Vaal Oewer Ratepayers Association	6/04/2018 – 11/05/2018	<u>Gavin Aboud:</u> There is already a screening plant onsite, and not in the current mining plan. Hence your current application. This is extremely presumptuous, and you are requested to remove said equipment until this process is completed.	Screening Plant: Quintin van der Merwe (QM) explained during the Meeting held on the 21 st of April why the screen plant was there, QM states that as Dr. Stephen Jacobz (SJ) mentioned, we are all business men and woman here. Therefore, the screen plant being there was a business decision. QM states that the screen plant came from a project called Aggenys, the screen plant was placed at this mine and will sit there until the amendment has been approved. QM states that as the safety officer, he stopped any use of the screening plant in order to remain compliant and prevent DMR from closing them down or receiving any fines. QM states that he followed the EMP and said that no screening may take place at that point.

		<p>Tertius Wehmeyer and Renee Hartsliel: Please be so kind as to provide the other documentation Tertius requested. I am particularly interested in the consultation and public participation documentation:</p> <p>Please be so kind to forward:</p> <ol style="list-style-type: none"> 1. The number of the mining permit or mining right for this mine. 2. A copy of mining permit / right 3. A copy of the Section 10 Notice for this mine sent out by your office. 4. Copies of public documents such as the EIA, EMP, EMPR, Proof of Consultation and Public Participation, Scoping Report and Heritage Impact Assessment. <p>If they, SPH, have been contracted by any other mine to provide services for them, please provide detail requested above for that mine as well as the registered mine name and mine owner.</p> <p>On 29 November 2014, I registered myself, the FS Private Nature Reserve Savannah, and the Wild Water Conservancy as IAPs with the consultant Monty van Eeden of Dorean in the Tja Naledi mine application. Due to the comprehensive rehabilitation plan, distance from the Vaal River, and small scale of the operation, as contained in the BID document we received, we did not object at that time to the mining.</p> <p>However, it appears that the rehabilitation did not take place as promised. Further, the scale is proposed to be greatly increased and the highly-stressed Vaal River is being encroached upon. I question the efficacy of your dust mitigation proposal, your statements about noise pollution and whether due diligence has been paid to the road and bridge capacities for transport trucks. Also, has a proper public participation process been followed regarding the rezoning of the land? It would be helpful to receive answers to these questions in advance of any meeting with the Protect Vaal Eden committee or the public.</p> <p>Finally, please note that the registered IAP's mentioned above were NEVER contacted regarding the new application and I hereby object in the strongest terms to any new application, on those grounds alone.</p>	<p>Document Request: The FBAR documentation was supplied to the committee on 11 April that included all the requested documentation.</p> <p>Registration: Please refer to Appendix A, Tertius Wehmeyer Email that also answers all the questions Tertius Wehmeyer brought up on 17 April. This has also been discussed telephonically on the 20th of April 2018 Please note that your registration was not listed in the current approved EMP for Tja Naledi, therefore you have not been consulted during the Section 102 Amendment. There was no proof of correspondence with you in the current mining right application. It seems that you have not been registered during the 2014 mining right. After the meeting held on the 21st of April, Yolandie Coetzee, the EAP for Greenmined Environmental consulted with Dorean Environmental. Monty from Dorean confirmed that Renee was never registered as she did not respond to the Tja Naledi project. Monty and Renee Hartsliel had telephonic conversations regarding the Tja Naledi Project. She did however respond to the Sweet Sensations project and registered word that Mining Right. The only comment that was made by Renee for Tja Naledi was to determine if trucks will drive past her property. Whereby Dorean replied that they will not. He asked her to put everything in writing and no response was received.</p> <p>Rehabilitation: This issue has also been addressed in the meeting presentation. This is not applicable to the Section 102 application.</p> <p>Dust: Dust monitoring will be conducted on a monthly basis together with wind roses. A dust management plan will be compiled for this project. A 10 000l water cart is on site to be used for dust suppression and a water canon is suppressing the stockpiles. SPH have appointed an occupation hygienist as per the OHS to conduct the gravimetric noise testing done. This has been addressed during the meeting.</p> <p>Noise: Noise monitoring station will be set up at Craig Richardson farm to measure the levels of noise from Tja Naledi. Personal dust and noise monitoring is being conducted, which forms part of the Mine Health and Safety Act. SPH have appointed an occupation hygienist as per the OHS to conduct the gravimetric noise testing done. This concern will be investigated further to minimise noise in the mining area.</p> <p>Road Integrity: Going forward, together with other sand mines in the area, which will be using the same road (Sweet Sensation and Pure Source Minerals), a strategy will be developed to assist in road repairs once the Section 102 mining right has been approved for Barrage Bulk Sand Mine. Roads Department is currently busy with an analysis of the road integrity and the sand mines. Once finalized a negotiated plan between BBSM, Pure Source Minerals, Sweet Sensations and the roads department will be discussed and a plan implemented.</p> <p>Bridge: The Roads Department informed SPH Kundalila that the Barrage Bridge was built to hold the capacity of the heaviest legal load on national roads, as the bridge is built over a national road. - 120 tons' maximum payload. Vaal-Eden Bridge loads will be investigated.</p> <p>Rezoning: Dr. S Jacobs is awaiting documentation from lawyers stating that no rezoning needs to be conducted.</p>

COMMENTS RECEIVED DURING CONSULTATION PUBLIC PARTICIPTION PHASE 2017-2019			
Interested and Affected Parties	Date Comments Received	Issues raised	EAPs response to issues as mandated by the applicant
List the name of persons consulted in this column, and Mark with an X where those who must be consulted were in fact consulted			
		<p>Gavin Aboud: At this point my only comment is that the public participation process was flawed, and that given the required amendments in terms of minerals to be mined and the amendment in the Mining Plan, the PPP must be redone.</p> <p>You are not meeting with the Vaaloewer Ratepayers Association, you are meeting with the Protect Vaal Eden Committee, and we represent the complete area around the mine, which incorporates three provinces, Gauteng, Free State, and North West.</p>	<p>The PPP that reference was made to was regarding the mining right. This is not applicable to the Section 102 amendment.</p> <p>Noted. As per DMR's request.</p>
		<p>Surrounding neighbours of the Vaal-Oewer where invited to the meeting.</p>	<p>In terms of Regulation 41(2)(b)(ii) of the Amendments to the Environmental Impact Assessment Regulations, 2014 the person conducting a public participation process must give notice to all potential interested and affected parties of an application or proposed application which is subjected to public participation by giving written notice, in any manners provided for in section 47D of the Act (NEMA), to <u>owners, persons in control of, and occupiers of land adjacent to the site where the activity is or is to be undertaken.</u></p> <p>Therefore, in terms of the regulations, we were not obliged to contact you, as your land is not adjacent to the site. However, you have been registered as and I&AP during this current PPP with the Vaal Oewer Association.</p>

	<p>Tertius Wehmeyer:</p> <p>At the outset I want to state that the public participation process conducted by yourself and your company Greenmined, is in my view not in line with the NEMA act, regulations and guidelines and I will set out my reasons in the email below. Just ask yourself this question: "Why would an international Environmental Consultancy like SLR Consulting (https://slrconsulting.com/za/ & https://slrconsulting.com/za/slr-documents/goosebay-sand-gravel-and-diamond-project-1-1-1) have a list of over 800 I&APs excluding government departments and Greenmined, a small local environmental consultancy with a website under construction (http://www.greenmined.com/index.php), have an I&AP list of only 10 people (excluding government departments) which includes at least 2 owners of Tja Naledi Beafase Holdings, the applicant, and also owners / employees of the two other sand mines, for the public participation process of two neighbouring sand mines with a very similar profile?"</p> <p>Was that because SLR followed the latest (2017) DEA Public Participation Guideline which encourages the public participation process to be as inclusive as possible (https://www.environment.gov.za/sites/default/files/docs/publicparticipationguideline_intermsofnemaEIAregulations.pdf) and possibly followed the Funnel Approach as outlined in this paper at http://www.thegreenconnection.org.za/dmdocuments/Public_Participation_in_EIAs.pdf by Liz McDaid (Green Connections) and Lynette Kruger (Environmental Evaluation Unit, UCT)? In contrast, it seems to me as if Greenmined spoke to as few members of the public as possible and then also to only people who welcomed the changes to TNB's mining right. But of course, size does not always matter and possibly Greenmined and not SLR followed the correct approach. However, it is my contention that SLR's approach is more correct, although not flawless in our experience. I give my reasons below.</p> <p>Firstly, for those who are not aware of what Regulation 41 of the NEMA act is about, it regulates the Public Participation process with regards to interested and affected parties. In subsection (2) of regulation 41 it states that "The person conducting a public participation process <u>must</u> take into account <i>any relevant guidelines applicable to public participation as contemplated in section 24J</i> of the Act and <u>must</u> give notice to <u>all potential interested and affected parties</u> of an application or proposed application which is subjected to public participation by ..." and then list 5 main categories of methods of giving notice summarised below:</p> <ul style="list-style-type: none"> - Regulation 41 (2) (a) - fixing a notice board in a place accessible and conspicuous to the public at mining site. (Not shown in FBAR document) - Regulation 41 (2) (b) - written notices to at least 6 categories of individuals / organisations (FBAR only alludes to written notices to residents / owners of farm on the mining site itself and some adjacent farms, examples of written notices are not provided) - Regulation 41 (2) (c) - placing an advertisement in a local newspaper or an official gazette published specifically to provide public notice of applications or other submissions made in terms of these regulations (the FBAR document Appendix E lists Parys Gazette of 7 September 2017 but does not provide a copy of the advertisement) - Regulation 41 (2) (d) - placing an advertisement in at least one provincial newspaper or national newspaper, if the activity has or may have an impact that extends beyond the boundaries of the metropolitan or district municipality in which it is (PLEASE NOTE that due to the fact that the mine lies in a tripoint area where THREE provinces (Free State, Gauteng & North-West) meet and the fact that the mining activity may impact on these areas, this subsection IS relevant) - Regulation 41 (2) (e) - using reasonable alternative methods, as agreed to by the CA, in those instances where a person is desirous of but unable to participate in the process due to illiteracy, disability or any other disadvantage (there is an informal settlement next to Vaaloewer which may fall in this category). <p>Furthermore, the definitions of "interested and affected party" and the "public participation process" are also critical in interpreting the NEMA act, regulations and guidelines. In the NEMA act, these concepts are defined as follows:</p> <p>"interested and affected party", for the purposes of Chapter 5 and in relation to the assessment of the environmental impact of a listed activity or related activity, means an interested and affected party contemplated in section 24(4)(a)(v), and which includes-</p> <ul style="list-style-type: none"> (a) any person, group of persons or organisation <u>interested in or affected by</u> such operation or activity; and (b) <u>any organ of state</u> that may have jurisdiction over any aspect of the operation or activity; <p>"public participation process", in relation to the assessment of the environmental impact of any application for an environmental authorisation, means a process by which potential interested and affected parties are given opportunity to comment on, or raise issues relevant to, the application</p> <p>Section 24 deals with Environmental Authorisation. Section 24(4)(a)(v) mentioned in the definition of "interested and affected parties" above, reads as follows:</p> <p>"Section 24 (4) Procedures for the investigation, assessment and communication of the potential consequences or impacts of activities on the environment –</p> <ul style="list-style-type: none"> (a) must ensure, with respect to every application for an environmental authorisation— (v) public information and participation procedures which provide <u>all interested and affected parties</u>, including <u>all organs of state in all spheres of government that may have jurisdiction over any aspect of the activity</u>, with a <u>reasonable opportunity to participate</u> in those information and participation procedures; and <p>Yolandie, in your reply to Allister Cousins from Pont de Val, you stated (text in blue and "" below) that you were not obliged to contact him through a written notice.</p> <p>"In terms of Regulation 41(2)(b)(ii) of the Amendments to the Environmental Impact Assessment Regulations, 2014 the person conducting a public participation process must give notice to all potential interested and affected parties of an application or proposed application which is subjected to public participation by giving written notice, in any manners provided for in section 47D of the Act (NEMA), to <u>owners, persons in control of, and occupiers of land adjacent to the site where the activity is or is to be undertaken.</u></p> <p>Therefore, in terms of the regulations, we were not obliged to contact you, as your land is not adjacent to the site. However, you have been registered as and I&AP during this current PPP with the Vaal Oewer Association."</p> <p>Although your statement is correct in a minimalist approach to the NEMA act and regulations with regards to a WRITTEN notice to Pont de Val residents / owners, as Pont de Val on farm Erina is not a neighbouring property, this is only 1 of all the methods of notification listed in Regulation 41! Also, written notices had to be issued to other neighbouring properties to Woodlands 407 (like Vaaloewer and other neighbouring farms across the Vaal River adjacent to Woodlands 407, Mr Abrie Hanekom of farm De Fontaine 189 (between De Pont and Woodlands 407)) AS WELL AS any organisation of ratepayers (see Regulation 41(2) (b) (iii)) that represent the community in the area. This was clearly not done.</p> <p>If Greenmined used the 2017 DEA "PUBLIC PARTICIPATION GUIDELINE IN TERMS OF NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS" as CLEARLY instructed in the introductory part of Section 41 (2), then you would have been familiar with Section 6 of the Guideline</p> <p style="text-align: center;">quoted below:</p> <p style="text-align: center;">"6. GUIDANCE ON THE LEVEL OF PUBLIC PARTICIPATION</p> <p>The <u>minimum requirements for public participation outlined in the EIA Regulations</u> will not necessarily be sufficient for all applications. This is because the circumstances of each application are different, and it may be necessary in some situations to incorporate extra steps in the PPP. The table below provides guidance for deciding on the required level of PP."</p> <p>Table 1 list 3 main categories with 16 different situations that might be applicable in an area with regards to an Environmental Authorisation. In my view, only 2 of the situations are not applicable to our area and your current environmental authorisation process. So that indicates to me that the public participation process should be as wide and as inclusive as possible. The public participation process outlined in the FBAR document supplied, fails dismally in this respect. Noticeable omissions were known I&APs such as Mr Abrie Hanekom on a neighbouring farm, who you alleged to have contacted but who cannot recall any such contact and you do not provide proof of it. I Renee de Jong Hartslielief owner of farm Savannah and co-chair of Friends of the Vredefort Dome was also a registered I&AP for the application for a mining right of Tja Naledi Beafase who should have been contacted. Others are the residents of Vaal Eden (those not contacted), Vaaloewer and Lindequesdrift as well as government structures in North-West province, Tlokwe LM, Gauteng province and Emfuleni LM as these mines falls close to the border of 3 provinces.</p> <p>Lastly, please respond to the following:</p> <ol style="list-style-type: none"> 1. Provide copies or photographs of all notices (e.g. notice boards, newspaper adverts, letters to I&APs etc) that were used in the public participation process for the Basic Assessment Report required for TNBH Section 102 application. In the FBAR document, it is stated (see screenshot below) that these documents are contained in Appendix A which only contains maps! If you have copies, also copies of all section 10 notices 	<p>Please refer to Error! Reference source not found. for the letter to address the comments made by Tertius Wehmeyer.</p> <p>Diamond mining is no longer applicable as described above.</p>

Mark with an X where those who must be consulted were in fact consulted			
		<p>1. Why do the mining applicants not apply for rezoning first? The Vaal Eden Road S171 is in our IDP / SDF as a scenic route and Gauteng gateway to the Vredefort Dome World Heritage Site. Sand and gravel mining is supposed to take place near Sasolburg, along the R59...</p> <p>2. Why do the water use applications seem to also lag behind? The critically-stressed Vaal River and its water table is the lifeline of Parys and VDWHS.</p> <p>3. Why is rehabilitation of prior mining activity seemingly not taken into account before a new permit is issued?</p> <p>4. Why do the applicants change their company names?</p>	<p>1. Why do the mining applicants not apply for rezoning first? The Vaal Eden Road S171 is in our IDP / SDF as a scenic route and Gauteng gateway to the Vredefort Dome World Heritage Site. Sand and gravel mining is supposed to take place near Sasolburg, along the R59... This is a process that is follow by the local municipality's guidelines and spatial planning. During PPP the municipality will inform the applicant that rezoning needs to be conducted. This is an historical mine. So the IDP needs to accommodate historic mines.</p> <p>2. Why do the water use applications seem to also lag behind? The critically-stressed Vaal River and its water table is the lifeline of Parys and VDWHS. We cannot answer for any delays in the Departments.</p> <p>3. Why is rehabilitation of prior mining activity seemingly not taken into account before a new permit is issued? We cannot answer for any other mining companies. This is not applicable to the Section 102 amendment.</p> <p>4. Why do the applicants change their company names? This is not applicable to the Section 102 amendment.</p>
		<p>Reference is made to the BID. Page 4 Heading Noise refers. Here you cover the issue regarding blasting, yet in the meeting you said there would be nothing.</p>	<p>Blasting: The BID (Background Information Document, the reference to the document that was made) was compiled to cover all the basis for the project. During the Basic Assessment that was conducted for the site numerous sample holes were dug and no rock beds were encountered. Therefore, no blasting will take place at Tja Naledi. There will be no explosives magazine on site. This is also the reason that no reference is made to blasting in the Basic Assessment Report.</p>

	<p>Allow me to subjoin hereunder preliminary comments prior to the proposed public participation process pursuant to our meeting on Saturday.</p> <p>Land Use</p> <p>I have transmitted a document on Saturday to the above e-mail address. I received a notification that it miscarried. It is the legal opinion we obtained regarding the legal requirements for the rezoning of agricultural land within the Free State Province to mining land. Kindly confirm whether you have received it. I nonetheless attach it hereto.</p> <p>Sense of Place</p> <p>During our discussion on Saturday, I referred to sense of place and the legal precedent which was established in DIRECTOR: MINERAL DEVELOPMENT, GAUTENG REGION, AND ANOTHER v SAVE THE VAAL ENVIRONMENT AND OTHERS 1999 (2) SA 709 (SCA). I attach a summary of the judgment hereto as well as the guideline document on "Sense of Place". I am of the considered opinion that it has particular relevance to the current application under consideration.</p> <p>Biodiversity Priority Area</p> <p>May I furthermore kindly request whether the mining area falls within a 1:100-year flood line or within 500 meters of a water course (that is the delineated wetland area) or within a FEPA and a 1 km buffer around the FEPA, critical biodiversity area (or equivalent areas) from the provincial spatial biodiversity plans or critically endangered and endangered ecosystems in terms of the Mining and Biodiversity Guideline? I infer from the SANBI Map that it falls within a River FEPA & associated sub-quaternary catchment.</p> <p>If my inference is correct the mining application is within a highest biodiversity importance area with the highest risk for mining. The likelihood of a fatal flaw for mining is very high because of the significance of the biodiversity features in this area and the associated ecosystem services.</p> <p>This mining application under consideration therefore resolves around the issue of mining in a sensitive area. This must be dealt in accordance with the <u>Mining Biodiversity Guidelines</u> and must be utilised in the evaluation of the <u>Best Practicable Environmental Option (BPEO)</u>.</p> <p>The balancing of the negative environmental impacts versus the alleged short term social benefits and the economic advantages can only be assessed if the loss to the environment is evaluated. This appraisal ought to be conducted with the guidance of <i>inter alia</i> the Mining Biodiversity Guideline and the taking into consideration of the opportunity costs.</p> <p>According to the Mining and Biodiversity Guideline the importance of the biodiversity features in these areas and the associated ecosystem services is sufficiently high to prohibit mining in these areas. Given the very high biodiversity importance, the Guideline states that an EIA conducted in respect of such an area should include the strategic assessment of optimum, sustainable land-use for a particular area which should determine the significance of the impact on biodiversity. The EIA must take into account the environmental sensitivity of the area, the overall environmental and socio-economic costs and benefits of mining as well as the potential strategic importance of the minerals to the country.</p> <p>The Guideline states that the EIA "<i>needs to identify whether mining is the optimal land use, whether it is in the national interest for that deposit to be mined in that area and whether the significance of unavoidable impacts on biodiversity are justified. It is important that a risk averse and cautious approach is adopted. This implies strongly avoiding these biodiversity priority areas, given the importance of the receiving environment and the probability that the proposed activity would have significant negative impacts</i>".</p> <p>When considering mining within these biodiversity priority areas, the Guideline prescribes a set of filters that should be sequentially applied and "<i>mining should only be considered if:</i></p> <ol style="list-style-type: none"> <i>It can be clearly shown that the biodiversity priority area coincides with mineral or petroleum reserves that are strategically in the national interest to exploit.</i> <i>There are no alternative deposits or reserves that could be exploited in areas that are not biodiversity priority areas or less environmentally sensitive areas.</i> <i>It can be demonstrated that they are spatial options in the landscape that could provide substitute areas of the same habitat conservation, to ensure that biodiversity targets would be met.</i> <i>A full economic evaluation of mining compared with other reasonable/feasible alternative land uses, undertaken as a necessary component of the EIA, shows that mining would be the optimum sustainable land use in the proposed area.</i> <i>A detailed assessment and evaluation of the potential direct, indirect and cumulative impacts of mining on biodiversity and ecosystem services shows that there would be no irreplaceable loss or irreversible deterioration, and that minimising, rehabilitating, and offsetting or fully compensating for probable residual impacts would be feasible and assured, taking into account associated risks and time lags.</i> <i>A risk averse and cautious approach, taking into account the limits of current knowledge about the consequences of decisions and actions, can be demonstrated both in the assessment and evaluation of environmental impacts, and in the design of proposed mitigation and management measures."</i> <p>The Guideline states further that "<i>the above filters should form the basis for deciding on whether or not, and how and where, to permit mining. This means that based on the significance of the impact, some authorisations may well not be granted. If granted, authorisation may set limits on allowed activities and impacts, and may specify biodiversity offsets that would be written into licence agreements and/or authorisations.</i></p> <p>The original (2014) EIA/EMP ought to have been compiled so as to give effect to the Guideline and the decision maker should have considered the Guideline in deciding whether or not to grant environmental authorisation. Since we were not consulted during the 2014 process, I am unsure whether or not the Guidelines were considered by the decision maker.</p> <p>The fact is that sand is plentiful on South Africa, it is overproduced and the sensitive environment is neither of the aforesaid. It would not have been possible to make an informed decision if this information, dealing specifically with the matters raised in the Mining Biodiversity Guideline, was lacking.</p> <p>This includes an assessment of the opportunity costs, e.g.:</p> <ul style="list-style-type: none"> o Understanding the value of the foregone opportunity; o The achievement of the desired aim/goal for the specific area; o Optimising of positive impacts; o Minimising of negative impacts; o Equitable distribution of impacts; and o The maintenance of ecological integrity and environmental quality. 	<p>Land Use:</p> <p>Received thank you.</p> <p>Sense of Place:</p> <p>Noted.</p> <p>Biodiversity Priority area:</p> <p>The mining area does not fall within the 1:100 year floodline, or is located within 500m from the watercourse. Therefore, this is not applicable. The mining area is located 900m from the watercourse.</p> <p>An Environmental Impact Assessment has been conducted for the Barrage Bulk Sand Mine.</p> <p>These guidelines were considered both during the 2014 and 2017 assessment.</p> <p>DMR is the decision maker.</p>

COMMENTS RECEIVED DURING CONSULTATION PUBLIC PARTICIPTION PHASE 2017-2019			
Interested and Affected Parties	Date Comments Received	Issues raised	EAPs response to issues as mandated by the applicant
<p>List the name of persons consulted in this column, and</p> <p>Mark with an X where those who must be consulted were in fact consulted</p>		<p>Applying the “opportunity cost” principle would change the question being asked, namely, by placing a positive duty upon the decision maker to consider if the development constituted the best use of the resources (i.e. the best practicable environmental option).</p> <p>The decision maker must make a decision based upon the following premise:</p> <p>a. If we, as a country, are to mine all minerals (and in the case under consideration, sand) in the ground, then there should be no regard for the environment since all of South Africa, as a resource rich country, will in any event be mined.</p> <p>b. If, however, not all minerals are to be mined and some will be left in the ground, then a decision on which areas to mine and the areas in which to leave the minerals in the ground, should be made.</p> <p>It is our submission that the first scenario is not sustainable and thus not an option. The second scenario is of direct application in this matter under consideration. The decision must reflect the guidelines in such a situation, as well as the lack of information before the decision maker in the documentation dealing with such a scenario.</p> <p>The decision will have to balance the above-mentioned factors at the hand of the EIA Regulations and other guidelines, including the Mining Biodiversity Guideline.</p> <p>The reasons for the decision maker’s decision will have to address these issues in detail in order to justify the decision.</p> <p>In order to ripen our judgement, may I kindly request an electronic copy of the 2014 EIA/EMP and the environmental authorisation?</p> <p>Water Use Licence And finally, during our meeting on Saturday it was stated that an application for a Water Use License (WUL) was submitted in 2017. I recollect that it was also stated during the meeting that the water uses in terms of section 21 of the National Water Act (36 of 1998) (NWA) will not be triggered by the mine’s activities. If my recollection is correct, it begs the question why the Application considered it necessary to apply for a WUL?</p>	<p>Noted and send.</p> <p>Water Use Licence: An application has been made to DWS that was approved on 24/07/2018. GA was approved for taking water from the borehole for industrial purposes of 33 065 m³/a</p>
Sampie van Rooyen	20/09/2017 – Registration as I&AP5 22/11/2017	<ul style="list-style-type: none"> ■ The condition of the tar road leading to Vaal Eden is considered to be heavily degraded, on account of potholes. This road however is used by both the mine, as well as the local farming community. This specific tar road is not constructed to handle the current traffic volumes, consisting mainly of heavy vehicles. Prior to upgrading of the mine, the local farming community requests the mine to upgrade the road to such a state that it will be able to handle the traffic volumes, especially heavy vehicle quantities. Speeding limits and speed bumps should form part of this upgrade, as several farmers own land on both sides of the tar road. Road crossing for both farmers and their livestock occurs daily. Thus, the safety of the farmers and their livestock needs to be assured by the mine. ■ The local farmers request the mine to incorporate dust and noise suppression methods at all times, as heavy dust and noise volumes negatively affect the livelihoods of the surrounding landowners. ■ Safety of the local farming community is regarded as high priority and needs to be addressed by the mine. With the large volume of workers employed by the mine, the farmer community’s safety of their families and livestock are compromised. Thus, the farming community requests that a regulated system be implemented at the entrance of the Vaal Eden road, which will regulate and inspect all peoples and equipment entering and exiting this specific road. ■ Since Greenmined Environmental did not receive any comments from the Interested and affected parties, we suggest that the public participation process was not adequate and request that a stakeholders’ engagement session should be held, informing all of the I&AP’s about the project. The local farming community will assist in locating a venue, as well as a specific date for this meeting. 	<p>Please refer to comment above regarding roads.</p> <p>Please refer to comment above regarding dust and noise. The mine will employ no external workers.</p> <p>Meeting with the Vaaloewer Ratepayers Association</p>
Joy Rabotapi (BEE Partner of Tja Naledi Beafase Investment)	24/10/2017	The only concern is that the DBAR states that the Groundwater is deeper than 5m, and Excavations can be as deep as 10m in some areas. Will there be mitigation measure.	Groundwater will be managed and mitigated as described in Part A – 3(h) iii), (j) and Part A – 3(h) iii) Part B – 1(e)
Mariette Lieferick	20/09/2018	<p>In order to ripen our judgment, we kindly request:</p> <ol style="list-style-type: none"> 1. Whether a full economic evaluation of the mining of sand and gravel compared with other reasonable/feasible alternative land uses, was undertaken showing that the mining of sand, gravel, etc. would be the optimum sustainable land use in the proposed area. 2. Whether the mining is the Best Practical Environmental Option in terms of the NEMA’s principles and that there are no alternative deposits or reserves of sand and gravel that could be exploited in areas that less sensitive. 3. An assessment of the opportunity costs, e.g. <ol style="list-style-type: none"> a. Understanding the value of the foregone opportunities; b. The achievement of the desired aim/goal for the specific area; c. Optimising of positive impacts; d. Minimising of negative impacts; e. Equitable distribution of impacts; and f. The maintenance of ecological integrity and environmental quality 4. Whether a cost/benefit analysis has been undertaken, which ought to take into account the loss to the environment, the impact on sense of place, the impacts upon eco-tourism and tourism and an evaluation of the financial costs of these impacts. 5. A detailed assessment and evaluation of the potential direct, indirect and cumulative impacts of sand mining in this area since this application is one of many. 6. Whether mining in this area is the optimal land use and whether the significance of unavoidable impacts on biodiversity and current land use and sense of place are justified. <p>We reserve our right to submit comprehensive comments on this application.</p>	<ol style="list-style-type: none"> 1. Comparative land use assessment included into Appendix I2 and in Part A – 3(h) iiv), (j) and Part A – 3(h) iii) Part B – 1(e) 2. The area is not classified as sensitive according to the Mining and Biodiversity Guidelines by SANBI. Please refer to Part A – 3(h) (vi), Part B – 1(e) 3. This assessment was included as part of the Environmental Impact Assessment. Part A – 3(h) (v). 4. Please refer to Part A – 3(v) and Appendix F for the impact assessment and cumulative impact assessment that was completed for this report. 5. The area is not classified as sensitive according to the Mining and Biodiversity Guidelines by SANBI. Please refer to Part A – 3(h) (vi), Part B – 1(e)

Carl Scholtz	25/09/2018 27/09/2018	<p>Please send the aerial map of where the site is located. Please note my objection and concerns below as a I&AP.</p> <p>Objection I object to any mining activity that is planned in an area of high eco-tourism and located in close proximity to a UNESCO World Heritage Site and a National water resource namely the Vaal River. Furthermore, to my knowledge sand, gravel and alluvial diamonds are not classified as strategic important minerals. It therefore begs the question whether the significant impacts on the natural environment, tourism, eco-tourism, and heritage are justified? As a resident In Vaaloewer the proposed mining activity will have a major visual impact and a disturbance of the sense of place within this serene area. Noise and dust pollution will be another impact which is in general challenge to manage for any surface mining operation. I further object in that this activity will negatively impact on the value of my property and the other properties in Vaaloewer and surrounding areas.</p> <p>Concerns Notwithstanding the above mentioned objection, I also have serious concerns in how the consultant and through its specialist studies will assess and evaluate the potential direct, indirect, cumulative impacts and opportunity costs of this application on the natural environment, tourism and eco-tourism in the area and that how will the EMP guarantee the elimination and or minimising of these impacts. Furthermore the previous EAP appointed by the proponent could not reasonably defend nor motivate the response to the above objection and concerns- what will make Greenmined Environmental contribution any different?</p>	<p>Maps where send to I&AP.</p> <p><u>Vredefort Heritage site</u></p> <ul style="list-style-type: none"> As from the letter received from the Heritage consultant, the mining area is not located within the Vredefort Heritage Site, which is classified by UNESCO as a Heritage site, but not by SAHRA. <p><u>Socio-Economic Study</u></p> <ul style="list-style-type: none"> A socio –economic study was conducted to address any issues that the I&AP'S have regarding the proposed mining right amendment. Impacts on tourism was addresses in the SEIA and Economic Impact Assessment that was conducted. <p><u>Noise Pollution</u></p> <ul style="list-style-type: none"> The noise in the area will be kept to a minimum during operational hours. Noise suppressors have been place on the equipment to minimizes the noise in the area SPH and Dr. Stephen Jacobs went to Craig Richardson's farm after the meeting to investigate the noise concerns. SPH added noise muffler systems on all the reverse hooters of the mining equipment. a noise monitoring system will be added to Mr. Richardson's farm to conduct noise monitoring in the future if the noise continues on his farm. <p>Diamond mining is no longer applicable as described above.</p>
Susan E Malcolmess	27/09/2018	<p>No Objection. Would like to know the rehabilitation undertaking are going to be enforced. This mining application is for land in an agricultural area that has a fast growing tourism industry. It is also within the Vredefort Word Heritage Site. I do not believe that continues mining vehicles equal to the noise levels of tractors that are not used every day. The noise pollution will be far more.</p>	<p><u>Rehabilitation</u></p> <ul style="list-style-type: none"> Previously mined areas do not reflect on the Section 102 amendment currently undertaken by SPH Kundalila. The previous mined area was mined before Tja Naledi applied for their mining right. The rehabilitation for the current mine has not taken place, as the plan is to still mine the area, therefore the Section 102 application was brought to include the screening plant into the Mining Right area. Rehabilitation of the mining area will be conducted once mining is complete. The new mining right application (Section 102) is for the same property and same size as the current mining area. <p><u>Agricultural land</u></p> <ul style="list-style-type: none"> The proposed section 102 amendment area falls within an area that has been used for previous mining activities. <p><u>Vredefort Heritage site</u></p> <ul style="list-style-type: none"> As from the letter received from the Heritage consultant, the mining area is not located within the Vredefort Heritage Site, which is classified by UNESCO as an Heritage site, but not by SAHRA. <p><u>Noise Pollution</u></p> <ul style="list-style-type: none"> The noise in the area will be kept to a minimum during operational hours. Noise suppressors have been place on the equipment to minimizes the noise in the area SPH and Dr. Stephen Jacobs went to Craig Richardson's farm after the meeting to investigate the noise concerns. SPH added noise muffler systems on all the reverse hooters of the mining equipment. a noise monitoring system will be added to Mr. Richardson's farm to conduct noise monitoring in the future if the noise continues on his farm.

Martin Struwig	27/09/2018	<p>Yolandie,</p> <p>Please find this email as my info as an affected & concerned party to the application to include gravel and diamond mining. I reside on portion 80 Zeekoefontein on the river which is just opposite Woodlands farm portions and next to Vaaloewer (see some pic's for info). I have been living in Vaaloewer area since 1980 and selling property here since 1990. We are probable less than 1km from the mine as the crow flies and due to the landscape we can hear the movement of heavy equipment from the mine until very late at night and early morning hours (I do not see any working hours indicated on your documents).</p> <p>Vaaloewer including Goose Bay Canyon township and the Zeekoefontein farm portions represent a total market value of ±R456 679 000 representing well over 1000 properties on which owners are paying rates and taxes to Emfuleni Municipal Council. Large scale mining in the area will have a negative impact on property values, noise & air pollution, further future development and also impact on job creation in the area. These properties are used for permanent, retirement, leisure living and also investment purposes and owners purchase here to be in an unpolluted, non-industrial, tranquil peace and quiet area as most come from cities and want to be away of the hustle and bustle.</p> <p>The mining can also have an effect on the pollution of the river and Vaaloewer extract water from the river to purify for household consumption. Although you mention that the area is mainly a agricultural area and therefor there are noise factors such as tractors and farming equipment so this will not be a problem. The type of equipment including large tipper trucks, excavators, crushers or other diamond related machinery will make more noise than that of normal farming in the area.</p> <p>As this is now the first time that we become aware of your existing mining and further planned operations we have never been party to any public participation which we find very strange as with any google search you would be able to see the developments in our area which are in close proximity to mining area. We will attend the public meeting to be held in Parys on 27th October 2018.</p>	<p><u>Operational Hours.</u></p> <p>The nuisance value of noise generated by heavy earthmoving equipment for residence in the near vicinity is deemed to be of low – medium significance, as the mine is will only be operational during daylight hours, 6 days a week. The distance of residents from the mining area (>2km) will however assist in the mitigation of the noise impact. All mining vehicles will also be equipped with silencers and maintained in a road worthy condition in terms of the National Road Traffic Act, 1996 (Act No. 93 of 1996). The mine will not be operationl at night, so any noise in the area will not be from the BBSM operation.</p> <p>Please refer to statement above regarding <u>noise</u>.</p> <p>Greenmined Environmental cannot be held responsible for any previous PPP that was conducted. We were instructed by the DMR to consult with all parties around the mining area, the Vaal Oewer town, and Vaaloewer Settlement, therefore you were listed as an I&AP and where involved into this Public Participation Process.</p> <p>Diamond mining is no longer applicable as described above.</p>

Marianne Bilsland	9/10/2018	<p>"I, M Bilsland, owner of 11 Kingfisher Bend, Vaaloewer, object to the development of the Tja Naledi Beaface Investment Holding (Pty) Ltd Mining Project as detailed under reference DMR Reference Number FS30/5/1/1/2/10020MR.</p> <p>My property is situated on the Vaal River and was purchased solely for the peace and tranquillity that the area offered. This particular stretch of the river allows me to enjoy the quietness of country living and experience the abundant birdlife, fish and animal life of the habitat that is associated with the river. My property will be directly affected by the proposed mining operation with regard to, but not limited to, the following: (kindly note that Italic font has been used for information taken directly from the 'Background Information Document'</p> <p>Vague information</p> <p>It is my opinion that the 'Background Information Document' dtd 25/09/2018 is vague in numerous aspects. I am not able to comment or verify a portion of the document as it refers to legalese, acts and mining rights that, as a layman, I am not in a position to interpret or confirm. However, I draw attention to the following extracts from the document that are concerning:</p> <ul style="list-style-type: none"> • 'The farm Woodlands 407 is situated approximately 3.98 km southwest of Vaal Oewer, 22.26km north-east of Parys, 21.6km east of Sasolburg, Free State Province.' <ul style="list-style-type: none"> ○ Which reference point are these distances measured from? ○ The accompanying map with the 'Background Information Document' doesn't show the area of Vaaloewer in the enlarged section. It is therefore difficult to ascertain distances using the scaling information on the map. ○ The accompanying map with the 'Background Information Document' shows the area of Vaaloewer in the minimised section but makes no reference to the fact that it is an existing township. As I live here, I am able to recognise the small portion of Vaaloewer. However, anyone not familiar with area could overlook the fact that the township exists. →' • The proposed mining area is approximately 437.8330ha is extent and the applicant, Tja Naledi Beafase Investment Holdings (Pty) Ltd, intends to win material from the area for at least 10 years.' <ul style="list-style-type: none"> ○ It is unacceptable that only a minimum period is stated. • The mining area was identified to constitute the lowest possible visual impact on the surrounding environment.' <ul style="list-style-type: none"> ○ Who would have been qualified to make this identification? • The surrounding area has previously been disturbed by mining activities.' <ul style="list-style-type: none"> ○ It is my understanding that a large portion of this referenced 'mining activity' is illegal and under investigation. • 'All disturbed or exposed areas will be re-vegetated as soon as possible during mining to prevent any dust source from being created.' <ul style="list-style-type: none"> ○ The phrase 'as soon as possible' is vague and unenforceable. • → 'Regional Manager'. <ul style="list-style-type: none"> ○ Who would this person be? ○ Would he be a government employee? ○ Would I, as an affected person, be able to freely contact him/her? ○ Would I be guaranteed of a response and action, should the mining company be in contravention? <p>Dust:</p> <ul style="list-style-type: none"> • 'Speed on the access road will be limited to 30 km/h to prevent the generation of excess dust.' Roads will be sprayed with water or an environmentally friendly dust-allaying agent that contains no PCB's (e.g. DAS products) if dust is generated above acceptable limits. <ul style="list-style-type: none"> ○ Who will be responsible for determining acceptable limits of dust? ○ The very nature of the mining proposed will incur dust, yet no mention is made in the report of how this will be controlled and minimised. ○ It is well documented that current mining activities have caused dust problems. • Excavators, Loaders and Trucks will operate and idle continuously and the resultant pollution and smell of fuel fumes will have a negative impact on ambient air quality and in turn will affect me. <p>Noise</p> <p>As previously stated, my property was bought for the seclusion and quietness that Vaaloewer offered. The water sport activity on the river is controlled and infrequent and I was fully aware that there would be water activity on the river when my property was purchased. Traffic noise is less than minimal. At the time of purchasing my property, there was no sign of mining activity. The proposed mining activity will cause noise pollution through the presence of noise generating infrastructure and activities. Due to the non-urban configuration of the area, noise travels far distances and will not be contained in the area demarcated for mining. Proposed operating times have not been addressed.</p> <ul style="list-style-type: none"> • 'The project environment is located within an agricultural setting in which heavy equipment, e.g. tractors, already operate.' <ul style="list-style-type: none"> ○ The only heavy equipment noted and referenced is tractors, and this is by no means comparable to the noise that will be generated by mining equipment. ○ It is stated that the following equipment will be used for mining, which will incur noise: <ul style="list-style-type: none"> ○ Excavating equipment; ○ Earthmoving equipment; ○ Mobile crushing and screening plants; • The activities noted cannot be carried quietly and will incur unacceptable noise: • Excavating; • Crushing and Screening; • Stockpiling and transporting; <ul style="list-style-type: none"> ○ It will be ensured that employees and staff conduct themselves in an acceptable manner while on site. • Who and how would this be monitored and enforced? <ul style="list-style-type: none"> ○ 'The noise generated from (sic) the mining machinery will be similar to noise generated along the Vaal Eden road by public vehicles,' <ul style="list-style-type: none"> • This statement is untrue. The Vaal Eden road generates minimal public vehicles and the noise is therefore negligible and cannot be equated to the noise that will be generated due to mining activity. ○ '..... and by the adjacent sand mine (Pure Source Minerals Mining Co (Pty) Ltd. ' ○ It is my understanding that a large portion of referenced 'mining activity' is illegal and under investigation. The above statement is an unacceptable attempt to quantify an increase in noise. <p>Surface and Ground Water:</p> <ul style="list-style-type: none"> • 'The proposed activities are not expected to have a negative impact on any surface and ground water of the area.' <ul style="list-style-type: none"> ○ The above statement does not specifically preclude the sourcing of water from the Vaal River. Should water be sourced from the river, the resultant noise from the pumps will be an added noise disturbance. • 'The proposed activities are not expected to have a negative impact on any surface and ground water of the area.' <ul style="list-style-type: none"> ○ The above statement does not specifically preclude the sourcing of water from the Vaal River. Should water be sourced from the river, the resultant noise from the pumps will be an added noise factor. <p>Fauna</p> <ul style="list-style-type: none"> • 'Birds commonly associated with the area include Guinea fowl, plovers, pigeons swaisons's francolin amongst other common airborne species.' 	<p>Vague Information</p> <ul style="list-style-type: none"> • As per the BID that was submitted to all I&APs "Further information is available on Greenmined Environmental website at www.greenmined.com.. Please contact... and would like to receive a copy of the Basic Assessment Report (BAR)... An electronic copy of the report will be published on the Greenmined Environmental website (www.greenmined.com). • The locations are measured from the entre point of where the mining will be located. The map in the BID indicated the Regulation 2.2 map that is required as per legislation. As mentioned above, the Vaal Oewer is situated 3.98km, as the crow flies north of the proposed mining area. Please refer to all maps that was published on our Greenmined website. • A Mining Right is granted for a minimum of 10 years, where after it will be renewed. • The EAP as well as the appointment specialist are qualified to make this identification. • Not applicable to the Section 102 application. • "As soon as possible" indicated as soon as mining has completed in that sections where vegetation has been removed and mining has completed. • The Regional Manger refers to the DMR's regional manager that is appointed. Any I&AP may contact the RM during the process of mining. <p>Dust</p> <ul style="list-style-type: none"> • Dust limits are set by the SANS and NEM"AQA legislation and standards • Please refer to the DBAR for the management measures <p>Noise</p> <ul style="list-style-type: none"> • Please refer to previous comments regarding Noise and operational hours. • Noise levels will be kept within the legal limit. • Site management to ensure that staff and employees conduct themselves in acceptable manner <p>Surface and Groundwater:</p> <ul style="list-style-type: none"> • No water will be abstracted from the Vaal River, a GA has been granted for the abstraction from the borehole for Dust Suppression. <p>Fauna</p> <ul style="list-style-type: none"> • Fauna is able to move away from the mining activities. Will return after mining ceased. • Proof of induction, as indicated in the Environmental Awareness Plan the induction will be included. <p>Visual Exposure</p> <ul style="list-style-type: none"> • Please refer to statement above • Vaaloewer residents is located 3.98km north of the proposed site. The site is visually barricaded by eucalyptus trees. <p>Ablution, Waste water & Waste Disposal.</p> <ul style="list-style-type: none"> • Please refer to the DBAR document for mitigation and management measures • Parys landfill has been earmarked for the disposal of the various item. • General waste will be disposed of on a weekly basis. <p>Financial Implications</p>

COMMENTS RECEIVED DURING CONSULTATION PUBLIC PARTICIPTION PHASE 2017-2019			
Interested and Affected Parties	Date Comments Received	Issues raised	EAPs response to issues as mandated by the applicant
<p>List the name of persons consulted in this column, and</p> <p>Mark with an X where those who must be consulted were in fact consulted</p>		<ul style="list-style-type: none"> The birdlife along the river is prolific, the following names just a few of the birds species that are sighted and enjoyed, and there will be no guarantee that these birds will remain in the area: African Fish Eagle, Goliath Heron, Squacco Heron, Brown Hooded Kingfisher, Giant Kingfisher, Malachite Kingfisher, Pied Kingfisher, Western Osprey, African Spoonbill, Caspian Tern, Golden Tailed Woodpecker, Spotted Eagle Owl. 'Workers should be educated and managed to ensure that no fauna at the site is harmed.' The use of the word 'should' in the above statement gives no guarantee that workers will be educated. <p><u>Visual Exposure</u></p> <ul style="list-style-type: none"> 'The mining area was identified to constitute the lowest possible visual impact on the surrounding environment. The surrounding area has previously been disturbed by mining activities.' I again ask the question who qualified to identify the area for the '...lowest possible visual impact...' and I reiterate that it is my understanding that a large portion of referenced 'mining activity' is illegal and under investigation. 'The site will be visible from the Vaal Eden road.' The site will be highly visible to many Vaaloewer residents. Why was this fact omitted from the report? The applicant should however ensure that housekeeping is managed to standard, as this will mitigate the visual impacts during the operational phase of the mine. Again, the use of the word 'should' in the above statement gives no guarantee that housekeeping will be done. <p><u>Ablution, Waste Water & Waste Disposal</u></p> <ul style="list-style-type: none"> The information in the 'Background Information Document' under this heading gives no guarantee or time limit for the referenced actions to be done. Which 'facility' and 'land-fill site' has been earmarked for the disposal of the various items mentioned in the paragraph? 'General waste will be disposed at the authorised Parys or Vanderbijlpark Disposal facility.' The distances noted are '...22.26km north-east of Parys, 21.6km east of Sasolburg 22.26km...' How often will general waste be removed from site, considering the kms quoted above are not exactly in close proximity to the site. <p><u>Financial implications</u></p> <ul style="list-style-type: none"> The establishment of mining operations in such close proximity to my property will have a direct financial implication to me in that I will not be able to realise the true value of property should I decide to sell. This has been corroborated by several Estate Agents that service the area. <p><u>General:</u></p> <ul style="list-style-type: none"> I have objected to the mining rights that the neighbouring Goosebay Farm (Pty) Ltd have under application. In 2008, the owner of Goosebay Farm, under the auspices of Van Wyk Land Development Corporation (Pty) Ltd, marketed his property as an eco estate area. I find it incongruous that the land is now being mooted for mining as opposed to an eco estate. My question is what factors were used to market an eco-estate which are now being disregarded in favour of mining? I would like to draw your attention to the following: Section 1 of the MPRDA, in terms of which this application is administered gives effect to the definition of the environment as such is defined under NEMA and which is as follows: "environment" means the surroundings within which humans exist and that are made up of – <ul style="list-style-type: none"> (i) the land, water and atmosphere of the earth; (ii) micro-organisms, plant and animal life; (iii) any part or combination of (i) and (ii) and the interrelationships among and between them; and (iv) the physical, chemical, aesthetic and cultural properties and conditions of the foregoing that influence human health and wellbeing;" Section 2(h) of the MPRDA refers to the over-riding requirement for application to be consistent with Section 24 of the Constitution and which states: "Everyone has the right - (a) to an environment that is not harmful to their health or well-being; and (b) to have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that - (i) prevent pollution and ecological degradation; (ii) promote conservation; and (iii) secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development." In closing, I oppose the mining application in the strongest possible manner and, in addition, I am of the opinion that in terms of the MPRDA sections noted above, my rights are being violated. 	<ul style="list-style-type: none"> From the SEIA that was conducted the Property values are affected by numerous factors, and quantifying the impact posed by the amendment of an existing mine on surrounding property values do any degree of certainty is near impossible. To add to the challenge, there are another two mines in the area as well agricultural activities, both of which generate dust and noise. Should the activities associated with the proposed mining right amendment result in an increase in dust and noise, a negative effect on property values could occur but quantifying this is difficult. <p><u>General</u></p> <ul style="list-style-type: none"> This is not relevant to the Section 102 application.

Bob Hartsliel	15/10/2018	<p>Article forwarded from electronic source dated 19th November 2012.</p> <p>The obligation to rezone land and its impact on mining and prospecting rights in South Africa - 19TH NOVEMBER 2012</p> <p>The necessity to rezone land for mining or prospecting purposes has been confirmed by a series of recent judgements. If this obligation is ignored by holders of mining rights, mining permits or prospecting rights, it could have severe consequences for the holder, such as the forced legal closure of operations by municipal authorities or other affected persons, including local communities. Holders of rights or permits who have not applied for the rezoning should do so now, or where necessary, negotiate with landowners to rezone the land as a matter of extreme urgency, or face the consequences.</p> <p>In April 2012, the Constitutional Court (ConCourt) delivered judgement in Maccsand (Pty) Ltd v City of Cape Town and Others 2012 (7) BCLR 690 ("Maccsand Case"). Maccsand is the holder of a mining right and mining permit issued to it by the South African Department of Mineral Resources (DMR) in terms of the Mineral and Petroleum Resources Development Act (MPRDA). The land over which the mining right and mining permit was granted is zoned as public open space. The City of Cape Town informed Maccsand that it would not be permitted to exercise the mining right or mining permit unless the land was rezoned for mining purposes in terms of the Land Use Planning Ordinance 15 of 1985 (Cape) (LUPO).</p> <p>Maccsand and the DMR submitted that mining fell under the exclusive competence of the national sphere and that LUPO therefore does not apply as it only regulates a municipal functional area.</p> <p>LUPO applies in three provinces, the Western Cape, parts of the Eastern Cape and parts of the North-West. There are similar provincial laws in the other provinces including the Orange Free State's Townships Ordinance 9 of 1969 and the Transvaal Province's Town-Planning and Townships Ordinance 15 of 1986, applying in Gauteng, Limpopo and Mpumalanga (Ordinances).</p> <p>The Ordinances authorise the preparation of structure plans and zoning schemes or regulations. A zoning scheme or regulation is a legal document which records all land-use rights on properties in an area of jurisdiction. It includes regulations and restrictions on such rights and how they can be exercised. Under the different Ordinances, every municipality has its own zoning scheme or multiple zoning schemes, each setting different rules and regulations.</p> <p>The rules and regulations that would apply to each holder would depend on the location of mining or prospecting operations, the relevant Ordinance as well as the relevant zoning scheme or regulation applicable to that area of jurisdiction.</p> <p>Whereas mining is governed by the MPRDA, the land on which mining takes place is regulated by the various Ordinances. There is therefore an overlap of the two functions.</p> <p>In the Maccsand Case, the ConCourt found that because the powers allocated by the Constitution to the three spheres of government (national, provincial and municipal), in accordance with the functional vision of what was appropriate to each sphere, were not contained in airtight compartments, the exercise of powers by two spheres may on occasion result in an overlap.</p> <p>In the instance of the Maccsand Case the ConCourt found that the overlap of the MPRDA and LUPO does not constitute an impermissible intrusion by one sphere into the area of another. Where overlapping occurs, the Constitution obliges these spheres of government to cooperate with one another in mutual trust and good faith, and to co-ordinate actions taken with one another. The ConCourt held that mining cannot take place until the land in question is appropriately rezoned.</p> <p>The ConCourt further noted that there is nothing in the MPRDA which suggests that LUPO (and therefore any Ordinance) will cease to apply to land upon the granting of a right or permit, the mere granting of a right or permit therefore does not cancel out the applicability of an Ordinance.</p> <p>Section 23(6) of the MPRDA states that "A mining right is subject to this Act, any relevant law, the terms and conditions stated in the right..." and section 17(6) similarly stipulates that "A prospecting right is subject to this Act, any other relevant law and the terms and conditions stipulated in the right..." (Underlining our emphasis). The MPRDA does not define the phrase 'relevant law' and the ConCourt therefore contends that, consequently, it must be accorded its ordinary wide meaning. There is therefore no justification whatsoever for limiting it to laws regulating mining only.</p> <p>If land is intended to be used or is used for a purpose not permitted in terms of the zoning scheme or regulations, application must be made to the municipality for rezoning or for a use departure. If either is granted, the land must be used for the permitted purpose within a period of two years, failing which that rezoning lapses. It must be noted that the Ordinances generally authorise a landowner to apply for rezoning of land. However, land may also be rezoned at the instance of the provincial government or the municipality in whose jurisdiction it is located. This places a rights holder who is not also the landowner at a disadvantage.</p> <p>It is clear from the above that mining cannot take place until the land in question is appropriately rezoned. If consent for rezoning is refused it does not mean that the first decision is vetoed; but it does result in the mining right holder being unable to exercise its rights to mine. Such conflicts of authority would be required to be resolved through cooperation between the two organs of State, failing which the refusal may be challenged on review.</p> <p>The view that rezoning of land is required where the land in question is not zoned for mining purposes was further confirmed by the ConCourt in the Minister for Mineral Resources v Swartland Municipality and Others 2012 (Swartland Case). The ConCourt stated that a party who is granted a mining right or permit in terms of the MPRDA may start mining operations only if the zoning of the land in terms of LUPO (or another Ordinance) allows mining.</p> <p>Both the Maccsand and Swartland cases dealt only with mining rights. However, in a recent decision, the Western Cape High Court, on an application by the Berg River Municipality, granted an interdict against Bongani Minerals, preventing Bongani Minerals from prospecting for tungsten and molybdenum until the land has been rezoned for prospecting purposes. It must be noted that the prospecting activities of Bongani were not particularly intrusive (drilling) and had little impact on the land.</p> <p>The judgment has not yet been reported but it would now appear that rezoning will be required for both mining and prospecting purposes.</p> <p>Holders of rights or permits must bear in mind that the Maccsand and Swartland cases have given extra ammunition to landowners in their negotiations with mining companies, as the landowner is the principal person able to apply for the rezoning of any property. The right to rezone is not extended to the holder of a right or permit.</p> <p>The holder of a right or permit under the MPRDA may have commenced prospecting or mining operations and may in fact have been granted access to the land by the landowner, but, notwithstanding the grant and execution of a right or permit, until the area covered by the right or permit has been rezoned for mining or prospecting purposes in terms of the relevant land-use planning legislation, such mining or prospecting operations will in fact be carried out illegally.</p> <p>Local government has the legal right to force mining or prospecting operations to close down if the land is not correctly zoned. Ceasing mining or prospecting operations because of rezoning can have far reaching consequences on the right or permit holders as they will have to apply to the DMR for the suspension of mining or prospecting operations until such time as the land has been rezoned. If suspension is not applied for, the holders will not be mining or prospecting in accordance with their approved mining works programmes or prospecting work programmes, which could result in the DMR invoking the provisions of section 47 of the MPRDA and cancelling or terminating a right or permit by reason of non-compliance. The suspension of rights or permits may also have severe financial and/or contractual implications for the holders.</p> <p>Most resource companies believed, and still believe, that a right or permit granted in terms of the MPRDA is sufficient regulatory authority for the conduct of their operations and that rezoning is not required. This is clearly not the case. We strongly advise that the holders of rights or permits who have not applied for the rezoning do so, or where necessary commence negotiations with landowners, to rezone the land as a matter of extreme urgency.</p>	<p>Noted.</p> <p>Please refer to comment above regarding zoning.</p>

Gavin Aboud	15/10/2018	<p>Mining Rights and Land Use Compliance - Jun 28, 2017</p> <p>Important Issues to Consider Regarding Mining Rights and Land Use Compliance</p> <p>The issue of mining rights and land use compliance is briefly discussed below, giving you an indication how zoning restrictions could hamper the right to prospect or mine in South Africa. Anyone who wants to apply for mining rights in the country should study and ensure compliance with the Mineral and Petroleum Resources Development Act and all environmental management laws and regulations of South Africa.</p> <p>However, failure to take zoning restrictions into consideration will mean that the person or company, even if they are complying with the terms of the Mineral and Petroleum Resources Development Act, will not be able to exercise their mining rights. As such, land use compliance and mining rights must be considered together. If there is a zoning restriction on the particular piece of land which, for instance, only allows for agricultural or residential usage of the land, the applicant must first apply for the lifting or changing of the zoning to include mining and prospecting usages of the land. For this, the mineral rights permit holder has to get the required land use planning permission before any prospecting or mining operations can commence.</p> <p>Keep in mind that the right to mine on a particular piece of land does not override other laws of the country, not even local ordinances. As such, the mining rights are subject to compliance with other laws and ordinances. Therefore, it is essential to first apply for rezoning of the land where one wants to mine before commencing with mining operations. Because the land use and zoning requirements and limitations differ from province to province, it is important to review the legislation and restrictions of the specific province where the mining rights holder wants to mine. In this regard, the expertise of The Practice Group can come in handy. Our consultants work with zoning restrictions all the time and will be able to assist in the application for rezoning and the relevant approvals from the local authorities to ensure that the mining permit holder can commence with mining operations.</p> <p>That being said, one cannot only look at the current legislation in the province and the local authority zoning restrictions in place now, but must also consider what legislation was in place when the mineral mining rights permit was applied for and received by the permit holder. The legislation may have changed over time. If, for instance, the company applied for mining and mineral rights on a particular piece of land and was granted the right under land use legislation at the time of application, allowing for mining without first having to get provincial or local authority permission, then the company does not have to do so, even if the law has changed in the meantime, before the company started their mining operations on the particular piece of land.</p> <p>To avoid legal disputes and complications regarding mining rights and land use compliance, we recommend that prospective mining permit holders consider factors regarding zoning restrictions, such as:</p> <ul style="list-style-type: none"> • What is the town planning scheme regarding the particular piece of land? • If there is a town planning scheme regarding the land, does the zoning allow for mining on that land? • If there is no town planning scheme over the land, does the scheme exempt mining? • If there is no mining exemption, does the scheme make provision for mining? <p>• If it is not the case, is it possible to argue that the scheme is not legally binding?</p> <p>We highly recommend consulting an attorney specialising in mining and minerals rights and land use management, in addition to making use of our services to apply for authorisation to use the land for mining purposes if mining activities are restricted on the particular piece of land. Rather than waiting until the project must commence, do timely research regarding the particular property. It is possible to have us do a property due diligence to determine which land uses are allowed before you buy the specific property. With prospecting and mining operations being expensive, early application for rezoning will help minimise the risk of financial loss due to having to wait for rezoning approval.</p> <p>Get professional guidance from our team and attorneys to help avoid costly mistakes regarding mineral rights and land use compliance.</p>	Noted.
Dawn and Gerrit Scheepers	15/10/2019	We live in the area. This will drastically affect our health due to the dust which will affect our lungs. It will have a really negative effect on our birdlife and animal life as well as fish and creatures which live in the river. The water in the Vaal River will definitely be negatively affected which will further affect our health. Businesses in the area will be negatively affected which in turn will bring down the value of our properties. I therefore strenuously object to the mining in this area.	Please refer to comments above regarding dust and silicosis, fauna and water. Please refer to the Socio-Economic study of the area.
Chris Campbell	18/10/2019	Object Strongly. Concerns, Air pollution, Water Pollution, Noise Pollution, Proximity to Vaal river due to counties most significant water sources, Groundwater Pollution, Negative socio-economic impact.	Please refer to above comments regarding impacts mentioned.
Althea Campbell	18/10/2019	Object Strongly. Concerns, Air pollution, Water Pollution, Noise Pollution, Proximity to Vaal river due to counties most significant water sources, Groundwater Pollution, Negative socio-economic impact. Land Zone Agriculture better socio-economic benefits if rezoned for eco-tourism.	Please refer to above comments regarding impacts mentioned.
Rocco Campbell	18/10/2019	Object Strongly. Concerns, Air pollution, Water Pollution, Noise Pollution, Soil erosions and desertification. Animal habitats destroyed. Insufficient evidence of duty of care by mine owners. Destruction of ecosystem.	Please refer to above comments regarding impacts mentioned.
Candice Campbell	18/10/2019	Object Strongly. Concerns, Air pollution, Water Pollution, Noise Pollution. Desertification. Disturbance of ecosystem. Insufficient evidence of duty of care by mine owners, therefore lack of evidence in the future commitment to HO. Adverse socio-economic impact.	Please refer to above comments regarding impacts mentioned.
Cindy Campbell	18/10/2019	Object Strongly. Concerns, Air pollution, Water Pollution, Noise Pollution. Desertification. Disturbance of ecosystem. Insufficient evidence of duty of care by mine owners, therefore lack of evidence in the future commitment to HO. Adverse socio-economic impact.	Please refer to above comments regarding impacts mentioned.
Revanye Cambell	18/10/2019	Object Strongly. Concerns, Air pollution, Water Pollution, Noise Pollution. Insufficient evidence of duty of care. Adverse social-economic impact. Destruction of flora and fauna. Mining activity in proximity of key water resource, o.e. Vaal river especially diamonds will destroy normal river flow.	Please refer to above comments regarding impacts mentioned. Diamond mining is no longer applicable as described above.

COMMENTS RECEIVED DURING CONSULTATION PUBLIC PARTICIPTION PHASE 2017-2019

Craigh Richardson	26/10/2018	As immediate neighbours we were never notified of the original Mining Application. Please send proof that notifications were posted in Newspapers in Gauteng as the property borders Gauteng and Emfuleni Local Municipality was notified. This is a legal requirement. Mining is currently taking place on agricultural zoned land which is illegal. The noise generated by the current mine is destroying our sense of place and the noise from the trucks and equipment creates a daily noise nuisance. This if far in excess of normal farm noise as per your information document. The introduction of more heavy equipment and the resultant noise will make living and working in our home impossible and totally destroy our properties value. The current mine has not adhered to their EMP, by working out of designated hours and failing to do concurrent rehabilitation. The DMR is unable to monitor compliance. The dust generated from the mine is unacceptable and it is proving impossible to control. We have photos to prove this. The area is earmarked for tourism and we are planning a multi-billion rand education facility, currently sitting with Gauteng Province that will have to be scrapped should the mines in the area be allowed to continue.	Please refer to answers above regarding the mentioned issues that was addressed during the previous meeting with the Protect the Vaal.
Gavin Aboud	26/10/2018	Good day Yolandie, Attached please find our objections to your Section 102 application. Please note I sent you a list Of 1396 persons that were to be registered as IAP's. These objections are raised by each of those 1396 IAP's.	The objection received was the same letter as when received on 23/05/2018 and will hereby not be addressed again.
Anne Wilson	26/10/2018	The cleanliness of the Vaal river is already a water concerns to the sewerage seeping and leaking into the river. We need guarantees that this will not create more problems with regards to pollution. Noise pollution will directly impact my business as well as other such business in our town. This goes for air pollution as well.	Thank you for you valued comments. A water use licence application has been made. DWS regulated water uses in the area. BBSM is located 3km south as the crow flies from the Vaal Oewer Town, all possible measures to minimise noise and air pollution are taken.
Department Police, Roads and Transport Mr. JPW Maree	30/10/2018	The Department has 3 borrow pits on the said properties with reference numbers: 203/2/181/170 – 172.	The following comments were made in the letter received and are responded to accordingly: <ol style="list-style-type: none"> 1. It is assumed that the above- mentioned proposed mining activities will take place on the Remainder of the farm Woodlands 407. Your attention is nevertheless brought thereto that this Department has three borrow pits on Subdivisions of Woodlands 407. The number of these borrow pits are: <ol style="list-style-type: none"> a. 203/2/181/170 b. 203/2/181/171 c. 203/2/181/172 2. This department reserved these borrow puts in terms of the provision of section 17(2) of the Free State Roads Ordinance, 1968 (Ordinance No.4 of 1968), as amended. The material from these borrow puts are utilized by the Department for roads building or road rehabilitation purposes. Usable material for such purposes are limited in the province. 3. In view of the existing Department, all borrow pits on the above-mentioned properties, this department has to object should any proposed mining activities for the above-mentioned mining project take place on Subdivision of Woodlands 407. <p>As the Environmental Consultant of the applicant, Tja Naledi, I herewith kindly request the Department of Police, Roads and Transport to provide me with the exact co-ordinates of the three (3) borrow pits as described in your letter under reply.</p> <p>Tja Naledi obtained the Mining Right in 2014, at which stage no objections and/or comments were received from your Department. To enable us to investigate this matter please provide us with the requested co-ordinates as a matter of urgency.</p>

COMMENTS RECEIVED DURING THE SEIA PARTICIPATION PHASE

The SEIA was distributed to the I&APS on the 28th of January 2019, where they I&AP'S was allowed a 30-day commenting period that ends on the 28th March 2019. The outcome of this consultation is described in detail below. Please also refer to Appendix E for the comments that was received during the SEIA commenting phase.

Interested and Affected Party	Date Comments Received	Comments	EAPs response to issues as mandated by the applicant
Ngwathe Municipality – Ria Jordan	29 January 2019	Acknowledgement of receipt.	N/A
Renee Hartslief	31 January 2019	Thanks Yolandie. As discussed when you called this morning, when you personally sent the notification to the group yesterday, It was received by us. But it was NOT received from your bulk mail handler. Except for Craig. We look forward to hearing from your marketing person about what the problem might be and how it will be corrected so that ALL IAPs are reached.	Bulk email was send via Outlook to all I&APS and Renee Hartslief was requested by Sonette Smith to comment on the report.
Sampie Van Rooyen	6 February 2019	<p>Good day Yolandie, I hope you will find these comments useful in your EIA process. In the Economic Impact Assessment, a total of 10 impacts were identified, of which 6 were negative. Will you please indicate to what extent your client, Tja Naledi Barrage Sand Mine, will be willing to assist the affected community in mitigating these negative impacts. Please describe in your Impact Assessment the process of compensation your client proposes if they do not comply to the final EMP (Environmental Management Plan) and Mining Right.</p> <p>Please include all recommendations made by OCES in their Economic Impact Report in your final EMP to be submitted to DMR. Please include all recommendations made by Enviroworks Environmental in their Soci-Economic Impact Assessment into your final EMP to be submitted to DMR.</p> <p>I would also appreciate it if you highlight to DMR the Impact Statement made by Enviroworks Environmental: <i>“The findings from the SEIA indicate that the socio-economic benefits associated with the proposed amendment will not outweigh the negative impacts. Numerous negative impacts as a result of the sand mines in the area bother the surrounding community and the proposed amendment will compound this.”</i></p> <p>I highly recommend that you include in your final Impact Assessment and EMP (Environmental Management Plan) a recommendation for monthly Socio-economic and Economic monitoring throughout the lifetime of the mine, to ensure that the current status of the community and environment remain the same or improve. It is very important to have continuous communication and consultations with the affected community. Please explain the methods you propose to fulfil this request.</p> <p>All non-compliances to the EMP and Mining Right must be communicated to the affected community and especially to DMR. I also request that a copy of the monthly monitoring report done by the ECO (Environmental Control Officer) be furnished to all registered I&AP’s and DMR. Please do not hesitate to contact me if any of the comments need further explaining.</p> <p>Regards, Sampie</p>	<p>Thank you for your valued comments. Your comments will be incorporated into the Final BAR that will be submitted to the DMR. The SEIA’s management and mitigation measure was incorporated into this FBAR. All statements made by Enviroworks Environmental was incorporated into this FBAR as well as the SEIA that was incorporated into the report as Appendix H. Monthly Socio-Economic Monitoring throughout the life of mine will be investigated. A quarterly forum will be established so that all registered I&AP’s and community members can raise their comments and concerns during the lifetime of the project.</p> <p>All ECO and EPA reports are available on site and can be viewed by all registered I&AP’s.</p>
Errol White	11 February 2019	<ol style="list-style-type: none"> 1. The LOCAL COMMUNITY benefits are marginal 2. Our TOURISM sector would be further threatened 3. The MINES must be responsible for reconstruction and maintenance of the Vaal Eden ROAD, from the N1 bridge to the R59 at the Parys Airfield 4. The negative impacts of 3 mines are CUMULATIVE and cannot be considered in isolation from each other 5. The required MITIGATION measures would render the mines UNPROFITABLE <p>There are OTHER PLACES designated by Ngwathe for gravel mining</p>	<p>Thank you for your valued comments. Your comments will be incorporated into the Final BAR that will be submitted to the DMR.</p> <p>All questions has been addressed in the SEIA.</p> <p>Please refer to section above regarding the road S717 and the agreement that will be set in place relating to the Vaal-Barrage road.</p>

Interested and Affected Party	Date Comments Received	Comments	EAPs response to issues as mandated by the applicant
Fezile Dabi District Municipality	15 February 2019	The SEIAR was read together with the economic impact assessment report for the project. FDDM notes that the project is unlikely to improve the livelihoods of people in proximity to the mine, whether from the Free State or Gaiting side. Employment opportunities and improvement of peoples lived is what remains high in the wellbeing of communities. It is noted that the document also took into account the existence of other sand mines in vicinity of Tja Naledi, and once can reasonable conclude that it is unlikely that all these mined comply with their environmental authorisations conditions. It is indicated that already there non-compliance picked from the contractor operation the mine, SPH Kundalila and that it in itself should be a worrying factor. FDDM would like to submit that report is noted and there and no major objection to the project, however it important for DMR to ensure that Tja Naledi complies with its current mining conditions or at least there is clear plan to ensure compliance where non-compliance has been picked before amending the mining right to accommodate mining aggregates and further crushing and screening processes which could require stricter operating conditions.	Thank you for your valued comments. Your comments will be incorporated into the Final BAR that will be submitted to the DMR. All non-compliances has been addressed by SPH Kundalila. EPA report has been conducted by Greenmined Environmental and submitted to DMR for perusal.
Gavin Aboud	20/02/2019	I refer your mail requesting comment on the subject. Whilst I regard the report and honest one, I think the negative aspects on the mining on the surrounding areas is understated from both a Socio and Economic aspect. If we look just at the informal settlement and the jobs provided in Vaaloewer , Lindequesdrift and Vaaleden, and we compound this with the resorts in the area, we estimate that at least 1000 people are employed in the area. If we work on the assumption that there are 5 dependants associated to those employed, this number grows to 6 000. The enormity of this impact is not clearly stated in the report. I request that this aspect be revisited and that I be consulted in this regard.	Thank you for your valued comments. Your comments will be incorporated into the Final BAR that will be submitted to the DMR. As described above, While only a six (6) employment opportunities will be created, this can be enhanced by Local Economic Development initiatives.
Louis Kruger	20/02/2019	Hi Gavin. I support your view 100% I think it is imperative now that the frame of reference to the 2011 census must be challenged as their was exponential growth, private development in the area and rapidly and drastically changed employment numbers associated with tourism, lodges etc. Again the reference must census be to the Spatial Development plan of Tlokwe that clearly defines the area as a tourism corridor, with advantage that it form part of the Vredefort Done heritage site and the vaal river corridor that support the spacial development plan of Tolkwe. I will also avail myself for more detailed discussions	The 2011 Census will thus be the third census conducted by a democratic South African government and forms part of the 2010 round of African censuses, which aim to provide comprehensive data on the continent, for improved planning and to aid development. A population census is typically held every five years, but because of a lack of capacity within Statistics South Africa, it was decided that the interval will be extended to 10 years. Reference was made to die Spatial Development Plan for Tlokwe, which is not applicable to the Spatial Development Plan for the Free State Province.
