Dear Sir/Madam

REQUEST INFORMATION ON PROPERTY: LAND CLAIM

We acknowledge receipt of your enquiry received on 13 October 2022.

We confirm that at the date of this letter, no land claims appear on our database in respect of the property described as **the Remaining Extent of the farm Elands Spruit No. 5523**. This includes the database for claims lodged by 31 December 1998 and those lodged between 1 July 2014 and 27 July 2016 in terms of the provisions of the Restitution of Land Rights Act, 22 of 1994 (as amended).

Whilst the Commission takes reasonable care to ensure and verify the accuracy of the information it provides, there are various factors that are beyond the Commission's control, particularly relating to claims that have been lodged but not yet published in the relevant government gazette, such as:

1. Some claimants refer to properties they claim dispossession of rights in land against, using historical property descriptions which may not match the current property description; and
2. Some claimants provide the geographic description of the land they claim without mentioning the actual property description against which they are claiming dispossession of rights in land.

The Commission therefore does not accept any liability whatsoever if through the process of further investigation, it is found that there is in fact a land claim in respect of the above property.

If you are aware of any change in the description of the above property after 19 June 1913, kindly supply us with such description (historic and current) so as to enable us to do a further search.

Regards

Raubex KZN (Pty) Ltd (hereafter referred to as RBX-KZN) holds a mining permit (DMRE ref no: KZN 30/5/1/3/2/10518 MP) to mine aggregate from a 4.9 ha area on the Remaining Extent of the farm Elands Spruit No 5523, uThukela District. The RBX-KZN permit will be valid until February 2023 (upon renewal).

The KZN Amafa and Research Institute (the Institute) reviewed the application on the 17 August 2022 and considered your application:

The Committee resolved not to object to the development within the limits of the general stipulated conditions and mitigation measures.

STANDARD CONDITIONS

1. The KwaZulu-Natal Amafa and Research Institute should be contacted if any heritage objects are identified during earth-moving activities and all development should cease until further notice.
2. No structures older than sixty years or parts thereof are allowed to be demolished, altered, or extended without a permit from the KwaZulu-Natal Amafa and Research Institute.
3. Under no circumstances may any heritage material be destroyed, inundated, collected, or removed from the site unless under the direction of the KwaZulu-Natal and Amafa Research Institute and a heritage specialist.
4. Should any remains, that could potentially be human remains be found on-site, the South African Police Service (SAPS) should be contacted and the KwaZulu-Natal Amafa and Research Institute must be notified immediately. No SAPS official may disturb or exhume such remains, without the necessary permission from the KwaZulu-Natal Amafa and Research Institute.
5. No activities are allowed within 50m of a site that contains rock art.

6. Sources of all-natural materials (including topsoil, sands, natural gravels, crushed stone, asphalt, etc.) must be obtained in a sustainable manner and in compliance with the heritage and environmental (NEMA) legislation.

7. The committee resolved not to object to the development within the limits of the general stipulated conditions and mitigation measures. Should you have any further queries, please contact the designated official using the case number quoted above in the case header. Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Re: Proposed Mining on a portion of the remaining extent of the Farm Elands Spruit No. 5523, Alfred Duma Municipal Area, KwaZulu-Natal Province.

1. PURPOSE

To provide comments from the KZN Department of Agriculture and Rural Development (DARD): Agricultural Resources Management (ARM) – Land Use Regulatory unit (LURU), in response to the Proposed Mining on a portion of the remaining extent of the Farm Elands Spruit No. 5523, Alfred Duma Municipal Area, KwaZulu-Natal Province.

2. BACKGROUND

2.1 The Applicant, Raubex Construction (Pty) Ltd applied for environmental authorisation (EA) and mining permit (MP) over a footprint of 4.9 Ha of the remaining extent of the farm Elands Spruit No. 5523 (317.74 Ha in total extent), uThukela Magisterial District, KwaZulu-Natal. This is located along the Collings pass (P263 road) just of the N11 road about 26 km north east of Ladysmith in the direction of New Castle. The mine is approximately 10 m from the P263 road. This small 10m stretch will need an upgrade to accommodate haulage trucks from the quarry. According to the Environmental Assessment practitioner the old quarry was an historical mine used for the building of N11 Road way back in the 70's. There is no previous mining permit for the previous operation.

2.2 The proposed mining operation will entail extension of the existing quarry via conventional open cast mining methods. The following mining processes are involved; site establishment and infrastructure development, striping and stockpiling topsoil from the proposed mining footprint area, the mining method will make use of blasting

2020/12/4975 – Proposed Mining on a portion of the remaining extent of the Farm Elands Spruit No. 5523, Alfred Duma Municipal Area, KwaZulu-Natal Province.

to loosen the hard rock. The loosen material will then be transported to crushing and screening processing plant where it will be screened to various sized stockpiles before it is sold and transported from the mining sites.

- 2.3 It should be noted that the impact on the quality of the air of the surrounding environment if properly mitigated, should be at an acceptable level of low-medium significance. The same applies to ambient noise levels.
- 2.4 The proposed mining area falls within 500m from wetland and requires a Water Use Authorisation in terms of the National Water Act, 1998. The stock pile area has been selected as areas without notable seeps or wetlands within the confines of the mining footprint. The stock pile area is more than 170m from the outer boundary of the wetland, and therefore outside the 70m buffer proposed by the specialist.
- 2.5 The Proposed project will utilise chemical toilets for approximately 8 staff under its employment. Storm water management plan for the site must be properly planned to prevent erosion in the adjacent farmlands and pollutions of nearby wetland systems.
- 2.6 The studies indicated on the aspects of terrestrial Biodiversity, conservation Areas and ground cover shows that a critical Biodiversity area (CBA) extends across the western boundary of the site. This area has been disturbed by the existing quarry therefore the section categorised as CBA optimal does not qualify to be in that category as a result. Aloes species observed in this area must be rescued and relocated to safer environment within the farm.
- 2.7 It has been determined that No sites observation of archaeological, palaeontological or cultural importance exist within the study area. It is therefore important to ensure that all mitigation measures proposed for notable impact studies be observed in the strictest sense to ensure that existing infrastructures on the farm or neighbouring properties will not be adversely impacted by the proposed project.
- 2.8 This application is submitted in terms of the Mineral and Petroleum Resources Development Act (Act 29 of 2002) as amended. It is required that the applicant is fully compliant in terms of the provisions of the National Environmental Management Act NEMA (Act 107 of 1998). In terms of section 16(3) (b) and 17(1) (c) under EIA regulations, 2014.

3. COMMENTS

- 3.1 A site inspection was conducted to the Farm Elands Spruit on 11 October 2022. The property is a stock grazing farm. According to the KZN Department of Agriculture and Rural Development Land category's Map of 2012, The Farm is a Category B Land.
- 3.2 The mining operations must be conducted in accordance with the best practice guideline for small scale mining in relation to storm water management, erosion/sediment control, and waste management. It should be noted that any other

measures such as prevention of contaminated water from spilling into clean water system such as ground water and wetland systems must be ensured through collection and containment of contaminated water in systems such as berms, pools, dams or attenuation ponds with this regard.

3.3 It should be noted that all impact mitigations identified must be strictly implemented as there are a number of them that ranges from noise, storm water attenuation for erosion/silting control, ground water and air pollution prevention to blasting impact on the farm and neighbouring infrastructure. The rehabilitated land must be continuously utilised for one form of agriculture or the other after the useful life of the quarry.

3.4 It must be ensured that the mining area is properly fenced off to prevent incursion by livestock and human which can lead to injury of animals or in extremity the death of livestock. The applicant must ensure that proper sanitation of the environment is ensured and wastes must be disposed of appropriately in designated disposal systems at all times.

3.5 The EAP consultant has indicated that blasting impact on the nearest buildings will be measured by a vibrometer to be installed at both at the blasting site and by the buildings to ensure monitoring of blasting activity within regulated limits. It was further expressed that no significant impact is expected as the buildings are said to be more than 500m from the blasting site.

4. RECOMMENDATION.

This office has no objection to the proposed mining on a portion of the remaining extent of the Farm Elands Spruit No. 5523, subject to 3.2, 3.3, 3.4 and 3.5 above.

**PROOF OF THE ENGLISH ADVERT PLACED IN THE
LADYSMITH GAZETTE ON 30 SEPTEMBER 2022**

1. NOTICE OF MINING PERMIT APPLICATION

Notice in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), and the Environmental Impact Assessment Regulations 2014 (as amended), that Raubex Construction (Pty) Ltd applied for:

- Environmental authorisation to mine gravel from the Remaining Extent of the farm Elands Spruit No 5523, uThukela Magisterial District, KZN; and
- A mining permit in terms of Section 27 of the MPRDA.

The proposed mining footprint will be 4.9 ha and will entail the expansion of the existing quarry on the property. The mining method will make use of blasting to loosen the hard rock; upon which the material will be loaded and hauled to the mobile crushing plant where it will be screened to various sized stockpiles. The product will be transported with trucks. All mining activities will be contained within the boundaries of the site.

The proposed project triggers the following listed activities in terms of NEMA and the EIA Regulations 2014 (as amended):

• GNR 517 Listing Notice 1 Activity 21 as amended:

Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as continued in this Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.

• GNR 327 Listing Notice 1 Activity 26:

Residential, retail, recreational, tourism, commercial or institutional developments of 1 000 square metres or more, on land previously used for mining or heavy industrial purposes.

• GNR 327 Listing Notice 1 Activity 27:

The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.

• GNR 324 Listing Notice 1 Activity 28:

Residential, mixed, retail, commercial, industrial, or institutional developments where such land was used for agriculture, game farming, equestrian purposes or afforestation on or after 01 April 1998 and where such development (ii) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.

• GNR 324 Listing Notice 3 Activity 4:

The development of a road wider than 4 metres with a reserve less than 13.5 metres.

g. Northern Cape

ii(ee) Critical biodiversity areas as identified in systematic biodiversity plans adopted by the competent authority or in bioregional plans.

• GNR 324 Listing Notice 3 Activity 12:

The clearance of an area of 300 square metres or more of indigenous vegetation.

g. Northern Cape

ii. within critical biodiversity areas identified in bioregional plans;

• GNR 324 Listing Notice 3 Activity 18:

The widening of a road by more than 4 metres, or the lengthening of a road by more than 1 kilometre.

g. Northern Cape

ii(ee) Critical biodiversity areas as identified in systematic biodiversity plans adopted by the competent authority or in bioregional plans.

Interested and Affected Parties (I&AP's) are invited to provide written comments. Closing date for submission of comments is 31 October 2022. Please use KZN 30/5/1/3/2/10817 MP as reference when commenting.

2. NOTICE OF ENVIRONMENTAL AUTHORISATION APPLICATION

Notice in terms of the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA) and the Environmental Impact Assessment Regulations 2014 (as amended), that Raubex Construction (Pty) Ltd applied for environmental authorization in terms of regulation 16(1) of the EIA Regulations to stockpile material on a portion of the Remaining Extent of the farm Elands Spruit No 5523, uThukela Magisterial District, KZN.

The Applicant proposes to establish an area for stockpiling and crushing of the material mined from the aforesaid quarry, on 10 hectares of the same property. The material will be transported from the quarry into the stockpile area where it will be screened/crushed and stockpiled until removed from site.

The proposed project triggers the following listed activities in terms of NEMA and the EIA Regulations 2014 (as amended):

• GNR 327 Listing Notice 1 Activity 24:

The development of a road (ii) with a reserve wider than 13.5 metres, or where no reserve exists where the road is wider than 8 metres.

• GNR 327 Listing Notice 1 Activity 27:

The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.

Interested and Affected Parties (I&AP's) are invited to provide written comments. Closing date for submission of comments is 31 October 2022. Please use DC23/0005/2022 KZN/EIA/0001820/2022 as reference when commenting.

The Draft Basic Assessment Reports (DBAR) with Environmental Management Programmes (EMPR), for both applications will be available for public comment from 30 September 2022. Copies thereof can be obtained from Greenmined upon request, downloaded from www.greenmined.com, alternatively be viewed at the Ladysmith Library. Should additional information be required, it can be obtained from Greenmined.

By taking part in this process, you hereby consent, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of your personal information by Greenmined, which personal information may be used as part of documentation pertaining to the Environmental Authorisation application process. Dear Sir/Madam

DC23/0005/2022: COMMENTS IN TERMS OF SECTION 24K OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT , (ACT 107 OF 1998) AS AMENDED FOR THE APPROVAL OF AN ENVIRONMENTAL AUTHORISATION(EA) FOR THE PROPOSED DEVELOPMENT OF AN AREA FOR STOCKPILING AND PROCESSING OF DOLERITE ON PORTION OF THE REMAINING EXTENT OF THE FARM ELANDS SPRUIT NO. 5523, WITHIN THE ALFRED DUMA LOCAL AND UTHUKELA DISTRICT MUNICIPALITY, KZN.

1. The application for environmental authorization in terms of section 24(1) of National Environmental Management Act (NEMA) of 1998 for the above project has reference.
2. The Draft Basic Assessment Report (DBAR) was received by this Department, where GreenMined Environmental proposes to develop an area of about 10.5ha for stockpiling and processing of a dolerite.
3. This Department has reviewed the report and would like to comment as follows:

A. Layout plan

- The coordinates provided on the locality map are noted. However, the locality map must be zoomed-in to the proposed site and superimpose the activity including the associated land uses and infrastructure on the environmental sensitivities of the site encompassing areas to be avoided with buffers.
- The Layout plan is to indicate the four boundaries of the proposed area.
- The layout plan must be updated to include all sensitivity and their recommended buffer zones as identified in the specialist's studies.

B. Specialist studies

- Please ensure that all specialist studies include the specialists signed expertise, declaration and curriculum vitae.
- Please ensure that photographs from page 68-77 are clear as they are shaded in parts and printed in colour for ease of reference.

C. Public Participation

- The Draft Basic Assessment Report must be subjected to a Public Participation process and employ all methods as stipulated in Regulation 41 of NEMA Regulations, including copies of the supporting documents and inputs as per Appendix 3(1)(h)(ii).
 - "Application to access Department of Transport road via Collings Pass was in 2017." Please append comments and/or responses from the Department of Transport to utilise the aforementioned access road.
4. Please note that the project stated above may not commence prior to the relevant authorization being granted.
 5. This Department reserves the right to revise or withdraw these comments should any other information that contradicts the above come to light.
 6. Contact this Department if you have any queries regarding this correspondence.

Yours faithfully
