Summary

Case ID: 28791

Case Status: SUBMITTED

Heritage Authority(s): ECPHRA

Proposal Description

The proposed development entails a small-scale open-cast quarry for the extraction of dolerite aggregate to supply regional infrastructure and construction projects. Mining activities will include drilling, controlled blasting, excavation, crushing, screening, and stockpiling.

The operation will be undertaken over an approximate 5 ha footprint and will follow a phased approach to limit disturbance and enable progressive rehabilitation. The anticipated lifespan of the quarry is short-term, linked to project-specific demand, with potential extension subject to permitting. On a PORTION OF PORTION 0 OF FARM 94, ABERDEEN, EASTERN CAPE

Final Comment

In terms of Section 38(4) of the National Heritage Resources Act (Act 25 of 1999)/In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Power Construction (Pty) Ltd
Power Construction (Pty) Ltd
PO Box 129,
Blackheath
Blackheath
Blackheath 7580

Greenmined Environmental (Pty) Ltd has been appointed by Power Construction (Pty) Ltd to undertake an Environmental Authorisation (EA) Application for proposed Aggregate mining activities on 5Ha of portion 1 and 2 of farm Vingerfontein 162 situated in the Ubuntu Local Municipality, Northern Cape Province.

A Final Basic Assessment Report (FBAR) and Environment Management Programme report (EMPr) has been submitted in terms of the National Environmental Management Act, 1998 and the National Environmental Management Waste Act, 2008 in respect of listed activities that have been triggered by applications in terms of the Mineral and Petroleum Resources Development Act, 2002 (MPRDA) (as amended). The proposed operation will employ open-cast quarrying methods to extract hard rock dolerite.

Beyond Heritage has been appointed to provide heritage specialist input into the EA process in terms of section 24(4)b(iii) of NEMA and section 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA).

Kraljevi?, L. 2025. Heritage Impact Assessment for the proposed development on Portions 1 and 2 of the Farm Vingerfontein 162, Victoria West, Northern Cape Province.

The site was subjected to field survey during November 2025. This was during summer and Archaeological visibility was good due to low vegetation cover.

The HIA identified the following Heritage Resources:

- VF001: Large rock panels with finely detailed rock art figures attributed a high significance rating,
- VF002: Large panels of engravings including geometric forms, animals, inscriptions and bicycles

attributed a high significance rating,

- VF003: Rock panels with inscription, geometric shapes as well as figures with rifles among the engravings attributed a high significance rating.

The HIA recommends as follows;

- Sites VF001 – VF002 must be avoided with a 100m buffer and in-situ conservation,
- If this is not possible, extensive mapping and recording as well as moving the engraved stones is recommended

Prof. Marion Bamford has been appointed to provide Palaeontological specialist input.

Bamford, M. 2025. Palaeontological Impact Assessment for the proposed quarry on Farm Vingerfontein 162, west of Victoria West, Northern Cape Province.

The proposed site lies on the potentially very highly sensitive Poortjie Member (Teekloof Formation, Adelaide Subgroup) of the Karoo Supergroup, but very close to a large expanse of dolerite that is probably the target material.

A site visit and walkdown was completed on 13 November 2035 (summer). NO FOSSILS of any kind were seen even though the vegetation is sparse. Only dolerite and sandstone boulders and cobbles were visible.

The PIA recommends the following:

- A Chance Finds Procedure be implemented.

Final Comment

The following comments are made as a requirement in terms of section 3(4) of the NEMA Regulations and section 38(8) of the NHRA in the format provided in section 38(4) of the NHRA and must be included in the Final BAR and EMP:

- 38(4)a – The SAHRA Development Applications Unit (DAU) has no objections to the proposed development;
- 38(4)b – The recommendations of the specialists are supported and must be adhered to. The following

additional recommendations must be adhered to:

- A 100m buffer must be implemented around site VF001 – VF003;
- If this is not possible, a permit in terms of section 35 of the NHRA (1999) must be lodged with SAHRA;
- 38(4)c(i) – If any evidence of archaeological sites or remains (e.g. remnants of stone-made structures, indigenous ceramics, bones, stone artefacts, ostrich eggshell fragments, charcoal and ash concentrations), fossils or other categories of heritage resources are found during the proposed development, SAHRA DAU (Boitshepo Motsodisa/bmotsodisa@sahra.org.za) must be alerted as per section 35(3) of the NHRA.
