide please. Next slide.	6	CHAIRPERSON: Okay. There's a section –
7	MS SMIT: Just the meeting rules.	7	firstly there's a section that describes the process and
8	CHAIRPERSON: I'm looking for the agenda	8	then the second-last point which in my view is supposed to
9	one. All right. While we're setting that up, ladies and	9	be the bulk of the meeting and will be is a section raised
10	gentlemen, as we would say in Afrikaans spit sewe ore. The	10	- it's titled comments raised during consultation and that
11	proposed agenda is as follows. Firstly just a short	11	is also then the section where I will – where all of you
12	discussion by myself about the procedures. Then there will	12	will get an opportunity to raise your points as you see fit
13	be a presentation by a variety of people about the purpose	13	and I assure you that I will allow each one of you to raise
14	of the meeting, project background, legal requirements,	14	the points that you want to and I'll give you sufficient
15	public participation process, the applicant details,	15	time to respond and give you – allow you the time that you
16	details of the landowner, the project description, the	16	need to raise your points and your let me say issues and
17	clarity and scope, rehabilitation procedures and plan and	17	concerns and observations. Does that answer your question?
18	then the farm aspects relating to the land use allocation,	18	MS HUNTLEY: Thank you so much, Chair.
19	access roads, the need and desirability of the project, the	19	CHAIRPERSON: All right. We're still
20	envisaged end land use and then there'll be a comments and	20	having the welcome slide.
21	response session that includes both comments – where the	21	MS HUNTLEY: I think Craig has a question
22	EAP will present comments made up till now and we will then	22	as well about the time frame. If we as the public are to
23	take any further comments or questions that may arise and	23	be incorporated is there really enough time?
24	then the way forward which will be presented by Sonette.	24	CHAIRPERSON: Sonette?
25	[13:21] It sounds like a hugely complex agenda because of	25	MS SMIT: Can I – I'm not a hundred
	Page 14		Page 16
1	the way it's structured but the report has been made		menses to me Trunchened commencesting Tf and comments
		1	percent sure I understand your question. If – can you just
2	available and so everybody will give a summary of their	2	repeat that?
2 3	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the	2 3	repeat that? MALE SPEAKER: (inaudible).
3 4	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're	2 3 4	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The
3 4 5	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the	2 3 4 5	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous.
3 4 5 6	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the	2 3 4 5 6	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments
3 4 5 6 7	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and	2 3 4 5 6 7	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't
3 4 5 6 7 8	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period	2 3 4 5 6 7 8	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can
3 4 5 6 7 8 9	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda	2 3 4 5 6 7 8 9	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I
3 4 5 6 7 8 9 10	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee.	2 3 4 5 6 7 8 9 10	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised.
3 4 5 6 7 8 9 10 11	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct.	2 3 4 5 6 7 8 9 10 11	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get
3 4 5 6 7 8 9 10 11 12	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can	2 3 4 5 6 7 8 9 10 11 12	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get a response on this from Sonette's side then I'd like to add
3 4 5 6 7 8 9 10 11 12 13	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda?	2 3 4 5 6 7 8 9 10 11 12 13	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get a response on this from Sonette's side then I'd like to add something and then, Mr Campbell, I will allow your hand –
3 4 5 6 7 8 9 10 11 12 13 14	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda? MALE SPEAKER: (inaudible).	2 3 4 5 6 7 8 9 10 11 12 13 14	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get a response on this from Sonette's side then I'd like to add something and then, Mr Campbell, I will allow your hand – your – for you to say what – your say. Sonette?
3 4 5 6 7 8 9 10 11 12 13 14 15	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda? MALE SPEAKER: (inaudible). CHAIRPERSON: All right. The fact that	2 3 4 5 6 7 8 9 10 11 12 13 14 15	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get a response on this from Sonette's side then I'd like to add something and then, Mr Campbell, I will allow your hand – your – for you to say what – your say. Sonette? MS SMIT: As per our previous meeting,
3 4 5 6 7 8 9 10 11 12 13 14 15 16	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda? MALE SPEAKER: (inaudible). CHAIRPERSON: All right. The fact that the agenda is not coming up, how do we resolve that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get a response on this from Sonette's side then I'd like to add something and then, Mr Campbell, I will allow your hand – your – for you to say what – your say. Sonette? MS SMIT: As per our previous meeting, the agenda looks very long but it doesn't take that much
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda- MALE SPEAKER: (inaudible). CHAIRPERSON: All right. The fact that the agenda is not coming up, how do we resolve that? Sonette, if you can help us with that. The agenda slide	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get a response on this from Sonette's side then I'd like to add something and then, Mr Campbell, I will allow your hand – your – for you to say what – your say. Sonette? MS SMIT: As per our previous meeting, the agenda looks very long but it doesn't take that much time. In our previous meeting that we had last weekend, we
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda? MALE SPEAKER: (inaudible). MS SMIT: As per our previous meeting, the agenda looks very long but it doesn't take that much time. In our previous meeting that we had last weekend, we did go – get through everyone's questions and concerns and there is time to raise questions if you would just allow us to continue the presentation. You would – there is –
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda? MALE SPEAKER: (inaudible). CHAIRPERSON: All right. The fact that the agenda is not coming up, how do we resolve that? Sonette, if you can help us with that. The agenda slide hasn't come up yet – MS SMIT: Can't you see the slide. Sorry. Let's try again. MALE SPEAKER: You need to stop share and	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. The documentation that we've been supplied with is enormous. It's more than we've ever seen before and the comments section is not a question and answer section and I don't think that as Craig says in the chat that we can realistically cover everything in these two hours. And I see Chris Campbell has his hand raised. CHAIRPERSON: All right. Let me just get a response on this from Sonette's side then I'd like to add something and then, Mr Campbell, I will allow your hand – your – for you to say what – your say. Sonette? MS SMIT: As per our previous meeting, the agenda looks very long but it doesn't take that much time. In our previous meeting that we had last weekend, we did go – get through everyone's questions and concerns and there is time to raise questions if you would just allow us to continue the presentation. You would – there is – there's enough time allocated and we will give everyone a
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	available and so everybody will give a summary of their viewpoints. I don't expect every participant to read the details of every slide, but – so what we're saying is we're presenting the project, presenting the EAP, detail the applicant, presenting the land use case and then the feedback from the specialists on various environmental and related aspects and then the comments and response period and then the way forward. For this agenda – is this agenda acceptable? Iemand moet nou sê ja of nee. MALE SPEAKER: Correct. CHAIRPERSON: From the public's side, can we continue with this agenda? MALE SPEAKER: (inaudible). CHAIRPERSON: All right. The fact that the agenda is not coming up, how do we resolve that? Sonette, if you can help us with that. The agenda slide hasn't come up yet – MS SMIT: Can't you see the slide. Sorry. Let's try again. MALE SPEAKER: You need to stop share and then new share.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	repeat that? MALE SPEAKER: (inaudible). MS HUNTLEY: Thank you. Yes. You would – there is – there's enough time allocated and we will give everyone a fair chance to raise their comments and concerns. CHAIRPERSON: I might be wrong but I

Public Participation Meeting

Meeting

-			
	Page 17		Page 19
1	volume of information that was made available to the public	1	presupposes that we are looking at an environmental
2	that the expectation to raise all the issues and concerns	2	approval process for a mine. Please help me understand
3	with regarded to that in this two hour period may not be	3	what mine because as far as I'm concerned we're talking
4	sufficient time. Have I got it right?	4	about a farm and I need some clarification on whether this
5	MS HUNTLEY: Thank you, Chair. Yes. You	5	farm has actually been rezoned such that we would be
6	have it right.	6	expending this valuable time of all of the people on board
7	MS SMIT: Okay. That – the 30 day –	7	here. Thanks, Dr De Waal.
8	remember this is just – this meeting is just a summary of	8	CHAIRPERSON: Mr Campbell, I'm going to –
9	the documentation and to explain the documentation but the	9	I didn't hear you so well, so I'm going to just rephrase it
10	30 day period is the commenting period on everything and	10	in my words and you must please correct me if I have it
11	you have your 30 days to comment on the bulk of the	11	wrong. A lot of time is being spent on a process for
12	documentation while we're still in the process of – we are	12	something to be – to happen still and all the specialists
13	still in the public participation process.	13	and your time and so forth and in this process, is this
14	CHAIRPERSON: Remember that you have	14	time not – is this time that you spend not wasteful. Is
15	time. This is not the last opportunity. Any comments that	15	that what you're asking?
16	you may have or observations or questions, you are welcome	16	MR CAMPBELL: That is correct. Because
17	to still submit that to the EAP until the 22nd of the month	17	my concern is that it remains unclear as to whether any
18	I believe. So if there's any other issues that you felt	18	rezoning has been done such that the area under question is
19	were not dealt with today or that you've even realised	19	no longer a farm but rezoned for mining.
20	afterwards there is still an opportunity for you until the	20	CHAIRPERSON: Okay. So there's two
21	next week or ten days or whatever, till the 22nd I think to	21	questions. The first one is regarding what will happen to
22	raise those issues.	22	the process and the second one is quite specific, is this –
23	MS SMIT: If I may that is –	23	this is – in other words it's a farm. Let's assume it's
24	CHAIRPERSON: Wie se hand was volgende op	24	agricultural land. Has the rezoning taken place and how
25	- sorry. Please repeat.	25	did that work, whatever the case might be and Sonette, I
25	- solly. Flease repeat.	25	did that work, whatever the case might be and soliette, I
	Dage 10		
1	Page 18 MS SMIT: Sorry I'm sorry I can't	1	Page 20 suspect you might be the best person to respond to that
1	MS SMIT: Sorry. I'm sorry. I can't	1	suspect you might be the best person to respond to that.
2	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry	2	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the
2 3	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent	2 3	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the
2 3 4	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the	2 3 4	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns
2 3 4 5	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in	2 3 4 5	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet,
2 3 4 5 6	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation	2 3 4 5 6	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the
2 3 4 5 6 7	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going	2 3 4 5 6 7	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be
2 3 4 5 6 7 8	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That	2 3 4 5 6 7 8	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's
2 3 4 5 6 7 8 9	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd.	2 3 4 5 6 7 8 9	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in
2 3 4 5 6 7 8 9 10	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments	2 3 4 5 6 7 8 9 10	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the
2 3 4 5 6 7 8 9 10 11	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason,	2 3 4 5 6 7 8 9 10 11	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope.
2 3 4 5 6 7 8 9 10 11 12	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the	2 3 4 5 6 7 8 9 10 11 12	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge
2 3 4 5 6 7 8 9 10 11 12 13	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette?	2 3 4 5 6 7 8 9 10 11 12 13	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge me. I'm then most confused because to me this sounds like
2 3 4 5 6 7 8 9 10 11 12 13 14	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette? MS SMIT: Hundred percent.	2 3 4 5 6 7 8 9 10 11 12 13 14	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge me. I'm then most confused because to me this sounds like – I've actually – I'm actually a – yes. I'm going to make
2 3 4 5 6 7 8 9 10 11 12 13 14 15	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette? MS SMIT: Hundred percent. CHAIRPERSON: All right. Ek het nou	2 3 4 5 6 7 8 9 10 11 12 13 14 15	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge me. I'm then most confused because to me this sounds like – I've actually – I'm actually a – yes. I'm going to make an analogy. I'm actually a veterinary scientist but I'm
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette? MS SMIT: Hundred percent. CHAIRPERSON: All right. Ek het nou vergeet wie se hand volgende op was. Help my asseblief?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge me. I'm then most confused because to me this sounds like – I've actually – I'm actually a – yes. I'm going to make an analogy. I'm actually a veterinary scientist but I'm applying a process here presupposing that I'm a
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette? MS SMIT: Hundred percent. CHAIRPERSON: All right. Ek het nou vergeet wie se hand volgende op was. Help my asseblief? MS SMIT: Chris Campbell.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge me. I'm then most confused because to me this sounds like – I've actually – I'm actually a – yes. I'm going to make an analogy. I'm actually a veterinary scientist but I'm applying a process here presupposing that I'm a geotechnical engineer. Isn't it too chalk and cheese and
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette? MS SMIT: Hundred percent. CHAIRPERSON: All right. Ek het nou vergeet wie se hand volgende op was. Help my asseblief? MS SMIT: Chris Campbell. CHAIRPERSON: Mr Campbell, if you would	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge me. I'm then most confused because to me this sounds like – I've actually – I'm actually a – yes. I'm going to make an analogy. I'm actually a veterinary scientist but I'm applying a process here presupposing that I'm a geotechnical engineer. Isn't it too chalk and cheese and should the boxes – and I say this cautiously but I do
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette? MS SMIT: Hundred percent. CHAIRPERSON: All right. Ek het nou vergeet wie se hand volgende op was. Help my asseblief? MS SMIT: Chris Campbell. CHAIRPERSON: Mr Campbell, if you would please?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So should land be – rezoning be necessary, that is a different commenting authority. It's a different decision making authority and we are purely in the process of applying for a mining right here. So the land use in this application is not part of the scope. MR CAMPBELL: Okay. So please indulge me. I'm then most confused because to me this sounds like – I've actually – I'm actually a – yes. I'm going to make an analogy. I'm actually a veterinary scientist but I'm applying a process here presupposing that I'm a geotechnical engineer. Isn't it too chalk and cheese and should the boxes – and I say this cautiously but I do believe it's part of the process. Surely you first rezone,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MS SMIT: Sorry. I'm sorry. I can't raise my hand as I'm the host of the Zoom meeting, so sorry for interrupting. But yes. That's hundred percent correct. This session is to try and put some light on the information, but this is not – whatever's not commented in this specific meeting or any of the public participation meetings doesn't mean it's not going to be – it's not going to form part of the comments and responses received. That will only close on the 22nd. CHAIRPERSON: Okay. But if any comments were received after that point for any – whatever reason, those comments would in any case be submitted to the department with the report. Is that correct, Sonette? MS SMIT: Hundred percent. CHAIRPERSON: All right. Ek het nou vergeet wie se hand volgende op was. Help my asseblief? MS SMIT: Chris Campbell. CHAIRPERSON: Mr Campbell, if you would please? MR CAMPBELL: Yes. Thank you, Mr Chair,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	suspect you might be the best person to respond to that. MS SMIT: Thank you. Yes. We are in the process of applying for a mining right. Part of the process is to obtain information and comments and concerns from the public. We are not – this is not authorised yet, so as DMR is the first step and DMR is – sorry – is the first step in the process. So it's like we've jumped a step and I get the impression that you assume that automatically this rezoning is a non-

1	Page 21 CHAIRPERSON: All right. Firstly I think	1	Page 23 spoken through the agenda and we've spoken – if we can get
2	it's an interesting point you're making and that will be	2	the next slide up please. The slide –
3	noted and when I say something is noted, I just – and I'll	3	MS SMIT: I think the – there's three
4	ask somebody else to also respond. I just want to explain	4	hands. We've got if I may, Ms Liefferink, Rene Huntley and
5	to the participant what that means. That means that that	5	Mark Van Wyk's hands are up, so I don't know in which
6	issue is written up. It forms part of the minutes which	6	order.
7	will be attached to the report. The report must consider	7	CHAIRPERSON: Rene, please. It's your
8	those comments and all these observations and comments and	8	turn.
9	the minute will be submitted to the department. So when I	9	MS HUNTLEY: Thank you again. I just
10	say something is noted it means I'm formalising it and	10	want to understand correctly. So the rezoning hasn't taken
11	making sure that it's written up and become part of the	11	place yet and that will go through a public participation
12	formal minutes proceeding. Mr Campbell, your question is a	12	phase. All the – sorry. My (inaudible) – Okay. Sorry.
13	very interesting one from my side and I think Mr Peter Roux	12	CHAIRPERSON: Ms Huntley, we have a
14	would maybe like to add a word or two on this matter.	14	helicopter flying over here. Give us 20 seconds because we
15	MR ROUX: Hi, Chris. Peter Roux here.	15	can't hear you.
16	I'm from Malherbe Rigg and Ranwell Attorneys. If I	16	MS HUNTLEY: Okay. Let me know when I'm
10		17	
17	understand your question correctly it relates to – to put it very briefly why there is a mining right application	17	back on. CHAIRPERSON: You're back on again.
10	when the land has not been zoned for mining. Can you just	10	Thank you for the patience.
20	confirm that that is correct before I proceed?	20	MS HUNTLEY: Thank you. Okay. So the
20	MR CAMPBELL: Yes. That is correct.	20	land hasn't been zoned for mining and the company that's
22	MR ROUX: Okay. So to respond very	21	applying $isn't$ zoned for $-isn't$ regarded as a mining
22	simply without getting into a long detailed explanation,	22	company. It seems to me that the processes are a little
23	there are two aspects to it and you are correct that the	23	bit arse backwards and it seems to me that those things
25	land does need to effectively be zoned for the mining, but	25	should take place first. I might be wrong in my naïve
25	and does need to encervely be zoned for the mining, but	25	should take place hist. I hight be wrong in high have
	Page 22		Page 24
1	Page 22 the two are separate processes and you – or a mining right	1	Page 24 thing. So he's not a mining company. And when will that
1 2	5	1 2	
	the two are separate processes and you - or a mining right		thing. So he's not a mining company. And when will that
2	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and	2	thing. So he's not a mining company. And when will that be changed?
2 3	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right	2 3	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question
2 3 4	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order	2 3 4	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette,
2 3 4 5	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this	2 3 4 5	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that?
2 3 4 5 6	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage.	2 3 4 5 6	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a
2 3 4 5 6 7	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible).	2 3 4 5 6 7	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a
2 3 4 5 6 7 8	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal?	2 3 4 5 6 7 8	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine,
2 3 4 5 6 7 8 9	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes?	2 3 4 5 6 7 8 9	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's
2 3 4 5 6 7 8 9 10	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me?	2 3 4 5 6 7 8 9 10	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I
2 3 4 5 6 7 8 9 10 11	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me	2 3 4 5 6 7 8 9 10 11	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I explained to you, we don't even know if this right is going
2 3 4 5 6 7 8 9 10 11 12	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me now?	2 3 4 5 6 7 8 9 10 11 12	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I explained to you, we don't even know if this right is going to be granted, so you can't zone land for something that's
2 3 4 5 6 7 8 9 10 11 12 13	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me now? MS SMIT: Yes, I can hear you. Just as a	2 3 4 5 6 7 8 9 10 11 12 13	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I explained to you, we don't even know if this right is going to be granted, so you can't zone land for something that's not there yet, but should there be a land use application,
2 3 4 5 6 7 8 9 10 11 12 13 14	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me now? MS SMIT: Yes, I can hear you. Just as a point of clarity, the application – this is an application	2 3 4 5 6 7 8 9 10 11 12 13 14	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I explained to you, we don't even know if this right is going to be granted, so you can't zone land for something that's not there yet, but should there be a land use application, that has got its own public participation process as well.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me now? MS SMIT: Yes, I can hear you. Just as a point of clarity, the application – this is an application for a mining right at this stage. So we can't accept that	2 3 4 5 6 7 8 9 10 11 12 13 14 15	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I explained to you, we don't even know if this right is going to be granted, so you can't zone land for something that's not there yet, but should there be a land use application, that has got its own public participation process as well. And that's not part of this application that we are
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me now? MS SMIT: Yes, I can hear you. Just as a point of clarity, the application – this is an application for a mining right at this stage. So we can't accept that the mining right will be granted. So we are still in the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I explained to you, we don't even know if this right is going to be granted, so you can't zone land for something that's not there yet, but should there be a land use application, that has got its own public participation process as well. And that's not part of this application that we are currently dealing with. Whether it's going to happen, I
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me now? MS SMIT: Yes, I can hear you. Just as a point of clarity, the application – this is an application for a mining right at this stage. So we can't accept that the mining right will be granted. So we are still in the process of applying for a mining right. Can we just	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. The mine – the company that applies for a mining right needs to have the technical ability to mine, so it doesn't have to be a mining company per se. That's the first answer. And then the order. No. Like I explained to you, we don't even know if this right is going to be granted, so you can't zone land for something that's not there yet, but should there be a land use application, that has got its own public participation process as well. And that's not part of this application that we are currently dealing with. Whether it's going to happen, I can't comment further on that.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the two are separate processes and you – or a mining right applicant is entitled to proceed with the application and in due course then proceed with the zoning right application or the rezoning of the property. So the order that it is currently being done in is not an issue at this stage. CHAIRPERSON: (inaudible). MS SMIT: If I may. Dr De Waal? CHAIRPERSON: Yes? MS SMIT: Can you hear me? CHAIRPERSON: I can. Can you hear me now? MS SMIT: Yes, I can hear you. Just as a point of clarity, the application – this is an application for a mining right at this stage. So we can't accept that the mining right will be granted. So we are still in the process of applying for a mining right. Can we just clarify? I just want that to be clarified. CHAIRPERSON: Okay, Mr Campbell, I'm going to –	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	thing. So he's not a mining company. And when will that be changed? CHAIRPERSON: I don't think the question is naïve at all. I think it's a valid question. Sonette, can you help us with that? MS SMIT: First it doesn't need to be a mining company. 		1	
	Page 25		Page 27
1	don't know who was first. So maybe ladies first if we may?	1	property was accordingly not subject to a land use scheme
2	CHAIRPERSON: Mariette, I suspect that's	2	at the commencement of mining operations. Ngwathe Local
3	you then.	3	Municipality has yet to adopt a land use scheme as
4	MS LIEFFERINK: Yes. Thank you. I just	4	contemplated in section 24.1 of the Spatial Planning and
5	want to refer to a letter that was written by Advocate Van	5	Land Use Management Act of 2013, also colloquially referred
6	Wyk to Verhemdek in which he attached a detailed	6	to as SPLUMA, nor does the municipality's current land use
7	explanation regarding the zoning where he mentioned that	7	scheme make provision for the zoning of farm land.
8	the Ngwathe local municipality had yet to adopt the land	8	Consequently, the property in question falls squarely
9	use scheme. However in the issues and response report it	9	within the ambit of section 26.3 of SPLUMA which I quote
10	mentions on two occasions that the applicant will still	10	hereunder for everybody's benefit and this is very
11	apply for a land use rezoning. So it seems there is a well	11	important. Mrs Liefferink Mrs Hartslief for once and for
12	 some anomalies in this regard. Then I also just want to 	12	all, with respect, please listen to this. We know town
13	also concur with the previous participants that this is a	13	planning or land use scheme applies to a piece of land
14	matter where the cart is being put before the horse and	14	before land sue scheme is approved in terms of this act.
15	there was a court case in the Paradyskloof Golfing Estate	15	Such land may be used only for the purposes listed in the
16	which unfortunately I can't now quickly access, but I shall	16	schedule 2 of this act and for which such land was lawfully
17	put it in my writing – my written comments because if for	17	used or could lawfully have been used immediately prior to
18	example the zoning is not approved, Advocate Van Wyk would	18	commencement of the act. Schedule of SPLUMA include – I
19	have spent a significant amount of money for a – basically	19	beg your pardon - in turn includes mining purposes. In the
20	a superfluous or – exercise. And on the other hand, if for	20	premises mining activities of the nature envisaged
21	example the mining rights' application is approved it can	21	conducted on the property in question are and were not in
22	be unfairly used to put pressure on the Ngwathe	22	contravention of any law. The owners were and are under no
23	municipality to approve zoning.	23	obligation to rezone the property as alleged by Mrs
24	[13:41] So I also have some concerns regarding this	24	Liefferink, Mr Campbell and, I'm sorry, and Rene whose
25	process.	25	surname alludes me, Mrs Hartslief. That's the answer and

Your point, both points are noted and you will indicate in your writing up about these particular details of this particular decision if I heard you correctly? Mariette, I've lost you there? MS LIEFFERINK: Yes, that is correct. CHAIRPERSON: Thank you very much. I just want to confirm again that both those points are noted and will form part of the minutes. Mark, I suspect your hand is next? MR VAN WYK: Thank you, Dr De Waal. Dr De Waal, this issue was comprehensively dealt with by myself in person at the Rendek meeting held at the DMR Welkom on the 25th of April 2019. Now Mr Bob Hartslief was	2 3 4 5 6 7 8 9 10 11 12 13 14	this document – CHAIRPERSON: Thank you Mark – MR VAN WYK: We're more than happy to make available to everybody after the meeting. It's part of the public record. I'm certain Mrs Liefferink has seen this as has Mrs Hartslief. So I'm quite astounded at this question being raised. CHAIRPERSON: Mark, thank you for that. Again, as with all the respondents this response is minuted and noted. Mariette, I'm going to, if you want to – would you like a further opportunity? MS LIEFFERINK: Yes, please. I just want to mention I did acknowledge Mr Van Wyk's, Advocate Van Wyk's letter in which well, he alleged certain defamatory
2 3 4 5 6 7 8 9 10 11 12 13 14 15	CHAIRPERSON: Thank you very much. Your point, both points are noted and you will indicate in your writing up about these particular details of this particular decision if I heard you correctly? Mariette, I've lost you there? MS LIEFFERINK: Yes, that is correct. CHAIRPERSON: Thank you very much. I just want to confirm again that both those points are noted and will form part of the minutes. Mark, I suspect your hand is next? MR VAN WYK: Thank you, Dr De Waal. Dr De Waal, this issue was comprehensively dealt with by myself in person at the Rendek meeting held at the DMR Welkom on the 25th of April 2019. Now Mr Bob Hartslief was present at that Rendek meeting and I suspect that Mrs	2 3 4 5 6 7 8 9 10 11 12 13 14 15	this document – CHAIRPERSON: Thank you Mark – MR VAN WYK: We're more than happy to make available to everybody after the meeting. It's part of the public record. I'm certain Mrs Liefferink has seen this as has Mrs Hartslief. So I'm quite astounded at this question being raised. CHAIRPERSON: Mark, thank you for that. Again, as with all the respondents this response is minuted and noted. Mariette, I'm going to, if you want to – would you like a further opportunity? MS LIEFFERINK: Yes, please. I just want to mention I did acknowledge Mr Van Wyk's, Advocate Van Wyk's letter in which well, he alleged certain defamatory comments by public participant but nonetheless I have read

Meeting

1	Page 29	1	Page 31
1	Environmental Society of South Africa versus The Minister of Finance and Development Planning in the Western Cape and	1 2	want to make clear that timing is an issue. There's a whole variety of I think comments and responses still to
3	the Municipality of Stellenbosch and (inaudible) Golf	2	come and I'd like the presenters to please present to us
4	Estate. I would encourage Advocate Van Wyk, since he is a	4	the substance of the slides. This information will be made
5	legal person, to perhaps just review this because as it	5	available and that participants can read the details of the
6	mentions here that the court made it clear that the	6	slide at their own leisure. So let's have a functional
7	piecemeal approach to EIA's cannot be permitted.	7	presentation giving the substance of the matter. Is there
8	Furthermore, it's not lawful to grant an environmental	8	a hand up?
9	authorisation subject to other assessments having to be	9	MS SMIT: There's a hand up from Craig.
10	carried out at makes an important component of the	10	CHAIRPERSON: Craig, you've got the
11	development after the authorisation has been granted. That	11	floor.
12	is the crux of the matter.	12	MR RICHARDSON: (Inaudible).
13	CHAIRPERSON: Thank you very much. Both	13	CHAIRPERSON: Craig, I've lost you?
14	these viewpoints are minuted and they need to be addressed	14	MR RICHARDSON: Mr Chairman, can you hear
15	one way or the other in the process further and the	15	me?
16	comments. Would it be okay if we move forward on this	16	CHAIRPERSON: I can hear you now, yes,
17	issue? I think both viewpoints have been made, are very	17	thank you.
18	clear and I don't think a debate about what one or the	18	MR RICHARDSON: I'm just having audio
19	other right now will add value. Mark, would you and Mrs	19	issues. I'm just trying to (inaudible) it seems to be
20	Liefferink agree if I move on, noting that both these	20	working now if you can hear me.
21	points have been noted and minuted and they must be	21	CHAIRPERSON: Craig, you're breaking up.
22	addressed in the proceedings in the way forward? Would	22	I'm sorry, could you please repeat that?
23	that be acceptable?	23	MR RICHARDSON: Sorry, Mr Chair, I'm
24	MR VAN WYK: Noted, Dr De Waal. Please	24	having audio, it seems like I'm having audio issues
25	proceed at your leisure, thank you.	25	(inaudible) you can hear me or not?

2 3 4 5 6 7 8 9 10	CHAIRPERSON:Mariette, from your side oris there anything you'd like to add?MS LIEFFERINK:No, I accept, thank you.CHAIRPERSON:Alright we've now got onthe meeting rules. I'm going to just summarise them veryquickly and this is as we've had it now. We have a desirefor an old-fashioned meeting where we work structured,where people, everybody gets a fair chance uninterrupted togive their viewpoints and to make sure that theirviewpoints are noted and recorded. So all I'm asking for	2 3 4 5 6 7 8 9 10	CHAIRPERSON: Craig, can I ask you, you could possibly send, just type your comment to Sonette because I hear about every second or third word and unfortunately, I can't hear enough to make sense of what you're saying and maybe if you can just quickly type it for her then it would make it may be easier for us to understand what you want to contribute. MR RICHARDSON: Thank you, Chair, I'll do that. CHAIRPERSON: Thank you very much.
2 3 4 5 6 7 8 9 10 11	CHAIRPERSON:Mariette, from your side oris there anything you'd like to add?MS LIEFFERINK:No, I accept, thank you.CHAIRPERSON:Alright we've now got onthe meeting rules. 1	apologise again for what happened this morning.	1	red (privately). Advert was placed in the Star newspaper
2	CHAIRPERSON: If I can just add to that	2	classified section 19 March. So I assume that only I can
3	and then I'll give you another chance is after the meeting	3	see this response. Can the response please be open to
4	obviously I was supposed to (inaudible) or not after the	4	everyone. And then I'd like to make a comment please.
5	meeting, after the event and I was informed that everything	5	CHAIRPERSON: The -
6	was tested and set up yesterday already and it was tested	6	MS FREDERICKS: The Star newspaper, if I
7	before last night, before everybody went away and	7	may say, Mr Chair.
8 9	everything worked perfectly and this morning when the	8	CHAIRPERSON: Please do.
9 10	meeting started.	9 10	MS FREDERICKS: The Star newspaper is not
10	[14:01] Apart from there were noise issues, but also the presentation was not visible on this side. And then of	10	being delivered to Vaaloewer and it's mainly Johannesburg
12	course after patiently waiting for 40 odd minutes the	11	basic newspaper and in as far as the EIA regulations, correct me if I'm wrong, Sonette, should be advertised in
12	participants had to leave. Sonette spoke about a technical	12	two local newspapers, the Star is just one. And I have
14	difficulty, I believe that is what it was and the floor	13	recording from the local shops where they say the Star
14	back to you.	14	newspaper hasn't been delivered to the Vaal Triangle since
16	MS SMIT: Yes thank you. There's nothing	16	pre-Covid. So we wouldn't have seen those newspapers or
17	more that I can about that, it was tested yesterday. I'm	10	those adverts. Thank you, Mr Chair.
18	not a technical person, I do not know what happened there,	18	CHAIPERSON: Your point –
19	but we are trying our best to accommodate everyone. The	19	MS FREDERICKS: Sorry, Mr Chair.
20	slides have been sent to everyone that participated this	20	CHAIRPERSON: Your point is noted, thank
21	morning, there was hard copies made available. Again I	21	you for that.
22	apologise, but what we must note please the public meeting	22	MS FREDERICKS: Okay and then again the
23	is not the end of the commenting period. It's just the	23	participants, the INA participants this morning, it can be
24	information session, but the documentation that is being	24	reasonably understood that they had other commitments and
25	presented in the public participation meetings is part of	25	they had set aside a time for this morning's meeting. It

1	the Draft Environmental Assessment Report. So there's no	1	would only be fair and reasonable to accommodate them with
2	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's	2	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to
2 3	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I	2 3	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants?
2 3 4	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear?	2 3 4	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could
2 3 4 5	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any	2 3 4 5	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request.
2 3 4 5 6	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event	2 3 4 5 6	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star
2 3 4 5 6 7	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better	2 3 4 5 6 7	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your
2 3 4 5 6 7 8	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted.	2 3 4 5 6 7 8	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that.
2 3 4 5 6 7 8 9	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks.	2 3 4 5 6 7 8 9	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not
2 3 4 5 6 7 8 9 10	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me?	2 3 4 5 6 7 8 9 10	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you
2 3 4 5 6 7 8 9 10 11	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can.	2 3 4 5 6 7 8 9 10 11	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And
2 3 4 5 6 7 8 9 10 11 12	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please	2 3 4 5 6 7 8 9 10 11 12	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the
2 3 4 5 6 7 8 9 10 11 12 13	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not	2 3 4 5 6 7 8 9 10 11 12 13	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be
2 3 4 5 6 7 8 9 10 11 12 13 14	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately?	2 3 4 5 6 7 8 9 10 11 12 13 14	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is	2 3 4 5 6 7 8 9 10 11 12 13 14 15	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay -	2 3 4 5 6 7 8 9 10 11 12 13 14 15	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting. MS FREDERICKS: Okay, but now, Sonette,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay - CHAIRPERSON: So what would you like to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting. MS FREDERICKS: Okay, but now, Sonette, how were you going to because those individuals have gone
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay - CHAIRPERSON: So what would you like to respond to that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting. MS FREDERICKS: Okay, but now, Sonette, how were you going to because those individuals have gone away for the weekend and they've – I mean most of the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay - CHAIRPERSON: So what would you like to respond to that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay - CHAIRPERSON: So what would you like to respond to that? MS SMIT: Can I just ask publicly,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting. MS FREDERICKS: Okay, but now, Sonette, how were you going to because those individuals have gone away for the weekend and they've – I mean most of the Vaaloewer residents say, I'm speaking to them, those
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay - CHAIRPERSON: So what would you like to respond to that? MS SMIT: Can I just ask publicly, meaning can you elaborate?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting. MS FREDERICKS: Okay, but now, Sonette, how were you going to because those individuals have gone away for the weekend and they've – I mean most of the Vaaloewer residents say, I'm speaking to them, those attendees are not in town. So how were we going to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay - CHAIRPERSON: So what would you like to respond to that? MS SMIT: Can I just ask publicly, meaning can you elaborate? MS FREDERICKS: I asked a question at	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting. MS FREDERICKS: Okay, but now, Sonette, how were you going to because those individuals have gone away for the weekend and they've – I mean most of the Vaaloewer residents say, I'm speaking to them, those attendees are not in town. So how were we going to accommodate them then, they're not in town for the rest of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the Draft Environmental Assessment Report. So there's no new information distributing at public meetings, that's just to clarify. But really there's nothing further that I can elaborate on. Chair is it clear? CHAIRPERSON: Let me find out. Any further comments on this morning's, let me call it event for lack of a better word, or lack of event for a better word before we move on? I think the point is well minuted. MS SMIT: Fay Fredericks. MS FREDERICKS: Hi, can you hear me? CHAIRPERSON: Yes I can. MS FREDERICKS: Okay fine. May I please request that Green Minded admin responds publicly and not just privately? CHAIRPERSON: I think your request is noted. MS FREDERICKS: Okay - CHAIRPERSON: So what would you like to respond to that? MS SMIT: Can I just ask publicly, meaning can you elaborate? MS FREDERICKS: I asked a question at 1:59 where the ads were placed and will the participants be	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	would only be fair and reasonable to accommodate them with the normal two week notice period. Would you be able to consider that request from those participants? CHAIRPERSON: Sonette, if you could respond to that request. MS SMIT: Okay. Firstly the Star newspaper, I'll have to look into that. I've noted your comment and we'll come back to you in writing with that. And then secondly the two week notice period is not legislative for a public meeting and (inaudible) if you want to elaborate on that you are welcome to. And unfortunately we do not have two weeks prior to the submission date of our final document that needs to be submitted to DMR. So that's why we tried to give as long as possible notification and in a reasonable time for people to attend that meeting. MS FREDERICKS: Okay, but now, Sonette, how were you going to because those individuals have gone away for the weekend and they've – I mean most of the Vaaloewer residents say, I'm speaking to them, those attendees are not in town. So how were we going to accommodate them then, they're not in town for the rest of the day, so how will you accommodate them?

		I	
1 2 3 4 5 6	Page 41 for them. We'll be in contact with them telephonically as well and as said earlier if some of those people need to attend a physical meeting the physical meetings will be held, another two more physical meetings will be held on the 24th of April. MS FREDERICKS: And then, Sonette,	1 2 3 4 5 6	Page 43 everybody, please just hear me out. Please work via me and Mark has got the floor and I think Mark must just finish what he was saying and after that we will take the hand. I wouldn't like to interrupt Mark while he's speaking to take a hand. So the next person if I may ask you to please just have a bit of patience. Once Mark has finished I will give
7	they've also requested that I may just ask about the fact	7	you the first opportunity after that. Mark, please
8	that they've spent, it's 22 kilometres from Vaaloewer and	8	continue.
9	22 kilometres back. I think it's Vaal or Eden Manor,	9	MR VAN WYK: Thank you, Dr De Waal.
10	that's 44 kilometres and we feel considerations, would	10	Sonette, if I could just ask you to put up the images at
11	there be -	11	the end of the brochure. I know this brochure we made
12	CHAIRPERSON: I heard up till where you	12	available to attendees and they can look at this in their
13	said that the extra kilometres for this morning's meeting	13	own time. So while Sonette is going to these images I just
14	would be considered in any way.	14	want to tell you the following. You can look at these
15	MS FREDERICKS: They have requested –	15	images, they're estates that I've built on East Rand. Okay
16	sorry, Mr Chair. They've requested that I ask about	16	all of the companies that I've mentioned above are
17	possible reimbursement for their 44 kilometres of travel.	17	companies within the VLDC group of companies, I founded the
18	CHAIRPERSON: Sonette.	18	group in 1999. Importantly the VLDC group has been
19	MS SMIT: If they can put that in writing	19	involved for more than two decades in the development,
20	for us we will respond to that. Thank you.	20	administration and sale of urban and upmarket residential
21	MS FREDERICKS: Thank you.	21	estates on the East Rand of Gauteng. The group is also
22	CHAIRPERSON: It has minuted just on a	22	involved in other commercial activities mainly property
23	technicality, it has not been raised at the meeting, but it	23	related. I'm not going to bore you with all of the
24	has been minuted, so the issue is formalised. Are you	24	details, but I'm showing you the images of the units that
25	saying that the particulars individuals, Sonette, should	25	are in estates that I've built. Okay.

7	It's impressive to see the estate's developments that	7	MS LIEFFERINK: I'm satisfied with the
8	Advocate van Wyk was involved in. Thank you for sharing	8	answers, thank you.
9	that. I'm just now referring to the Draft Environmental	9	CHAIRPERSON: Right, I now have
10	Impact Report of March 2019 and perhaps just to have some	10	absolutely no idea where we are on the presentation now.
11	clarity. The applicant there is Monte Cristo Commercial	11	Sonette, if you can get me on the right slide, ah Margo is
12	Park which shares a common shareholding and directorship	12	helping me.
13	with the land owner. The land owner is Goosebay Farm and	13	MS SMIT: I believe we've just dealt with
14	the sole director of this farm is Advocate Van Wyk. So the	14	this slide, Mark if you're happy we can continue.
15	applicant is both the applicant and the land owner, so	15	CHAIRPERSON: All right, before we do
16	there is in other words an intertwining between the land	16	that I had my back to the room, there are some people in
17	owner and the applicant and the director. So I just want	17	the room. Please, my apologies for not noting you, I
18	to ask who will be responsible in terms of section 34 and	18	didn't see you, there's a question here on this side. I
19	section 28 of the NEMA for the duty of care and remediation	19	need to take it because of Covid, so I need to hold it.
20	because as we know section 28 of NEMA holds a wide pool of	20	PATRICK: Can I use that one?
21	persons responsible. So will both the land owner, the	21	CHAIRPERSON: Yes of course you can.
22	applicant and the director although they're all the same	22	PATRICK: Afternoon. My name is Patrick,
23	person, Advocate Van Wyk, will they be held solely	23	I come from Plot Number 4. I've seen the experience as
24	responsible then for the duty of care and remediation? And	24	shared by Mr Van Wyk, I don't know if it's Advocate Van
25	also will then corporate influence and the corporate	25	Wyk, but I believe so, on the real estate projects, on the
1	Page 46	1	Page 48 real estate projects and the farming. I'm just interested
1	accountability all fall upon Advocate Van Wyk?	1	real estate projects and the farming, I'm just interested
2	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but	2	real estate projects and the farming, I'm just interested in hearing more of your experience, Mr Van Wyk, if you can
	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but I suspect that this is a question that Advocate Van Wyk	2 3	real estate projects and the farming, I'm just interested in hearing more of your experience, Mr Van Wyk, if you can on mining because I'm struggling also to hear the audio.
2 3 4	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but I suspect that this is a question that Advocate Van Wyk should respond to.	2 3 4	real estate projects and the farming, I'm just interested in hearing more of your experience, Mr Van Wyk, if you can on mining because I'm struggling also to hear the audio. But I'm interested in hearing your experience in mining if
2 3 4 5	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but I suspect that this is a question that Advocate Van Wyk should respond to. MS SMIT: Yes please.	2 3	real estate projects and the farming, I'm just interested in hearing more of your experience, Mr Van Wyk, if you can on mining because I'm struggling also to hear the audio. But I'm interested in hearing your experience in mining if you have some.
2 3 4 5 6	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but I suspect that this is a question that Advocate Van Wyk should respond to. MS SMIT: Yes please. MR VAN WYK: Thank you. Mrs Liefferink,	2 3 4 5	real estate projects and the farming, I'm just interested in hearing more of your experience, Mr Van Wyk, if you can on mining because I'm struggling also to hear the audio. But I'm interested in hearing your experience in mining if you have some. CHAIRPERSON: Thank you, Patrick. Mark,
2 3 4 5	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but I suspect that this is a question that Advocate Van Wyk should respond to. MS SMIT: Yes please. MR VAN WYK: Thank you. Mrs Liefferink, the three parties you've mentioned, in other words myself,	2 3 4 5 6	real estate projects and the farming, I'm just interested in hearing more of your experience, Mr Van Wyk, if you can on mining because I'm struggling also to hear the audio. But I'm interested in hearing your experience in mining if you have some. CHAIRPERSON: Thank you, Patrick. Mark, if you would respond to that please. The question I think
2 3 4 5 6 7	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but I suspect that this is a question that Advocate Van Wyk should respond to. MS SMIT: Yes please. With regards to mining I've mined on this farm, in terms of mining permits and prospecting right or a prospecting right from 2009 up to the end of 2018, that's 10 years' experience. CHAIRPERSON: Thank you, Mark. Mr
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	accountability all fall upon Advocate Van Wyk? CHAIRPERSON: Sonette, I don't know, but I suspect that this is a question that Advocate Van Wyk should respond to. MS SMIT: Yes please. MR VAN WYK: Thank you. Mrs Liefferink, the three parties you've mentioned, in other words myself, Monte Cristo Commercial Park and the owner of the land Goosebay Farm are all separate legal entities. They're all separate legal persona and they're regarded as such in the law in South Africa and elsewhere. But I would imagine that the rehabilitation liability would fall on Monte Cristo Commercial Park. But, Mrs Liefferink, this is also a crucial point that I must make to you. Do you think for a minute I would allow mining to take place on the game farm that I bought to develop an estate on? And that goes to Mr Hunter's question of a moment ago that flashed on the screen. Do you think that I would allow mining, which I was in charge of, to happen on my farm which would result in it being destroyed or being damaged or being environmentally negatively affected? I'll get back to this point later on. But to answer your question, as I understand the legislation Monte Cristo Commercial Park of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	real estate projects and the farming, I'm just interested in hearing more of your experience, Mr Van Wyk, if you can on mining because I'm struggling also to hear the audio. But I'm interested in hearing your experience in mining if you have some. CHAIRPERSON: Thank you, Patrick. Mark, if you would respond to that please. The question I think relates to – Patrick would like to hear from yourself your own experience or as you in your organisations in mining. MR VAN WYK: Thank you, Dr De Waal. Good afternoon, Patrick. Thank you for your interest and attendance. I'm afraid of what your surname is, it wasn't mentioned, I'm just going to refer to you as Mr Patrick for ease of reference. Mr Patrick I've been involved in a variety of commercial activities for almost 30 years. As I've stated, mainly property related including estate development, construction or holding of retail shopping centres and other property. With regards to mining I've mined on this farm, in terms of mining permits and prospecting right or a prospecting right from 2009 up to the end of 2018, that's 10 years' experience. CHAIRPERSON: Thank you, Mark. Mr Patrick, follow up? Thank you very much. Margo se net vir

1	details of the land owner. I think, Mark, you've spoken	1	following business operations on Goose Bay Farm. Game
2	about some of this and then page 21 is that diagram that	2	farming. We've introduced herds of game onto the farm
3	indicates the surface area of the activities on the	3	which everybody on Vaal Oewer can see. Do you really think
4	portion. If you could take us through that it would be	4	I'm going to let anything happen to that game? Grass-fed
5	appreciated.	5	cattle, livestock farming, production of free range organic
6	MR VAN WYK: Yes, Dr De Waal, can we just	6	eggs, vegetables and crop farming. Tourism and rental of
7	go back to page 20 because there's some very important	7	holiday accommodation. If you could just scan up a bit
8	information there? And Dr De Waal, there was an important	8	please. I see we've gone past the other activities, but
9	question raised by a gentleman called Sean Hunter. Mr	9	they include the training of staff with regards to farming
10	Hunter, I wasn't merely boring you with the details of my	10	activities, hospitality, farming equipment and maintenance
11	exploits with regards to residential estates. The point is	11	and repair and so on and so on.
12	that I acquired Goosebay Farm in 2005 with the intention of	12	CHAIRPERSON: Okay.
13	developing an upmarket eco and river estate on the site.	13	MR VAN WYK: Okay. There you can see
14	I've applied for an environmental clearance, it's been	14	clearly that the three portions of land that make up Goose
15	granted. I've done a great deal of work with the	15	Bay Farm. I can just point out that the mining right has
16	assistance of my consultants one of whom is sitting in	16	been applied for over three farm – over all three farm
17	front of you, Mr Van den Berg with regards to the	17	portions and Sonette, if you can scan down you can see
18	development of the eco and river estate. I'll get to that	18	images of what the farm looks like at the moment. You can
19	in detail a little later if the Chairman will permit me.	19	see the animals. We have experts to assist us with regards
20	But just having said that, I'm just going to quickly go	20	to the game – with maintaining the game, caring for it and
21	through the details of land owner. You can see it on the	21	so on and so on. There you can see we've identified the
22	screen in front of you.	22	land with agricultural potential and we farm it to its
23	[14:21] Goosebay farm Limited as stated above is a	23	fullest extent as you can see. Dr De Waal, that's all I
24	landowner of three farm portions. I am going to show you	24	have to say on this.
25	the diagram in a moment. And this is very important it	25	CHAIRPERSON: Thank you very much.
1	Page 50 touches on what Ms Liefferink raised. I'm going to read it	1	Page 52 There's no hands this side. Any hands up that I'm not

So should I allow mining to take place which is not done correctly, if we don't rehabilitate the ten hectares that we're mining at any given time, my farm is going to be impacted. I'm not going to allow that ever. I'm just going to go on as to what we're doing on the farm. You can see the gentlemen there dressed in khaki. They're the farm managers who do all these	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	with the locality, which makes it slide 24. MS SMIT: Yes. We've got a hand, Chair. Mariette Liefferink. CHAIRPERSON: Right. You've got the floor. MS LIEFFERINK: May I please – yes. If I may just ask, with regards to the rehabilitation of (inaudible) and the future land use for the sections that will be mined, have the future land use been negotiated with (inaudible) an affected party, because often you see that is part of (inaudible) – CHAIRPERSON: Mariette, I'm missing you there. I've got two or three voices at a time. Are you asking is the – MS LIEFFERINK: Okay. I just want to ask in terms of the Mineral and (inaudible) Resources Development Act, that is the regulations, a closure must commence from the commencement of mining and the closure of (inaudible) must be determined (inaudible) mining and that future land use, is that rehabilitation in the process objectives to arrive at a future land use which should be
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	MCCP, shares common shareholding and directorship with the landowner. In other words same directors. Therefore notwithstanding that the mining right applicant is a different legal persona from the landowner, the said applicant obviously has a vested interest to ensure that all mitigation measures and conditions set up in this application as well as any authorisations that may follow should be fully adhered to and complied with in order to minimise any impact on themselves as the related party to the landowners of this property. To go on, the landowner, an applicant, as related parties with common shareholding and directorships will be directly affected by any impacts arising from the proposed mining activities. They will first and foremost be affected by an impacts arising from these activities. So should I allow mining to take place which is not done correctly, if we don't rehabilitate the ten hectares that we're mining at any given time, my farm is going to be impacted. I'm not going to allow that ever. I'm just going to go on as to what we're doing on the farm. You can see the gentlemen there dressed in khaki. They're the farm managers who do all these activities on the farm. They can speak to you later if you	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	with the locality, which makes it slide 24. MS SMIT: Yes. We've got a hand, Chair. Mariette Liefferink. CHAIRPERSON: Right. You've got the floor. MS LIEFFERINK: May I please – yes. If I may just ask, with regards to the rehabilitation of (inaudible) and the future land use for the sections that will be mined, have the future land use been negotiated with (inaudible) an affected party, because often you see that is part of (inaudible) – CHAIRPERSON: Mariette, I'm missing you there. I've got two or three voices at a time. Are you asking is the – MS LIEFFERINK: Okay. I just want to ask in terms of the Mineral and (inaudible) Resources Development Act, that is the regulations, a closure must commence from the commencement of mining and the closure of (inaudible) must be determined (inaudible) mining and that future land use, is that rehabilitation in the process objectives to arrive at a future land use which should be sustainable. Has that been negotiated or has (inaudible)
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MCCP, shares common shareholding and directorship with the landowner. In other words same directors. Therefore notwithstanding that the mining right applicant is a different legal persona from the landowner, the said applicant obviously has a vested interest to ensure that all mitigation measures and conditions set up in this application as well as any authorisations that may follow should be fully adhered to and complied with in order to minimise any impact on themselves as the related party to the landowners of this property. To go on, the landowner, an applicant, as related parties with common shareholding and directorships will be directly affected by any impacts arising from the proposed mining activities. They will first and foremost be affected by an impacts arising from these activities. So should I allow mining to take place which is not done correctly, if we don't rehabilitate the ten hectares that we're mining at any given time, my farm is going to be impacted. I'm not going to allow that ever. I'm just going to go on as to what we're doing on the farm. You can see the gentlemen there dressed in khaki. They're the farm managers who do all these	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	with the locality, which makes it slide 24. MS SMIT: Yes. We've got a hand, Chair. Mariette Liefferink. CHAIRPERSON: Right. You've got the floor. MS LIEFFERINK: May I please – yes. If I may just ask, with regards to the rehabilitation of (inaudible) and the future land use for the sections that will be mined, have the future land use been negotiated with (inaudible) an affected party, because often you see that is part of (inaudible) – CHAIRPERSON: Mariette, I'm missing you there. I just want to ask in terms of the Mineral and (inaudible) Resources Development Act, that is the regulations, a closure must commence from the commencement of mining and the closure of (inaudible) must be determined (inaudible) mining and that future land use, is that rehabilitation in the process objectives to arrive at a future land use which should be

		r	
	Page 53		Page 55
1	the one question. And then I also just want to refer	1	on within the rehabilitation section.
2	Advocate Van Wyk to the guidelines for the rehabilitation	2	CHAIRPERSON: Mader, maybe you can just –
3	of mined land. That is the Chamber of Mines guidelines.	3	I don't think Mariette's question has been fully answered.
4	When it refers to source stripping, source stockpiling,	4	If you can just explain to us how the topsoil will be
5	land (inaudible), land for (inaudible), and irrigation and	5	handled and the intention with that during the
6	(inaudible) and biodiversity (inaudible). Because	6 7	rehabilitation process, if you would. MR VAN DER BERG: Certainly. I don't
7	obviously these guidelines will have to be followed in		,
8	(inaudible) for that land use to be sustainable and as far	8	want to jump the gun. There is quite a detailed section in
9	as (inaudible) understood is that it will be open cast	9	the presentation later on, on that, but just briefly, it
10	mining which mean there will be need for topsoil	10	would be the rollover mining concept in which we – or the
11	replacement and perhaps if Advocate Van Wyk can just	11 12	mining contractor would strip the topsoil and when – as far
12	explain whether there will be sufficient financial provisions made for that as well as for latent and residual		as possible immediately place it back on an area that was
13	•	13	disturbed before. We've gained that knowledge from the
14	impacts in terms of the 2015 (inaudible) regulations for	14	mining permit actions that were taking place previously.
15	(inaudible) provisioning, because I've noticed only R14-	15	So there was a good knowledge base created from that
16	million had been made available for rehabilitation. CHAIRPERSON: Either Sonette or Mark.	16 17	practice and we believe that's the most effective way of
17		17	rehabilitating. So topsoil is as good as gold and we will treat it as that.
18 19	Sonette, can you guide me here please? MS SMIT: Yes. If I understand the	10	CHAIRPERSON: Right. Then there was a
20	question correctly is was there available funds for the	20	question that Mariette asked if I heard correctly about
20	rehabilitation. Is that the 2014 guidelines being followed	20	maybe I can call it unforeseen or not planned for results
22	in calculating that rehabilitation fund. Am $I - do I$	21	in the future with the end land use and post land use and
22	understand you correctly?	22	how would that issue – that aspect be addressed. As ek reg
23	CHAIRPERSON: That's one part of the	24	verstaan hierso.
25	question, Mariette. Is that correct.	25	MS SMIT: That is the financial guarantee
25		25	
	Page 54		Page 56
1	MS LIEFFERINK: And the 2015. It's the	1	that will be submitted to the Department of Mineral
2	2015 financial regulations, not the 2014 and I'm referring	2	Resources for (inaudible). So that is part of the closure
3	specifically to residual or latent impacts that may only	3	and the financial guidelines that she referred to in the
4	become known in future. But that was only part of my	4	guidelines of 2015.
5	question. There were questions regarding the future land	5	CHAIRPERSON: Mariette, last comment on
6	use, whether that had been consulted with interested and	6	your side?
7	affected parties and also whether the guidelines for the	7	MS LIEFFERINK: No comment. I accept,
8	remediation of mine land that is now the minerals council,	8	thank you.
9	their guidelines, whether that would be followed and how	9	CHAIRPERSON: Thank you very much. Any
10	the topsoil will be replaced in the open pits.	10	other hands?
11	MS SMIT: Okay.	11	MS SMIT: Chris Campbell, Mark Van Wyk.
12	CHAIRPERSON: All right. We've got that.	12	CHAIRPERSON: All right. Let's start
13	Sonette, if you can respond to where you can and guide me	13	with you.
14	then who else I can ask to respond.	14	MR CAMPBELL: I think Mark might have
15	MS SMIT: Yes. We will still -	15	been before me. I'm happy for him to go first. Chair?
16	(inaudible) that all the rehabilitation details will be in	16	MR VAN WYK: Mr De Waal, perhaps Mr
17	the slides as well, but yes, the guidelines – the 2015	17	Campbell would like to ask his question first and then I
18	guidelines has been followed. The public participation –	18	can answer everything at once. Thank you. Thank you
19	did the documentation go out for public – the future land	19	(inaudible), Mr Campbell.
20	use go out for public participation? As part of this	20	CHAIRPERSON: Mr Campbell if you –
21	process the future land use were included and was there	21	MR CAMPBELL: Not a problem. Okay.
22	anything else that I've missed?	22	Thank you. I'm just thinking here and I fully appreciate
23	CHAIRPERSON: The question about the	23	the perspective that the applicant is offering there in
24 25	topsoil.	24	respect of how he has as a responsible property developer,
	MS SMIT: That will be dealt with further	25	what he's done and how he has – takes cognisance of his own

		1	
	Page 57		Page 59
1	farms and his own property which he would make sure would	1	adjacent landowners would also be considered in the
2	not be affected. I'm just a little bit curious as to	2	application on this side. Mr Campbell, have I got you
3	whether the applicant – is this not now trying to reflect a	3	right?
4	level of credibility after this – closing the door after	4	MR CAMPBELL: Yes. That's correct,
5	the horse has – closing the stable door after the horse has	5	Chair.
6	bolted, because firstly there's been mining activity. I'm	6	CHAIRPERSON: Sonette, who is going to
7	unsure of whether there's been much efforts toward	7	respond to that?
8	rehabilitation because you know already that sits there as	8	MS SMIT: Can I please ask Mark to
9	a problem and then in terms of duty of care, that too does	9	respond to that?
10	not re – it's not for self only. It's for adjacent	10	CHAIRPERSON: Advocate Van Wyk, if you
11	property owners and has there not been an impact on the	11	would.
12	adjacent property and farm owners such that you know the	12	MR VAN WYK: Thank you, Dr De Waal and
13	notions of are we dealing with credible – a credible party	13	thank you Craig. I think it was Craig who asked that
14	or not are moot at this stage? Thank you.	14	question – Mr Campbell.
15	CHAIRPERSON: Thank you, Mr Campbell. I	15	MR CAMPBELL: Chris.
16	just want to say one thing. Yesterday we had a question,	16	MR VAN WYK: I beg your pardon, Chris.
17	or the other day. When was it? I can't remember now.	17	Later on in the presentation we're going to show you a
18	Last week we had a question on the portion of the mine that	18	detailed brochure, time permitting, about what's going to
19	was not rehabilitated and it became apparent that that part	19	happen, what the eco river estate is going to look like and
20	– the open piece of the mine is actually on the land of the	20	you'll see that what I propose to do there is going to
21	mine next door and that all the mining activities or the	21	greatly increase the value of the adjacent properties.
22	prospecting activities – Robert, help me here. Just	22	Every time I've built a residential estate, the property in
23	explain that again. I just want to make sure that we have	23	the immediate area has greatly increased in value. I've
24	a common understanding.	24	got a detailed brochure here to show you, but you've got a
25	MR VAN DER BERG: Should I – can I	25	lot of material to get through. We'll show you at the end.
1	Page 58	1	Page 60 Just one last thing I want to add. With regards
1	respond to that, Chair?	1	Just one last thing I want to add. With regards
2	respond to that, Chair? CHAIRPERSON: Mader, please do.	2	Just one last thing I want to add. With regards the rehabilitation, we take it really, really seriously.
2 3	respond to that, Chair? CHAIRPERSON: Mader, please do. MR VAN DER BERG: Yes. So there was the	2 3	Just one last thing I want to add. With regards the rehabilitation, we take it really, really seriously. Where we've mined and we've replanted the grass, that grass
2 3 4	respond to that, Chair? CHAIRPERSON: Mader, please do. MR VAN DER BERG: Yes. So there was the exact same concern raised last week and there was – there's	2 3 4	Just one last thing I want to add. With regards the rehabilitation, we take it really, really seriously. Where we've mined and we've replanted the grass, that grass has to be better quality grazing and foliage than what was
2 3 4 5	respond to that, Chair? CHAIRPERSON: Mader, please do. MR VAN DER BERG: Yes. So there was the exact same concern raised last week and there was – there's obviously a bit of a confusion because if you stand on Vaal	2 3 4 5	Just one last thing I want to add. MR VAN WYK: I'll get to why I say it will increase the value of the land in the surrounding area in a moment – in a bit and we'll show you how we intend to do that. CHAIRPERSON: All right. Thank you for
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	respond to that, Chair? CHAIRPERSON: Mader, please do. MR VAN DER BERG: Yes. So there was the exact same concern raised last week and there was – there's obviously a bit of a confusion because if you stand on Vaal Oewer's side and you look across to Goose Bay Farm, on the right-hand side there's another mine currently active – being actively mined which is called Sweet Sensation. Now there's a drawing up at the moment and it shows two orange areas – let me say the yellow area in the middle is the application area. On the left-hand side which is on the western side there's an orange block which says Sweet Sensation. They are currently actively mining and on the what is that – southern side there is Echanaledi which I believe is currently not mining. It has been mined previously. So I think in a – just to make clear, know that there are other mines in the area. Currently on Goose Bay Farm there are no mining. Permit areas has been mined	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Just one last thing I want to add. With regards the rehabilitation, we take it really, really seriously. Where we've mined and we've replanted the grass, that grass has to be better quality grazing and foliage than what was there originally and that's exactly what Mr Van Der Berg, the gentleman in front of you, the landscape architect, has been tasked with doing. He's been assisting myself and my staff for the past six years. We've got detailed studies, reports. You name it, we've got it, on this topic to try and upgrade the grazing and the general grasslands on the farm. CHAIRPERSON: Thank you for that. MR VAN WYK: I'll get to why I say it will increase the value of the land in the surrounding area in a moment – in a bit and we'll show you how we intend to do that. CHAIRPERSON: All right. Thank you for that. I think we should move on. Sonette, I think the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	respond to that, Chair? CHAIRPERSON: Mader, please do. MR VAN DER BERG: Yes. So there was the exact same concern raised last week and there was – there's obviously a bit of a confusion because if you stand on Vaal Oewer's side and you look across to Goose Bay Farm, on the right-hand side there's another mine currently active – being actively mined which is called Sweet Sensation. Now there's a drawing up at the moment and it shows two orange areas – let me say the yellow area in the middle is the application area. Thank you for that. I think we should move on. Sonette, I think the ball is in your court. MS SMIT: Thank you. There's another question that's been raised in the chat box and I would
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	respond to that, Chair? CHAIRPERSON: Mader, please do. MR VAN DER BERG: Yes. So there was the exact same concern raised last week and there was – there's obviously a bit of a confusion because if you stand on Vaal Oewer's side and you look across to Goose Bay Farm, on the right-hand side there's another mine currently active – being actively mined which is called Sweet Sensation. Now there's a drawing up at the moment and it shows two orange areas – let me say the yellow area in the middle is the application area. On the left-hand side which is on the western side there's an orange block which says Sweet Sensation. They are currently actively mining and on the what is that – southern side there is Echanaledi which I believe is currently not mining. It has been mined previously. So I think in a – just to make clear, know that there are other mines in the area. Currently on Goose Bay Farm there are no mining. Permit areas has been mined previously but has been fully rehabilitated at the moment and I can attest to that. CHAIRPERSON: Okay. Then Mr Campbell's second question was that when you – in terms of duty of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Just one last thing I want to add. With regards the rehabilitation, we take it really, really seriously. Where we've mined and we've replanted the grass, that grass has to be better quality grazing and foliage than what was there originally and that's exactly what Mr Van Der Berg, the gentleman in front of you, the landscape architect, has been tasked with doing. He's been assisting myself and my staff for the past six years. We've got detailed studies, reports. You name it, we've got it, on this topic to try and upgrade the grazing and the general grasslands on the farm. CHAIRPERSON: Thank you for that. MR VAN WYK: I'll get to why I say it will increase the value of the land in the surrounding area in a moment – in a bit and we'll show you how we intend to do that. CHAIRPERSON: All right. Thank you for that. I think we should move on. Sonette, I think the ball is in your court. MS SMIT: Thank you. There's another question that's been raised in the chat box and I would appreciate if Mark can also just answer that. It will –
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	respond to that, Chair? CHAIRPERSON: Mader, please do. MR VAN DER BERG: Yes. So there was the exact same concern raised last week and there was – there's obviously a bit of a confusion because if you stand on Vaal Oewer's side and you look across to Goose Bay Farm, on the right-hand side there's another mine currently active – being actively mined which is called Sweet Sensation. Now there's a drawing up at the moment and it shows two orange areas – let me say the yellow area in the middle is the application area. On the left-hand side which is on the western side there's an orange block which says Sweet Sensation. They are currently actively mining and on the what is that – southern side there is Echanaledi which I believe is currently not mining. It has been mined previously. So I think in a – just to make clear, know that there are other mines in the area. Currently on Goose Bay Farm there are no mining. Permit areas has been mined previously but has been fully rehabilitated at the moment and I can attest to that. CHAIRPERSON: Okay. Then Mr Campbell's second question was that when you – in terms of duty of care he appreciates the fact that the landowner would	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Just one last thing I want to add. With regards the rehabilitation, we take it really, really seriously. Where we've mined and we've replanted the grass, that grass has to be better quality grazing and foliage than what was there originally and that's exactly what Mr Van Der Berg, the gentleman in front of you, the landscape architect, has been tasked with doing. He's been assisting myself and my staff for the past six years. We've got detailed studies, reports. You name it, we've got it, on this topic to try and upgrade the grazing and the general grasslands on the farm. CHAIRPERSON: Thank you for that. MR VAN WYK: I'll get to why I say it will increase the value of the land in the surrounding area in a moment – in a bit and we'll show you how we intend to do that. CHAIRPERSON: All right. Thank you for that. I think we should move on. Sonette, I think the ball is in your court. MS SMIT: Thank you. There's another question that's been raised in the chat box and I would appreciate if Mark can also just answer that. It will – that's a reoccurring question. That's if the eco-estate is

1	Page 61 Thank you, Dr De Waal. That's a very important question,	1	Page 63 MS SMIT: But she said that your
2	one that is very close to my heart. We've got the	2	neighbours are suffering and the roads, the dust and the
		3	
3	environmental clearance and in fact we've had that	_	noise.
4	environmental clearance from shortly after I purchased the	4	[14:41] MR VAN WYK: The roads, look we cannot
5	farm. That's why the farm was purchased, to build an eco-	5	hide away from the fact that the Vaal Eden Road which is
6	estate. But these things take time. They take a lot of	6	the road immediately in front of Goosebay Farm is being
7	planning. Take a lot of capital. But we have started to	7	damaged. And this is also of great concern to me, but I'm
8	do that already. We're busy putting in the roads, doing	8	not allowed to touch that road. We can't do anything to
9	the planning with the architects, getting the game going,	9	it, we have engaged with the authorities, we will continue
10	doing the basic development that you have to do on a site	10	to engage with them and Sonette, I know you'll explain this
11	of this size. The mining and the development of the estate	11	a bit further. Mrs Hartslief, just for your benefit I've
12	will take place concurrently. We're going to get to this	12	built kilometres of roads before for the local authorities
13	in a bit more detail later, but you need to – everybody	13	in and around my estates. Those roads are perfect after 20
14	needs respectfully to bear in mind that the active area	14	years, but I cannot touch this road without permission from
15	being mined at any given time will be less than 20	15	the authorities. Also it's of great concern to me, but I
16	hectares. In fact it's probably going to be in the order	16	would add that the recent damage to the road has got
17	of 10 hectares. But we'll get to that in detail. That is	17	nothing to do with me, it has to do, unfortunately, with
18	one to two percent of the surface area of the farm and	18	the other two mines. And also with the authority's lack of
19	whilst that mining is going on – and we've got the machines	19	maintenance of the road.
20	there to do the mining, we can rehabilitate properly. We	20	CHAIRPERSON: Right, thank you. Sonette.
21	can reshape what we have to reshape. We can attend to the	21	MS SMIT: Another question, that is from
22	proper development of the estate.	22	Craig, has public participation, that's also for Mark
23	With regards to when specific buildings and	22	
			please, has public participation for the eco-estate taken
24	estates will be built, we intend to build a wedding venue.	24	place as it would be a change of land use?
25	We've got images. We'll show you – within the next two to	25	CHAIRPERSON: I will allow this one
	Page 62		Page 64

What I can tell you is that we do everything we can to ameliorate that. I've got the three leading experts in the country here today. There's Dr Willie from Infotox. He's introduced himself to you. You can ask him questions about the dust and the effect on the people at Vaal Oewer. At great expense I let him conduct expense – studies to ensure that the people in Vaal Oewer would not be harmed or prejudiced in any way. Mr Nick Grobler from Infotox. I beg your pardon, from Airshed will address you as well and Mr	2 3 4 5 6 7 8 9 10 11 12 13 14 15	question because it's related, but we just need to rememberthat the purpose of this meeting is the mining rightsapplication, but I think there's a link between the two.So, Mark, if you could respond to that for us please.MR VAN WYK:We have the writtenenvironmental clearance from the authorities as envisagedby, sorry I'm not sure who it was, it wasn't Mr Campbell,but in any event we have the written document, we can makeit available to you.CHAIRPERSON:But the question was ifduring that process there was total engagement.MR VAN WYK:Dr De Waal, you must bear inmind that this authorisation was granted some time ago. Atthat point whatever had to be done was done, it was morethan 10 years ago.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	five years. That's the answer. CHAIRPERSON: Thank you very much. Sonette. MS SMIT: Another question. Mark, you keep saying what you do for your own land but neighbours are suffering, roads, dust and noise. MR VAN WYK: Dust and noise is an unavoidable part of mining unfortunately. What I can tell you is that we do everything we can to ameliorate that. I've got the three leading experts in the country here today. There's Dr Willie from Infotox. He's introduced himself to you. You can ask him questions about the dust and the effect on the people at Vaal Oewer. At great expense I let him conduct expense – studies to ensure that the people in Vaal Oewer would not be harmed or prejudiced in any way. Mr Nick Grobler from Infotox. I beg your	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	question because it's related, but we just need to rememberthat the purpose of this meeting is the mining rightsapplication, but I think there's a link between the two.So, Mark, if you could respond to that for us please.MR VAN WYK:We have the writtenenvironmental clearance from the authorities as envisagedby, sorry I'm not sure who it was, it wasn't Mr Campbell,but in any event we have the written document, we can makeit available to you.CHAIRPERSON:But the question was ifduring that process there was total engagement.MR VAN WYK:Dr De Waal, you must bear inmind that this authorisation was granted some time ago. Atthat point whatever had to be done was done, it was morethan 10 years ago.SPEAKER:But the question was from
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	five years. That's the answer. CHAIRPERSON: Thank you very much. Sonette. MS SMIT: Another question. Mark, you keep saying what you do for your own land but neighbours are suffering, roads, dust and noise. MR VAN WYK: Dust and noise is an unavoidable part of mining unfortunately. What I can tell you is that we do everything we can to ameliorate that. I've got the three leading experts in the country here today. There's Dr Willie from Infotox. He's introduced himself to you. You can ask him questions about the dust and the effect on the people at Vaal Oewer. At great expense I let him conduct expense – studies to ensure that the people in Vaal Oewer would not be harmed or prejudiced in any way. Mr Nick Grobler from Infotox. Craig, at the time we complied with – we appointed a local consultant, a town planner to attend to this. Everything that had to be done was done and we've got the document from the environmental authorities confirming that. CHAIRPERSON: All right, the last

		1	
1	Page 65	1	Page 67
1	MR VAN WYK: Sorry, Dr De Waal, sorry, Dr	1	going into this, about the road situation. There have been
2	De Waal, here's Warren coming up with a potentially valid	2 3	reports from the Roads Department that say this cannot
3 4	point. The eco-estate application has expired by now. No, Warren, what we did is after we got the eco state	4	continue because they can't maintain the roads and neither do the people that are around them. The mines don't
5	environmental authorisation we wrote to the authorities and	5	maintain the roads, we the farmers in the area maintain the
6	said we're going to start. That letter and the fact that	6	roads and it's time that we looked at that and the
7	we started with development interrupts the prescribing of	7	cumulative impact of what that does to our neighbourhood.
8	the, or lapsing of the authorisation.	8	And Mark, with all due respect you don't live here, we do,
9	CHAIRPERSON: All right, listen we're	9	we live here, we work here and what you're doing is killing
10	running out of time. We've got quite a bit to go still, so	10	our businesses. Thank you.
11	I would like to suggest that questions and comments about	11	CHAIRPERSON: Rene, your comment is
12	the permitting process for eco-estate be addressed maybe	12	noted. It will minuted, there is a discussion on the road,
13	outside this meeting between the individuals concerned and	13	safety issue of the road (inaudible) a little bit later,
14	Advocate Van Wyk because sorry I'm sounding rude here, but	14	but in the meanwhile your comment is noted and will be
15	the purpose of this meeting is to discuss the mining rights	15	recorded as such. Sonette.
16	application and when considering that the eco-estate	16	MS SMIT: Craig's hand is up.
17	application has already been granted I would like to ask	17	CHAIRPERSON: All right, Craig.
18	that we continue this meeting and focus on the mining right	18	MR CAMPBELL: Mr Chair, can you hear me?
19	application. Sonette, any other hands or can we continue?	19	CHAIRPERSON: Yes I can.
20	MS SMIT: There is some more questions	20	MR CAMPBELL: [Inaudible] if an eco-
21	regarding the eco-estate because it was brought up, the	21	estate has been approved how is being approved without
22	questions should be allowed and then Rene Hartslief has had	22	public participation with a chain of values?
23	her hand up for quite some time. If I can just suggest	23	CHAIRPERSON: Craig, that's a question
24	that some of the questions is relating to slides that's	24	that I think – let me put it this way, I think that request
25	still coming. So I think most of them will be dealt with,	25	we'll pass onto Advocate Van Wyk, who's got the application
1	Page 66	1	Page 68
1	but it's up to you, Chair.	1	for that process and the details on that, nobody in this
2	but it's up to you, Chair. CHAIRPERSON: So what are you advising	2	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been
2 3	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette?	2 3	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question
2 3 4	but it's up to you, Chair.CHAIRPERSON:So what are you advisingme, Sonette?MS SMIT:I think some of the answers	2 3 4	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to
2 3 4 5	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those	2 3 4 5	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette.
2 3 4 5 6	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think	2 3 4 5 6	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're
2 3 4 5 6 7	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come –	2 3 4 5 6 7	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in
2 3 4 5 6 7 8	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible]	2 3 4 5 6	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail.
2 3 4 5 6 7	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come –	2 3 4 5 6 7 8	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail.
2 3 4 5 6 7 8 9	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question.	2 3 4 5 6 7 8 9	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond
2 3 4 5 6 7 8 9 10	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry?	2 3 4 5 6 7 8 9 10	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're
2 3 4 5 6 7 8 9 10 11	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in	2 3 4 5 6 7 8 9 10 11	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time –
2 3 4 5 6 7 8 9 10 11 12	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please	2 3 4 5 6 7 8 9 10 11 12	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly.
2 3 4 5 6 7 8 9 10 11 12 13	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue.	2 3 4 5 6 7 8 9 10 11 12 13	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion –
2 3 4 5 6 7 8 9 10 11 12 13 14	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up.	2 3 4 5 6 7 8 9 10 11 12 13 14	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear me? CHAIRPERSON: Yes we can. MS HARTSLIEFS: Good. Mark has discussed	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to separate the eco-estate meeting from this meeting. Okay,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear me? CHAIRPERSON: Yes we can.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to separate the eco-estate meeting from this meeting. Okay, Sonette.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear me? CHAIRPERSON: Yes we can. MS HARTSLIEFS: Good. Mark has discussed everything that goes on, on his farm and I do believe that what he does is the best for his farm, but it certainly	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to separate the eco-estate meeting from this meeting. Okay, Sonette. MS SMIT: If we may continue, Mader Van der Berg. MR VAN DER BERG: Thank you. I think I
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear me? CHAIRPERSON: Yes we can. MS HARTSLIEFS: Good. Mark has discussed everything that goes on, on his farm and I do believe that what he does is the best for his farm, but it certainly isn't the best for our neighbourhood. And when he glosses	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to separate the eco-estate meeting from this meeting. Okay, Sonette. MS SMIT: If we may continue, Mader Van der Berg. MR VAN DER BERG: Thank you. I think I really want to try and get through the following
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear me? CHAIRPERSON: Yes we can. MS HARTSLIEFS: Good. Mark has discussed everything that goes on, on his farm and I do believe that what he does is the best for his farm, but it certainly isn't the best for our neighbourhood. And when he glosses over the bad roads, these are not bad roads, these are	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to separate the eco-estate meeting from this meeting. Okay, Sonette. MS SMIT: If we may continue, Mader Van der Berg. MR VAN DER BERG: Thank you. I think I really want to try and get through the following information as quick as possible, but not without the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear me? CHAIRPERSON: Yes we can. MS HARTSLIEFS: Good. Mark has discussed everything that goes on, on his farm and I do believe that what he does is the best for his farm, but it certainly isn't the best for our neighbourhood. And when he glosses over the bad roads, these are not bad roads, these are demolished roads and if he is intending to build a wedding	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to separate the eco-estate meeting from this meeting. Okay, Sonette. MS SMIT: If we may continue, Mader Van der Berg. MR VAN DER BERG: Thank you. I think I really want to try and get through the following information as quick as possible, but not without the thoroughness that it requires, but you can read there in
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	but it's up to you, Chair. CHAIRPERSON: So what are you advising me, Sonette? MS SMIT: I think some of the answers will come as we continue, but if we've answered those questions then we might just skip that slide. But I think if we deal with it in the slides the answers will come – CHAIRPERSON: [Inaudible] MS SMIT: Let Rene ask the question. Sorry? CHAIRPERSON: Let's deal with that in more detail, in fact let's move on. Sonette, please continue. MS SMIT: Rene Hartslief's hand is up. CHAIRPERSON: Rene, if you would. MS HARTSLIEFS: Hi sorry, can you hear me? CHAIRPERSON: Yes we can. MS HARTSLIEFS: Good. Mark has discussed everything that goes on, on his farm and I do believe that what he does is the best for his farm, but it certainly isn't the best for our neighbourhood. And when he glosses over the bad roads, these are not bad roads, these are	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	for that process and the details on that, nobody in this meeting on the applicant's side except for Mark has been involved in that. So I respectfully pass your question onto Advocate Van Wyk and I request him and his team to respond to that maybe in a direct manner. Sonette. MR VAN WYK: Dr De Waal, sorry you're fading away, would you like me to respond to it now or in writing, in detail. CHAIRPERSON: I would like you to respond to it in writing, in detail, I'll tell you why. We're running out of time – MR VAN WYK: Yes most certainly. CHAIRPERSON: I have a suspicion – MR VAN WYK: Yes I agree. CHAIRPERSON: - about eco-estate, of about the mining rights still to come, so I would like to separate the eco-estate meeting from this meeting. Okay, Sonette. MS SMIT: If we may continue, Mader Van der Berg. MR VAN DER BERG: Thank you. I think I really want to try and get through the following information as quick as possible, but not without the

	Page 69		Page 71
1	about it earlier, about the rollover mining concept, so	1	property from year 3 and in that period there would be I
2	there would be three resources mined. Firstly sand and	2	think other infrastructure built like the drying plant and
3	secondly in aggregate and then thirdly diamonds which is	3	the washing plant. So from year 3 that's when the full
4	normally associated with the sand deposit and could be	4	production will basically come to realisation and that
5	underneath the sand. The area that's currently demarcated	5	would continue for up to year 27. And the last three years
6	for mining is 363.5 hectares, it's distributed over the	6	would be a bit of a ramp down to get to your point of you
7	whole farm. The whole farm is a bit over 800 hectares.	7	now fully rehabilitated and closure of the entire mining
8	The average areas that will mined for sand per year comes	8	site. Okay next slide. Okay this is again just a summary
9	to 6.8 hectares and average area for aggregate per year	9	of the previous two maps, you can see it in the top two
10	comes to 4.5 hectares. I would like to show you to the	10	maps, the left one showing the sand, the right one showing
11	bullet point right at the bottom that says "However, only	11	the aggregate. Keep in mind, like I mentioned earlier,
12	five hectares sand and four hectares aggregate will be	12	that the diamond mining is mostly associated with the sand.
13	actively mined at any given time at the various locations	13	There are gravels, this a difficult word for me
14	as indicated in the following figures." So I would like to	14	diamondiferous, is that it? Diamondiferous gravel
15	just be very clear about it. When we speak about the	15	underneath the sand, so you first need to remove the sand
16	averages that's simply based on the total area divided by	16	to get to those gravels. And then understand the potential
17	the 30 years which is the 30 years mineable period. If we	17	of diamonds in that gravel. The bottom two maps shows the,
18	really speak about the nitty gritty then we need to focus	18	the one on the left bottom shows again all the mining areas
19	on the five hectares and the four hectares which comes	19	in yellow and brown. It also shows the three alternative
20	together at nine hectares per year that will actively	20	sites that was identified for the processing plant. The
21	mined. The picture that you currently see on the screen	21	one on the right currently it just shows a bit of the
22	there is the 30 year division for the sand area alone.	22	current existing activities. You can see the agricultural
23	It's just a colourful block, but it shows the anticipated	23	fields that are mostly on the southern boundary of the site
24	mining years and you can see it starts at year 1 right on	24	and that coincides with the soil beds and the agricultural
25	the southern point of the $-$ it's like a magenta colour, in	25	potential which is pretty on high on that side. Thank you,
	Page 70		Page 72
1	Page 70 the same time it also starts on the northern pit, on the	1	Page 72 next slide. Again all right so this is a bit more detail
1 2		1 2	
	the same time it also starts on the northern pit, on the		next slide. Again all right so this is a bit more detail
2	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there	2	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't
2 3	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next	2 3	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's
2 3 4	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette,	2 3 4	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated
2 3 4 5	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is	2 3 4 5	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are
2 3 4 5 6	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so	2 3 4 5 6	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand
2 3 4 5 6 7	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1.	2 3 4 5 6 7	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will
2 3 4 5 6 7 8	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give	2 3 4 5 6 7 8	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry
2 3 4 5 6 7 8 9	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining	2 3 4 5 6 7 8 9	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the
2 3 4 5 6 7 8 9 10	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that,	2 3 4 5 6 7 8 9 10	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant
2 3 4 5 6 7 8 9 10 11	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it	2 3 4 5 6 7 8 9 10 11	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities.
2 3 4 5 6 7 8 9 10 11 12	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was	2 3 4 5 6 7 8 9 10 11 12	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities. From there it would be loaded onto the necessary trucks or
2 3 4 5 6 7 8 9 10 11 12 13	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was identified by the various specialists. I don't want to go	2 3 4 5 6 7 8 9 10 11 12 13	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities. From there it would be loaded onto the necessary trucks or stored in a silo as you can see in the last, this is just a
2 3 4 5 6 7 8 9 10 11 12 13 14	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was identified by the various specialists. I don't want to go into detail, but definitely there's a buffer area around	2 3 4 5 6 7 8 9 10 11 12 13 14	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities. From there it would be loaded onto the necessary trucks or stored in a silo as you can see in the last, this is just a schematic which shows more or less the process that will be
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was identified by the various specialists. I don't want to go into detail, but definitely there's a buffer area around the Vaal River, you can see it in the dark blue line going	2 3 4 5 6 7 8 9 10 11 12 13 14 15	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities. From there it would be loaded onto the necessary trucks or stored in a silo as you can see in the last, this is just a schematic which shows more or less the process that will be followed. Okay next slide. I did discuss this a bit
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was identified by the various specialists. I don't want to go into detail, but definitely there's a buffer area around the Vaal River, you can see it in the dark blue line going all around the perimeter of the property. There are also	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities. From there it would be loaded onto the necessary trucks or stored in a silo as you can see in the last, this is just a schematic which shows more or less the process that will be followed. Okay next slide. I did discuss this a bit earlier about the diamonds, there's no new information in
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was identified by the various specialists. I don't want to go into detail, but definitely there's a buffer area around the Vaal River, you can see it in the dark blue line going all around the perimeter of the property. There are also areas inside where there has been wetlands identified, those have been all excluded as well as the sensitive	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities. From there it would be loaded onto the necessary trucks or stored in a silo as you can see in the last, this is just a schematic which shows more or less the process that will be followed. Okay next slide. I did discuss this a bit earlier about the diamonds, there's no new information in here except that there would be a – Robert just to correct me, that's called a rotary plant, a rotary plant is the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was identified by the various specialists. I don't want to go into detail, but definitely there's a buffer area around the Vaal River, you can see it in the dark blue line going all around the perimeter of the property. There are also areas inside where there has been wetlands identified,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. It will then be transported to the processing plant where it will go through the washing and drying facilities. From there it would be loaded onto the necessary trucks or stored in a silo as you can see in the last, this is just a schematic which shows more or less the process that will be followed. Okay next slide. I did discuss this a bit earlier about the diamonds, there's no new information in here except that there would be a – Robert just to correct
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the same time it also starts on the northern pit, on the west bank. There's al so a year 1. Ja thank you, there were the mouse cursor is. This is for sand. The next slide would show the aggregate, if you can go on, Sonette, so that's the aggregate. Again there's a year 1 which is right in the centre of the map there at the cursor, so there would be three separate areas starting in year 1. Two for sand, one for aggregate. That together would give you a total mining area of 9 hectares, active mining hectares. Okay I want to also just point you out that, just go back to that slide, Sonette, please, in this map it shows various buffer areas and sensitive zones that was identified by the various specialists. I don't want to go into detail, but definitely there's a buffer area around the Vaal River, you can see it in the dark blue line going all around the perimeter of the property. There are also areas inside where there has been wetlands identified, those have been all excluded as well as the sensitive ridges as well as buffer zones around the power lines and roads and so forth. So those have all been excluded from	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	next slide. Again all right so this is a bit more detail on the various resources that will be mined and I don't think I need to go into a lot of detail here because it's about the benches and about the depths that's associated with that, the total areas and how the 30 years are planned. That's a schematic of the specialised sand process, so phase, 1, 2, 3 and 4, the first phase will happen in the pit, that's where it will be excavated, sorry just go back to that drawing, thank you, excavated in the pit. 	Page 77		Page 79
1	administrator.	1	MR SCHIMPERS: As far as I can note it's
2	SPEAKER: I see, is it Chris Campbell?	2	six –
3	MR CAMPBELL: Yes.	3	MR VAN DEN BERG: Ja, I also remember six
4	CHAIRPERSON: Chris, you've got the	4	metres deep for aggregate. So aggregate is distinguished
5	floor.	5	between two layers. It's an oxidised and un-oxidised
6	MR CAMPBELL: Thank you very much, Chair.	6	material. Both of them have different applications but I
7	I think the point was noted now and probably highly	7	also have it as six metres deep for the aggregate quarries.
8	fortunate that Mr Van Wyk's operation now comes on the back	8	The impacts that you're referring to for groundwater and so
9	of two other entities who've destroyed any credibility that	9	forth that's not part of my expertise. I believe some of
10	may be even available. So we sit with that as a problem	10	the specialists are on the meeting and if the Chair is okay
11	but over and above that in Mr Van Den Berg's presentation.	11	with that they can respond to those specific questions.
12	The question I have here is these linear diagrams of the	12	CHAIRPERSON: Sonette, I'm comfortable
13	operations have a risk of over simplifying the activity and	13	that we do respond to those questions now. If you can just
14	we've got to be frank. If you're going to be excavating	14	ask the appropriate – sorry, I don't have the list in front
15	exactly to what depth is that? If you're doing operations	15	of me – appropriate specialists to respond to the potential
16	within the excavation what is happening to the groundwater	16	for groundwater pollution as a result let me call it
17	in respect of contamination? You're going to have	17	operational activities, machining activities and so forth
18	equipment there, diesel spillage, all of that and I really	18	within the pit?
		19	•
19 20	wonder if, you know, the quality of water that may remain based on the potential, the large potential for		
		20	note of the contamination comment. What I can at this
21	contaminating the groundwater whether that has been	21	stage say is we've incorporated mitigation measures from
22	adequately factored and then the other colleague's comment	22	all the specialists regarding that but we do not have our
23	and I talk again about how the credibility of the other	23	groundwater specialist on the team today.
24	miners had destroyed any trust because they don't stick to	24	CHAIRPERSON: May I ask, Sonette, and if
25	the working hours. The noise is significant and if you	25	I'm out of order you will tell me that we can in the
	Page 78		Page 80
1	Page 78 were going to have such an intense operation, you're	1	Page 80 minutes that we actually add to the minutes his response to
1 2	were going to have such an intense operation, you're	1 2	5
	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought,		minutes that we actually add to the minutes his response to
2	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt	2	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that.
2 3	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your -	2 3	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The
2 3 4	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can	2 3 4	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous
2 3 4 5 6	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank	2 3 4 5	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is
2 3 4 5 6 7	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair.	2 3 4 5 6 7	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise
2 3 4 5 6 7 8	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we	2 3 4 5 6 7 8	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a
2 3 4 5 6 7 8 9	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are	2 3 4 5 6 7 8 9	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond
2 3 4 5 6 7 8 9 10	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are	2 3 4 5 6 7 8 9 10	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that?
2 3 4 5 6 7 8 9 10 11	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to	2 3 4 5 6 7 8 9 10 11	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja,
2 3 4 5 6 7 8 9 10 11 12	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've	2 3 4 5 6 7 8 9 10 11 12	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at,
2 3 4 5 6 7 8 9 10 11 12 13	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you	2 3 4 5 6 7 8 9 10 11 12 13	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the
2 3 4 5 6 7 8 9 10 11 12 13 14	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The	2 3 4 5 6 7 8 9 10 11 12 13 14	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about
2 3 4 5 6 7 8 9 10 11 12 13 14 15	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that? MR VAN DEN BERG: I can give a response	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on the level of operations and will only be between 6 AM and 6
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that? MR VAN DEN BERG: I can give a response to the depth and firstly it's various - the sand deposit	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on the level of operations and will only be between 6 AM and 6 PM when mining is conducted. We have recommended various
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that? MR VAN DEN BERG: I can give a response to the depth and firstly it's various - the sand deposit for instance isn't the same depth everywhere but from the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on the level of operations and will only be between 6 AM and 6 PM when mining is conducted. We have recommended various mitigation measures to be included in the EMPR for the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that? MR VAN DEN BERG: I can give a response to the depth and firstly it's various - the sand deposit for instance isn't the same depth everywhere but from the prospecting it came out to a maximum of 12 metres deep.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on the level of operations and will only be between 6 AM and 6 PM when mining is conducted. We have recommended various mitigation measures to be included in the EMPR for the mine. Maybe the mining team can elaborate on what those
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that? MR VAN DEN BERG: I can give a response to the depth and firstly it's various - the sand deposit for instance isn't the same depth everywhere but from the prospecting it came out to a maximum of 12 metres deep. Definitely in some areas less. It could be in some	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on the level of operations and will only be between 6 AM and 6 PM when mining is conducted. We have recommended various mitigation measures to be included in the EMPR for the mine. Maybe the mining team can elaborate on what those will be. They've been investigating things like white
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that? MR VAN DEN BERG: I can give a response to the depth and firstly it's various - the sand deposit for instance isn't the same depth everywhere but from the prospecting it came out to a maximum of 12 metres deep. Definitely in some areas less. It could be in some specific areas a little bit more. For the aggregate I'm	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on the level of operations and will only be between 6 AM and 6 PM when mining is conducted. We have recommended various mitigation measures to be included in the EMPR for the mine. Maybe the mining team can elaborate on what those will be. They've been investigating things like white noise reverse (inaudible) and constantly be, the use of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	were going to have such an intense operation, you're looking at excessive noise generation. So I just thought, you know, I'm curious as to how those are going to be dealt with because the linear graphics don't do justice to your - almost like a video of actual activity so that people can see how messy it is and what real impact there is. Thank you, Chair. CHAIRPERSON: Thank you. Just before we get a response, I think some of those responses are comments and some of them are observations and there are some questions in between as well. I'd like to respond to the questions but just before that all these points you've made are minuted and recorded as such. Sonette, would you guide me on who's going to respond to what questions? The first question I think is how deep would the cuts be. Maybe we should take one as first. Mader, can you help on that? MR VAN DEN BERG: I can give a response to the depth and firstly it's various - the sand deposit for instance isn't the same depth everywhere but from the prospecting it came out to a maximum of 12 metres deep. Definitely in some areas less. It could be in some	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	minutes that we actually add to the minutes his response to that question? MS SMIT: Definitely, we can do that. CHAIRPERSON: Thank you very much. The noise, the level of noise as a result of the continuous operation who could respond to that? So what I'm saying is the noise mitigation or the measures to manage the noise along the, I think you know, working the strip the along a strip there's an issue towards that. Can anybody respond to that? MR GROBLER: It's Nick of Airshed. Ja, our propagation simulation showed that noise levels at, well, will definitely when the mining is closest to the town there will be an increase of noise levels of about between three decibels at the further side of the village or the town and about between seven and 15 decibels to the closest side of the town. That will of course depend on the level of operations and will only be between 6 AM and 6 PM when mining is conducted. We have recommended various mitigation measures to be included in the EMPR for the mine. Maybe the mining team can elaborate on what those will be. They've been investigating things like white

		1	
	Page 81	1	Page 83
1	distinguish a 3 decibel increase and 15 decibels is about	1	handled. There is some dust generated of course but
2	the level where it becomes easily distinguishable and possibly irritating. So when the mining is closest to the	2	because the material's not being blasted before it gets
3	town it will be audible but on when it's at all the other	3	removed from the pit and because it has a very low silt content the material itself doesn't generate a lot of dust
4	blocks that Mader showed earlier it will not be – it will	4 5	-
5	likely not be audible at Vaal Oewer.	6	although there are some mitigation measures recommended for that. But water sprays are the main recommendation
6 7	CHAIRPERSON: Thank you very much.	7	although there are some others and then of course timeous
8	Sonette, did I cover all the questions in the previous	8	revegetation of any exposed area so that you don't have
9	comment or is there one that I've missed?	9	wind erosion which can be a big problem if an area is left
10	MS SMIT: There was the dust and we've	10	open and then covered with topsoil and not revegetated
11	got another hand up as well.	11	because topsoil unlike the sand and the gravel material is
12	CHAIRPERSON: Okay, who's going to talk	12	prone to wind erosion.
13	about the dust management and the potential implications or	13	CHAIRPERSON: Thank you very much for
14	impacts, sorry, of the dust?	14	that. Sonette, I suspect we can move on. Is my assumption
15	MR GROBLER: That will be me as well,	15	correct?
16	Robert, thanks. Ja, same as with the noise the disbursing	16	MS SMIT: Just two more hands and then we
17	modelling shows that with the initially planned mitigation	17	can continue.
18	measures there would be definitely dust impact at Vaal	18	CHAIRPERSON: Okay?
19	Oewer when the mining is closest to the town. Simulation	19	MS SMIT: Craig, Mariette Liefferink.
20	shows that dust, the long term dust impact there is way	20	CHAIRPERSON: Craig, you've got the
20	below the South African limit but there might be short term	20	floor.
22	exceedances on the limit depending on the wind direction	22	MR RICHARDSON: Mr Chair, please see the
23	which is in this area mainly from the north. So in the odd	23	questions I've written in the chat.
24	occasion that there is wind from the south or on wind still	24	CHAIRPERSON: Okay. Sonette, can you
25	days there might be particular impacts at Vaal Oewer or at	25	please read those questions to us?
25	days there might be particular impacts at vali Dewer of at	25	picase read those questions to us:

MR RICHARDSON: (Inaudible). CHAIRPERSON: I think if I can respond to that? A little bit earlier in the presentation it was said that this application would work on a 66 basis and I think
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the closest residences to the north of the mine. The dust impact because the wind direction is mainly from the north extends much further to the south of the operations. CHAIRPERSON: If I - MR GROBLER: Sorry? CHAIRPERSON: If you can just quickly guide us on the mitigation measures proposed for the dust impact? MR GROBLER: The mining team will need to or the applicant will need to just give us a better understanding of what they have accepted and put into the EMPR but some of the measures that we have recommended is to move the mobile crushers out of the pit and rather do crushing at a single location where that can be properly mitigated but also has a little bit of an impact on noise as well, moving that away from the (inaudible) receptors. I don't want to make any commitments on their part but recommendations that we've made is the use of water cannons in the pit to create a mist in the pit that keeps the material being handled continuously moist. Continuous water sprays with water bowsers on all the ore roads that will be used. The main dust impacts from mining operations mainly come from vehicle (inaudible) whether that's in the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MS SMIT: The noise from the road needs to be addressed. This will now be 24 hours a day. What about the noise from the other neighbours on the river? CHAIRPERSON: Okay, Sonette, would you like to talk about cumulative impacts? I think the noise issue has been noted and is recorded and I understand the question to mean in other words the joint impact of this application as well as the other two mines or the one mine already in operation. Craig, have I got you right? MR RICHARDSON: (Inaudible) CHAIRPERSON: Sonette, any response on that? MS SMIT: Ja, the mitigation measures as indicated is all included in the red boards and that needs to be followed. That is what I can say about the noise and the mitigation but the 24-hours a day I'm not 100% sure I understand that question. Are you asking if they will be working 24 hours a day? MR RICHARDSON: (Inaudible). CHAIRPERSON: I think if I can respond to that? A little bit earlier in the presentation it was said that this application would work on a 66 basis and I think Craig's question is that if you add that to the other

		-	
	Page 85		Page 87
1	right?	1	the same on the Gauteng side. The mining is a bit further
2	MR RICHARDSON: Mr Chair, can you hear	2	away specially during the first years from (inaudible) to
3 4	me? CHAIRPERSON: Please repeat that, I	3 4	year 30 there is mining closer there but we did do baseline noise measurements in those areas both to the north and to
5	didn't hear you?	5	the east. Ja, so those were included in the study and the
6	MR RICHARDSON: Sorry, can you hear me	6	results are available in the report. I'm sorry, I'm
7	now?	7	referring specifically to Vaal Oewer because that was the
8	CHAIRPERSON: Yes, I can.	8	main area of focus with the close mining there close to the
9	MR RICHARDSON: My question the expert	9	island. But all the sensitive receptors all along the
10	keeps on referring to Vaal Oewer. They are not only the	10	river on both sides of the river are taken into account.
10	impacted neighbours specially on the Gauteng side there're	11	CHAIRPERSON: Thank you very much for
12	a number of neighbours that will be impacted. Has it done	12	that.
12		12	MR RICHARDSON: Mr Chair?
13	readings along the whole river in his study and my question is will the trucks be running 24 hours a day? Because with	13	CHAIRPERSON: Yes?
	(inaudible) at the moment we're dealing with a case of the		
15		15	[15:21] MR RICHARDSON: Just on the thing with the trucks to be first into the mine obviously is to be
16 17	mine is operating various hours but the trucks start running three or four hours prior to their opening hours.	16 17	first out. So you'll have queues of trucks probably from
17	So the effect of that is we have trucks running from 4	17	midnight on the road, so the road will be operational 24
19	o'clock in the morning.	19	hours a day.
20	CHAIRPERSON: Alright, let us get a	20	CHAIRPERSON: I hear your point.
20	response. Maybe the easier one on the number of trucks and	20	MR RICHARDSON: Please could you have
22	what times those trucks will be running? Robert, if you	21	that noted and on the second point regarding the noise what
22	would?	22	points were measured? Is that in the report?
23	MR GROBLER: Okay so our operating hours	23 24	MR GROBLER: Sorry I can take it quickly.
25	will be from six the morning until six at night. If the	25	Yes it is in the report, it's figure 6 in the noise report.
25	will be from six the morning that six the highle. If the	25	resteris in the report, its figure of in the holse report.
	Page 86		Page 88
1	Page 86 trucks come in from five or four, we will surely try and	1	Page 88 [Inaudible] five points, if you want to I can describe them

	trucks come in from five or four, we will surely try and		[Inaudible] five points, if you want to I can describe them
2	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a	2	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the
2 3	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the	2 3	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest
2 3 4	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating	2 3 4	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the
2 3 4 5	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At	2 3 4 5	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done
2 3 4 5 6	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night.	2 3 4 5 6	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side
2 3 4 5 6 7	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making,	2 3 4 5 6 7	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area,
2 3 4 5 6 7 8	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can	2 3 4 5 6 7 8	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers
2 3 4 5 6 7 8 9	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles	2 3 4 5 6 7 8 9	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area.
2 3 4 5 6 7 8 9 10	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6	2 3 4 5 6 7 8 9 10	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise
2 3 4 5 6 7 8 9 10 11	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles	2 3 4 5 6 7 8 9 10 11	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road
2 3 4 5 6 7 8 9 10 11 12 13 14	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct?	2 3 4 5 6 7 8 9 10 11 12 13 14	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police
2 3 4 5 6 7 8 9 10 11 12 13 14 15	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about the noise we in our response earlier from Airshed we spoke	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise measurements were done on the southern side of the river.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about the noise we in our response earlier from Airshed we spoke quite a bit about Vaal Oewer and the question was just	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise measurements were done on the southern side of the river. What we try and do when we do baseline noise measurements
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about the noise we in our response earlier from Airshed we spoke quite a bit about Vaal Oewer and the question was just whether the study also considered the Gauteng side in terms	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise measurements were done on the southern side of the river. What we try and do when we do baseline noise measurements is to stay away from local sources because what that does
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about the noise we in our response earlier from Airshed we spoke quite a bit about Vaal Oewer and the question was just whether the study also considered the Gauteng side in terms of neighbours and people on this side living in the area	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise measurements were done on the southern side of the river. What we try and do when we do baseline noise measurements is to stay away from local sources because what that does is when we're trying to do a cumulative assessment for
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about the noise we in our response earlier from Airshed we spoke quite a bit about Vaal Oewer and the question was just whether the study also considered the Gauteng side in terms of neighbours and people on this side living in the area and maybe if we can have a response on that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise measurements were done on the southern side of the river. What we try and do when we do baseline noise measurements is to stay away from local sources because what that does is when we're trying to do a cumulative assessment for noise we want to work on the lowest noise areas because
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about the noise we in our response earlier from Airshed we spoke quite a bit about Vaal Oewer and the question was just whether the study also considered the Gauteng side in terms of neighbours and people on this side living in the area and maybe if we can have a response on that? MR GROBLER: Ja, sorry, I'm referring to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise measurements were done on the southern side of the river. What we try and do when we do baseline noise measurements is to stay away from local sources because what that does is when we're trying to do a cumulative assessment for noise we want to work on the lowest noise areas because that shows the biggest difference. Noise, unlike some
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. But our operating hours will strictly be from six to six in the day. At night there won't be any trucks operating at night. CHAIRPERSON: So the point you're making, Robert, is that the trucks may be on the road but they can only access our operations from 6 o'clock in the morning till 6 o'clock at night. In other words, there will be no vehicles and no loading and no anything so that vehicles can continue travelling from your operation before 6 o'clock in the morning or after 6 o'clock at night, is correct? MR SCHIMPERS: That's correct, yes. CHAIRPERSON: Alright, the question about the noise we in our response earlier from Airshed we spoke quite a bit about Vaal Oewer and the question was just whether the study also considered the Gauteng side in terms of neighbours and people on this side living in the area and maybe if we can have a response on that? MR GROBLER: Ja, sorry, I'm referring to Vaal Oewer because the noise impact especially during year	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	[Inaudible] five points, if you want to I can describe them for you quickly. It's on the eastern boundary close to the river, then in about the centre of the area the furthest that was accessible towards – it's about directly to the east of the River. Then there was a measurement done directly to the south of Vaal River, on the southern side of the river. One done to the west of the study area, close to the river and then one done much further away from the study area where the river turns back to the south on the eastern bank of the river. So it was a – it covers almost the entire area. MR RICHARDSON: So were noise measurements taken on the Gauteng side off the link road between the Potch, Vanderbijl Road and the Barrage police station? MR GROBLER: No all the noise measurements were done on the southern side of the river. What we try and do when we do baseline noise measurements is to stay away from local sources because what that does is when we're trying to do a cumulative assessment for noise we want to work on the lowest noise areas because that shows the biggest difference. Noise, unlike some other things, when you look at it cumulatively it's much
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	trucks come in from five or four, we will surely try and make a plan, you know, to stop that but I mean it's a public road so I don't know how we will be able to stop the public road so the trucks can't enter. 1	that then simply doesn't show up. So in order to stay	1	the National Dust Control regulations, the amendments now
2	conservative and show what the worst impact will be we try	2	asks for, I don't know if it's been published yet, but that
3	to do it in as quiet areas as possible, but are still	3	a mining company, prior to mining, must prepare not just a
4	representative of the area. So all of those were on the	4	dust monitoring plan, but a dust management plan. And I
5	southern side of the area, most of them were away from any	5 6	also just express concern because the average period of
6	local activity.	-	monitoring weakens quick responses to short term episodes
7	CHAIRPERSON: Thank you. Nick you've	7	because as we know that it's often averaged out in a month and then I also wanted to ask whether the residential level
8	still got the floor.	8	
9	MR RICHARDSON: Thank you, Mr Chair.	9	of 600 milligrams per square metre in a month has been
10	CHAIRPERSON: Anything further on this	10	applied in this application or was a non-residential level
11 12	matter from your side? MR RICHARDSON: No thank you, Mr Chair,	11 12	applied of 1200 milligrams per square metre. And then my
12			last question the mitigation measures that are being
13	that's fine. CHAIRPERSON: Mader, if you would	13 14	proposed we all realise that there are management mitigation measures. The problem is the implementation of
			these mitigation measures and the poor enforcement if there
15 16	continue I suspect we're on page 31 or something. MR VAN DER BERG: Any other questions?	15 16	is non-implementation or non-compliance with the legally
10	CHAIRPERSON: Sonette, any other	10	binding EMPR. That is of a major concern. So we would
17	questions on this, I think we've exhausted them now.	17	really suggest that there is an environmental officer that
19	MS SMIT: Yes there's just one more hand	19	should be appointed by the mine and that if the application
20	up from Mariette Liefferink, but there's one question in	20	proceeds that communities also assessed in the monitoring
21	the chat as well that's asking if the applicant will be	21	of these aspects, of these impacts.
22	working during the public holidays and weekends.	22	CHAIRPERSON: Mariette, thank you. I'm
23	CHAIRPERSON: All right before we give it	23	going to take them one by one. I just want to say about
24	to Mariette, Robert will the plant or the operations be	24	the last two points you made there are minuted and of
25	active during public holidays and weekends and so forth?	25	course regarding the environmental control officer and the

May I just ask whether you are including this water use licence application because it is my understanding it has to be included in terms of the one environmental system? But I've not seen sight of the water use license	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	setting up, to use a different word, environmental committees with the communities. I think there's lots of precedence for that, so those two suggestions or comments are noted. Sonette, if we can start with where does the water use license application fit in and after that we'll talk about the noise regarding whether ambient levels were used or point levels and then the same for the dust. What standard of saturation was used. So, Sonette, if you can talk to us about where the water use application fits in please. MS SMIT: Okay. We did apply for a water use license, it is submitted to the Department of Water Affairs and it's still in its early stages. We've recently been appointed to do that, so yes I can just answer you to say that the application is in process and as you will be well aware is that it's got its own public participation process also. So all the specialist studies pertaining to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	MR GROBLER: Every second weekend the Saturday will only be clean up for up to about 12 o'clock and ja public holiday I'm sure we won't work as far as I know. And how it's been in the past on the plan that we mined, so no. CHAIRPERSON: All right, Mariette, you've got the floor. MS LIEFFERINK: Thank you. I have some internet connection challenges, but I'll try my best. First of all in the presentation that was done there was mention made about the wetland areas that mining would take place in the wetland area that's in the buffer zones, so I would infer that there would be a need to apply for a water use license in terms of section 21 of the National Water Act. May I just ask whether you are including this water use licence application because it is my understanding it has to be included in terms of the one environmental system? But I've not seen sight of the water use license application. That is the one question. And I also want to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	setting up, to use a different word, environmental committees with the communities. Meeting

		I	
	Page 93	1	Page 95 levels used, we did assess the residential locations
1	that we put into this environmental report becomes the conditions at the end of the day. So the approval, should	1 2	against the residential limit of 600 milligrams per square
3	there be an approval, are based on the mitigation measures.	3	metre per day. And other locations such as to the south of
	So I think the environmental committee I think that is a	4	
4			the operations against 1 200. Just to give you an idea,
5	very, very good point and I would definitely include that	5	the dust fall out from dispersion modelling simulations it
6	in the report. The ECO is already included that the ECO	6	shows about 300 milligram, between 300 and 600 at most of
7	should be appointed on this site, but I think in that area	7	the residential locations to the north of the river. And
8	for environmental committee. Thank you very much for that	8	obviously it extends further to the south because there is
9	comment, I think it's very relative.	9	a northerly component in the prevailing wind. But both of
10	CHAIRPERSON: Nick if you could take the	10	those limits were applied where applicable, so for general
11	baton and continue. It had to do with the noise	11	areas we've used the 1 200 and for residential the 600.
12	measurement relation to ambient noise levels and point	12	CHAIRPERSON: Mariette, is there
13	levels or source levels. Mr Grobler, that's you.	13	something that you raised that we didn't discuss or I
14	MR GROBLER: Sorry I'm pressing my unmute	14	forgot?
15	button and didn't realise I didn't have my window open.	15	MS LIEFFERINK: I'm satisfied, I will put
16	I'm doing a speech here for myself. Sorry let me start	16	my questions in writing, but thank you for the response.
17	again. Okay, Mariette, with regards to ambient noise	17	CHAIRPERSON: Thank you very much.
18	levels, we did take it into account. For noise assessments	18	Mader, dis nou jou beurt.
19	we do not look at incremental noise levels at all. We look	19	MR VAN DER BERG: Okay so this slide
20	at cumulative noise levels taking into account what the	20	speaks about the phasing of the mine and this question was
21	baseline noise level is and then we look at increase in	21	raised quite a bit in last week's session. So we've spoken
22	noise levels from baseline as well. Impulsivity and	22	about it earlier that it would be the role of a mining
23	(inaudible) and everything has been taken into account in	23	practice that would happen. And I want to point you to the
24	the source inventory and included in the propagation	24	third bullet point there which says to achieve an effective
25	modelling. So all of that is in there, the frequency of	25	mining sequence the maximum of four phases or four blocks
	D 04		Dara OC
1	Page 94 the noise and everything has been included. With regards	1	Page 96 will be either actively mined or in the process of

2 3 4 5 6 7 8	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never	2 3 4 5 6 7 8	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your
2 3 4 5 6 7 8 9	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation	2 3 4 5 6 7 8 9	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and
2 3 4 5 6 7 8 9 10	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the	2 3 4 5 6 7 8 9 10	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be
2 3 4 5 6 7 8 9 10 11	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however,	2 3 4 5 6 7 8 9 10 11	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and
2 3 4 5 6 7 8 9 10 11 12	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance.	2 3 4 5 6 7 8 9 10 11 12	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which
2 3 4 5 6 7 8 9 10 11 12 13	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions.	2 3 4 5 6 7 8 9 10 11 12 13	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring
2 3 4 5 6 7 8 9 10 11 12 13 14	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from	2 3 4 5 6 7 8 9 10 11 12 13 14	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is	2 3 4 5 6 7 8 9 10 11 12 13 14 15	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is exceeded about 400 metres from active mining operations.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is exceeded about 400 metres from active mining operations. And 4 decibels, let me just think, I think it was 1.5 or	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note that it's only in the first block where there would be
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is exceeded about 400 metres from active mining operations. And 4 decibels, let me just think, I think it was 1.5 or 1.8 kilometres. So at 1.5 kilometres the mine won't be	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note that it's only in the first block where there would be active mining occur. The other three blocks would be
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is exceeded about 400 metres from active mining operations. And 4 decibels, let me just think, I think it was 1.5 or 1.8 kilometres. So at 1.5 kilometres the mine won't be audible at all or you won't be able to distinguish the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note that it's only in the first block where there would be active mining occur. The other three blocks would be already in the process of being rehabilitated. That brings
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is exceeded about 400 metres from active mining operations. And 4 decibels, let me just think, I think it was 1.5 or 1.8 kilometres. So at 1.5 kilometres the mine won't be audible at all or you won't be able to distinguish the noise from the mine. At 1.2 kilometres away it might	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note that it's only in the first block where there would be active mining occur. The other three blocks would be already in the process of being rehabilitated. That brings me to the bullet point just after that that says at no
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is exceeded about 400 metres from active mining operations. And 4 decibels, let me just think, I think it was 1.5 or 1.8 kilometres. So at 1.5 kilometres the mine won't be audible at all or you won't be able to distinguish the noise from the mine. At 1.2 kilometres away it might become intrusive based on the Gauteng legislation. Ja but	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note that it's only in the first block where there would be active mining occur. The other three blocks would be already in the process of being rehabilitated. That brings me to the bullet point just after that that says at no point will active mining occur in an area larger than five
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. It extends if my memory serves, about 1.2 kilometres from active mining operations. And I think 15 decibels is exceeded about 400 metres from active mining operations. And 4 decibels, let me just think, I think it was 1.5 or 1.8 kilometres. So at 1.5 kilometres the mine won't be audible at all or you won't be able to distinguish the noise from the mine. At 1.2 kilometres away it might become intrusive based on the Gauteng legislation. Ja but that is all included in the report, that is all included in	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note that it's only in the first block where there would be active mining occur. The other three blocks would be already in the process of being rehabilitated. That brings me to the bullet point just after that that says at no point will active mining occur in an area larger than five hectares for the sand and four hectares for the aggregate.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the noise and everything has been included. With regards to the seven decibel increase the Gauteng specific legislation we did include it in our assessment criteria, both the seven decibel increase criteria as well as the Gauteng, what is called, I just don't remember now, something zones, I can't remember the exact name now, but they have a 60 decibel limit for controlled zones. In many cases – for most of the study areas 60 decibels is never exceeded and 60 decibels is quite loud. The propagation modelling shows that in the immediate vicinity of the mining operations. The seven decibel increase is, however, does extend, however, for quite a significant distance. That is noted in the report and shown in the conclusions. And 4 decibels, let me just think, I think it was 1.5 or 1.8 kilometres. So at 1.5 kilometres the mine won't be audible at all or you won't be able to distinguish the noise from the mine. At 1.2 kilometres away it might become intrusive based on the Gauteng legislation. Ja but that is all included in the report, that is all included in the – but that's all evaluated without additional	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	will be either actively mined or in the process of rehabilitation. Now if I can ask you to just use your imagination and think about the mine being four years in advance that block that would be mined in year 4 is referred to here as the first block, that's where active mining would occur. The block in year 3 which is the second is where shaping and profiling would occur, so that's already where rehabilitation starts. That's your first phase of rehabilitation is the basic shaping and profiling of the pit. The third block or that would be second year of mining where topsoil would be spread and seeding would occur. And then at the fourth block which would be the one that was mined first is in your monitoring of rehabilitation. That's where you would have some adaptive management. So we see an area of disturbance expanding over four phases or four blocks, but take note that it's only in the first block where there would be active mining occur. The other three blocks would be already in the process of being rehabilitated. That brings me to the bullet point just after that that says at no point will active mining occur in an area larger than five hectares for the sand and four hectares for the aggregate. Please don't confuse this with the yearly average which is

		-	
	Page 97		Page 99
1	for aggregate. And this includes the areas that are being	1	[15:40] So, the smaller area that's disturbed at any
2	rehabilitated. So ja that's just about the whole disturbed	2	single time the smaller his environmental liability. So,
3	area. You can go onto the next slide please.	3	it is really a benefit for him to stick to a rollover
4	Okay we refer you to the 30 year mining plan,	4	mining plan and obviously rehabilitate as soon as possible.
5	those were the pictures we showed earlier where the mine	5	We spoke earlier about the topsoil and I mentioned that
6	area for sand and the mine area for aggregate were divided	6	with the mining permits it became very, very clear that
7	into 30 years. Some areas are slightly bigger and that's	7	topsoil management is a very important concept that we
8	due to the lesser depth of the resource, so that area is a	8	can't slip up on, and I'm not joking when I'm saying that
9	little bit bigger. If you want me to expand on that I can.	9	topsoil is as good as gold, because to create topsoil or
10	Second bullet point 13.5 hectares will be allocated to the	10	import topsoil from somewhere else is just very expensive.
11	fixed mining infrastructure. So that could be referring to	11	So, the topsoil that's available on the site would be
12	the processing plant. There would be strict lines drawn	12	handled very, very specifically and in the rehabilitation
13	physically basically on where mining can occur in a certain	13	report there is a whole topsoil management programme
14	area. So the third bullet point no vegetation outside of	14	towards that. So, ja, it all slides into this concurrent
15	the active blocks may be disturbed until it is time for	15	rehabilitation programme.
16	that specific area to be mined. That obviously doesn't	16	The next slide, please? It goes into a little
17	include roads because you need to get to that specific	17	more detail of how the profiling would occur. We know that
18	point. And that last point just emphasises that immediate	18	erosion is increased with the increase in site slopes, so
19	rehabilitation will occur as soon as mining is done. Okay	19	we want to keep it to about 18 degrees as a good minimum.
20	the next two slides, I don't really want to go into too	20	It could even be less than that, especially on the sandy
21	much depth, it's just the basic what we discussed now and	21	areas, but in the aggregate quarries you can go a bit
22	it shows the progression of the mine over certain periods.	22	steeper, a maximum of 27 degrees. There is a point right
23	We spoke about the construction phase being in the first	23	at the end there that speaks about the monitoring and the
24	two years, so in the bottom, just go back one, ja that's	24	maintenance programme. We do anticipate that there might
25	it. The bottom left picture shows the first two years	25	be areas that need a bit more attention for a longer time.
			-
	Page 98		Page 100
1	mining areas and the sequencing after that from year 3 to	1	I think Mr Grobler mentioned about the potential for dust
2	5. Next image please. 62.10, 11 to 15 and so it goes on	2	when you spread out topsoil. We are very well aware of
3	until we get to the end of it and it just shows how	3	that and we've worked on two strategies to combat that.
4	rehabilitation would occur after that. Okay next slide.	4	One of it is that before you start mining you would cut and
5	Okay so you are well aware at this point that the end land	5	bail the grass that's currently there. that should be
6	use for the mining would be to re-vegetate the area and to	6	stored away and as soon as you do your rehabilitation you
7	increase the grazing potential of it for the benefit of the	7	spread your topsoil and let your seeding goes, bails can
8	game that's on there. That's in the mining area. This	8	then be opened up again and spread over the area. So, that
9	should also be integrated into the estate planning that the	9	would minimise dust erosion. It would help to keep a
10	applicant, Advocate Mark Van Wyk is planning at the end of	10	constant temperature on the surface by insulating it. It
11	it. So we've done quite a bit of work to understand how we	11	also keeps it moist, it helps with moisture retention. So,
12	can rehabilitate with the eco-estate in mind. So there	12	that has been practiced in the past on a small scale and it
13	would be some areas that would obviously have a pit or a	13	worked very effectively. Alternatively, you can use all
14	void that could be converted into dams or some water	14	kinds of other geo fabrics that's available on the market
15	course. That's indicated in the right bottom side, it's at	15	to put over the soil to contain the soil from, or protect
16	this point just a zone, but it should be planned as the	16	the soil from not eroding away. So, there are various
17	mine progress. Okay next one. Okay again we spoke we	17	options to prevent that.
18	about the rollover mining. I would just like to point you	18	The next slide, please, Sonette? So, that just
19	to the second paragraph there. So historically closure was	19	indicates the rollover mining concept as I've explained
20	seen as an intervention that's left to the end of the life	20	before. That's taken over the four year or the four phase
21	of mine. The concept of progressive closure aligns hand in	21	or the four phases, as I've explained, it just again a
22	hand with concurrent rehabilitation and this is quite	22	graphic that shows how it should proceed. You'll see there
23	important from the applicant's perspective that he wants to	23	is a fence included in there. The reason for that is to
24		24	actually keep the animals away. It sound strange but we've
1 - '	minimise his environmental liability to as little as	24	actually keep the animals away. It sound strange but we ve
25	possible.	24 25	seen that as soon as the grass starts germinating, that's

1	Page 101 obviously where the animals come to graze because that's	1	Page 103 deals with it quite extensively. Okay, good, so I like
2	the new growth, and that doesn't help us in terms of long	2	this drawing because it shows everything very well in
3	term rehabilitations, so a temporary fence would be erected	3	perspective. It is a full pie chart of the whole property,
	in that specific area that's in the process of being	4	the 858 hectares and which areas are currently used for
4		5	what in terms of the mines. You can see at the top there
	rehabilitated for about a year or two or until we can see	6	is a 16 hectare allocated for the resort development which
6	that the vegetation has been well established. So, that's		is currently in planning. That forms part of the eco-
7	now one of those stranger things that you don't normally	7	
8	find on a mining site with the animals being a bit of a	8	estate. There is quite a large area of 391 hectares of
9	nuisance.	9	still natural habitat and those include the buffer areas
10	Okay, the next slide is just talking through	10	and the sensitive zones that were identified by the various
11	that. Sonette, you can skip onto the next one. This is	11	specialists. Then right at the bottom, the red one is the
12	basically the same, it is just showing it on plan, how it	12	agricultural fields which I believe is currently used for
13	should proceed. I just want to refer you that there would	13	grazing mostly, Robert, for cattle.
14	be some topsoil stockpiling. You obviously can't, when you	14	Okay, then you go into the mining area. So, you
15	start off with your mind you can't place that first batch	15	can see the mining area is 363 hectares and it just shows
16	of topsoil on the previously rehabilitated area because	16	portion wise. Again, it is based on averages, 12 hectares,
17	none has been opened up. So, that needs to be stockpiled	17	yearly mining and those shots just shows you exactly how it
18	for a certain period. So, I just wanted to show that there	18 19	works. So, you can see those different colours, the orange, yellow and the lighter yellows, speaking again to
19	would be some topsoil stockpiling. Sonette, you can go on		
20	to the next one. That's the same process, just being	20 21	those four phases that we discussed earlier where the first one would be actively mined. The second one in the process
21 22	discussed to the end of it. You can skip to the next one.	21	of being rehabilitated by profiling. The third one,
22	Again, a graphic showing exactly those three or four phases that we've discussed. You can see on the left-hand side it	22	topsoil and seeded and the fourth one in the process of
23	starts off with the pre-mining environment being your	23 24	being monitored. That's it. I think I'm done. We can
25	active mining environment, progressive rehabilitation shown	25	skip to the next one which, Robert, do you want to present
20	delive mining environment, progressive rendsmation shown	25	sup to the next one which, robert, do you while to present
	Page 102		Page 104
1	in the middle there and then your closure phase. So, that	1	
	in the made there and then your closure phase. So, that	1	this or should I just –

You can see some of those photographs, it has been fully rehabilitated and you know to be fair, certainly small pockets and you could see that on that image on the left, small pockets of areas that hasn't been fully vegetated, but I'm taking

Public Participation Meeting

Meeting

Page 105 Image 105 1 slopes where a little bit of erosion came in and washed the 1 injoht-hand lanes need to be provided. As part of the 2 top soil away. So, that's just an area that needs to be 1 injoht-hand lanes need to be provided. As part of the mine itsels and like 3 handled with a bit more care. So ja, from my side the 1 important that in terms of this security accesses and like 4 vegetation doen on the permits, they were very successfully 1 the main secses and were and comparison the mine. Yes, so there 7 CHAIRPERSON: Thank you, Chair, Leon 5 to go to slide number 62 reads. 9 NR ROETS: Thank you, Chair, Leon 10 construction takes place, of the mine itsels ap lace, then 12 Side there, that the main access will be from road S121. 13 there and orealized probably these activities 13 fide there, that the read is important. It is also completion 14 CHAIRPERSON: Thank you, Chair, Link in the read on antopacty. 14 the and oradify and capacity. In terms of the percents, as soon at this there and is the nation or capacity at there and is the addify and capacity. 15 reage and on the mine. Yes, soot asthis anot capacity at theread is the particapacity.			I	
2 top soil avey. So, that's just an area that needs to be 2 future and detailed jamming of the mine itsels and like 3 handled with a bit more care. So ja, from my side the 3 important that in terms of this security accesses and like 4 vegetation doe on the permits, they were very successfully 1/ve mentioned ariler, where do the trucks park, wading 5 one. I think we've nailed it down to a to of dealit of 5 to go on the site and to be cleared and weight, that's a 7 CHAIPERSON: Thank you, Chair, Leon 5 orgo nucleas and then wells 10 obsparking. Can I continue? 1 the ray overaint. The salk completion 1 13 slide there, that the main access will be from road S171. 13 Chair, I think Tve covered what I was supposed to cover. 14 It is a provincial road. It belongs to the Free State 15 roduct that the road is improvements to be made, but 15 there is road safety and capacity. In terms of capacity at 1 eaction there is improvements or be made, but 14 the read beings to the Free State 10 robat many count that the state and the maine traces 15 requires that the manangement plan be put in action, and as	1.			-
3 important that in terms of this security access and like 4 vegetation done on the permits, they were very successfully 4 6 understand what needs to be done. 1 6 understand what needs to be done. 6 7 CHARPERSON: Thank you, If we can then 6 8 go to slide number 62 roads. 9 need to happen, the improvements need to happen while the 10 speaking, Can I continue? 9 need to happen, the improvements need to happen while the 11 CHARPERSON: Orear, Thank you, Sis indicated on the 11 12 MR ROETS: Now, as is indicated on the 12 14 the spoaking the road safety and capacity. In terms of capacity and three is and safety and capacity. In terms of capacity and the also accomments or 10 10 15 outh the mana of a site wide you could have seem that 11 notas part of the report, because we are trafficking engineers 21 would? 23 MR RECHESSON: Sored the road sand not the internal roads on the movements. We have been 15 outh that the management plan be put in action, and as 10 MR RECHESSON: <td< td=""><td></td><td>•</td><td></td><td></td></td<>		•		
4 vegetation done on the permits, they were very successfully 4 1 The mentioned earlier, where do the truck space, space space of the mine. Yes, so there 7 CHARPERSON: Thank you, Chair, Leon 5 to go on the site and to be cleared and weighed, that's a construction takes place, of the mine takes place, then 10 MR ROETS: Thank you, Chair, Leon 1 the rad or perational phase of the mine takes place, then 12 MR ROETS: Thank you, Chair, Leon 10 ChARPERSON: And then when 13 slide there, that the main access will be from road S171. 11 the rad or sections thre is indicated on the 12 there and sections thre is ingrovements to read site a bar. There are two components. 16 the end or sections thre is ingrovements. 13 section by Adv Yan Wyk. Are three any comments or 10 the end or sections thre is ingrovements to be made, but 14 CHARPERSON: Chair, my hand 12 there is currently probles and it is then also recommended 14 CHARPERSON: Chair, my hand 14 the read selegingers. As soon as this proje				· •
5 done. I think we've nailed it down to a lot of detail to 5 to go on the site and to be cleared and weighed, that's a 6 understand what needs to be done. . 7 CHAIPPERSON: Thank you, I'we can then 8 go to slide number 62 roads. are two pages as part of the mining activity, thee activities 9 MR ROFTS: Thank you, Chair, Leon need to happen, the improvements need to happen while the 11 CHAIPPERSON: Of course. . 12 MR ROFTS: Thank you, Chair, Leon . 13 side there, that the main access will be from road S121. . It is a provincial road. It belongs to the free State 13 that fashin in the report. There are two components. . CHAIPERSON: . 14 the and of sections there is improvements to be made, tot . . . 15 requires that the management plan be put in action, and as . . . 16 oubt that the road sections there is improvements as this project comes . . . 16 output them and put in action, and as . .				
6 understand what needs to be done. 6 separate exercise that happens on the mine. Yes, so there 7 CHAIRPERSON: Thank you. If we can then 9 pot solid enumbre 62 roads. 9 MR ROFTS: Thank you, Chair, Leon 10 Splot enumbre 62 roads. 11 CHAIRPERSON: Of course. 12 MR ROFTS: Now, as is indicated on the 13 side there, that the main access will be from road 5121. 14 It is a provincial road. It belongs to the Free State 15 Department of Roads and then, - 1 don't think there is any 16 there is road safety and capacity. In terms of capacity at 17 that fashion in the roport. There are two components. 18 There is road safety and capacity. In terms of capacity at 19 the end of sectors there is improvements to be made, but 20 even by means of a site visity ou could have seen that 21 there is road safety and capacity. In terms of capacity at 23 and not pavement designeers. As soon as this project comes 24 the optic there state Police, Read at 25 the the road semprouse of the presentations is 26 </td <td></td> <td></td> <td></td> <td></td>				
7 CHAIRPERSON: Thank you. If we can then 7 are two pages as part of the mining activity, the 8 go to silde number 62 reads. 9 MR RCTS: Thank you, Chair, Leon 10 speaking. Can L continue? 9 need to happen, the improvements need to happen withe the 11 CHAIRPERSON: Of course. 11 the real operational phase of the mine takes place, then 13 side there, that the main access will be from read 5171. 13 the real operational phase of the mine takes place, then 14 the appent, the improvements need to happen, while improvements need to happen, the improvements need to happen, while improvements need the improvements neer			_	
8 go to slide number 62 roads. 9 MR ROETS: Thank you, Chair, Leon 10 9 speaking, Can I continue? 9 need to happen, the improvements neertainty problemats in the improvements need to hap			_	
9 MR ROETS: Thank you, Chair, Leon 9 need to happen, the improvements need to happen while the 10 speaking. Can I continue? ChAIRPERSON: Or curse. 11 CHAIRPERSON: The construction takes place, of the mine takes place, then 12 MR ROETS: Now, as is indicated on the 13 side there, that the main access will be from road S171. 14 It is a provincial road. It belongs to the Free State Chair, I think I ve covered what I was supposed to cover. 14 the road sam on the report. There are two components. There is road safety and capacity. In terms of capacity at 19 there not payment of a site wist you could have seen that requires that the management plan be put in action, and as 21 there is currently potholes and it is then also recommended vere out craigly shard up. 22 and not payment disginers. As soon as this project comes MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it requires that the management plan be put in action, and as 25 requires that the management plan be put in action, and as CHAIRPERSON: Call, places, if you 24 to a point where more certainty is being placed, then it readures add the doshard mod		-		
10 speaking. Can I continue? 10 construction takes place, of the mine itself and then when 11 CHAIRPERSON: Of course. 12 MR ROETS: Now, as is indicated on the 13 slide there, that the main access will be from road S171. It is a provincial road. It belongs to the Free State 15 Department of Roads and then, - I don't think there is any Chair, I think I've covered what I was supposed to cover. 14 It is a provincial road. It belongs to the Free State Free State 17 that fashion in the report. There are two components. Free State or agalot, I. there most o capacity, it there so capacity, it there so carents or othe acade pack. 18 there of o sections there is improvements to be made, but guestions regarding the road before we move onto the next 19 there and craithy is being placed, then it the apoint, my first point was to 21 chair placed, then it Simprovements can be made on the road, but is a process that 24 that be road belongs to the Free State Police, Roads and Transport Department and it doesn't mean that no 1 massent that noise and I think the's a concern with he to's a concern with a lot Guecibis I. Just wanted that to be noted. 3 Transport Department and it doesn't mean that no min		-	_	
11 CHAIRPERSON: Of course. 12 MR ROETS: Now, as is indicated on the 13 side there, that the main access will be from road S121. 14 It is a provincial road. It belongs to the Free State 15 Department of Roads and then, -1 don't think there is any 16 doubt the road is inportant. It is also complied in 17 that fashion in the report. There are two components. 18 There is road safety and capacity. In terms of capacity at 19 there is currently potholes and it is then also recommended 20 even by means of a site visit you could have seen that 21 there is currently potholes and it is then also recommended 22 as part of the report, because we are trafficking engineers 23 and not pavement designers. As soon as this project comes 24 to a point where more certainty is being placed, then it 25 requires that the management plan be put in action, and a 16 improvements. Can be made on the road, but is a process that 16 improvements. Can be made on the read, but is a process that 17 regard the road condition as it is now to one specific 18 Yes, so what is also important it is ad tour			_	
12 MR ROETS: Now, as is indicated on the 13 sile there, that the main access will be from road S17L. 13 Ghair, 1 think I've covered whet I was supposed to cover. 14 It is a provincial road. It belongs to the free State 15 Department of Roads and then, - I don't think there is any 16 doubt that the road is important. It is also compiled in 17 that fashion in the report. There are two comments or 19 the end of sections there is improvements to be made, but 10 even by means of a site wisk you could have seen that 21 there is currently potholes and it is then also recommended 22 and not pavement designers. As soon as this project comes 23 and not pavement designers. As soon as this project comes 24 to a point where more certainty is being placed, then it 25 requires that the management plan be put in action, and as 3 Transport Department and it doesn't mean that no 4 improvements can be made on the road, but is a process that 5 requires that management plan be put in activities and 7 regotations. Sorry, can I continue? 8 Yes, so what is a bio important is that our 9 readiatit			-	
13 slide there, that the main access will be from road S171. 13 Chair, I think I've covered what I was supposed to cover. 14 It is a provincial road. It belongs to the Free State 13 Chair, I think I've covered what I was supposed to cover. 14 Department of Roads and then, - I don't think there is any 14 Chair, I think I've covered what I was supposed to cover. 14 There is roads and then, - I don't think there is any 15 participants, that there might be one or two comments or 19 thee of of sections there is site any components. 16 participants, that there might be one or two comments or 19 there is our entry potholes and it is then also recommended 17 that is then also recommended 21 there is for the report, because we are trafficking engineers 20 MS RITI: We've got Craig, please, if you 22 and not pavement designers. As soon as this project comes 21 CHAIRPERSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it 23 MR RICHARSON: Sorry, Mr Chair, my hand 25 to a point where more certainty is being placed, then it 1 noise level for a rural area is 45 decibels and not 60 26 that the road belongs to the Free State Pol				
14 It is a provincial road. It belongs to the Free State 14 CHAIRPERSON: Airight. I know that the 15 Department of Roads and then, - I don't think there is any 16 pattherm dight. I know that the 16 doubt that the road is inportant. It is also compiled in 16 patticipants, that there might be one or two comments or 17 that fashion in the report. There are two components. 16 patticipants, that there might be one or two comments or 18 There is road safety and capacity. In terms of capacity at 18 scient by AdV Van Wyk. Are there any comments or 19 the end of sections there is improvements to be made, but 19 questions at this stage regarding the roads? 20 even by means of a site visit you could have seen that 17 questions at this stage regarding the roads? 21 and not pavement designers. As soon as this project comes 30 MR RICHARSON: Sorry, Mr Chair, my hand 23 and not pavement designers. As soon as this project comes 30 MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it 27 was mentioned previously in some of the presentations is 25 that the road belongs to the Free State Police, Roads and 7<		,		
15 Department of Roads and then, - I don't think there is any 16 doubt that the road is important. It is also compiled in 16 doubt that the report. There are two components. 16 participants, that there might be one or two comments or 17 that fashion in the report. There are two components. 16 participants, that there might be one or two comments or 18 There is road safety and capacity. In terms of capacity at 18 section by AdV vol Wyk. Are there any comments or 19 there is currently potholes and it is then also recommended 18 section by AdV vol Wyk. Are there any comments or 20 even by means of a site visit you could have seen that 18 section by AdV vol Wyk. Are there any comments or 21 there is currently potholes and it is then also recommended 18 Section by AdV vol Wyk. Are there any comments or 22 as part of the report, because we are trafficking engineers 20 MS SMIT: We've got Craig's hand up. 21 there is currently potholes and it is then also recommended 20 MS SMIT: Me've got Craig's hand up. 22 would? 23 MR RICHARSON: Sorry, Mr Chair, my hand 35 requires that the management plan be put in action; is a this seqeregaling the roads?				
16 doubt that the road is important. It is also compiled in 17 that fashion in the report. There are two components. 18 There is road safety and capacity. In terms of capacity at 19 the end of sections there is improvements to be made. 20 even by means of a site visit you could have seen that 10 there is currently potholes and it is then also recommended 21 as part of the report, because we are trafficking engineers 20 MS SMIT: We've got Craig's hand up. 21 and not pavement designers. As soon as this project comes 20 MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it 7 requires that the management plan be put in action, and as 25 that the road belongs to the Free State Police, Roads and 7 noise level for a rural area is 45 decibels and not 60 1 noise level for a rural area is 45 decibels and not 60 decibels. I just wanted that to to en oted. 3 Transport Department and it doesn't mean that our 9 reads, as I went back to it is, the effect of the trucks 6 running on the road and nobody is legally obliged to reasare that noise and I this that our 9 7 pash is also important is that our 9 roads whici all the experts say that isn't in t				5
17 that fashion in the report. There are two components. 18 There is road safety and capacity. In terms of capacity at 19 the end of sections there is improvements to be made, but 20 even by means of a site visit you could have seen that 21 there is currently potholes and it is then also recommended 22 as part of the report, because we are trafficking engineers 23 and not pavement designers. As soon as this project. 24 to a point where more certainty is being placed, then it 25 requires that the management plan be put in action, and as 26 that the road belongs to the Free State Police, Roads and 3 Transport Department and it doesn't mean that no 4 improvements can be made on the road, but is a process that 5 is required in order to do the improvements. We have been 6 involved with a number of mining activities and 7 negotiations. Sorry, can I continue? 8 Yes, so what is also important is that our 9 traffic inroad assessment was focussed on the extenal 10 roads and not the internal roads on the mine itself. So, 11 not here are is post (inaudible) between the 12				
18 There is road safety and capacity. In terms of capacity at 19 the end of sections there is improvements to be made, but 19 the end of sections there is improvements to be made, but 19 questions at this stage regarding the roads? 20 even by means of a site visit you could have seen that 19 questions at this stage regarding the roads? 21 there is currently potholes and it is then also recommended 35 MS SMIT: We've got Craig's hand up. 22 as part of the report, because we are trafficking engineers 23 MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it 25 your previous presenter regarding the noise. The Gauteng 25 requires that the management plan be put in action, and 25 your previous presenter regarding the noise. The Gauteng 26 that the road belongs to the Free State Police, Roads and 16 noise level for a rural area is 45 decibels and not 60 2 that the road belongs to the improvements. We have been 6 involved with a number of mining activities and 7 negotations. Sorry, can I continue? 8 Yes, so what is also important is that our 9 traffic inroad assessment was focussed on the external 10 road which all the experts				
19 the end of sections there is improvements to be made, but 19 questions at this stage regarding the roads? 20 even by means of a site visit you could have seen that 20 MS SMIT: We've got Craig's hand up. 21 there is currently potholes and it is then also recommended 21 CHAIRPERSON: Craig, please, if you 23 and not pavement designers. As soon as this project cornes 23 MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it 23 ms BRICHARSON: Sorry, Mr Chair, my hand 25 requires that the management plan be put in action, and as 25 your previous presenter regarding the noise. The Gauteng 70 was mentioned previously in some of the presentations is 1 noise level for a rural area is 45 decibels and not 60 2 that the road belongs to the Free State Police, Roads and 3 CHAIRPERSON: Moted. 3 Transport Department and it doesn't mean that no 3 CHAIRPERSON: Moted. 4 improvements can be made on the road, but is a process that 5 readiations. Sorry, can I continue? 8 Yes, so what is also important is that our 9 raffic inroad assessment was focused on the external 10 10 ro				
20 even by means of a site visit you could have seen that 20 MS SMIT: We've got Craig's hand up. 21 there is currently potholes and it is then also recommended CHAIRPERSON: Craig, please, if you 22 as part of the report, because we are trafficking engineers 20 Would? 23 and not pawement designers. As soon as this project comes 20 Would? 24 to a point where more certainty is being placed, then it 23 MR RICHARSON: Sorry, Mr Chair, my hand 25 requires that the management plan be put in action, and as 25 your previous presenter regarding the noise. The Gauteng 26 that the road belongs to the Free State Police, Roads and 1 noise level for a rural area is 45 decibels and not 60 3 Transport Department and it doesn't mean that no 3 CHAIRPERSON: Noted. 4 MR RICHARSON: and not the interrol ods on the mine rade, but is a process that 5 is required in order to do the improvements. We have been 6 involved with a number of mining activities and 7 messure that noise and I think that's a concern with the 5 5 is required in order to do the improvements. So, running on the road and nobody is legally obliged to 7 <				
21 there is currently potholes and it is then also recommended as part of the report, because we are trafficking engineers and not pavement designers. As soon as this project comes 21 CHAIRPERSON: Craig, please, if you 23 and not pavement designers. As soon as this project comes MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it Page 106 25 requires that the management plan be put in action, and the presentations is Page 106 1 was mentioned previously in some of the presentations is noise level for a rural area is 45 decibels and not 60 2 that the road belongs to the Free State Police, Roads and noise level for a rural area is 45 decibels and not 60 3 Transport Department and it doesn't mean that no improvements can be made on the road, but is a process that MR RICHARSON: And the concern with the 5 is required in order to do the improvements. We have been magotiations. Sorry, can I continue? MR RICHARSON: And the concern with a lot 7 respotive we've made recommendations. The action noise and not the internal roads on the mine itself. So, mad not the internal roads on the one to so on specific 10 plan (inaudible) said there is post (inaudible) between the toor come and it is a community solution. It is not, although		-		
22 as part of the report, because we are trafficking engineers 22 would? 23 and not pavement designers. As soon as this project comes 24 MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it 24 has been up for a while. The point, my first point was to 25 requires that the management plan be put in action, and as 25 your previous presenter regarding the noise. The Gauteng 26 that the road belongs to the Free State Police, Roads and 1 noise level for a rural area is 45 decibels and not 60 3 Transport Department and it doesn't mean that no 1 noise level for a rural area is 45 decibels and not 60 4 improvements can be made on the road, but is a process that 5 is required in order to do the improvements. We have been 5 is required in order to do the improvements. We have been 6 running on the road and nobody is legally obliged to 7 negotiations. Sorry, can I continue? 7 measure that noise and I think that's a concern with a lot 8 Yes, so what is also important is that our 7 regard the road condition as it is now to one specific 10 roads and not the internal roads on the external 10 first point is noted. Yes, please continu				5 5 1
23 and not pavement designers. As soon as this project comes 23 MR RICHARSON: Sorry, Mr Chair, my hand 24 to a point where more certainty is being placed, then it 23 MR RICHARSON: Sorry, Mr Chair, my hand 25 requires that the management plan be put in action, and as 24 has been up for a while. The point, my first point was to 26 your previous presenter regarding the noise. The Gauteng Page 106 1 was mentioned previously in some of the presentations is 1 noise level for a rural area is 45 decibels and not 60 3 Transport Department and it doesn't mean that no 1 noise level for a rural area is 45 decibels and not 60 4 MR RICHARSON: Noted. 3 7 regotiations. Sorry, can I continue? 4 MR RICHARSON: Noted. 8 Yes, so what is also important is that our 9 regard the road condition as it is now to one specific 7 measure that noise and I think that's a concern with a lot 10 roads and not the internal roads on the mine itself. So, 11 CHAIRPERSON: Okay, good question. Your 12 plan (inaudible) said there is post (inaudible) between the 15 orumers and levelopment will require more input into this				
24to a point where more certainty is being placed, then it requires that the management plan be put in action, and as24has been up for a while. The point, my first point was to your previous presenter regarding the noise. The GautengPage 1081was mentioned previously in some of the presentations is 2 that the road belongs to the Free State Police, Roads and 3 Transport Department and it doesn't mean that no 4 improvements can be made on the road, but is a process that 5 is required in order to do the improvements. We have been 6 involved with a number of mining activities and 7 negotiations. Sorry, can I continue?noise level for a rural area is 45 decibels and not 60 2 decibels. I just wanted that to be noted. 38Yes, so what is also important is that our 9traffic inroad assessment was focussed on the external 10 roads and not the internal roads on the mine itself. So, 11 in that perspective we've made recommendations. The action 12 plan (inaudible) said there is post (inaudible) between the 13 owners and developments and mines. One can certainly not 14 regard the road condition as it is now to one specific 15 owner and it is a community solution. It is not, although 16 this specific development will require more input into this 17 whole exercise but it requires more than one party to come 18 to the party.NR RICHARSON: 19Noted. 419If we can go to the next slide, please? There, 20 what it basically just indicated is that it is 21 approximately 8 kilometres from Boundary Road. We've 21 looked up to Boundary Road, to the access where the green 23 is, to the mine access and we've also assessed Boundary 24 Road intersection. We've for example proposed that lightsPage 108 2410 <td></td> <td></td> <td></td> <td></td>				
25 requires that the management plan be put in action, and as 25 your previous presenter regarding the noise. The Gauteng 1 was mentioned previously in some of the presentations is 1 noise level for a rural area is 45 decibels and not 60 1 that the road belongs to the Free State Police, Roads and 1 noise level for a rural area is 45 decibels and not 60 2 that the road belongs to the Free State Police, Roads and 1 noise level for a rural area is 45 decibels and not 60 3 Transport Department and it doesn't mean that no 1 noise level for a rural area is 45 decibels and not 60 4 improvements can be made on the road, but is a process that 6 1 5 is required in order to do the improvements. We have been 6 1 6 involved with a number of mining activities and 7 7 7 reagotiations. Sorry, can I continue? 8 Yes, so what is also important is that our 9 traffic inroad assessment was focussed on the external 10 road which all the experts say that isn't in their scope 10 10 roads and not the internal roads on the mine itself. So, 11 11 11 CHAIRPERSON: Okay, good question. Your 11 in that pe				
Page 106Page 1081was mentioned previously in some of the presentations isinoise level for a rural area is 45 decibels and not 602that the road belongs to the Free State Police, Roads andinoise level for a rural area is 45 decibels and not 603Transport Department and it doesn't mean that noimprovements can be made on the road, but is a process thatinoise level for a rural area is 45 decibels and not 604Inoise level for a rural area is 45 decibels and not 60decibels. I just wanted that to be noted.5Transport Department and it doesn't mean that noGLAIRPERSON: Noted.6involved with a number of mining activities andmago the road and nobody is legally obliged to7negotiations. Sorry, can I continue?measure that noise and I think that's a concern with a lot8Yes, so what is also important is that ourreads and not the internal roads on the external9traffic inroad assessment was focussed on the externalorwas and developments and mines. One can certainly not10plan (inaudible) said there is post (inaudible) between theto come back to this question and ask Sonette to respond to14regard the road condition as it is now to one specificMR RICHARSON:Sorry, Chair. So, we're15owners and development will requires more input into thisMR RICHARSON:Sorry, Chair. So, we're16going to have additional 300 odd trucks on a road that isobviously not built to accommodate that, but the effect of16the party.If we can go to the next slide, please? There,have a highway running in a rural area,				
1was mentioned previously in some of the presentations is1noise level for a rural area is 45 decibels and not 602that the road belongs to the Free State Police, Roads and2decibels. I just wanted that to be noted.3Transport Department and it doesn't mean that no3CHAIRPERSON: Noted.4improvements can be made on the road, but is a process that3CHAIRPERSON: And the concern with the5is required in order to do the improvements. We have been6running on the road and nobody is legally obliged to6involved with a number of mining activities and7measure that noise and I think that's a concern with a lot8Yes, so what is also important is that our9roads and not the internal roads on the mine itself. So,1010roads and not the internal roads on the mine itself.5011CHAIRPERSON: Okay, good question. Your12plan (inaudible) said there is post (inaudible) between the13owners and it is a community solution. It is not, although1314regard the road condition as it is now to one specific14that, but please continue.1515ownere and it is a community solution. It is not, although15MR RICHARSON: Sorry, Chair. So, we're16to the party.19If we can go to the next slide, please? There,1920what it basically just indicated is that it is20down the road. It is already a nightmare. Two weeks ago,21approximately 8 kilometres from Boundary Road. We've21someone died in an accident on that road. S				
2that the road belongs to the Free State Police, Roads and 32decibels. I just wanted that to be noted.3Transport Department and it doesn't mean that no 4improvements can be made on the road, but is a process that 53CHAIRPERSON: Noted.4MR RICHARSON:And the concern with the 5roads, as I went back to it is, the effect of the trucks 66involved with a number of mining activities and 7negotiations. Sorry, can I continue?4MR RICHARSON: And the concern with the 58Yes, so what is also important is that our 9traffic inroad assessment was focussed on the external 10roads and not the internal roads on the mine itself. So, 11roads and not the internal roads on the mine itself. So, 11roads and not the internal roads on the mine itself. So, 1110roads which all the experts say that isn't in their scope 1010roads and developments and mines. One can certainly not 14regard the road condition as it is now to one specific 15owners and development will require more input into this 17whole exercise but it requires more than one party to come 16this specific development will require more input into this 17MR RICHARSON: 18Sorry, Chair. So, we're 1919If we can go to the next slide, please? There, 20what it basically just indicated is that it is 21approximately 8 kilometres from Boundary Road. We've 2121looked up to Boundary Road, to the access where the green 23is, to the mine access and we've also assessed Boundary 24Koad intersection. We've for example proposed that lights24		Page 106		Page 108
3Transport Department and it doesn't mean that no3CHAIRPERSON:Noted.4improvements can be made on the road, but is a process that4MR RICHARSON:And the concern with the5is required in order to do the improvements. We have been6involved with a number of mining activities and76involved with a number of mining activities and7reads, as I went back to it is, the effect of the trucks7negotiations. Sorry, can I continue?7measure that noise and I think that's a concern with a lot8Yes, so what is also important is that our8of us, is the noise, the additional traffic noise on the9traffic inroad assessment was focussed on the external9road which all the experts say that isn't in their scope10roads and not the internal roads on the mine itself. So,10in that perspective we've made recommendations. The action11cHAIRPERSON:Okay, good question. Your12plan (inaudible) said there is post (inaudible) between the1313owners and developments and mines. One can certainly not1414regard the road condition as it is now to one specific15MR RICHARSON:15owner and it is a community solution. It is not, although15MR RICHARSON:16this specific development will require more input into this16going to have additional 300 odd trucks on a road that is17whole exercise but it requires more than one party to come18the noise on the neighbouring properties, you're going to18 <td>1</td> <td></td> <td>1</td> <td>noise level for a rural area is 45 decibels and not 60</td>	1		1	noise level for a rural area is 45 decibels and not 60
4improvements can be made on the road, but is a process that is required in order to do the improvements. We have been involved with a number of mining activities and negotiations. Sorry, can I continue?4MR RICHARSON: roads, as I went back to it is, the effect of the trucks running on the road and nobody is legally obliged to reasure that noise and I think that's a concern with a lot of us, is the noise, the additional traffic noise on the roads and not the internal roads on the mine itself. So, 114MR RICHARSON: reasure that noise and I think that's a concern with a lot of us, is the noise, the additional traffic noise on the roads and not the internal roads on the mine itself. So, 1157Measure that noise and I think that's a concern with a lot of us, is the noise, the additional traffic noise on the roads and not the internal roads on the mine itself. So, 1111CHAIRPERSON: Okay, good question. Your first point is noted. Yes, please continue, I would like to come back to this question and ask Sonette to respond to that, but please continue.14regard the road condition as it is now to one specific to whore and it is a community solution. It is not, although to the party.15MR RICHARSON: Sorry, Chair. So, we're for obviously not built to accommodate that, but the effect of that party.15If we can go to the next slide, please? There, to the party.18He noise on the neighbouring properties, you're going to have a highway running in a rural area, with the trucks to approximately 8 kilometres from Boundary Road. We've to kne nie access and we've also assessed Boundary to the mine can start operating at 6 in the morning but it is to the interest of the truck driver to be first in line to20 <td>2</td> <td></td> <td></td> <td>-</td>	2			-
5is required in order to do the improvements. We have been involved with a number of mining activities and negotiations. Sorry, can I continue?5roads, as I went back to it is, the effect of the trucks f running on the road and nobody is legally obliged to measure that noise and I think that's a concern with a lot 88Yes, so what is also important is that our 98of us, is the noise, the additional traffic noise on the 99traffic inroad assessment was focussed on the external 109roads and not the internal roads on the mine itself. So, 111011in that perspective we've made recommendations. The action 1211CHAIRPERSON:Okay, good question. Your12plan (inaudible) said there is post (inaudible) between the 130Come back to this question and ask Sonette to respond to that, but please continue.14regard the road condition as it is now to one specific this specific development will require more input into this 1711CHAIRPERSON:Sorry, Chair. So, we're16this specific development will require more input into this 1716MR RICHARSON:Sorry, Chair. So, we're18to the party.16the noise on the neighbouring properties, you're going to 1817obviously not built to accommodate that, but the effect of 1820what it basically just indicated is that it is 2210If we can go to the next slide, please? There, 2019If we can go to the access where the green 2223is, to the mine access and we've also assessed Boundary 2424Ne we've and that is is a 2220	3		3	
6involved with a number of mining activities and negotiations. Sorry, can I continue?6running on the road and nobody is legally obliged to7negotiations. Sorry, can I continue?7measure that noise and I think that's a concern with a lot8Yes, so what is also important is that our8of us, is the noise, the additional traffic noise on the9traffic inroad assessment was focussed on the external9road which all the experts say that isn't in their scope10roads and not the internal roads on the mine itself. So,10investigation.11in that perspective we've made recommendations. The action11CHAIRPERSON:Okay, good question. Your12plan (inaudible) said there is post (inaudible) between the12first point is noted. Yes, please continue, I would like13owners and developments and mines. One can certainly not13to come back to this question and ask Sonette to respond to14regard the road condition as it is now to one specific14that, but please continue.15owner and it is a community solution. It is not, although15MR RICHARSON:Sorry, Chair. So, we're16this specific development will requires more than one party to come17obviously not built to accommodate that, but the effect of18to the party.19If we can go to the next slide, please? There,19have a highway running in a rural area, with the trucks20what it basically just indicated is that it is20down the road. It is already a nightmare. Two weeks ago,21a				
7negotiations. Sorry, can I continue?7measure that noise and I think that's a concern with a lot8Yes, so what is also important is that our9traffic inroad assessment was focussed on the external9of us, is the noise, the additional traffic noise on the9traffic inroad assessment was focussed on the external9road which all the experts say that isn't in their scope10roads and not the internal roads on the mine itself. So,10investigation.11in that perspective we've made recommendations. The action11CHAIRPERSON:Okay, good question. Your12plan (inaudible) said there is post (inaudible) between the13owners and developments and mines. One can certainly not1414regard the road condition as it is now to one specific14that, but please continue.15MR RICHARSON:Sorry, Chair. So, we're16this specific development will require more input into this16going to have additional 300 odd trucks on a road that is17whole exercise but it requires more than one party to come18the noise on the neighbouring properties, you're going to18to the party.18the noise on the neighbouring properties, you're going to19If we can go to the next slide, please? There,2020what it basically just indicated is that it is2021looked up to Boundary Road, to the access where the green2222looked up to Boundary Road, to the access where the green2223is, to the mine access and we've also assessed B	-			
8Yes, so what is also important is that our8of us, is the noise, the additional traffic noise on the9traffic inroad assessment was focussed on the external9road which all the experts say that isn't in their scope10roads and not the internal roads on the mine itself. So,10investigation.11in that perspective we've made recommendations. The action11CHAIRPERSON:Okay, good question. Your12plan (inaudible) said there is post (inaudible) between the12first point is noted. Yes, please continue, I would like13owners and developments and mines. One can certainly not14regard the road condition as it is now to one specific1415owner and it is a community solution. It is not, although15MR RICHARSON:Sorry, Chair. So, we're16this specific development will require more input into this16going to have additional 300 odd trucks on a road that is17whole exercise but it requires more than one party to come18the noise on the neighbouring properties, you're going to19If we can go to the next slide, please? There,19have a highway running in a rural area, with the trucks20what it basically just indicated is that it is20down the road. It is already a nightmare. Two weeks ago,21approximately 8 kilometres from Boundary Road. We've21someone died in an accident on that road. So, it is a22looked up to Boundary Road, to the access where the green23the mine can start operating at 6 in the morning but it is23is, to the m	_	-	_	
9traffic inroad assessment was focussed on the external to roads and not the internal roads on the mine itself. So, 119road which all the experts say that isn't in their scope investigation.10roads and not the internal roads on the mine itself. So, 1111CHAIRPERSON: Okay, good question. Your12plan (inaudible) said there is post (inaudible) between the 1311CHAIRPERSON: Okay, good question. Your13to come back to this question and ask Sonette to respond to to come back to this question and ask Sonette to respond to that, but please continue.14regard the road condition as it is now to one specific this specific development will require more input into this to the party.15MR RICHARSON: Sorry, Chair. So, we're going to have additional 300 odd trucks on a road that is to accommodate that, but the effect of the noise on the neighbouring properties, you're going to have a highway running in a rural area, with the trucks to down the road. It is already a nightmare. Two weeks ago, 2120looked up to Boundary Road, to the access where the green 2322looked up to Boundary Road, to the access where the green 2323is, to the mine access and we've also assessed Boundary 2423the mine can start operating at 6 in the morning but it is 2424Road intersection. We've for example proposed that lights24in the interest of the truck driver to be first in line to			_	
10roads and not the internal roads on the mine itself. So,10investigation.11in that perspective we've made recommendations. The action11CHAIRPERSON: Okay, good question. So, in that perspective we've made recommendations. The action plan (inaudible) said there is post (inaudible) between the owners and developments and mines. One can certainly not regard the road condition as it is now to one specific owner and it is a community solution. It is not, although this specific development will require more input into this whole exercise but it requires more than one party to come to the party. If we can go to the next slide, please? There, what it basically just indicated is that it is approximately 8 kilometres from Boundary Road. We've	 9 10 11 12 13 14 15 16 17 18 19 20 21 	road which all the experts say that isn't in their scope investigation. CHAIRPERSON: Okay, good question. Your first point is noted. Yes, please continue, I would like to come back to this question and ask Sonette to respond to that, but please continue. MR RICHARSON: Sorry, Chair. So, we're going to have additional 300 odd trucks on a road that is obviously not built to accommodate that, but the effect of the noise on the neighbouring properties, you're going to have a highway running in a rural area, with the trucks down the road. It is already a nightmare. Two weeks ago, someone died in an accident on that road. So, it is a
	10 11 12 13 14 15 16 17 18 19 20 21 22	roads and not the internal roads on the mine itself. So, in that perspective we've made recommendations. The action plan (inaudible) said there is post (inaudible) between the owners and developments and mines. One can certainly not regard the road condition as it is now to one specific owner and it is a community solution. It is not, although this specific development will require more input into this whole exercise but it requires more than one party to come to the party. If we can go to the next slide, please? There, what it basically just indicated is that it is approximately 8 kilometres from Boundary Road. We've looked up to Boundary Road, to the access where the green	 9 10 11 12 13 14 15 16 17 18 19 20 21 22 	road which all the experts say that isn't in their scope investigation. CHAIRPERSON: Okay, good question. Your first point is noted. Yes, please continue, I would like to come back to this question and ask Sonette to respond to that, but please continue. MR RICHARSON: Sorry, Chair. So, we're going to have additional 300 odd trucks on a road that is obviously not built to accommodate that, but the effect of the noise on the neighbouring properties, you're going to have a highway running in a rural area, with the trucks down the road. It is already a nightmare. Two weeks ago, someone died in an accident on that road. So, it is a major concern and the mine, I'm going back to the point,
The mode to be implemented at the intersection, activated in The Section and get out instead of queding. So, were going to	10 11 12 13 14 15 16 17 18 19 20 21 22 23	roads and not the internal roads on the mine itself. So, in that perspective we've made recommendations. The action plan (inaudible) said there is post (inaudible) between the owners and developments and mines. One can certainly not regard the road condition as it is now to one specific owner and it is a community solution. It is not, although this specific development will require more input into this whole exercise but it requires more than one party to come to the party. If we can go to the next slide, please? There, what it basically just indicated is that it is approximately 8 kilometres from Boundary Road. We've looked up to Boundary Road, to the access where the green is, to the mine access and we've also assessed Boundary	 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 	road which all the experts say that isn't in their scope investigation. CHAIRPERSON: Okay, good question. Your first point is noted. Yes, please continue, I would like to come back to this question and ask Sonette to respond to that, but please continue. MR RICHARSON: Sorry, Chair. So, we're going to have additional 300 odd trucks on a road that is obviously not built to accommodate that, but the effect of the noise on the neighbouring properties, you're going to have a highway running in a rural area, with the trucks down the road. It is already a nightmare. Two weeks ago, someone died in an accident on that road. So, it is a major concern and the mine, I'm going back to the point, the mine can start operating at 6 in the morning but it is
	10 11 12 13 14 15 16 17 18 19 20 21 22 23	roads and not the internal roads on the mine itself. So, in that perspective we've made recommendations. 		I	
	Page 109		Page 111
1	have trucks running all hours of the night to be first in	1	sampling location next to the access road. At the entrance
2	line and as you see in a of towns that's what happens, the	2	to the property, I believe as that's the only place where
3	trucks park outside and on the side of the road, there is	3	it's a controlled environment where one has control over
4	no (inaudible) that's not safe, it is a major, major issue.	4	how any trucks are moving there.
5	CHAIRPERSON: I hear you. I think it is	5	CHAIRPERSON: Okay. I suspect I've
6	a good point.	6	missed one of your points. If I have, just correct me,
7	MR RICHARSON: Thank you, Chair.	7	please.
8	CHAIRPERSON: Sorry, I've broken up,	8	MR RICHARDSON: Sorry, Mr Chair. I
9	please say it again?	9	understand monitoring at the entrance is where the trucks
10	MR RICHARSON: No, I said, thank you	10	are slowing down. It's the trucks racing along the road to
11	Chair, I think I've put my point across.	11	get to the mine is creating the noise disturbance.
12	CHAIRPERSON: Thank you very much. I	12	CHAIRPERSON: Nick?
13	think, Nico, the point about the 64 and the 60, I can note	13	MR GROBLER: Ja, Craig, I agree with
14	that but would you like to maybe add something to that?	14	that. I think it's something that needs to be included in
15	MR GROBLER: No, Craig is correct, the	15	the management and monitoring plan for the mine is another
16	daytime level for rural areas is 45 and for suburban areas	16	sampling location next to that access road. I agree with
17	it is 50. He is correct, and it is noted as such in the	17	that point.
18	report. Sorry, I just made a mistake. I was referring to	18	MR RICHARDSON: Thank you very much.
19	the control zones.	19	CHAIRPERSON: Alright, Craig, anything
20	CHAIRPERSON: Okay. Then the second	20	else from your side?
21	question – please continue?	21	MR RICHARDSON: No, that's it, thank you,
22	MR RICHARSON: Sorry, on that point, I	22	Chair.
23	understand that it is illegal to give permission to conduct	23	CHAIRPERSON: Right, anybody else before
24	an activity that exceeds the limits on that particular	24	we move on to the needs and desirability?
25	property.	25	MS SMIT: Chris Campbell?

As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.	2 3 4 5 6 7 8 9 10 11 12 13	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and
2 3 4 5 6 7 8 9 10 11 12 13 14	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest we	2 3 4 5 6 7 8 9 10 11 12 13 14	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't
2 3 4 5 6 7 8 9 10 11 12 13 14 15	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and it will then	2 3 4 5 6 7 8 9 10 11 12 13 14 15	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you for	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you forthat.The second question, if my memory serves me right,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user and its impact on this secondary road? This is not going
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you forthat. The second question, if my memory serves me right,has to do with the noise impact of the hundreds of trucks	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user and its impact on this secondary road? This is not going to last. It's going to be gone, you know, as soon as you
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you forthat.The second question, if my memory serves me right,has to do with the noise impact of the hundreds of trucksand to what level has that been accommodated.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user and its impact on this secondary road? This is not going to last. It's going to be gone, you know, as soon as you start increasing your truck trips you shorten the lifespan
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you forthat. The second question, if my memory serves me right,has to do with the noise impact of the hundreds of trucksand to what level has that been accommodated.[16:00]Or your viewpoints on that Nick? I suspect I	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user and its impact on this secondary road? This is not going to last. It's going to be gone, you know, as soon as you start increasing your truck trips you shorten the lifespan of that road significantly. So I'm not so sure even that
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you forthat. The second question, if my memory serves me right,has to do with the noise impact of the hundreds of trucksand to what level has that been accommodated.[16:00]Or your viewpoints on that Nick? I suspect Imight be putting you on the spot now, my apologies.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user and its impact on this secondary road? This is not going to last. It's going to be gone, you know, as soon as you start increasing your truck trips you shorten the lifespan of that road significantly. So I'm not so sure even that the Municipality or the Provincial Government will
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you forthat. The second question, if my memory serves me right,has to do with the noise impact of the hundreds of trucksand to what level has that been accommodated.[16:00] Or your viewpoints on that Nick? I suspect Imight be putting you on the spot now, my apologies.MR GROBLER:No, no problem. There is a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user and its impact on this secondary road? This is not going to last. It's going to be gone, you know, as soon as you start increasing your truck trips you shorten the lifespan of that road significantly. So I'm not so sure even that the Municipality or the Provincial Government will proactively or be able to do anything. I think there's
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	CHAIRPERSON:Nick?MR RICHARSON:And that is the SAN'stable. I think it is 10103 or 4, something like that. Canwe just get clarity on that?CHAIRPERSON:Nick, could you help uswith that?MR GROBLER:Sorry, I'm just trying toget to my unmute button.Craig, I cannot speak to thelegality of it. As far as I'm aware the legislation saysthat no person is allowed to conduct an activity that wouldcause a disturbing noise.I'll have to have a look at theGauteng legislation, but that is of course, the decision isof course up to the department to make.CHAIRPERSON:I think what I suggest wedo is, that question is noted and recorded and it will thenbe addressed as part of the process.Nick, thank you forthat.The second question, if my memory serves me right,has to do with the noise impact of the hundreds of trucksand to what level has that been accommodated.[16:00]Or your viewpoints on that Nick? I suspect Imight be putting you on the spot now, my apologies.MR GROBLER:No, no problem. There is arecommendation made for a noise sampling location for, I	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	CHAIRPERSON: Please go, you've got the floor. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. MR CAMPBELL: The S171 is actually a secondary road. What that means is that, and your traffic impact engineer did make the statement that they have no idea of what the impact would be on the pavement layers. But surely even up front one would, I think we have to acknowledge firstly, I'm guessing S171, falls under the provincial authority, the Free State Roads and Works. I can't vouch for how good they are, how functional they are and how much money they have but you are looking at an accelerated deterioration of that road based on the number of truck trips for which that road was never designed and to then be comfortable and say but, you know, this can't fall only on this user surely there has to be some more responsibility in terms of the intensified use by this user and its impact on this secondary road? This is not going to last. It's going to be gone, you know, as soon as you start increasing your truck trips you shorten the lifespan of that road significantly. So I'm not so sure even that the Municipality or the Provincial Government will proactively or be able to do anything. I think there's enough evidence in the coal mining areas of what the trucks

		I	
1	Page 113 responsibility that the mine's going to assume because the	1	Page 115 access to roads. So every mining company or a mining
2	mines in the Witbank area and further afield, Ermelo, they	2	authorisation holder needs to apply for that specific
3	eventually had to come to the party because the Mpumalanga	3	application and Leon touched on that. I just want to
4	Provincial Government just didn't have the money to fix the	4	clarify a bit. That is a process on its own that's being
5	roads and, you know, that became a danger to the normal	5	applied for by the Department of Roads, Police Roads and
6	motorists. So that's maybe a comment, bit of a question	6	Transport. So the negotiations will definitely still be
7	but a serious concern. Thanks, Chair.	7	done with them. So we must just keep note of that and the
8	CHAIRPERSON: I will note that and it's	8	noise and the trucks is a very valid point and mitigations
9	recorded and I think it's a combination of a comment and	9	for that we would definitely have to come up with some sort
10	I'll also record that as a serious concern. Leon, if you	10	of a plan and I take note of that just from my side. How
11	would like to say anything about this concern or about this	11	the trucks are going to operate, when are they allowed to
12	issue you are welcome to. It is a, you know, a comment, so	12	cue, those type of mitigations we will have to look into
13	it's not a question as such. It's a statement but if you	13	and we will certainly try and come up with the best
14	would like to you have an opportunity now.	14	possible solution for that. So just –
15	MR ROETS: Thank you very much, Chair. I	15	CHAIRPERSON: Thank you for that. Last
16	think in terms of our report we have very clearly stated	16	chance on roads and transport going, going, going –
10	that a management plan has to be prepared and it's based on	17	MS SMIT: Mariette, she's got her hand
18	experience. It's not only for, it's in the long run that	17	up.
19	the material can be imported and exported also so it's to	19	CHAIRPERSON: Okay last chance. Please
20	the benefit of the mine itself also. But what I'm trying	20	go for it?
21	to bring over is that the road owner is the Government and	21	MS LIEFFERINK: Sorry I am (inaudible)
22	you can go in partnerships with them but all these things	22	comment. If I may just comment on the previous
23	are not straightforward. So it needs to be and that is why	23	presentation where we were shown a picture of the
24	we said a management plan needs to be set up from the start		rehabilitation site. So I just want to ask the expert
25	and not when the road breaks down and when that arrives it	25	which species were selected for rehabilitation and what are
			· · · · · · · · · · · · · · · · · · ·
	Page 114		Page 116
1	needs to be in place as a mitigation measure. I just want	1	the biodiversity objectives of the applicant? Because I
2	to make a general comment and the overall road condition in	2	think it is necessary to determine whether there will be an
3	our country or some provinces where trucks are driving or	3	established environment of the native or (inaudible)
4	not driving, we get accidents and it is not just related to	4	vegetation. Thank you.
5	mining activities. Obviously, the tendency is higher at	5	CHAIRPERSON: Sonette, I'm going to ask
6	mining activities but lately in the Free State it was	6	you to help me there. I got very little of what Mariette
7	potholes where I've read in the newspaper of farmers	7	said. Maybe you head better?
8	travelling on the road and then the one hit the pothole and	8	MS SMIT: It was very broken. I didn't
9	the other one bumped the other side of the road. So safety	9	get all of that.
10			-
10	like we have indicated in our report is something that	10	CHAIRPERSON: Mariette, ekskuus, will you
11	needs to be addressed and be monitored just as you monitor	11	CHAIRPERSON: Mariette, ekskuus, will you please give it another shot? On our side it was very
11 12	needs to be addressed and be monitored just as you monitor a provision and whatever measure you can put in place. So,	11 12	CHAIRPERSON: Mariette, ekskuus, will you please give it another shot? On our side it was very broken up and unfortunately, I couldn't get enough to
11 12 13	needs to be addressed and be monitored just as you monitor a provision and whatever measure you can put in place. If I get that right you were asking about species diversity and the

		1	
1	Page 117 The sand area doesn't bear very great grazing grass. We	1	Page 119 mining can continue but before the trucks can load material
2	would like to improve that. There is a specie list of what	2	from that particular mine and that approval needs to be in
3	we would like to see is being established on that area. I	3	place. So that's why we've referred to the roads
4	just don't know it off by heart. It's in my rehabilitation	4	maintenance plan that was brought up by Leon. That would
5	report but that would at least consist of five to ten	5	be, all of that would be negotiated with the Department of
		6	Roads.
6	species. Unfortunately, you're quite dependent on what's	_	
7	commercially available but taken into the account the way	7	CHAIRPERSON: I think the question is, if
8	we managed our topsoil there should also be quite a strong	8	I may just, Sonette, make sure that we've got it right, if
9	seedbank transported or contained inside the topsoil that	9	access to the trucks is not provided that means the product
10	would also germinate from that. So there would be an	10	can't move out?
11	original specie – it would consist of some of the original	11	MS SMIT: That's correct. So that's why
12	species as well as whatever we planted extra for the	12	the mining applicant is obliged to have a roads maintenance
13	grazing potential. I hope that answers your question?	13	plan in place and that's just one more condition otherwise
14	CHAIRPERSON: Sonette, may I ask you,	14	the trucks can't leave the site.
15	you're welcome to tell me to catch a fish, would it be	15	CHAIRPERSON: Thank you for that
16	possible to add that species list in particular to the	16	clarification. There was somebody else who's name I've now
17	minutes as well?	17	forgotten, with the hand up?
18	MS SMIT: Definitely. I'm making notes	18	MR RICHARDSON: Sorry, Mr Chair, on that
19	of those specific mitigations and reports that will be	19	point surely that should be obtained before they even
20	distributed just for ease of reference.	20	consider mining?
21	CHAIRPERSON: Thank you very much.	21	CHAIRPERSON: Sonette, respond to that if
22	Mariette, something of you still?	22	you would. I've got an opinion but it's not my job today.
23	MS LIEFFERINK: No, thank you.	23	So you would please respond to that?
24	CHAIRPERSON: Alright, thank you for	24	MS SMIT: If again, mining needs to be –
25	that. That brings us the point, presentation by Advocate	25	an application for mining needs to be approved first. You

	Van Wyk about the needs and reliability and matters		need to go through the process to know how many trucks,
2	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us	2	need to go through the process to know how many trucks, what's going happen on the road before you submit that
2 3	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation.	2 3	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in
2 3 4	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure	2 3 4	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are
2 3 4 5	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's.	2 3 4 5	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department
2 3 4 5 6	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that.	2 3 4 5 6	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to
2 3 4 5 6 7	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn?	2 3 4 5 6 7	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense?
2 3 4 5 6 7 8	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me?	2 3 4 5 6 7 8	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense.
2 3 4 5 6 7 8 9	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you.	2 3 4 5 6 7 8 9	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not
2 3 4 5 6 7 8 9 10	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it	2 3 4 5 6 7 8 9 10	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give
2 3 4 5 6 7 8 9 10 11	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State	2 3 4 5 6 7 8 9 10 11	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety
2 3 4 5 6 7 8 9 10 11 12	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification	2 3 4 5 6 7 8 9 10 11 12	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we
2 3 4 5 6 7 8 9 10 11 12 13	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the	2 3 4 5 6 7 8 9 10 11 12 13	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we know of two weeks ago. Surely if the road hasn't got the capacity to handle 300 trucks twice a day the mine can't
2 3 4 5 6 7 8 9 10 11 12 13 14	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the property as Mariette brought out earlier because what	2 3 4 5 6 7 8 9 10 11 12 13 14	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we know of two weeks ago. Surely if the road hasn't got the capacity to handle 300 trucks twice a day the mine can't continue out approval of use of the road because of public
2 3 4 5 6 7 8 9 10 11 12 13 14 15	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the property as Mariette brought out earlier because what happens if they end up with an approval of mining right and	2 3 4 5 6 7 8 9 10 11 12 13 14 15	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we know of two weeks ago. Surely if the road hasn't got the capacity to handle 300 trucks twice a day the mine can't continue out approval of use of the road because of public infrastructure by the Free State Roads and Transport.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the property as Mariette brought out earlier because what happens if they end up with an approval of mining right and they can't use the roads to mine? Then the Roads	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we know of two weeks ago. Surely if the road hasn't got the capacity to handle 300 trucks twice a day the mine can't continue out approval of use of the road because of public infrastructure by the Free State Roads and Transport. CHAIRPERSON: If I may respond to that,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the property as Mariette brought out earlier because what happens if they end up with an approval of mining right and they can't use the roads to mine? Then the Roads Department is going to be pressurised and be held over a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we know of two weeks ago. Surely if the road hasn't got the capacity to handle 300 trucks twice a day the mine can't continue out approval of use of the road because of public infrastructure by the Free State Roads and Transport. CHAIRPERSON: If I may respond to that, Sonette, if you would allow me? And the answer is in
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the property as Mariette brought out earlier because what happens if they end up with an approval of mining right and they can't use the roads to mine? Then the Roads Department is going to be pressurised and be held over a barrel saying you're limiting our ability to mine.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we know of two weeks ago. As Sonette said that the access application is a process so it normally runs, the negotiations run concurrently with the assessment process. It's not that the one happens and then the other one and secondly, it is a condition. In other words, in your traffic management
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the property as Mariette brought out earlier because what happens if they end up with an approval of mining right and they can't use the roads to mine? Then the Roads Department is going to be pressurised and be held over a barrel saying you're limiting our ability to mine. CHAIRPERSON: Interesting point. Sonette, would like to maybe guide us on that? MS SMIT: Ja, the approval is not for the mining. The approval is for the roads, the trucks too. That's why it's called an access to roads application.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. Yes, it is in constant consultation why you apply or while you are applying but it's more of a condition than – the Department of Roads can't stop the mining. So it's a condition as to how they use the roads. If that makes sense? CHAIRPERSON: It does make sense. MR RICHARDSON: If the road is not suitable for the volume of trucks you can't legally give permission or approval of the mine because it's a safety hazard. We've already had one death on the road that we know of two weeks ago. Surely if the road hasn't got the capacity to handle 300 trucks twice a day the mine can't continue out approval of use of the road because of public infrastructure by the Free State Roads and Transport. CHAIRPERSON: If I may respond to that, Sonette, if you would allow me? And the answer is in between. As Sonette said that the access application is a process so it normally runs, the negotiations run concurrently with the assessment process. It's not that the one happens and then the other one and secondly, it is a condition. In other words, in your traffic management plan and this – or let me say the terms of this condition
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Van Wyk about the needs and reliability and matters relating to that. Mark, I'm going to ask you to give us the abbreviated version of the abbreviation. MR VAN WYK: Dr De Waal, with pleasure but I see that Craig's hand is up as is Warren's. CHAIRPERSON: Sorry, I didn't see that. Alright, Craig first? Craig, it's your turn? MR RICHARDSON: Can you hear me? CHAIRPERSON: Yes, I can hear you. MR RICHARDSON: Just to have it noted it would seem that approval is required from the Free State (inaudible) Roads and Transport as is the clarification where mining can be done on the property. Surely these should be done prior to doing a full EIA study on the property as Mariette brought out earlier because what happens if they end up with an approval of mining right and they can't use the roads to mine? Then the Roads Department is going to be pressurised and be held over a barrel saying you're limiting our ability to mine. CHAIRPERSON: Interesting point. Sonette, would like to maybe guide us on that? MS SMIT: Ja, the approval is not for the mining. The approval is for the roads, the trucks too.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	need to go through the process to know how many trucks, what's going happen on the road before you submit that application with the Department of Roads. 1	the applicant and the DMR. And this negotiations would	1	that can stop trucks from coming to and from. So that –
2	provide conditions. Now the grey areas, if those	2	the applicant will need to comply with that.
3	conditions can't be met that opens another question and	3	WARREN: Thank you, Sonette.
4	maybe Sonette could enlighten us on that point, but it's	4	MS SMIT: If that gives you some ease on
5	not that you have to have the one before you have the	5	the matter.
6	other. These two sort of run together and they're	6	CHAIRPERSON: Mark, you had a follow up
7	interactive and they lead to the development of a list of	7	question. I beg your pardon?
8	conditions according to which the mine must be managed, the	8	WARREN: Yes. First of all that's very
9	traffic must be managed and so forth. Sonette, have I got	9	valuable information. I appreciate that. Something else
10	a point there or am I smoking my socks?	10	that came up during the rehabilitation assessment. With
11	MS SMIT: No, you definitely do have a	11	mining going down to ten, 12 metres deep and removal of all
12	point and I don't want to get into particular details but	12	the sand and aggregate, that's surely going to affect the
13	say for instance the road can take a certain amount of	13	capacity for water retention in the area and the ground
14	trucks because the Department of Roads and Transport are	14	water will obviously be lowered and what is this impact on
15	also stakeholders the comments and everything for that	15	the environment and on the neighbours in the area and has
16	application as well will be sent as part of the	16	this been included in the assessment? Thank you.
17	application. But if the road can't take that they would	17	CHAIRPERSON: Sonette, I need your help
18	put a specific condition in that if you want to say for	18	in this one.
19	instance ten trucks leave the site on any given day and	19	MS SMIT: Yes. I believe it has to a
20	they say only two trucks leave the site or a certain	20	certain extent, but it will further be addressed within the
21	tonnage leave the site because of the road, that what the	21	water use licence application as well. So the ground water
22	road can currently take, then that would become a	22	specialist is not present today so that is also one of the
23	condition. So the onus is on the Department of Roads and	23	answers that we will respond to you within writing, but
24	Transport to give their input and that becomes conditions.	24	yes. For the water use licence those type of studies will
25	CHAIRPERSON: Thank you very much. Can	25	also be sent through to – with public participation and
	Page 122		Page 124
1	we move on or is there anything to comment on this aspect?	1	taken into account.
2	MS SMIT: A few more hands.	2	CHAIRPERSON: Sonette, if I remember
3	CHAIRPERSON: Right let's get them.	3	there was another hand.
4	MS SMIT: Warren?	4	MS SMIT: Willie Van Niekerk and Rene
5	CHAIRPERSON: Warren, I'm sorry, your	5	Huntley.
6	hand's been up for a while, my apologies. Warren, it's	6	CHAIRPERSON: Right. Mr Van Niekerk,
7	your turn.	7	you've got it.
8	WARREN: Yes, no problem. I think a lot	8	MR VAN NIEKERK: Mr Chairman, with great
9	of the comment now covered it. I just want to know was	9	apologies, you know we've run almost one and a half hours
10	that condition not also applicable during the permit	10	over time. I'm extremely sorry, but I have to leave now.
11	period? I'm not sure of legislation as I'm asking for the	11	I can't stay any longer on this call.
12	road and maintenance. I've got another question after	12	CHAIRPERSON: My apologies for that and
13	that.	13	thanks for having so much patience and please travel safely
14	CHAIRPERSON: I'm going to pass that on	14	and in any case you will receive a copy of the full minutes
15	to Sonette because I don't have a clue. Sonette, can you	15	and the associated documentation. But thank you very much.
16	help us with that please?	16	MR VAN NIEKERK: Okay. Thanks,
17	MS SMIT: It's for any mining	17	everybody.
18	authorisation. So we weren't involved in the permit area	18	MS SMIT: Yes?
19	so I can't – that is before my time so sorry that I can't	19	CHAIRPERSON: Keep well. Nog enetjie?
20	address that but, yes –	20	MS SMIT: Craig. Rene Huntley's hand was
21	WARREN: Alright.	21	up and it's down again so I believe her question was
22	MS SMIT: For mining in the area as well	22	answered. Warren's hand is still up. I don't know if
23	for the cumulative impact for the other mining companies	23	you've got a further question to my comment? Okay, and
24 25	that also needs to be in place.	24	then Craig.
25	[16:20] So that is one condition and that is something	25	CHAIRPERSON: Craig?
L			

		1	
	Page 125		Page 127
1	MR RICHARDSON: Mr Chair, can you hear	1	discussion on – the applicant was – so some of this
2	me?	2	information has already been discussed. So I would like to
3	CHAIRPERSON: I can hear you.	3	suggest that – Sonette, would you agree with me?
4	MR RICHARDSON: Just on the previous	4	MS SMIT: Yes, definitely. A lot of the
5	point of Willie's. This was addressed at the beginning of	5	information that's still – is still coming has already been
6	the meeting that two hours to cover an extensive mining	6	dealt with. It's just comprehensive information, so yes.
7	operation like this is no way adequate from a public	7	CHAIRPERSON: Right. Mark, if you can
8	participation perspective. And I think everyone knows that	8	give us – quickly give us the presentation on need and
9	there were 16 points on the agenda. That's seven minutes a	9	desirability –
10	point. We're now an hour and a half over the time. Not	10	MR RICHARDSON: Sorry, Mr Chair –
11	sure how much we still have to do and I just think it's	11	CHAIRPERSON: And then I think we've done
12	totally inadequate. We had a meeting on an amendment to an	12	the substance of the presentation –
13	existing mining right which took five and a half hours last	13	MR RICHARDSON: So on that point –
14	weekend and we didn't cover everything we wanted to.	14	CHAIRPERSON: It's not the ideal solution
15	CHAIRPERSON: I'm in agreement with you.	15	but I take your point and I'm not actually quite sure how
16	That was the reason that I've continued the meeting for	16	to address the totality, but I think if we've done this
17	that reason. I am more interested in getting opportunities	17	last page or page and a half then we've done the substance.
18	than to limit the - to two hours and you're right. There's	18	The rest is more detail on aspects we have discussed that
19	a lot of information on the table. Your point is taken.	19	one could well read because the matters have been discussed
20	MR RICHARDSON: Sorry, Mr Chair, we've	20	before. And I sincerely hope that you could live with
21	got commitments now. Now I have to leave the meeting now.	21	that.
22	But that's not fair on me because I've now – I've – the	22	MR RICHARDSON: Sorry, Mr Chair, on that
23	time allotted was two hours which we said was inadequate.	23	point.
24	CHAIRPERSON: Sonette –	24	CHAIRPERSON: Please continue.
25	MR RICHARDSON: How do we resolve this	25	MR RICHARDSON: We're already an hour and
	Page 126		Page 128

2 3 4 5 6 7 8 9 10	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with,	2 3 4 5 6 7 8 9 10	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in
2 3 4 5 6 7 8 9 10 11	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I	2 3 4 5 6 7 8 9 10 11	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I
2 3 4 5 6 7 8 9 10 11 12	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask	2 3 4 5 6 7 8 9 10 11 12	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of
2 3 4 5 6 7 8 9 10 11 12 13	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation.	2 3 4 5 6 7 8 9 10 11 12 13	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge
2 3 4 5 6 7 8 9 10 11 12 13 14	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe	2 3 4 5 6 7 8 9 10 11 12 13 14	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I
2 3 4 5 6 7 8 9 10 11 12 13 14 15	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of	2 3 4 5 6 7 8 9 10 11 12 13 14 15	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue as valid, all I'm saying is I note you have limited time.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent been discussed and what we have here is a whole series of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue as valid, all I'm saying is I note you have limited time. I note there's not enough time for two hours, which I think
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent been discussed and what we have here is a whole series of photos. So I think what's important is actually just to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent been discussed and what we have here is a whole series of photos. So I think what's important is actually just to give – you know the end land use, we've spoken about the application of the lodge and so forth and I think so the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue as valid, all I'm saying is I note you have limited time. I note there's not enough time for two hours, which I think your point is well taken. The only matter of substance still outstanding is the need and desirability, because the others are largely photos and a discussion of the good that
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent been discussed and what we have here is a whole series of photos. So I think what's important is actually just to give – you know the end land use, we've spoken about the application of the lodge and so forth and I think so the really point outstanding at this stage is the need and	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue as valid, all I'm saying is I note you have limited time. I note there's not enough time for two hours, which I think your point is well taken. The only matter of substance still outstanding is the need and desirability, because the others are largely photos and a discussion of the good that we've already done. So I'm trying to sort of make it in
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent been discussed and what we have here is a whole series of photos. So I think what's important is actually just to give – you know the end land use, we've spoken about the application of the lodge and so forth and I think so the really point outstanding at this stage is the need and desirability and I would suggest that if you can stay for	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue as valid, all I'm saying is I note you have limited time. I note there's not enough time for two hours, which I think your point is well taken. The only matter of substance still outstanding is the need and desirability, because the others are largely photos and a discussion of the good that we've already done. So I'm trying to sort of make it in between to give you the substance of the information
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent been discussed and what we have here is a whole series of photos. So I think what's important is actually just to give – you know the end land use, we've spoken about the application of the lodge and so forth and I think so the really point outstanding at this stage is the need and desirability and I would suggest that if you can stay for the last two or three minutes. The rest that's in the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue as valid, all I'm saying is I note you have limited time. I note there's not enough time for two hours, which I think your point is well taken. The only matter of substance still outstanding is the need and desirability, because the others are largely photos and a discussion of the good that we've already done. So I'm trying to sort of make it in between to give you the substance of the information without – your point is taken wholeheartedly and minuted
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	issue? CHAIRPERSON: I'm looking at the presentation and I'm going to be a coward and pass it on to Sonette. MS SMIT: The only – what happened to – we – our questions – the questions and answering was left for the end and we've actually dealt with it throughout the presentation and we only have the need and desirability left which is not going to take much of more time and as well as the end use of mine which is also then dealt with, but there's just more clarity points. So Mark is next. I do not know how much time he would need, but if I can ask 15 minutes more just to get through the presentation. CHAIRPERSON: If I can just maybe intervene here quickly. A large part of – many aspects of the end land use we actually discussed earlier in the discussion. In my view that point has to a large extent been discussed and what we have here is a whole series of photos. So I think what's important is actually just to give – you know the end land use, we've spoken about the application of the lodge and so forth and I think so the really point outstanding at this stage is the need and desirability and I would suggest that if you can stay for	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	a half over time. The time allocated by the – for this forum was totally inadequate. It was addressed from the beginning and I think it's not fair to say – to fly through a presentation in two hours which was physically, practically impossible on a public participation input and I just don't think it's fair. People were committed for two hours – the meeting which was inadequate. The meeting has taken now an hour and a half over the two hours and I cannot go on for another two hours. CHAIRPERSON: Look, you're putting me in a difficult spot and I'm going to respond as follows. I note and I record your – the view that the level of information to be discussed in two hours was a huge, huge ask and I in fact agree with you with that. Because I don't want to waste your time and because I'd like you to be part of the substance – and it doesn't remove your issue as valid, all I'm saying is I note you have limited time. I note there's not enough time for two hours, which I think your point is well taken. The only matter of substance still outstanding is the need and desirability, because the others are largely photos and a discussion of the good that we've already done. So I'm trying to sort of make it in between to give you the substance of the information

	Page 129		Page 131
1	MR RICHARDSON: I think it's still – I	1	point.
2	still think it's unacceptable and I know you're in a	2	MR RICHARDSON: Thank you, Chair.
3	difficult position but surely the experience having in mind	3	CHAIRPERSON: It's recorded and I think
4	you should know that the presentation of this magnitude	4	it's a substantive point that'll go into the issues and
5	cannot be undertaken in two hours –	5	process aspect that relate from this meeting and process.
6	CHAIRPERSON: Look the problem –	6	Point well noted and recorded and it will form part of the
7	MR RICHARDSON: I have an objection to	7	substance of the documentation and the process forward.
8	(inaudible) –	8	MR RICHARDSON: Thank you, Chair. I
9	CHAIRPERSON: We can't go back now so we	9	appreciate that.
10	are where we are, so what would you suggest now? In your	10	CHAIRPERSON: You're welcome. We're now
11	view how do you – what would your suggestion be on today?	11	going to have a very short summary of the short summary by
12	Your principal point is well made. In other words – and	12	Mark about the needs and desirability of the project and
13	your concern is well made but at this stage if you could	13	for those of you that have to leave, all I can say is my
14	advise me on how you think we can resolve it now, with you	14	apologies and please travel safely and thank you for
15	running out of time and so forth and I'm not being	15	sticking out so long as you could. That tenacity is much
16	facetious. I'm actually being very keen to hear if you've	16	appreciated. Thank you.
17	got any thoughts on the matter.	17	MS SMIT: Chair, if I may.
18	MR RICHARDSON: No, I've got no	18	CHAIRPERSON: Natuurlik.
19	thoughts. I have to leave. I physically have to leave the	19	MS SMIT: Can I just ask if you leave the
20	meeting now so I cannot be present for the rest of the	20	meeting can you just state your name before you go that we
21	meeting which I'm – then am discriminated against because I	21	just note it down please.
22	feel the length of the meeting has been specifically geared	22 23	CHAIRPERSON: Good point. Advocate Van
23 24	to jeopardise the public participation process. CHAIRPERSON: All right. We note that	23 24	Wyk. MR VAN WYK: Yes, Dr De Waal.
24	point –	24	CHAIRPERSON: Now this last three seconds
25	point -	23	CHARFERSON. Now this last three seconds

1	integration in the mining sector including but not limited	1	CHAIRPERSON: All right. I think the
2	to transportation, marketing, resale, mine supply,	2	brochure – if they could go through that. Mark I would
3	beneficiation and a host of other commercial activities.	3	like you –
4	In summary the economy will be greatly stimulated from the	4	MR VAN WYK: Yes. We'll mail it to them.
5	commercial activities relating to and caused both directly	5	CHAIRPERSON: If you can quickly just
6	and indirectly by the mine.	6	scan through it because I'd like to just allow a further
7	Dr De Waal, to move on to the envisaged end land	7	opportunity for the last questions and I'm sure everybody's
8	use, Sonette if you can access a brochure the people can	8	running out of time so if you can just quickly maybe finish
9	read what I've said there about the estate. There's the	9	this off for me. And I'm sorry that I –
10	point about record of decision. It was issued on the 12th	10	MR VAN WYK: Dr De Waal, we – yes. Look,
11	of January 2011. I can just point out that at the time	11	Dr De Waal, we're finished with this now.
12	that that environmental authorisation was issued I don't	12	CHAIRPERSON: Okay. Thank you very much
13	believe that public participation was a requirement in	13	for that. Ladies and gentlemen, any last questions at this
14	2011. Yes. If you just look at this diagram – if you can	14	stage? Doodse stilte. Mariette, from your side?
15	just go back. Just keep that diagram – just go back to the	15	MS LIEFFERINK: Thank you very much.
16	previous. Thank you. Sonette, just go back to the layout	16	Thank you. I just want to mention that of course public
17	of the eco-estate. Just go back one.	17	participation was always part of any application because it
18	This is the original layout for the eco-estate.	18	falls within the NEMA's ambit and the NEMA was promulgated
19	You can see that it's in 2007 and you can see – it may be	19	or published in 1998. I don't know the prospecting and the
20	difficult to see in detail but you can blow this up from	20	two mining rights applications by Advocate Van Wyk, whether
21	the presentation documents that are going to be mailed to	21	that pre-dates the Mineral and Petroleum Resources
22	you. You can see all the erven set out at the river's	22	Development Act that – sections 58 of the Mineral and
23	edge. As I say we have the environmental clearance for	23	Petroleum Resources Development Act which is dated 2002
24	this in place and that's what we propose to do. Sonette,	24	also included public participation. So I just thought I'll
25	if you just move along to the next one. This is a more	25	mention that.

A very important point which hasn't really been touched on. You'll see on the left-hand side of the sketch, on the western side that there's a water feature	2 3 4 5 6 7 8 9 10 11 12	Then with regards to the objective of the MPRDA is for the orderly extraction of mineral resources instead – in terms of section 24 of our constitution there has to be inter and inter-generational equity. If we as the current generation extract all the minerals and argue the need and desirability for that to state that it is necessary, we have to leave some minerals also for future generations. That is inter and inter-generational equity. So first of all I just want to say we do understand that there is a psychological dependency on mining but we must remember that mining is finite. It does deplete a non- renewable resource and we must leave resources for future
2 3 4 5 6 7 8 9 10 11 12 13	recent land use breakdown compiled by Mr Van Der Berg who is sitting in front of you. You can see agriculture. It is shown. We're going to continue with agricultural usages although probably not for (inaudible) crop farming, rather for cattle grazing. You can see there's a specialist game reserve there. The rest of the area will be rehabilitated as we mine and as Mader pointed out we're going to re-grass it. We're going to upgrade the grazing from what it is at the moment to run game. A very important point which hasn't really been touched on. You'll see on the left-hand side of the sketch, on the western side that there's a water feature shown there. That's part of our water use licence	2 3 4 5 6 7 8 9 10 11 12 13	Then with regards to the objective of the MPRDA is for the orderly extraction of mineral resources instead – in terms of section 24 of our constitution there has to be inter and inter-generational equity. If we as the current generation extract all the minerals and argue the need and desirability for that to state that it is necessary, we have to leave some minerals also for future generations. That is inter and inter-generational equity. So first of all I just want to say we do understand that there is a psychological dependency on mining but we must remember that mining is finite. It does deplete a non- renewable resource and we must leave resources for future generations.
2 3 4 5 6 7 8 9 10 11 12 13 14	recent land use breakdown compiled by Mr Van Der Berg who is sitting in front of you. You can see agriculture. It is shown. We're going to continue with agricultural usages although probably not for (inaudible) crop farming, rather for cattle grazing. You can see there's a specialist game reserve there. The rest of the area will be rehabilitated as we mine and as Mader pointed out we're going to re-grass it. We're going to upgrade the grazing from what it is at the moment to run game. A very important point which hasn't really been touched on. You'll see on the left-hand side of the sketch, on the western side that there's a water feature shown there. That's part of our water use licence application. That is to fill a void or to utilise the void	2 3 4 5 6 7 8 9 10 11 12 13 14	Then with regards to the objective of the MPRDA is for the orderly extraction of mineral resources instead – in terms of section 24 of our constitution there has to be inter and inter-generational equity. If we as the current generation extract all the minerals and argue the need and desirability for that to state that it is necessary, we have to leave some minerals also for future generations. That is inter and inter-generational equity. So first of all I just want to say we do understand that there is a psychological dependency on mining but we must remember that mining is finite. It does deplete a non- renewable resource and we must leave resources for future generations. And then the last point I want to mention –
2 3 4 5 6 7 8 9 10 11 12 13 14 15	recent land use breakdown compiled by Mr Van Der Berg who is sitting in front of you. You can see agriculture. It is shown. We're going to continue with agricultural usages although probably not for (inaudible) crop farming, rather for cattle grazing. You can see there's a specialist game reserve there. The rest of the area will be rehabilitated as we mine and as Mader pointed out we're going to re-grass it. We're going to upgrade the grazing from what it is at the moment to run game. A very important point which hasn't really been touched on. You'll see on the left-hand side of the sketch, on the western side that there's a water feature shown there. That is to fill a void or to utilise the void where the sand is going to be removed from. Okay. So I	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Then with regards to the objective of the MPRDA is for the orderly extraction of mineral resources instead – in terms of section 24 of our constitution there has to be inter and inter-generational equity. If we as the current generation extract all the minerals and argue the need and desirability for that to state that it is necessary, we have to leave some minerals also for future generations. That is inter and inter-generational equity. So first of all I just want to say we do understand that there is a psychological dependency on mining but we must remember that mining is finite. It does deplete a non- renewable resource and we must leave resources for future generations. And then the last point I want to mention – sorry. There's mention made that all our comments will be
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	recent land use breakdown compiled by Mr Van Der Berg who is sitting in front of you. You can see agriculture. It is shown. We're going to continue with agricultural usages although probably not for (inaudible) crop farming, rather for cattle grazing. You can see there's a specialist game reserve there. 1	[16:40] CHAIRPERSON: Thank you very much,].	1	the informal settlements, one in Lindequesdrift and one at
2	Any further questions and comments? I'm thinking about	2	the Barrage police station if I'm correct. The locations
3	closing in the next few seconds so this is your second-last	3	was emailed.
4	chance to say something.	4	MR HARTSLIEF: So for those of us that
5	MR HARTSLIEF: Good afternoon.	5	can't make it because we have other arrangements, what's
6	CHAIRPERSON: Good afternoon. Please	6 7	going to happen to us?
7	continue. MR HARTSLIEF: Mv name is Bob Hartslief.	8	CHAIRPERSON: I think, Sonette, you can maybe respond to that but at this stage I mean the meeting
0 9	MR HARTSLIEF: My name is Bob Hartslief. I would like to know what is going to happen to all of us	9	couldn't take place or there wasn't even a meeting – the
10	that travelled at six o'clock this morning to Eden Manor	10	get-together because of technical difficulties and I think
11	only to have that meeting cancelled. When will that be	11	there's a – in the next few days there were plans and
12	rescheduled please?	12	communications between yourselves as far as I understood
13	CHAIRPERSON: Sonette. If you could just	13	and the environmental team to see what can be done and to
14	respond to that. We did address that issue but if you	14	expect a final – you know there's just not really enough
15	could just refresh our memories on that please.	15	time to arrange everything and discuss everything, so I'm
16	MS SMIT: Yes. It was addressed.	16	quite confident that a measure should be put in place to
17	Everyone was contacted telephonically and will further be	17	address people this morning that did not have – attend to
18	contacted, these ones that wasn't contacted before this	18	and I think that –
19	meeting and an email was also sent that a further meeting	19	MR HARTSLIEF: With respect, Mr Chair –
20	is going to be held on the 21st – Wednesday the 21st of	20	with respect, Mr Chair –
21	April on the – it's a virtual meeting and the – there's	21	CHAIRPERSON: Please let me finish –
22	another physical meeting on the 24th of April.	22	MR HARTSLIEF: Being quite confident
23	CHAIRPERSON: I suspect –	23	doesn't (inaudible) okay. –
24	MR HARTSLIEF: I would like to just make	24	CHAIRPERSON: Please let me finish. I'm
25	the point after the (inaudible). I would like to just make	25	busy. Please let me finish. Fair is fair. I gave you a
1	Page 138 this point.	1	Page 140 chance. It's now my chance. And I suspect in the next day
2	CHAIRPERSON: Of course.	1 2	or two that there'll be – that they'll enter into a
3	MR HARTSLIEF: There are only IAPs in	3	discussion about how to resolve that issue. It's your turn
4	this matter. Interested and affected parties. Whether	4	now.
5	they are my staff, whether they are anybody's staff, we	5	MR HARTSLIEF: I would like Sonette to
6	have a multitude of interested and affected parties. To	6	confirm that please.
7	divide this into various little groups is disingenuous to	7	CHAIRPERSON: You're welcome.
8	say the least. So to try and divide us all is really not	8	MS SMIT: I will. Yes, I'll confirm
9			
1	going to work. So just to clarify, when is the physical	9	that.
10	going to work. So just to clarify, when is the physical meeting, Sonette?	9 10	that. MR HARTSLIEF: Further, on your website
_		-	
10	meeting, Sonette?	10	MR HARTSLIEF: Further, on your website
10 11	meeting, Sonette? MS SMIT: If I may answer the division, Chair. CHAIRPERSON: Please do.	10 11	MR HARTSLIEF: Further, on your website you have 52 points that you've raised and I do not and I agree with Craig and previous speakers that two hours is hopelessly inadequate to cover the 52 line items on your

I minute your point that you feel it's a deliberate ingenious effort to minimise consultation and – but I think that's a point that you have to take up with the department. All I can say for colleagues over the last 30 years that I've worked with in the environmental field, that the people,

	D 141		D 142
1	Page 141 any dis-ingenuity of them, but I note your point and I	1	Page 143 CHAIRPERSON: Last one.
2	suggest you also take that point up directly with the	2	MS SMIT: Faith.
3	department.	3	CHAIRPERSON: Going –
4	MR HARTSLIEF: Well, I certainly will.	4	MS SMIT: Faith Fredericks.
5	Thank you very much.	5	MS FREDERICKS: Question answered. Thank
6	CHAIRPERSON: All right. There was a	6	you, Sonette.
7	last question still that I heard in the background.	7	CHAIRPERSON: Yes.
8	MS SMIT: We had Warren and Faith	8	MS SMIT: Okay. Thank you, Warren. A
9	Fredericks.	9	hand is still up. Okay. Thank you. Chair, I believe we
10	CHAIRPERSON: All right. After Warren	10	went through most of these concerns. The only ones
11	Fredericks I would like to close the meeting. Warren, it's	11	pertaining to the water and the sense of place of the
12	your turn.	12	wetland, that specialist is also not available today, so we
13	WARREN: Thank you very much. I'd just	13	will make his comments also available when we send out the
14	like to point out there's a study – the tender went out for	14	documentation.
15	it before Covid to do a study along the whole Vaal River to	15	CHAIRPERSON: Thank you very much.
16	look at – use it beneficially for current and future	16	MS SMIT: The rest are all dealt with
17	generations and particularly looking into the study of	17	throughout the presentation.
18	protecting tourism and environmental areas, of which this	18	CHAIRPERSON: Thank you very much. I
19	area is certainly one of them. I don't know with Covid how	19	just want to say two short paragraphs in closure. I'm
20	far this study has gone but I think it's imperative that	20	going to close the meeting now. I have and I come from a –
21	this be considered and that mining should not be allowed at	21	in my irresponsible youth I also studied law, 40 or 45
22	least until this study is completed. We are looking at a	22	years ago and I have great understanding for the fact that
23	mining area for the next 30 years. That definitely impacts	23	whenever you have a new development or something, there's
24	on everybody. On the people in the area as well as tourism	24	almost like a crossroad. You have rights that are
25	and we have certainly got a responsibility to future	25	different and you have expectations that are different and
	Page 142	1	Page 144
1	generations.	1	I just want to say that I sincerely hope that this process,
2	generations. And I'd like to particularly thank Mariette for	2	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from
2 3	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or	2 3	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons.
2 3 4	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's	2 3 4	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your
2 3 4 5	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides	2 3 4 5	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your patience. This is not an easy matter and it took so long
2 3 4 5 6	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides in and she's given us enormous time and support. So we	2 3 4 5 6	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your patience. This is not an easy matter and it took so long and so forth and this morning's chronic misadventure.
2 3 4 5 6 7	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides in and she's given us enormous time and support. So we thank her a lot for that.	2 3 4 5 6 7	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your patience. This is not an easy matter and it took so long and so forth and this morning's chronic misadventure. Thank you for participating and continuing under those –
2 3 4 5 6 7 8	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides in and she's given us enormous time and support. So we thank her a lot for that. CHAIRPERSON: On that note of thanks to	2 3 4 5 6 7 8	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your patience. This is not an easy matter and it took so long and so forth and this morning's chronic misadventure. Thank you for participating and continuing under those – for the people that have already left, thank you for
2 3 4 5 6 7 8 9	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides in and she's given us enormous time and support. So we thank her a lot for that. CHAIRPERSON: On that note of thanks to Mariette, we'll minute it and record it.	2 3 4 5 6 7 8 9	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your patience. This is not an easy matter and it took so long and so forth and this morning's chronic misadventure. Thank you for participating and continuing under those – for the people that have already left, thank you for participating as long as you did and Sonette, thank you for
2 3 4 5 6 7 8 9 10	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides in and she's given us enormous time and support. So we thank her a lot for that. CHAIRPERSON: On that note of thanks to Mariette, we'll minute it and record it. WARREN: Thank you. And just to please	2 3 4 5 6 7 8 9 10	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. Thank you for participating and continuing under those – for the people that have already left, thank you for participating as long as you did and Sonette, thank you for your work. Mark, I always give the applicant - seeing that you arranged – you know were responsible for the process, if you'd like to say a last maybe four words, five words? MR VAN WYK: I just want to thank everybody for participating and David, especially to say to the IAPs, I live on the farm from time to time. These
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides in and she's given us enormous time and support. So we thank her a lot for that. CHAIRPERSON: On that note of thanks to Mariette, we'll minute it and record it. WARREN: Thank you. And just to please take note of that study. I did include it in a previous presentation. But it's a vital – it was initiated or carried out initially by the Bloemfontein University and the tender was – went out about two years ago. I don't know where it stands at the moment but it's a vital study. Thank you.	2 3 4 5 6 7 8 9 10 11 12 13 14	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your patience. This is not an easy matter and it took so long and so forth and this morning's chronic misadventure. Thank you for participating and continuing under those – for the people that have already left, thank you for participating as long as you did and Sonette, thank you for your work. Mark, I always give the applicant - seeing that you arranged – you know were responsible for the process, if you'd like to say a last maybe four words, five words? MR VAN WYK: I just want to thank everybody for participating and David, especially to say to the IAPs, I live on the farm from time to time. These people are my neighbours. I'm concerned about them. And
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	generations. And I'd like to particularly thank Mariette for bringing that up again. And I'd just like to point out or make a thank you to Mariette for all the help that she's given us in this area. It's not an area where she resides in and she's given us enormous time and support. So we thank her a lot for that. CHAIRPERSON: On that note of thanks to Mariette, we'll minute it and record it. WARREN: Thank you. And just to please take note of that study. I did include it in a previous presentation. But it's a vital – it was initiated or carried out initially by the Bloemfontein University and the tender was – went out about two years ago. I don't know where it stands at the moment but it's a vital study. Thank you. CHAIRPERSON: Warren, I agree with you.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	I just want to say that I sincerely hope that this process, whatever the decision is, comes to the right decision from the departmental side for good reasons and valid reasons. And then lastly thank you very much for your patience. This is not an easy matter and it took so long and so forth and this morning's chronic misadventure. Please travel safely. Wear your masks. And I therefore close this meeting officially at ten minutes to five and it is now closed.

APPENDIX E16.9.3 MEETING CHAT PUBLIC MEETING 2 17 APRIL 2021 AT 13H00

From Craig : Thank you Chair. From Fay Frodoric' 13:52:34 From Fay Fredericks : which newspapers were adds placed in? 13:56:53 From Fay Fredericks : will the I&A participants this 13:58:55 morning be accommodated with a two week notice period? 13:58:56 From greenmined.admin to Fay Fredericks(Privately) : Advert was placed in the Star Newspaper, Classifieds section, 19 March 2021 13:59:41 From Sean Hunter : What did the notices look like and where were they placed? 14:01:53 From greenmined.admin : Site notices were placed at 20 different sites. Photos and proof as well as the adverts will be in the FEIAR. 14:10:18 From Fay Fredericks to greenmined.admin(Privately) : hand lowered Sonette 14:13:24 From Sean Hunter : No idea what the estates built have anything to do with the mining 14:14:52 From Fay Fredericks to greenmined.admin(Privately) : as per Seans question above: are those developments related to rehabilitated land? 14:16:07 From Marianne Bilsland : I am puzzled why Mr Van Wyk interrupted proceedings to show his company's residential estates. 14:20:21 From Fay Fredericks to greenmined.admin(Privately) : Does prospecting not require an application? 14:22:12 From Fay Fredericks to greenmined.admin(Privately) : Please remove private mode 14:23:03 From Fay Fredericks : Does prospecting not require an application? 14:23:46 From warrin : If mining right is extended for 40 years when will first estate housing be built? 14:28:28 From Sean Hunter : Am I right in saying that Advocate Van Wyk suggests that the wildlife will not be affected by the open cast mining? 14:30:30 From Marianne Bilsland : I request Mr Van Wyk answer Warrin's question as to when the estate housing will be built. 14:31:38 From Renee Hartslief : Please answer Warrin's question 14:35:02 From Craig : What about the impact on neighbours for the next 30 years? 14:40:37 From Craig : Has Public Participation for the Eco Estate taken place? As it would be change of land use? 14:43:00 From Renee Hartslief : May I please be acknowledged - about the roads? 14:43:10 From Craig : Was there Public Participation? From warrin : The Eco Estate application will have expired 14:43:16 by now 14:43:29From Renee Hartslief : My hand is still up14:44:07From Marianne Bilsland : Mr Chairman - kindly note that Mr Van Wyk introduced his plans for an Eco Estate as well as his expertise on housing estates. Therefore questions around this should be allowed by I&APs 14:46:37 From Craig : My hand is up!!! From Sean Hunter : My biggest concern is that I bought here 14:48:44 as an investment, and if the property values are only going to increase after 30 years, 30 years will be too late for me 14:49:46 From Craig : Surely the same Public Participation process as this one would be required for the Eco Estate? 14:50:55 From Renee Hartslief : How many additional trucks on the road?

14:52:20 From Renee Hartslief : How many additional trucks on the road? 14:53:02 From Heather : We moved here to get away from noise and pollution as our main reasons. Within our area we constantly have challenges with municipal issues, we try to accept that and live with it because we have the peaceful, quality of life that we chose! This is now under threat along with our health and property values. Why would anyone in this area be amenable to the proposed mining. We do not choose to live alongside a mine. From Heather : Just the initial two years of proposed 14:55:44 construction, noise, mining will destroy our community. 14:55:45 From Selma Kok : Will you need to do blasting? 14:57:09 From Selma Kok : Are mobile crushing plants and Rotary Pan Plants currently used in the mining done there (or that was done there)? From Marianne Bilsland : From these current slides 15:00:00 explaining the different mining processes, there is no way there will be minimal noise and dust disturbance 15:01:40 From Craig : 200 trucks plus trucks from Sweet Sensations approximately 45! And Tja Naledi will add more! This impact is huge !!! From Fay Fredericks : Was an EIA with public participation 15:03:09 on the prospecting that took place over 10 years ago as stated by Mark 15:03:24 From Selma Kok : So noise levels will go up? From Craig : Thank you Chair. The cumulative impact will be 15:03:55 devastating for the area! 15:09:19From Selma Kok : Appedix D515:09:42From Craig : The noise from the road needs to be addressed! This will now be 24 hours a day! 15:11:31 From Craig : What about the noise for the other neighbours on the river? 15:14:59 From Marianne Bilsland : I take exception to the Noise Consultant's flippent remark that mining will ONLY take place between 6am to 6 pm. In addition, trucks will be queuing before 6am. Secondly previous communication indicates diamond mining will be continuous 15:17:38 From Marianne Bilsland : Where will the water pump station be located? This relates directly to noise disturbance. 15:19:08 From Sean Hunter : Does that include weekends and public holidays 15:24:23 From Marianne Bilsland : I repeat: Where will the water pump station be located? This relates directly to noise disturbance. 15:29:55 From Mariette Liefferink : The WULA ought to be part of the EIA because of the "one environmental system." 15:30:26 From Selma Kok : Could you explain what you mean regarding surface water pollution, with update water balance on an annual basis? From Craig : The Gauteng Rural limit is 45dB! 15:32:26 From Selma Kok : Could you also expand on the socio-15:34:10 economic impact. Where it is stated (10.1.2) there will be no socioecomic impact costs for the Pure Source Mine project as there are no communities in the immediate surrounding areas which could be affected. 15:35:28 From Sean Hunter : How does my property value increase in the next 10 years? From Sean Hunter : Are any of you willing to buy and live 15:36:34 in Vaal Oewer for the next 30 years 16:05:01 From Marianne Bilsland : It is evident that the grey area pertaining to several issues allows for non-compliance: The cumulative effect of the mines is not being taken into consideration; the roads are not owned by the mining companies, therefore they are not responsible;

the mining companies cannot be held responsible for noise created by trucks on public roads; etc, etc, etc 16:08:53 From warrin : Roads: would mining commence even if the road remains in present condition? 16:08:53 From Craig : Is approval for the mine required from Free State Police, Roads and Transport.? 16:18:44 From Renee Hartslief : None of the current mines have approval from the Department of Roads - that's why the road is demolished From Sean Hunter : Good point Craig 16:23:29 From Selma Kok : So the Human Resources Development and LED 16:27:03 will not be discussed? 16:29:01 From Fay Fredericks : I support that it is not reasonable for the meeting to continue to cover the remaining issues. There will be additional questions that may take another while 16:31:10 From Sean Hunter : Craig I am 100% behind and agree with you 16:31:24 From warrin : I have to agree with Craigs comments re meeting ppp 16:31:24 From Marianne Bilsland : In agreement with Craig re frustration experienced with public participation 16:32:23 From Craig : I have no choice but to leave the meeting. 16:32:50 From Fay Fredericks : We are being held hostage 16:33:52 From Fay Fredericks : We can not be reasonably expected to make meaningful contributions through this rush, skimping and overwhelm of information From Sean Hunter : Still, only after 30 years, in 30 years 16:36:05 I'm pushing up daisies, so I loose my investment 16:37:35 From Sean Hunter : Sean Hunter leaving 16:43:10 From warrin : Are these pp recordings available online? 16:49:18 From Fay Fredericks : For the record: I'd like to ad that the WUL and Sense of place was not discussed From Marianne Bilsland : Mr Chairman, kindly note that 16:50:39 while you may consider that the Environmental Company and associated contributors are reputable, I am fighting for the right to live in a quiet, safe environment and my home. 16:50:44 From Chris Campbell : Thanks to all.
