The Draft Basic Assessment submitted in respect of the above-mentioned project, received by the Department on the 04 December 2020, refers.

1. This Department has reviewed the Draft BAR and requires that the following issues be addressed in the Final BAR:

The department has reviewed the relevant spatial datasets and has established that the proposed development falls within areas that have been identified as being sensitive in terms of the uMgungundlovu District Environmental Management Framework (i.e. High agricultural, biodiversity, water quality constraints and is within a 500m buffer of a wetland). Kindly consider other specified activities in terms of the sensitivity of the proposed site.
3. Letters from all relevant service providers must be included in the Final BAR with their contact details in respect to the collection and disposal of waste. All hazardous waste must be disposed at a suitably licenced landfill site.
4. A copy of the Water Use License must be included in the FBAR.

5. The DBar states that "the proposed mining site area (S1) will be reached via an existing farm road that passes the site and Inzalo proposes to upgrade the road". Should the road be upgraded, widened or lengthened, then kindly consider Listing Notice 1, Activity 56 in the FBAR.
6. A suitably qualified botanist must be appointed to identify and relocate sensitive plant species prior to any site works and must ensure a Plant Rescue Plan be included in the FBAR. Permits must be obtained from KZN Wildlife for the relocation of plants.
7. All concerns raised by Interested and Affected Parties, must be addressed adequately in the FBAR.
8. The Final BAR must meet the requirements of Appendix 1 of the EIA Regulations, 2014 (as amended), the final Environmental Management Programme must comply with Section 24N of NEMA and Appendix 4 of the EIA regulations, 2014 (as amended) and all specialist studies compiled must be prepared in terms of Appendix 6 of the EIA Regulations, 2014 (as amended).
