

Kogas A

- Quartzite
- Shale
- Conglomerate
- Laminated dolomite
- Jaspilite and Sedimentary manganese

- Basaltic pillow lava
- Diamicite (Glacial)
- Kogas quartz-chlorite mudstone and wackes
- Clastic textured shallow-water iron-formation

- R = Riebeckitic
- G = Greenalite lutite
- Sid = Siderite lutite
- Ferudstones

- Microbanded ferhythmite (Deep-water iron-formation)
- Carbonate turbidite and pelagic shale
- Oolitic carbonates and columnar stromatolites
- Cryptalgal laminated platform lagunal limestone and dolomite
- Giant stromatolitic domes (reefs) of open platform
- Cherty intertidal dolsparite
- Boompiaas carbonate platform deposits of Schmidtsdrif Subgroup
