Attention: Ms Sonette Smit

Dear Ms Smit

**RE: DBAR - Prospecting right for Marble (Dimension Stone), Limestone, Dimension Stone (General) on a portion of Portion 3 and the Remaining Extent of the Farm Welverdiend No 511 Magisterial District of Vanrhynsdorp Western Cape Province**

DMR Ref: WC 30/5/1/2/2/10375 PR

CapeNature would like to thank you for the opportunity to comment on this application. Herewith our revised comments. These comments replace those made in our letter dated 08 September 2021.

1. It is understood that this prospecting application is for non-invasive prospecting. It is understood that the entire prospecting activity on site will comprise traversing the farm on foot and collecting rock samples for analysis, and that vehicles will not be used to drive through vegetation. It is understood that this method will have negligible impact on biodiversity.
2. We object to the prospecting application considering that prospecting applications ultimately lead to mining applications and considering that the proposed prospecting area targets an area that has bearing on the Greater Cederberg Biodiversity Corridor and has been identified as an area for protected area expansion via proactive stewardship.
3. Note that should invasive prospecting after this activity be required, that we will object to such an application as per point 1, and considering that the prospecting area is highly sensitive from a biodiversity perspective as the majority of the area is ESA, contains watercourses as well as CBA areas. Furthermore, part of the area contains critically endangered Klawer Sandy Shrubland.
4. Although we understand that the impacts of prospecting are usually less than that of mining, prospecting often leads to mining and we do not support mining activities in the prospecting application area, as the environmental damage to ecological pattern and process is often

irreparable, as the receiving environment is unlikely to be rehabilitated to its ecological state prior to mining.

CapeNature reserves the right to revise initial comments and request further information based on any additional information that may be received.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Ismat Adams', written over a faint, illegible printed name.

Good day Mr Adams,

We thank you for your valuable participation and submitting comments,

We take note of your objection sent 12 October 2021, it will be included in our FBAR and submitted to DMRE for their decision making. It will be recommended based on the comments received by you that any future invasive activities and or mining should be limited to existing mining and already disturbed areas in order to prevent the loss of natural vegetation or disturbance to water courses.

I trust you find this in order,

Kind Regards/Vriendelike Groete

Dear Madam

**COMMENTS ON THE DRAFT BASIC ASSESSMENT REPORT FOR LISTED ACTIVITIES ASSOCIATED WITH A PROSPECTING RIGHT ON PORTION 3 OF THE FARM WELVERDIEND NO. 511, VANRHYNSDORP (DMRE REF: WC 30/5/1/1/2/10375 PR)**

The e-mail correspondence of 13 August 2021 containing a Background Information Document ("BID"), the Department's acknowledgement of receipt of the BID sent via e-mail on the same day, and the e-mail notification of 14 September 2021 regarding the availability of the Draft Basic Assessment Report ("BAR") for comment, refer.

Please find consolidated comment from various directorates within the Department on the Draft BAR and associated Environmental Management Programme ("EMPr") dated September 2021 that was downloaded from the website of the environmental assessment practitioner ("EAP").

1. Directorate: Development Management (Region 1) – Mr Bernard Kgosana ([Bernard.Kgosana@westerncape.gov.za](mailto:Bernard.Kgosana@westerncape.gov.za); Tel: (021) 483 0753):
  - 1.1. Based on the information contained in the Draft BAR, it appears that a screening tool report was generated for the proposed prospecting area. Please note that if the screening tool report was not provided with the application for environmental authorisation, it must be included with the Final BAR to be submitted to the competent authority.
  - 1.2. In addition, in accordance with the "*Procedures for the assessment and minimum criteria for reporting on identified environmental themes in terms of sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for environmental authorisation*" ("the Protocols") published in Government Notice ("GN") No. 320 of 20 March 2020 and GN No. 1150 of 30 October 2020, a site sensitivity verification report is required. The site sensitivity verification report was not included in the Draft BAR and must therefore be appended to the Final BAR.
  - 1.3. It is noted that "*Heritage Western Cape will be contacted for their perusal and commenting.*" Please note that comments from Heritage Western Cape ("HWC") must be included in the Final BAR. Note that should HWC request any specialist assessments, a Revised Draft BAR with the required specialist assessment(s) will need to be circulated to registered interested and affected parties ("I&APs") for commenting purposes.
  - 1.4. Proof of the public participation process conducted must be included in the Final BAR.
  - 1.5. The following comments regarding the EMPr (Part B of the Draft BAR) are offered:
    - 1.5.1. It is advised that the EMPr be dated and contain a cover page, which includes the property description and the competent authority's reference number, since the EMPr must be kept on the proposed prospecting area.
    - 1.5.2. All areas outside of the prospecting area must be regarded as "no-go" areas.
    - 1.5.3. Appropriate penalties for transgressions should be stipulated in the EMPr.
2. Directorate: Pollution and Chemicals Management – Ms Shehaam Brinkhuis ([Shehaam.Brinkhuis@westerncape.gov.za](mailto:Shehaam.Brinkhuis@westerncape.gov.za); Tel: (021) 483 8309):
  - 2.1. It is noted that prospecting activities involve non-invasive surface exploration only. The potential pollution related impacts are therefore anticipated to be limited, on the assumption that activities are restricted as indicated, and do not include drilling or equipment being brought onto site.
  - 2.2. Notwithstanding the above, it is nonetheless imperative that where vehicles are used to traverse the prospecting area, that refuelling is undertaken off-site, or within the yard of the existing mine on-site, in an area that makes use of unplasticized polyvinyl chloride lining and drip trays.
  - 2.3. The presence of a non-perennial watercourse on-site is noted. Page 58 of the Draft BAR states the following: "*The proposed site falls within the Olifants/ Doorn Water Management Area, in the E33G quaternary catchment area. According to the National Freshwater Ecosystem Priority Areas (NFEPA) map as presented by SANBI, a NFEPA river intersects with the proposed prospecting footprint falls but*

*is partially modified in which a large loss of natural habitat, biota and basic ecosystem function have occurred. The conservation status of the area will be further assessed and discussed during the Basic Assessment process of this application.*" Page 107 further states that "The conservation status of the area will be further assessed and discussed during the EIA process of this application."

- 2.3.1. Please clarify if a suitably qualified and experienced freshwater specialist provided input to the assessment or to confirm the EAP's characterisation of the identified river.
- 2.3.2. The above paragraph indicates that the conservation status of the area will be further assessed during the basic assessment or environmental impact assessment ("EIA") process of this application, although it is not apparent that this potential impact has been assessed in any detail within the application.
- 2.4. The EMPr omits any reference to impact management measures or outcomes relating to protection of water resources, despite the prospecting area including a defined and mapped watercourse.
- 2.5. It is recommended that the watercourse and a suitable buffer area on either side is excluded from prospecting activities. The potential identification of future mining activities across the river corridor is not supported.
- 2.6. Pages 121 and 126 of the EMPr refer to section 30 of the National Environmental Management Act, 1998 (Act No. 107 of 1998) ("NEMA") in terms of waste management. Please amend the EMPr to reference section 30 of the NEMA, 1998 in terms of the control of incidents and any accidental release of a hazardous substance. In the event of a significant spill or leak of hazardous substances (e.g. petrol, diesel, etc.) used during the proposed activities, such an incident(s) must be reported to the relevant authorities, including the Directorate: Pollution and Chemicals Management, in accordance with section 30 of the NEMA, 1998.
3. Directorate: Waste Management – Mr Thorsten Aab ([Thorsten.Aab@westerncape.gov.za](mailto:Thorsten.Aab@westerncape.gov.za); Tel: (021) 483 3009):
  - 3.1. As clearly indicated in the Draft BAR, the proposed prospecting activities are unlikely to pose any significant environmental risks, as only non-invasive surface exploration will be undertaken, the duration of prospecting is proposed to be very short, and the original area to be surveyed has been reduced from 35km<sup>2</sup> to 70.1ha. No excavation or core drilling is proposed.
  - 3.2. No waste management activity listed in terms of GN No. 921 of 29 November 2013 (as amended), promulgated in terms of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) will be triggered. This Directorate has no further comments on the Draft BAR.
4. Directorate: Development Facilitation – Mr Ryan Apolles / Mr Ralph van Delin ([Ryan.Apolles@westerncape.gov.za](mailto:Ryan.Apolles@westerncape.gov.za) / [Ralph.vanDelin@westerncape.gov.za](mailto:Ralph.vanDelin@westerncape.gov.za); Tel: (021) 483 2817/ 5574):
  - 4.1. Per paragraph 2.3. above, this Directorate requires clarity on the statement in the Draft BAR pertaining to specialist assessments that will be undertaken to assess the hydrology and surface water resources of the prospecting area. It is stated on pages 6, 58, 77, 93 and 107 of the Draft BAR that the conservation status of the area will be further assessed and discussed during the basic process/ EIA

process of the application. Please note that specialist assessments must be undertaken prior to the release of a Draft BAR for public participation. Should any surface water assessment be undertaken for the prospecting right application, then said assessment must be made available to registered I&APs via the release of a Revised Draft BAR. This Directorate further requires clarity whether the EAP is referring to specialist assessments that will be undertaken as part of a (separate) EIA process that will be lodged for a mining right or permit application should the results of prospecting activities be deemed favourable.

- 4.2. The EAP is advised that final comment from HWC must be obtained prior to the submission of the Final BAR to the competent authority.
5. Directorate: Air Quality Management – Mr Sibusiso Sinuka ([Sibusiso.Sinuka@westerncape.gov.za](mailto:Sibusiso.Sinuka@westerncape.gov.za); Tel: (021) 483 2805):
  - 5.1. It is noted in the Draft BAR that dust pollution is predicted to have a negligible impact as the proposed prospecting activities are deemed to be non-invasive. Dust may be created from vehicles traversing the prospecting area and this must be monitored to not cause a nuisance. Dust generated from vehicles must comply with the National Dust Control Regulations (GN No. R. 827 of 1 November 2013) promulgated in terms of the National Environmental Management: Air Quality Act, 2004 (Act No. 39 of 2004). These regulations prohibit a person from conducting any activity in such a way as to give rise to dust in such quantities and concentrations that the dust, or dust fallout, has a detrimental effect on the environment, including human health.
  - 5.2. It is noted that noise generated by the proposed activities will have a negligible impact. It is expected that any potential noise generated on-site by vehicles must comply with the Western Cape Noise Control Regulations (Provincial Notice 200/2013) of 20 June 2013.
  - 5.3. Air emission impacts have been noted to have a negligible impact. All potential air pollutants on-site must be monitored and if causing significant emissions, must be strictly managed as per the recommendations stipulated in the EMPr.
  - 5.4. Kindly be advised that the Air Quality Officer for Matzikama Municipality must also be engaged with regarding the application. The designated official is Ms Thesme van Zyl and can be contacted on telephone (027) 201 3351 or on e-mail: [thesme@matzikama.gov.za](mailto:thesme@matzikama.gov.za).
6. The applicant is reminded of its “*general duty of care towards the environment*” as prescribed in section 28 of the NEMA, 1998 which states that “*Every person who causes, has caused or may cause significant pollution or degradation of the environment must take reasonable measures to prevent such pollution or degradation from occurring, continuing or recurring, or, in so far as such harm to the environment is authorised by law or cannot reasonably be avoided or stopped, to minimise and rectify such pollution or degradation of the environment.*”
7. Please direct all enquiries to the officials indicated in this correspondence should you require any clarity on any of the comments provided.

8. The Department reserves the right to revise or withdraw its comments and request further information based on any new information received.

Yours faithfully

**Thea**

Good day Thea,

Please see attached response to your comments as received.

All comments received for you as well as our response will be incorporated in the Final Basic Assessment Report to be submitted to DMRE for their consideration.

We trust you will find this in order. Please do not hesitate to contact us in the event of any uncertainties.

Kind Regards/Vriendelike Groete

Dear Madams /Sirs

**RE: COMMENTS RECEIVED ON THE APPLICATION FOR A PROSPECTING RIGHT APPLICATION IN TERMS OF SECTION 16 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT NO 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS OF 2014 (AS AMENDED) BY PARAMON (PTY) LTD, FOR THE PROSPECTING OF MARBLE (DIMENSION STONE), LIMESTONE, DIMENSION STONE (GENERAL), 70.077 HA ON A PORTION OF PORTION 3 OF THE FARM WELVERDIEND NO 511 MAGISTERIAL DISTRICT OF VANRHYNSDORP WESTERN CAPE PROVINCE (DMRE REF: (WC) 30/5/1/1/2/10375 PR).**

The above matter as well as letter received from you dated 15 October 2021 refers. Please see responses to your comments listed below:

1. Directorate: Development Management (Region 1) – Mr Bernard Kgosana  
(Bernard.Kgosana@westerncape.gov.za; Tel: (021) 483 0753):
  - 1.1. Based on the information contained in the Draft BAR, it appears that a screening tool report was generated for the proposed prospecting area. Please note that if the screening tool report was not provided with the

**the goal isn't to live forever, it is to protect a planet that will**

application for environmental authorisation, it must be included with the Final BAR to be submitted to the competent authority.

■ Comment noted, this report has been attached to the FBAR as Appendix M

1.2. In addition, in accordance with the "Procedures for the assessment and minimum criteria for reporting on identified environmental themes in terms of sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for environmental authorisation ("the Protocols") published in Government Notice ("GN") No. 320 of 20 March 2020 and GN No. 1150 of 30 October 2020, a site sensitivity verification report is required. The site sensitivity verification report was not included in the Draft BAR and must therefore be appended to the Final BAR.

■ Comment noted, this report has been attached to the FBAR as Appendix N

1.3. It is noted that "Heritage Western Cape will be contacted for their perusal and commenting." Please note that comments from Heritage Western Cape ("HWC") must be included in the Final BAR. Note that should HWC request any specialist assessments, a Revised Draft BAR with the required specialist assessment(s) will need to be circulated to registered interested and affected parties ("I&APs") for commenting purposes.

■ Comment was requested from HWC but not yet received by the printing of this document, as soon as comments are received it will be forwarded to DMRE

1.4. Proof of the public participation process conducted must be included in the Final BAR.

■ Comment noted, this report has been attached to the FBAR as Appendix G1&2

1.5. The following comments regarding the EMPr (Part B of the Draft BAR) are offered:

1.5.1. It is advised that the EMPr be dated and contain a cover page, which includes the property description and the competent authority's reference number, since the EMPr must be kept on the proposed prospecting area.

■ Comment noted this will be implemented and adhered to

1.5.2. All areas outside of the prospecting area must be regarded as "no-go" areas.

■ Comment noted this will be implemented and adhered to, please also refer to page 21 and 39 of the Draft BAR where it is clearly stated that "All activities will be contained within the boundaries of the site"

1.5.3. Appropriate penalties for transgressions should be stipulated in the EMPr.

■ Comment noted this will be implemented and adhered to

2. Directorate: Pollution and Chemicals Management – Ms Shehaam Brinkhuis ([Shehaam.Brinkhuis@westerncape.gov.za](mailto:Shehaam.Brinkhuis@westerncape.gov.za) Tel: (021) 483 8309):

2.1. It is noted that prospecting activities involve non-invasive surface exploration only. The potential pollution related impacts are therefore anticipated to be limited, on the assumption that activities are restricted as indicated, and do not include drilling or equipment being brought onto site.

2.2. Notwithstanding the above, it is nonetheless imperative that where vehicles are used to traverse the prospecting area, that refuelling is undertaken off-site, or within the yard of the existing mine on-site, in an area that makes use of unplasticized polyvinyl chloride lining and drip trays.

■ Comment noted this will be implemented and adhered to

2.3. The presence of a non-perennial watercourse on-site is noted. Page 58 of the Draft BAR states the following: "The proposed site falls within the Olifants/ Doorn Water Management Area, in the E33G quaternary catchment area. According to the National Freshwater Ecosystem Priority Areas (NFEPA) map as presented by SANBI, a NFEPA river intersects with the proposed prospecting footprint falls but *is partially modified in which a large loss of natural habitat, biota and basic ecosystem function have occurred. The conservation status of the area will be further assessed and discussed during the Basic Assessment process of this application.*" Page 107 further states that "*The conservation status of the area will be further assessed and discussed during the EIA process of this application.*"

■ Invasive prospecting was planned during the initial phases of the project but excluded during the EIA basic process/ EIA process of the application, therefore no further specialist assessments were required to be undertaken.

2.4. Please clarify if a suitably qualified and experienced freshwater specialist provided input to the assessment or to confirm the EAP's characterisation of the identified river.

2.5. The above paragraph indicates that the conservation status of the area will be further assessed during the basic assessment or environmental impact assessment ("EIA") process of this application, although it is not apparent that this potential impact has been assessed in any detail within the application.

2.6. The EMPr omits any reference to impact management measures or outcomes relating to protection of water

resources, despite the prospecting area including a defined and mapped watercourse.

2.7. It is recommended that the watercourse and a suitable buffer area on either side is excluded from prospecting activities. The potential identification of future mining activities across the river corridor is not supported.

- As per the Freshwater Statement compiled by Enviroworks dated October 2021 (attached as appendix O2 to FBAR) – Considering the specific project description above (as provided to the specialist by the Consultant) and the non-invasive prospecting method proposed, it is not anticipated that the prospecting activities will generate a noteworthy impact on the non-perennial watercourses (please refer to Appendix O2 Figure 2) during the one week of prospecting work. The prospecting will involve driving vehicles on existing unpaved access roads and traversing the area on foot, while also collecting loose surface rock samples. Even though this statement does not constitute a full specialist assessment and characterization of the non-perennial watercourses, it is the opinion of the specialist, that this detailed freshwater study will not be necessary at this stage, considering the current prospecting description. Even though this statement does not constitute a full specialist assessment and characterization of the non-perennial watercourses, it is the opinion of the specialist, that this detailed freshwater study will not be necessary at this stage, considering the current prospecting description. A portion of the non-perennial watercourse has been transformed by an old marble mine, just downstream of the artificial dam. There is also evidence of past mining and disturbance in the watercourse downstream from the old mine. This was confirmed by a site visit on 07 October 2021. It should be noted that the purpose of this site visit did not include assessing the watercourses over the entire prospecting right, nor did it include assessing potential impacts of the proposed prospecting.

Watercourses are nevertheless important ecological features in the landscape, therefore:

- Should this prospecting description change, the need for a more detailed freshwater study should be re-evaluated.
- Should the prospecting right be followed by a mining permit/mining application, it is recommended that a more detailed freshwater study be commissioned.

It is recommended that disturbance and damage to vegetation and the soil surface or channel morphology be avoided in the mapped (see appendix MO - Figure 2) non-perennial watercourses (this includes their bed and banks).

Even though it is not anticipated that the current planned prospecting activities will have a noteworthy impact on watercourses, it is noted that the Department will not support the potential identification of

future mining activities across the river corridor.

The applicant should be aware that prospecting within the watercourse corridor does not mean that the Department will support potential identification of future mining activities across the river corridor.

Should this prospecting description change, the need for a more detailed freshwater study should be re-evaluated.

Should the prospecting right be followed by a mining permit/mining application, it is recommended that a more detailed freshwater study be commissioned. This study should, amongst the other requirements of a freshwater specialist study, recommend a suitable buffer for watercourses.

It is recommended that the Consultant and the Applicant take note of the following comments from DEA&DP:

6. The applicant is reminded of its "general duty of care towards the environment" as prescribed in section 28 of the NEMA, 1998 which states that "Every person who causes, has caused or may cause significant pollution or degradation of the environment must take reasonable measures to prevent such pollution or degradation from occurring, continuing or recurring, or, in so far as such harm to the environment is authorised by law or cannot reasonably be avoided or stopped, to minimise and rectify such pollution or degradation of the environment".

- 2.8. Pages 121 and 126 of the EMP<sub>r</sub> refer to section 30 of the National Environmental Management Act, 1998 (Act No. 107 of 1998) ("NEMA") in terms of waste management. Please amend the EMP<sub>r</sub> to reference section 30 of the NEMA, 1998 in terms of the control of incidents and any accidental release of a hazardous substance. In the event of a significant spill or leak of hazardous substances (e.g. petrol, diesel, etc.) used during the proposed activities, such an incident(s) must be reported to the relevant authorities, including the Directorate: Pollution and Chemicals Management, in accordance with section 30 of the NEMA, 1998.

■ Comment noted, this has been amended in to the EMP<sub>r</sub>

3. Directorate: Waste Management – Mr Thorsten Aab ([Thorsten.Aab@westerncape.gov.za](mailto:Thorsten.Aab@westerncape.gov.za) Tel: (021) 483 3009):
- 3.1. As clearly indicated in the Draft BAR, the proposed prospecting activities are unlikely to pose any significant environmental risks, as only non-invasive surface exploration will be undertaken, the duration of prospecting is proposed to be very short, and the original area to be surveyed has been reduced from 35km<sup>2</sup> to 70.1ha.

No excavation or core drilling is proposed.

3.2. No waste management activity listed in terms of GN No. 921 of 29 November 2013 (as amended), promulgated in terms of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) will be triggered. This Directorate has no further comments on the Draft BAR.

■ Comment noted and I thank you for taking part in the commenting process.

4. Directorate: Development Facilitation – Mr Ryan Apolles / Mr Ralph van Delin ([Ryan.Apolles@westernape.gov.za](mailto:Ryan.Apolles@westernape.gov.za) / [Ralph.vanDelin@westerncape.gov.za](mailto:Ralph.vanDelin@westerncape.gov.za) Tel: (021) 483 2817/ 5574):

4.1. Per paragraph 2.3. above, this Directorate requires clarity on the statement in the Draft BAR pertaining to specialist assessments that will be undertaken to assess the hydrology and surface water resources of the prospecting area. It is stated on pages 6, 58, 77, 93 and 107 of the Draft BAR that the conservation status of the area will be further assessed and discussed during the basic process/ EIA process of the application. Please note that specialist assessments must be undertaken prior to the release of a Draft BAR for public participation. Should any surface water assessment be undertaken for the prospecting right application, then said assessment must be made available to registered I&APs via the release of a Revised Draft BAR. This Directorate further requires clarity whether the EAP is referring to specialist assessments that will be undertaken as part of a (separate) EIA process that will be lodged for a mining right or permit application should the results of prospecting activities be deemed favourable.

■ Invasive prospecting was planned during the initial phases of the project but excluded during the EIA basic process/ EIA process of the application, therefore no further specialist assessments were required to be undertaken.

4.2. The EAP is advised that final comment from HWC must be obtained prior to the submission of the Final BAR to the competent authority.

■ Comment was requested from HWC but not yet received by the printing of this document, as soon as comments are received it will be forwarded to DMRE

5. Directorate: Air Quality Management – Mr Sibusiso Sinuka ([Sibusiso.Sinuka@westernape.gov.za](mailto:Sibusiso.Sinuka@westernape.gov.za) Tel: (021) 483 2805):

5.1. It is noted in the Draft BAR that dust pollution is predicted to have a negligible impact as the proposed prospecting activities are deemed to be non-invasive. Dust may be created from vehicles traversing the

prospecting area and this must be monitored to not cause a nuisance. Dust generated from vehicles must comply with the National Dust Control Regulations (GN No. R. 827 of 1 November 2013) promulgated in terms of the National Environmental Management: Air Quality Act, 2004 (Act No. 39 of 2004). These regulations prohibit a person from conducting any activity in such a way as to give rise to dust in such quantities and concentrations that the dust, or dust fallout, has a detrimental effect on the environment, including human health.

- Comment noted this will be implemented and adhered to
- As per the Air Quality Statement compiled by Enviroworks dated October 2021 (attached as appendix O1 to FBAR) - Considering the specific project description above (as provided to the specialist by the Consultant), the rural receiving environment and low population density in the immediate surrounds, it is not anticipated that the prospecting activities will generate a significant dust nuisance from driving the two Light Duty Vehicles during the one week of prospecting work on unpaved existing access roads. Further to this, fugitive dust emissions due to vehicles driving on unpaved roads are often limited close to the source, and temporary in nature (being restricted to the one week of prospecting).
  - A Complaints register should be kept on site during the prospecting activities. If any complaints regarding dust nuisance are received, additional dust control and monitoring measures should be investigated and implemented.
  - Reduce driving speed of vehicles during prospecting, as increased vehicle speeds result in increased quantities of fugitive dust.

5.2. It is noted that noise generated by the proposed activities will have a negligible impact. It is expected that any potential noise generated on-site by vehicles must comply with the Western Cape Noise Control Regulations (Provincial Notice 200/2013) of 20 June 2013.

- Comment noted this will be implemented and adhered to

5.3. Air emission impacts have been noted to have a negligible impact. All potential air pollutants on-site must be monitored and if causing significant emissions, must be strictly managed as per the recommendations stipulated in the EMPr.

- Comment noted this will be implemented and adhered to

5.4. Kindly be advised that the Air Quality Officer for Matzikama Municipality must also be engaged with regarding the application. The designated official is Ms Thesme van Zyl and can be contacted on telephone (027) 201 3351 or on e-mail: [thesme@matzikama.gov.za](mailto:thesme@matzikama.gov.za).

- Comment was requested from Matzikama Municipality - Air Quality Officer but not yet received by the printing of this document, as soon as comments are received it will be forwarded to DMRE

5.5. The applicant is reminded of its "*general duty of care towards the environment*" as prescribed in section 28 of the NEMA, 1998 which states that "*Every person who causes, has caused or may cause significant pollution or degradation of the environment must take reasonable measures to prevent such pollution or degradation from occurring, continuing or recurring, or, in so far as such harm to the environment is authorised by law or cannot reasonably be avoided or stopped, to minimise and rectify such pollution or degradation of the environment.*"

- Comment noted this will be implemented and adhered to

All comments received for you as well as our response will be incorporated in the Final Basic Assessment Report to be submitted to DMRE for their consideration.

We trust you will find this in order. Please do not hesitate to contact us in the event of any uncertainties.

A handwritten signature in black ink, appearing to read "Sonette Smit", is written over the typed name.

Dear Sonette,

I hereby acknowledge receipt of your e-mail and the C&RR. Thank you for the responses to the Department's comments.

It is reiterated that should HWC require additional heritage specialist studies, these will have to be undertaken prior to the submission of the Final BAR to DMRE.

We look forward to receive a copy of HWC's Final Comments please.

Kind regards,  
Adri

Good Day

The person who is on site permanently will do as long as we will have access on site and somebody shows us where the prospecting will occur, that should be fine. All we will need are the directions to the site and the contact details of the person stationed on the property. Then 22<sup>nd</sup> is confirmed with that person.

Department of Mineral Resources  
Private Bag X 9  
ROGGE BAY  
8012  
Dear Sir

**Attention:** Peter Mohasoa

**COMMENTS ON FOR PROSPECTING RIGHT APPLICATION IN TERMS OF SECTION 16 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT NO 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS OF 2014 (AS AMENDED) BY PARAMON (PTY) LTD, FOR THE PROSPECTING OF MARBLE (DIMENSION STONE), LIMESTONE, DIMENSION STONE (GENERAL), 70.077 HA ON A PORTION OF PORTION 3 OF THE FARM WELVERDIEND NO 511 MAGISTERIAL DISTRICT OF VANRHYNSDORP WESTERN CAPE PROVINCE**

Reference is made to the above-mentioned document dated 14 September 2021 with a Reference No: WC 30/5/1/1/2/10375 PR.

The Department has no objections at this stage to the prospecting right application submitted to DMR by Paramon (Pty) Ltd subject to compliance to the following conditions:

1. Any development within 1:100-year floodline or within the riparian habitat constitutes a water use licence in terms of section 21 (c) and (i) of the National Water Act, 1998 (Act 36 of 1998) and will require authorisation before any development may commence.
2. If any portable toilets would be used on-site during construction and/or operational phase of the development; such toilet facilities must be located outside of the 1:100-year floodline and must be regularly emptied at a municipal wastewater treatment works.
3. Solid and chemical waste generated from construction and operational phases of the development must be kept away from drainage line.
4. No abstraction of surface water or ground water may take place without the prior authorization from this Department unless it is a Schedule 1 use or an Existing Lawful Use.

5. Where solid waste disposal is to take place on site, ensure that only non-toxic materials which have no risk of polluting the groundwater, are buried in designated approved areas at acceptable depths below ground level.
6. No surface, ground or storm water may be polluted as a result of any activities on the site.
7. The person who owns, controls, occupies, or uses the land in question is responsible for taking measures to prevent any occurrence of pollution to water resources.
8. Rehabilitation plan must be formulated and submitted to this Department for comments. If the rehabilitation of the site will include the storage of water, authorization will be required before any water is stored.
9. The rehabilitation of the site must ensure that the final condition of the site is environmentally acceptable and that there will be no adverse long-term effects on the surrounding environment especially the water resources post mining activities.
10. All requirements in the Regulations on use of water for mining and related activities aimed at the protection of water resources as contained in Government Notice No 704 dated 4 June 2004 must be adhered to.
11. Please note that all requirements as stipulated in the National Water Act (NWA) 1998(Act No. 36 of 1998) must be adhered to.
12. This Department reserves the right to amend and / or add to the comments made above in the light of subsequent information received.

Should there be any queries, please do not hesitate to contact this office.

**Kind Regards**
