Gordonia Shotokan Karate karatekas 'presteer

Uppies skitter by Upington Junior Ope

Gordonia Shotokan Karate se Sensei Paul Steenkamp is meer as tevrede met sy karatekas se puik gradering onlangs. Hy is trots op die karatekas se selfdisipline en deurstellingsvermoë. Karate is een van die wêreld se gewildste vorme van gevegs-kuns. Moderne karate is ontwikkel in Okinawa, 'n klein eiland buite Japan en is 'n hoogs effektiewe stelsel van selfverdediging, en ook 'n uitstekende vorm van oefening wat 'n aantal lewensvaardighede en waardes bevorder.

Op 21 en 22 Mei was die jaarlikse Upington Junior Ope Golf toernooi. Dit is een van die Noord Kaap toernooie wat tel vir die merietelys waaruit die Noord Kaap span gekies word wat in Desember aan die SA Interprovinciale Toernooi gaan deelneem. Jano Malan het op 'n ongelooflike -1 die toernooi gewen met 11 houe en is voor op die merietelys op die oomblik!

P.A Karsten het 4de geëindig in die toernooi en 1ste geëindig in die 0/17 ouderdomsgroep.

UITVOERENDE OPSOMMING

Namli Exploration and Mining (Edms) Bpk, (“Aansoeker”) het aansoek gedoen vir omgewingsmagtiging, 'n mynpermit, en afvallisensie oor 'n 5-ha gedeelte van die plaas Steinkopf No 22 in die Nama Khoi munisipale gebied van die Noord-Kaap Provinsie

Die mynpermit-aansoek is vir die ontginning van Litiumerts (Li), Nikkel (Ni), Mangaan (Mn), Lood (Pb), Koper (Cu), Yster (Fe), Kobalt (Co), Goud (Au), Sink (Zn), Silwer (Ag), Tungsten (W), Uraan (U), Berillium (Be), Skaars Aarde, Tantaal (Ta).

Die doel van die projek is die ontginning van minerale wat die elemente Ta, Li en Nb (Niobium) bevat uit twee afsettings wat bekend staan as Norrabees 1 en 2 op bogenoemde eiendom. Hierdie elemente is hoofsaaklik vervat in die minerale spodumeen (Li_2O) en tantaliet (Ta_2O_5). 'n Norrabees 1 het 'n groot volume uitskotmateriaal, wat spodumeen en tantaliet bevat. Die uitskot sal eerste verwerk word, en ontginning van die in-situ materiaal sal nie nodig wees tydens die eerste fase van die projek nie. Die projek sal 'n relatief kleinskaalse operasie wees met 'n beperkte lewensduur.

Die voorgestelde projek sal lei tot gelyste aktiwiteite ingevolge die Nasionale Omgewingsbestuurwet, 1998 (Wet 107 van 1998) en die Omgewingsimpakstudieregulasies, 2014 (soos gewysig), sowel as die Wet op Nasionale Omgewingsbestuurafval, 2008 (Wet 59 van 2008). Die projek vereis dus 'n omgewingsimpakstudie (OIS) (basiese assesseringsproses) wat projekspesifieke omgewingsimpakte en alternatiewe assesser, openbare insette oorweeg en versagtingsmaatreëls voorstel, wat uiteindelik saam gestel word in 'n omgewingsbestuursprogram wat die bevoegde owerheid (DMRE) inlig wanneer die omgewingsmagtiging oorweeg word. Hierdie verslag, die Konsep Basiese Assesseringsverslag, vorm deel van die departementele vereistes en is die eerste verslag van die OIS-proses aan.

Indien die MP (mynpermit) uitgereik word, en die mynbou goedgekeur word, sal die voorgestelde projek bestaan uit aktiwiteite wat in drie sleutelfases verdeel kan word, naamlik die:

- (1) *Terreinstigting/konstruksiefase* wat die afbakening van die toegelate myngebied sal behels. Terreinvestiging sal ook die skoonmaak van plantegroei en die plasing van mynmasjinerie en -toerusting noodsaak. Die stroop van subgrond sal slegs gedurende die tweede fase van die projek nodig wees.
- (2) *Bedryfsfase* wat eers die verwerking van die Norrabees 1-uitskot sal behels, daarna sal die ontginning van die in-situ harde rots volg. Die mynmetode sal gebruik maak van skietwerk om die harde rots te breek; waarna die losgemaakte materiaal na 'n verwerkingsaanleg op

die perseel vervoer sal word. Gedeeltelike verwerking, hoofsaaklik om 'n litium- en tantaalkonsentraat te vervaardig, sal op die perseel plaasvind. Die konsentraat sal dan na 'n geriefliker plek (Steinkopf / Springbok) vervoer word om die finale verkoopbare produkte te produseer.

- (3) *Ontmantelingsfase* wat die rehabilitasie van die geaffekteerde omgewing behels voor die indiening van 'n sluitingsaansoek by die Departement van Minerale Hulpbronne en Energie (DMRE). Sodra die volle myngebied gerehabiliteer is, sal daar van die mynpermithouer vereis word om 'n sluitingsaansoek by die DMRE in te dien in ooreenstemming met Artikel 43(4) van die MPRDA, 2002. Die sluitingsaansoek sal ingedien word ingevolge Regulasie 62 van die MPRDA, 2002, en Goewermentskennisgewing 940 van NEMA, 1998 (soos gewysig).

Finale Projek Voorstel

Terrein Alternatief 1, wat die ontwikkeling van die voorgestelde myn oor 5 ha van die plaas Steinkopf No 22 behels binne die GPS-koördinate soos gelys in Tabel 3 en uitgebeeld in Figuur 2, is tydens die assesseringsfase van die omgewingsimpakstudie geïdentifiseer deur die Aansoeker en projekspan, as die voorkeur en enigste lewensvatbare terreinalternatief.

Die gebruik van mobiele/tydelike infrastruktuur/toerusting by die voorgestelde mynbedrywighede word as die mees lewensvatbare en voorkeur-projekalternatief beskou.

“No-go” Alternatief

Die “no-go” alternatief word nie as die voorkeur-alternatief beskou nie, aangesien:

- ⌘ die Aansoeker nie in staat sal wees om die beskikbaar minerale binne die voorgestelde myngebied te ontgin, of in die vraag van die bedryf te voorsien nie;
- ⌘ die voorgestelde werkseleenthede (± 15), geassosieer met die ontwikkeling van die myn sal verlore wees vir die omliggende gemeenskap;
- ⌘ die verlate Norraabees 1- en 2-afsettings sal 'n veiligheidsrisiko in die omliggende gebied bly sonder die potensiaal om gerehabiliteer te word.

Publieke Deelname Proses

Tot dusver het die aanvanklike publieke deelname die plasing van Afrikaanse en Engelse terreinkennisgewings by Goodhouse, Vioolsdrif en Steinkopf behels. Terreinkennisgewings is ook by die wyksraadslid van Concordia afgelewer. Die projek sal in die Plattelander en die Gemsbok geadverteer word, en die wyksraadslede (en sommige gemeenskapslede) van wyke 1

- 3, asook die waarnemende munisipale bestuurder van die Nama Khoi Munisipaliteit is van inleidende pamflette oor die aansoek voorsien.

Die Konsep Basiese Asseseringsverslag (DBAR) is saamgestel en sal vir kommentaar en insae versprei word aan die B&GP's en belanghebbendes. 'n Harde kopie van die dokument (DBAR & EMPR) sal ook by die Steinkopf-biblioteek beskikbaar wees. 'n Kommentaartydperk van 30 dae, wat op 07 Julie 2022 eindig, sal toegelaat word vir insae tot die dokumentasie en indiening van kommentaar. Die kommentaar wat oor die DBAR ontvang word, sal in die Finale Basiese Asseseringsverslag (FBAR) geïnkorporeer word voordat dit vir besluitneming by DMRE ingedien word.

Basiese Asseseringsverslag

Die basiese asseseringsverslag identifiseer die potensiële positiewe en negatiewe impakte wat die voorgestelde projek op die omgewing en die gemeenskap sal hê, asook die aspekte wat 'n impak kan hê op die sosio-ekonomiese toestande van direk geïmpakteerde persone, en stel moontlike versagtingsmaatreëls voor wat toegepas kan word om die geïdentifiseerde impakte te wysig / reg te stel / te beheer / stop.

Die sleutelbevinding van die omgewingsimpakstudie behels die volgende:

Topografie:

Die voorgestelde aktiwiteit sal die topografie van die berg beïnvloed deurdat holtes met trapsywande geskep sal word soos mynbou vorder. Die voorgestelde myn behoort 'n uitgrawing met drie vlakke te skep wat gebank sal word namate die myndiepte toeneem. Daar word voorgestel dat die finale uitleg van die uitgrawing (na rehabilitasie) veiliger en aantrekliker sal wees, aangesien die huidige uitgrawings en uitskot hope gerehabiliteer sal wees.

Visuele Kenmerke:

Die voorgestelde myngebied sal slegs vanuit die onmiddellike omgewing sigbaar wees, en die aktiwiteit sal dus 'n lae visuele impak op die omgewing hê.

Lug- en Geraasgehalte:

Vanweë die afgeleë aard van die terrein word daar nie verwag dat inwoners/bewoners deur die voorgestelde aktiwiteite geraak sal word nie. Die impak op die luggehalte van die omliggende omgewing is van geringe betekenis.

Alhoewel die voorgestelde aktiwiteit 'n kumulatiewe impak op die omgewingsgeraasvlakke sal hê, sal die ontwikkeling nie naby enige inwoners plaasvind nie, en die impak word dus as van lae betekenis geag.

Geologie:

Die Norrabees-pegmatiet is een van talle gemineraliseerde pegmatiete wat op die plase Steinkopf 22 en Vioolsdrift 226 voorkom. Die pegmatiet is tydens vroeëre spodumeen- en berielmyn aktiwiteite ontbloot en dit is hierdie minerale waarin die Aansoeker belangstel.

Hidrologie:

Daar is geen riviere, strome of ander waterlope binne die voorgestelde myngebied nie, en die erosiepotensiaal van die terrein is van geringe betekenis.

Terrestriële Biodiversiteit, Bewaringsgebiede en Grondbedekking

Die TBIA het bevind dat hoewel die plantegroei van die gebied aan versteuring blootgestel is, die terrein steeds belangrike plantspesies het wat bewaar moet word. Die biodiversiteits sensitiwiteit van die studiegebied is oorwegend laag tot medium.

Geen diere is op die terrein waargeneem nie, en die voëlspesies wat waargeneem is, is almal algemeen. Daarom word die potensiële impak van die voorgestelde projek op die diere-komponent van die gebied as van geringe betekenis geag.

Kultuur- en Erfenis-omgewing:

Vier terreine van belang is op/naby die voorgestelde myngebied geïdentifiseer. Die HIA kom tot die gevolgtrekking dat die algehele (kulturele/erfenis-) impak van die projek laag is en dat oorblywende impakte tot 'n aanvaarbare vlak bestuur kan word deur die implementering van die aanbevelings wat in hierdie verslag gemaak is. Die sosio-ekonomiese voordele weeg ook swaarder as die moontlike impakte van die ontwikkeling, indien die korrekte versagtingsmaatreëls vir die projek geïmplementeer word. Die terrein is paleontologies van onbeduidende risiko/waarde.

Sosio-ekonomiese Omgewing:

Die voorgestelde myn sal ongeveer 15 werksgeleenthede vir plaaslike inwoners skep. Die verlate myngebiede sal gerehabiliteer en veilig gemaak word. Die bestaande paaie sal opgegradeer word (waar nodig) en deur die Aansoeker in stand gehou word vir die duur van die projek. Die voorgestelde projek sal (direk en indirek) bydra tot die plaaslike ekonomie met voorkeur aan

histories benadeelde Suid-Afrikaners en plaaslike verskaffers wat deur vroue besit word. Die suksesvolle ontginning van die gebied kan lei tot die ontwikkeling van 'n groter langtermyn-myn met meer werk geleentheid.

Tydens die omgewingsimpakstudie is die haalbaarheid van die voorgestelde terrein beoordeel om noodlottige foute te identifiseer wat as so ernstig beskou word dat dit die aktiwiteit kan verhoed om voort te gaan, of 'n terrein- of projekalternatief regverdig. Die uitkoms van die assessering het getoon dat indien die versagtingsmaatreëls en moniteringsprogramme wat in hierdie dokument voorgestel word geïmplementeer word, geen noodlottige foute geïdentifiseer kan word wat sal verhoed dat die projek kan voortgaan nie.

Omgewingsbestuursprogram (EMPR)

Die EMPR bevat 'n beskrywing van die impakbestuuruitkomst en sluitingsdoelwitte. Dit bespreek die impakte wat in hul onderskeie fases bestuur moet word, asook die versagtingsmaatreëls wat op die terrein toegepas moet word.

Die finansiële voorsieningsbedrag wat nodig sal wees vir die rehabilitasie van die myn tydens beide, skielike sluitings en die normale bedryf van die projek, is R 496 729.77.

Dear Mr / Ms M Van Den Berg

LAND CLAIMS ENQUIRY

- **5 ha portion of the farm Steinkopf No 22 in the Nama Khoi municipal area of the Northern-Cape Province**

We refer to your letter received: **31 May 2022.**

We confirm that as at the date of this letter that no land claim appears on our database in respect of the Property this includes the database for claims lodged by 31 December 1998; and those lodged between 1 July 2014 and 27 July 2016 in terms of the Restitution of Land Rights Amendment Act, 2014.

Whilst the Commission takes reasonable care to ensure the accuracy of the information it provides, there are various factors that are beyond the Commission's control, particularly relating to claims that have lodged but not yet been gazetted such as:

- Some Claimants referred to properties they claim dispossession of rights in land against using historical property descriptions which may not match the current property description; and
- Some Claimants provided the geographic descriptions of the land they claim without mentioning the particular actual property description they claim dispossession of rights in land against.

The Commission therefore does not accept any liability whatsoever if through the process of further investigation of claims it is found that there is in fact a land claim in respect of the above property.

If you are aware of any change in the description of the above property after 19 June 1913 kindly supply us with such description so as to enable us to do a further search.

Yours faithfully

A handwritten signature in black ink, appearing to be 'M. Du Toit', written over a horizontal line.

Greenmined Environmental (Pty) Ltd have been appointed by Namli Exploration and Mining (Pty) Ltd to undertake an Environmental Authorisation Application for proposed mining activities on the farm Steinkopf 22 in the Nama Khoi municipal area of the Northern Cape Province (NC 30/5/1/3/2/10950 MP).

A Draft Basic Assessment Report (DBAR) has been submitted in terms of the National Environmental Management Act, 1998 (NEMA) and the EIA Regulations for activities that trigger the Mineral and Petroleum Resources Development Act, 2002 (MPRDA)(As amended). The proposed mining will include clearing of vegetation, opencast mining consisting of excavations, drilling and blasting of the hard rock, haul and access roads, stockpiles, temporary washbay, site office, workshops and storerooms, crushing and screening plant, and processing plant within an application area of 5 ha.

Beyond Heritage has been appointed to provide specialist heritage input into the EA process as required by section 24(4)b(iii) of NEMA and section 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA).

Van der Walt, 2022. Heritage Impact Assessment for the Proposed Mining Right over a Portion of the Farm Steinkopf No 22 in the Nama Khoi Municipal area of the Northern-Cape Province.

The report states that the proposed development area is located in an area of insignificant sensitivity for palaeontological resources, however the SAHRIS PalaeoSensitivity map depicts the development footprint to be located in an area of unknown sensitivity for palaeontological resources.

A total of four heritage resources were identified within the proposed project area. These include a small addit with stone packed terraces, several stone packed features/platforms and enclosures with scatters of historical artefacts all of low to low-medium heritage significance.

Recommendations provided in the report include the following:

- Documentation (scaled mapping) of the mining-related structures at Norrabees 1 and 2;
- The enclosures recorded as Feature 3 are just outside of the development footprint and it is recommended that these features should be avoided and preserved in situ with 30 meter buffer zone;
- After documentation of the features a destruction permit can be applied for the sites that will be impacted on (for Feature 1 and 2) from Ngwao-Boswa Jwa Kapa Bokone (Northern Cape PHRA) prior to mining activities starting;
- Feature 4 is located outside of the impact area and should be demarcated and avoided during mining activities;
- Implementation of a Chance Find Procedure for the project (as outlined under Section 10.2);
- Monitoring of the project by the ECO.

Interim Comment

The SAHRA Archaeology, Palaeontology and Meteorites (APM) Unit requests that a desktop PIA be conducted for the proposed development as the footprint is located in an area of unknown sensitivity for palaeontological resources as per the SAHRIS PalaeoSensitivity map.

The applicant is advised to extend the EA process in terms of section 19(1)b of the NEMA EIA Regulations in order to comply with this comment.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

OPENING

Ms. Fouche from Greenmined Environmental (Pty) Ltd welcomed the attendees and thanked Mr. Magerman for attending the meeting. The attendees introduced themselves, upon which Ms. Fouche presented the meeting agenda (refer to attached meeting presentation).

It was agreed that all the attendees were comfortable to continue in English; the meeting was also recorded for minuting purposes only.

PROJECT DESCRIPTION

Ms. Fouche presented the application information, and project description to the meeting (refer to attached presentation) upon which a commenting period was allowed to discuss the project.

RESPONSE TO PRESENTATION / PROJECT

Mr. Magerman noted two points of interest:

1. An official letter must be signed with the council as the earmarked property is council land and rent is usually charged for the surface rights.

Ms. Fouche enquired who the correct contact person would be to contact in this regard as Mr. Raymond (Community Leader) as well as Mr. Warren Britz (Ward Councilor) were already informed of the project. It was decided that the agreement letter will be forwarded to the municipal manager (Mr. Magerman as acting municipal manager) who will then present it to the council for their consideration. Mr. Mdingi will visit Springbok in two weeks' time and will continue the land use agreement discussions with Mr. Magerman and the council.

2. A SPLUMA application will be applicable to this application in addition to the other authorizations to be approved by the DMRE. It was mentioned that as the area has been mined previously it may assist the outcome of the application. Mr. Magerman advised that he also deals with the town planning applications as he is acting municipal manager.

Ms. Fouche confirmed that a town planner was already contacted in this regard and enquired whether a full application will be needed, or if a temporary departure would be considered as the mining permit application will only have a lifespan of maximum five years. Mr. Magerman said that a final decision on the type of application will be taken once the town planner contacts the municipality. It was agreed that the land use application process will commence as soon as possible (with Mr. Magerman being the initial contact) to prevent a situation where the land use application keeps the activity from continuing once the mining permit was received.

In addition to the above, Mr. Magerman noted that the municipality supports development in the area if all the required processes are followed.

WAY FORWARD

Ms. Fouche presented the way forward regarding the Basic Assessment Process (refer to attached presentation).

It was agreed that Mr. Mdingi will be in contact with Mr. Magerman and the council regarding the land use agreement, and Ms. Fouche will speak to the Applicant regarding the SPLUMA application that needs to be submitted as soon as possible.

Ms. Fouche thanked everyone for their attendance and the meeting was adjourned.

Dear Sir/Madam

RE: NAMLI EXPLORATION AND MINING (PTY) LTD MINING PERMIT APPLICATION OVER THE FARM STEINKOPF NO 22, NAMA KHOI MUNICIPAL AREA, NORTHERN CAPE PROVINCE – NC 30/5/1/3/2/10950 MP

Herewith we would like to inform you that during the commenting period on the draft Basic Assessment Report of the abovementioned project, the South African Heritage Resources Agency requested that the palaeontological sensitivity of the area be confirmed by means of a desktop Palaeontological Impact Assessment.

Subsequently Prof Bamford , a palaeobotanist, in association with Beyond Heritage (Pty) Ltd compiled the study and concluded that: *“The proposed site lies on the non-fossiliferous volcanic rocks of the Vuurdoed Subsuite (Vioolsdrift Suite) and the Orange River Suite (Richtersveld Subprovince). These granites and reworked volcanoclastic sediments were emplaced about 2 000 to 1 900 million years ago so are the wrong type and too old to preserve any fossils. No fossils have been recorded from this area and the closest riverine alluvium with transported rocks occurs on the north side of the Orange River or far south. Since the impact will be extremely low, as far as the palaeontology is concerned, the project should be authorised, and mining permit granted.”* A copy of the said study is attached hereto for ease of reference.

The palaeontological findings were then incorporated into the projects Heritage Impact Assessment Report of which a copy is available on the Greenmined website at <https://www.greenmined.com/mining-permits/> under the *Namli Exploration and Mining (Pty) Ltd* heading. The final Heritage Impact Assessment will also form part of the Final Basic Assessment Report to be submitted to the Department of Mineral Resources and Energy by 15 July 2022 for their perusal and decision making.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Dear Sir/Madam

RE: NAMLI EXPLORATION AND MINING (PTY) LTD MINING PERMIT APPLICATION OVER THE FARM STEINKOPF NO 22, NAMA KHOI MUNICIPAL AREA, NORTHERN CAPE PROVINCE – NC 30/5/1/3/2/10950 MP

Herewith we would like to inform you that during the commenting period on the draft Basic Assessment Report of the abovementioned project, the South African Heritage Resources Agency requested that the palaeontological sensitivity of the area be confirmed by means of a desktop Palaeontological Impact Assessment.

Subsequently Prof Bamford , a palaeobotanist, in association with Beyond Heritage (Pty) Ltd compiled the study and concluded that: *“The proposed site lies on the non-fossiliferous volcanic rocks of the Vuurdoed Subsuite (Vioolsdrift Suite) and the Orange River Suite (Richtersveld Subprovince). These granites and reworked volcanoclastic sediments were emplaced about 2 000 to 1 900 million years ago so are the wrong type and too old to preserve any fossils. No fossils have been recorded from this area and the closest riverine alluvium with transported rocks occurs on the north side of the Orange River or far south. Since the impact will be extremely low, as far as the palaeontology is concerned, the project should be authorised, and mining permit granted.”* A copy of the said study is attached hereto for ease of reference.

The palaeontological findings were then incorporated into the projects Heritage Impact Assessment Report of which a copy is available on the Greenmined website at <https://www.greenmined.com/mining-permits/> under the *Namli Exploration and Mining (Pty) Ltd* heading. The final Heritage Impact Assessment will also form part of the Final Basic Assessment Report to be submitted to the Department of Mineral Resources and Energy by 15 July 2022 for their perusal and decision making.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards/Vriendelike Groete
