KENNIS VAN MYNPERMIT AANSOEK

Kennis geskied hiermee ingevolge die Minerale- en Petroleumhulpbronneontwikkingswet, 2002 (Wet 28 van 2002) (MPRDA), die Nasionale Omgewingsbestuurwet, 1998 (Wet 107 van 1998) (NEMA), die Omgewingsimpakstudie Regulasies, 2014 (soos gewysig) (OIS-), en die Nasionale Wet op Omgewingsbestuursafval, 2008 (Wet 59 van 2008) (NEM:WA) dat Namli Exploration and Mining (Pty) Ltd (Namli) aansoek gedoen het vir:

- omgewingsgoedkeuring om verskeie minerale op die plaas Steinkopf No 22 te myn;
- 'n mynpermit ingevolge artikel 27 van die MPRDA; en
- 'n afval lisensie ingevolge Kategorie A van die NEM:WA.

KORT PROJEKBESKRYWING:

Namli het aansoek gedoen vir 'n mynpermit oor 5 ha van die plaas Steinkopf No 22 in die Nama Khoi munisipale gebied van die Noord-Kaap Provinsie (verwys na kaart). Die mynpermit-aansoek is vir die ontginning van Litiumerts (Li), Nikkel (Ni), Mangaan (Mn), Lood (Pb), Koper (Cu), Yster (Fe), Kobalt (Co), Goud (Au), Sink (Zn), Silwer (Ag), Tungsten (W), Uraan (U), Berillium (Be), Skaars Aarde Minerale, en Tantaal (Ta).

Die doel van die projek is die ontginning van minerale wat die elemente Ta, Li en Nb (Niobium) bevat uit twee afsettings wat bekend staan as Norrabees 1 en 2 op die bogenoemde eiendom. Die afsettings is naby mekaar (450 m) en is albei voorheen gemyn met bestaande uitgrawings op beide Norrabees 1 en 2. Die uitskot van Norrabees 1 sal eerste verwerk word, en dus sal intensiewe mynbou nie nodig wees tydens die aanvangs fases van die projek nie. Die uitskot by Norrabees 1 sal voldoende wees vir ±6 maande, waarna skietwerk en ontginning van vaste materiaal nodig sal wees.

Die maatskappy sal mobiele klipbrekers inbring om die materiaal te verwerk waarna dit geberg word voordat dit finaal verwerk word. Die klipbrekers sal met tussenposes van ±6 maande na die perseel gebring word en daar sal dus nie aanhoudend klip gebreek word nie. Gedeeltelike verwerking, hoofsaaklik om 'n litium- en tantaalkonsentraat te vervaardig, sal op die perseel plaasvind. Die konsentraat sal dan na 'n meer formele perseel (Steinkopf/Springbok) vervoer word vir die vervaardiging van die finale bemarkbare produkte.

Meganiese, swaartekraggebaseerde, herwinningsprosesse sal gebruik word waartydens slegs water bygevoeg word. 'n Materiaal vir die vervaardiging van digtheid, naamlik ferrisilicon (FeSi) sal deur die verwerkingsaanleg gebruik word. FeSi is omgewingsvriendelik en word voortdurend magneties herwin tydens die proses. 'n Boorgat met konstante watertoevoer is naby die mynbou gebied geleë. Water wat by die verwerkingsaanleg gebruik gaan word, sal grootliks herwin word. Aangesien die bestaande paaie gebruik kan word, hoef daar geen nuwe paaie gebou te word nie. Die bestaande paaie sal opgegradeer word waar nodig. Kragopwekkers sal gebruik word wanneer elektrisiteit benodig word.

WETLIKE VEREISTES:

NOTICE OF MINING PERMIT APPLICATION

Notice is hereby given in terms of Section 27 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), the Environmental Impact Assessment Regulations 2014 (as amended), and the National Environmental Management: Waste Act, 2008 (NEM:WA) that Namli Exploration and Mining (Pty) Ltd ("Applicant") applied for:

- environmental authorization to mine various minerals from the farm Steinkopf No 22;
- a mining permit in terms of Section 27 of the MPRDA; and
- a waste licence in terms of Category A of the NEM:WA.

BRIEF PROJECT PROPOSAL:

The Applicant applied for a mining permit over a 5 ha portion of the farm Steinkopf No 22 in the Nama Khoi municipal area of the Northern-Cape Province (refer to map). The mining permit application is for the mining of Lithium ore (Li), Nickel (Ni), Manganese (Mn), Lead (Pb), Copper (Cu), Iron (Fe), Cobalt (Co), Gold (Au), Zinc (Zn), Silver (Ag), Tungsten (W), Uranium (U), Beryllium (Be), Rare Earths, Tantalum (Ta).

The objective of the project is the extraction of minerals containing the elements Ta, Li and Nb (Niobium) from two deposits currently known as Norrabees 1 and 2 on the abovementioned property. The deposits are closely spaced (450 m) and were both mined previously with extensive excavations on both the outcropping areas of Norrabees 1 and 2. The tailings of Norrabees 1 will be processed first, and actual mining will not be necessary during the initial phases of the project. The tailings at Norrabees 1 will be adequate to support the operation for a 6-month period, after which blasting and extraction of in-situ material from the existing mining areas will become necessary.

The company will bring in mobile crushers to process the material that will be stockpiled before future processing. Continuous crushing will not be necessary on site, as crushers will be brought to site at $\pm$ 6-month intervals. Partial processing, primarily to produce a lithium and tantalum concentrate, will take place on site. The concentrate will then be transported to a more convenient locality (Steinkopf/Springbok) for the production of final saleable products.

The proposed processing of the material represents mechanical, gravity based, recovery processes with water being the only consumable. A material for producing density, namely ferrisilicon (FeSi) will be used by the processing plant. FeSi is environmentally friendly and is magnetically recovered and continuously recycled during the process. A borehole with constant water supply is present near the mining operation. Water to be used at the processing plant will be extensively recycled. No new roads will be constructed as the existing roads will be used and upgraded where needed. The operations will be powered with generators when electricity is needed.

LEGAL REQUIREMENTS:

The proposed project triggers the following listed activities in terms of NEMA, 1998, the EIA Regulations 2014 (as amended), and the NEM:WA and therefore requires a basic assessment process to obtain environmental authorization:

- GNR 517 Listing Notice 1 Activity 21 as amended:
Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as continued in this Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.

the goal isn't to live forever, it is to protect a planet that will

- GNR 517 Listing Notice 1 Activity 21F as amended:
Any activity including the operation of that activity required for the reclamation of a residue stockpile or a residue deposit as well as any other applicable activity as contained in this Listing Notice or in Listing Notice 3 of 2014, required for the reclamation of a residue stockpile or a residue deposit.
- GNR 327 Listing Notice 1 Activity 26:
Residential, retail, recreational, tourism, commercial or institutional developments of 1 000 square metres or more, on land previously used for mining or heavy industrial purposes.
- GNR 327 Listing Notice 1 Activity 27:
The clearance of an area of 1 hectares or more, but less than 20 hectares of indigenous vegetation.
- GNR 324 Listing Notice 3 Activity 12:
The clearance of an area of 300 square metres or more of indigenous vegetation.
g. Northern Cape
ii. within critical biodiversity areas identified in bioregional plans;
- GNR 324 Listing Notice 3 Activity 18:
The widening of a road by more than 4 metres, or the lengthening of a road by more than 1 kilometre.
g. Northern Cape
ii Outside urban areas:
(bb) National Protected Area Expansion Strategy Focus areas;
(ee) Critical biodiversity areas as identified in systematic biodiversity plans adopted by the competent authority or in bioregional plans.
- Category A Activity 15
The establishment of reclamation of a residue or residue deposit resulting from activities which require a prospecting right or mining permit, in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002).

Goeiemiddag Mevrouw,

Die mynpermitaansoek op 'n gedeelte van Steinkopf No 22 het verwysing. Raadslid Visser het u nommer vir my gegee sodat ons u ook in kennis kan stel van die projek, al is die Vioolsdrif-omgewing eindlik net aangrensend tot die myn gebied.

Goeiemiddag Mevrou,

Weereens, baie dankie dat u en die raadslede laas week met ons vergader het om die projek te bespreek.

Soos belowe stuur ek graag aan u die elektroniese weergawe van die projek pamflet, asook die kaarte van die myng gebied ten opsigte van Concordia en Steinkopf (onderskeidelik).

Voel asb vry om my te kontak sou u die projek verder wil bespreek, of intussen kommentaar wil lewer. Alle kommentaar/korrespondensie met en vanaf u sal ingesluit word in die DBAR wat (soos genoem) vrygestel sal word vir publieke deelname en kommentaar. Laat weet my ook gerus indien daar enige ander instansie of individue is wat u voel genooi moet word om kommentaar te lewer op die projek.

Sal u asb ook onthou om die fotos van die kennisgewings vir my te stuur?

Kind Regards / Vriendelike Groete
