*Part 2: Amendments where a change in scope occurs*

*Amendments to be applied for in terms of Part 2*

31. An environmental authorisation may be amended by following the process prescribed in this Part if the amendment will result in a change to the scope of a valid environmental authorisation where such change will result in an increased level or change in the nature of impact where such level or change in nature of impact was not—

- (a) assessed and included in the initial application for environmental authorisation; or
- (b) taken into consideration in the initial environmental authorisation;

and the change does not, on its own, constitute a listed or specified activity.

*Process and consideration of application for amendment*

32. (1) The applicant must within 90 days of receipt by the competent authority of the application made in terms of regulation 31, submit to the competent authority—

Other legislation triggered by the proposed project includes:

- An amendment of the Mining Right Application in terms of Section 102 of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) has been submitted to the Department of Mineral Resource, to include alluvial diamonds and gravel into the mining right.

## **PROJECT DESCRIPTION**

The mining method to be used on Barrage Bulk Sand Mine will be strip mining. Mining will take place via a contractor (SPH Kundaila) who will load the material via a front end loader and hauled out of the excavation to the mobile crushing and screening plant. From the plant the material will be loaded via front end loader directly onto client's trucks. The material will be mined in strips with no more than one strip being open at any given time. The maximum depth of the excavations will be 10 meters in some areas (building sand and gravel) and 5 meters in other areas (plaster sand). All activities will be contained within the boundaries of the site.

The proposed mining area is approximately 437.8330ha in extent and the applicant, Tja Naledi Beafase Investment Holdings (Pty) Ltd, intends to win material from the area for at least 10 years. Silica Sand and Gravel (aggregate) to be removed from the mine will be used for building material in the vicinity. Application is also being made for alluvial diamonds, in the case that these minerals will be found during mining. The proposed mine will therefore contribute to the building industry in and around Parys, Vanderb(i)park and Sasolburg area.

The mining activities will consist out of the following:

- Stripping and stockpiling of topsoil;
- Excavating;
- Crushing and Screening;
- Stockpiling and transporting;
- Sloping and landscaping upon closure of the site; and
- Replacing the topsoil and vegetation the disturbed area.

The mining site will contain the following:

- One Front end loader;

## **BACKGROUND INFORMATION DOCUMENT**

- One tractor
- One water bowser;
- One container office;
- One caravan for admin purposes;
- Storage yard for storing equipment; and
- Mobile crushing and screening plant.

### **DUST:**

- Speed on the access road will be limited to 30 km/h to prevent the generation of excess dust.
- Roads will be sprayed with water or an environmentally friendly dust-suppressing agent that contains no PCB's (e.g. DMS products) if dust is generated above acceptable limits.
- All disturbed or exposed areas will be re-vegetated as soon as possible during mining to prevent any dust source from being created.
- Water from the existing boreholes will be pumped and reused for dust suppression.

### **NOISE:**

- The project environment is located within an agricultural setting in which heavy equipment, e.g. tractors, already operate.
- It will be ensured that employees and staff conduct themselves in an acceptable manner while on site.
- All mining vehicles will be equipped with silencers and maintained in a road worthy condition in terms of the Road Transport Act.
- The noise generated from the mining machinery will be similar to noise generated along the Vaal Eden road by public vehicles, and by the adjacent sand mine (Pure Source Minerals Mining Co (Pty) Ltd. Blasting noise will be instantaneous and of short duration. This will only occur once every two to three weeks.

### **ACCESS ROUTE:**

- Informal roads already exist on the farm and no new roads will be constructed. Vehicular movement will be restricted to existing access routes to prevent crisscrossing of tracks through undisturbed areas.
- Should any other access roads to the mining area be required it will be established in consultation with the landowner however existing roads will be used as far as practicable.

### **SURFACE AND GROUND WATER:**

- The proposed activities are not expected to have a negative impact on any surface and ground water of the area.
- The Barrage Bulk Sand Mine is located more than 500m from the edge of the Vaal river, no mining will be done within 100m from the Vaal river bank.

## BACKGROUND INFORMATION DOCUMENT

### VEGETATION:

- The mining area falls within the Soweto Highveld Grassland (GM8) (Threatened Status) - northern variation of the *Cymbopogon Themeda* grassveld (Acocks Veld Type No 48 – Grassveld Biome), which is a sparse tufted veld type. Trees such as the Fine Thorn (*Rhus Pyroides*), *Acacia* species and Buffalo Thorn *Ziziphus mucronata* can also occur on the site. The site is impacted by the cultivation of grazing and no undisturbed or virgin veld is present on site.

### GEOLOGY & SOILS:

- red to yellow or greyish soils with low to high medium base status. These soils are structure less.
- The underlying geology comprises of quaternary deposits of river gravels an aeolian sand overlying the rocks forming a portion of the ring synclinorium surrounding the Vrededorf domes. The geology for the area comes from a portion of the Transvaal sequence from the Malani dolomite.

### CLIMATE:

According to SA Explorer, Parys normally receives about 496mm of rain per year, with most rainfall occurring during summer. The chart below (Figure 1) shows the average rainfall values for Parys per month. It receives the lowest rainfall (0mm) in July and the highest (89mm) in December. The monthly distribution of average daily maximum temperatures (Figure 2) shows that the average midday temperatures for Parys range from 17.2°C in June to 28.2°C in January. The region is the coldest during July when the mercury drops to 0.1°C on average during the night. Consult the chart below (Figure 3) for an indication of the monthly variation of average minimum daily temperatures.

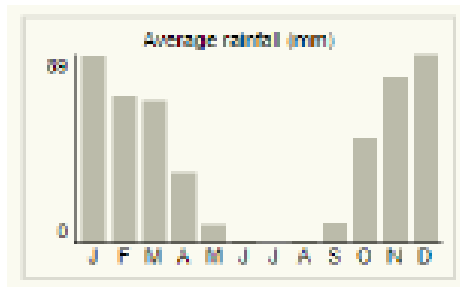

Figure 1: Average rainfall for Parys

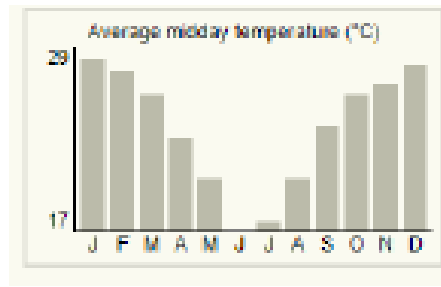

Figure 2: Average midday temperature

**BACKGROUND INFORMATION DOCUMENT**

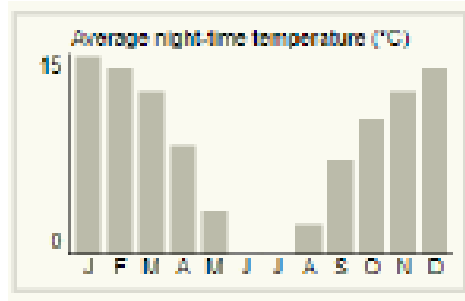

Figure 3: Average night-time temperature

**SENSITIVE LANDSCAPES:**

- The Vaal River is located within 500m from the mining area
- There are no protected areas (game parks/ nature reserves or monument) in close proximity to the proposed site.

**SITES OF ARCHAEOLOGICAL AND CULTURAL INTEREST:**

- No sites of archaeological or cultural importance were identified during the site inspection as the site has been extensively used for agriculture and grazing purposes.

**FAUNA:**

- Dukker, Guinea fowl and Addax were spotted during the site inspection. There is also some spoor of Rooikat in the area.
- Birds commonly associated with the area include Guinea fowl, plovers, pigeons swallows's francolin amongst other common airborne species.
- Ground squirrels, mongoose, moles and rats also occur in the area. The specific habitat in the area of interest however is not necessarily typical of their presence. Some of the animals that are currently occurring on the farm might temporarily leave the immediate area of mining for the duration of the mining activities. Proper mitigation measures will ensure the return of the small animals after the mining activities have ceased. No threatened amphibians, reptiles or fish that are listed in the red data book occur on or near the mining site.
- The fauna at the site will not be impacted by the proposed mining activity as they will be able to move away or through the site, without being harmed. Workers should be educated and managed to ensure that no fauna at the site is harmed.

## ***BACKGROUND INFORMATION DOCUMENT***

### **VISUAL EXPOSURE:**

- ❑ The mining area was identified to constitute the lowest possible visual impact on the surrounding environment. The surrounding area has previously been disturbed by mining activities.
- ❑ The site will be visible from the Vaal Eden road.
- ❑ The applicant should however ensure that housekeeping is managed to standard, as this will mitigate the visual impacts during the operational phase of the mine.
- ❑ Upon closure the site will be rehabilitated and sloped to insure that the visual impact on the aesthetic value of the area is kept to a minimum.
- ❑ The site will have a neat appearance and be kept in good condition at all times.

### **ABLUTION, WASTE WATER & WASTE DISPOSAL:**

- ❑ Ablution facilities will consist of chemical toilets hired from a contractor and serviced regularly.
- ❑ Any effluents containing oil, grease or other industrial substances will be collected in a suitable receptacle and removed from the site, either for resale or for appropriate disposal at a recognised facility.
- ❑ Spills would be cleaned up immediately to the satisfaction of the Regional Manager by removing the spillage together with the polluted soil and by disposing of them at a recognised facility.
- ❑ No mining waste will be generated. General waste will be disposed at the authorised Parys or Vanderbijlpark Disposal facility.
- ❑ Non-biodegradable refuse such as glass bottles, plastic bags, metal scrap, etc., will be stored in a container at a collecting point and collected on a regular basis and disposed of at a recognised landfill site.
- ❑ Biodegradable refuse generated will be handled as indicated above.
- ❑ No waste will be burned or buried on site.

### **FINAL REHABILITATION:**

- ❑ Rehabilitation of the surface area shall entail landscaping, levelling, top dressing, land preparation, seeding (if required), and weed / alien clearing.
- ❑ All infrastructures, equipment, and other items used during the mining period will be removed from the site (section 44 of the MPRDA).
- ❑ Waste material of any description, including receptacles, scrap, rubble and tyres, will be removed entirely from the mining area and disposed of at a recognised landfill facility. It will not be permitted to be buried or burned on the site.
- ❑ Weed / Alien clearing will be done in a sporadic manner during the life of the mining activities. Species categorised as weeds according to the National Environmental Management: Biodiversity Act (Act No. 10 of 2004) [NEMBA] Alien and Invasive Species Regulation GNR 598 and 599 of 2014 Species regarded as need to be eradicated from the site on final closure.
- ❑ Final rehabilitation shall be completed within a period specified by the Regional Manager.

## **BACKGROUND INFORMATION DOCUMENT**

### LAND CLAIMS ENQUIRY:

- 1. PORTION 4 OF THE FARM WOODLANDS 407, NGWATHE LOCAL MUNICIPALITY, FEZILE DABI DISTRICT, FREE STATE PROVINCE  
437.8330 HECTARES**

We refer to your letter sent to our office on the 19 September 2017.

We confirm that as at the date of this letter no land claims appear on our database in respect of the Property. This includes the database for claims lodged by 31 December 1998; and those lodged between 1 July 2014 and 27 July 2016 in terms of the Restitution of Land Rights Amendment Act, 2014.

Whilst the Commission takes reasonable care to ensure the accuracy of the information it provides, there are various factors that are beyond the Commission's

control, particularly relating to claims that have been lodged but not yet been gazetted such as:

1. Some Claimants referred to properties they claim dispossession of rights in land against using historical property descriptions which may not match the current property description; and
2. Some Claimants provided the geographic descriptions of the land they claim without mentioning the particular actual property description they claim dispossession of rights in land against.

The Commission therefore does not accept any liability whatsoever if through the process of further investigation of claims it is found that there is in fact a land claim in respect of the above property.

If you are aware of any change in the description of the above property after 19 June 1913 kindly supply us with such description so as to enable us to do a further search.

Yours faithfully
