

**PRELIMINARY SITE PLAN**

**PROSPECTING ACTIVITIES ON THE REMAINING EXTENT OF THE FARM ROOIFONTEIN NO 1722 (FORMERLY KNOWN AS SPECULATIE NO 217), BOSHOF MAGISTERIAL DISTRICT, FREE STATE PROVINCE**

FS 30/5/1/1/2/10261 PR

**NOTES:**

1. Phase 1: Geological desktop studies to establish whether or not other kimberlite bodies and/or alluvial gravel beds are present on the application area. The geological report will include recommendations and suggestions on the locality of the boreholes to be drilled during Phase 2.
2. Phase 2: RC/DC drilling on determined possible diamond carrying bodies.
3. Phase 3: Bulk sampling will follow once the results of Phases 1 & 2 were analysed and the bulk sampling locations established.
4. Phase 4: Drafting of detailed geological models and a -report using the prospecting results.
5. An updated Site Plan will be submitted to the DMRE once the position of the drill- and bulk sampling sites were determined.
6. Should the S102 application be approved the footprint of the bulk sampling pit/trench (within the ±5 ha extension area) must be determined in consultation with an archaeologist prior to commencement.
7. No prospecting may be allowed over existing infrastructure.
