- Parent farms
- Excluding high and very high sensitive areas regarded as no go zones
- Minimum application area

Rehabilitation will include activities to be divided into medium- and long term categories. In the medium term, rehabilitation will entail the removal of vegetation and the re-planting of areas through the use of overburden and soil material to backfill excavation pits, reinstatement of decommissioned processing areas, re-planting of eroded areas and the management of weeds and invasive plant species. Rehabilitation of the eroded areas for the above must serve as a final depositing area for the material removed from the excavation must be dumped into the surface area shall entail landscaping, levelling, top dressing, land preparation, seeding and maintenance, and invasive plant species clearing.
