ENVIRONMENTAL NOTIFICATION:

APPLICATION FOR AN INTEGRATED ENVIRONMENTAL AUTHORISATION AND INTEGRATED WATER USE LICENSE IN SUPPORT OF A MINING RIGHT APPLICATION FOR SAND, AGGREGATE/GRAVEL AND DIAMOND (ALLUVIAL), IN THE FREE STATE PROVINCE OF SOUTH AFRICA

Notice is hereby given in terms of Section 22 of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002, as amended) (MPRDA), Regulation 17 of the Environmental Impact Assessment (2014) (GNR 325) promulgated under the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA) and Regulation 41 of the National Water Act, 1998 (Act 36 of 1998) (NWA) of an application for a Mining Right (MR), an Integrated Environmental Authorisation (IEA) and Integrated Water Use License (IWUL) to mine sand, aggregate/gravel and diamond (alluvial) in the Free State Province of South Africa.

APPLICANT AND BACKGROUND
Goosebay Farm (Pty) Ltd (wholly owned by the Van Wyk Land Development Corporation (Pty) Ltd "VLDC" Group) submitted an application for a Mining Right and Integrated Environmental Authorisation to the Free State Department of Mineral Resources (DMR) Regional Manager in November 2017. This application was allocated the reference number: FS 30/5/1/2/2/10042 MR. However, this initial application was withdrawn by the Applicant due to the following reasons:

- Change of Applicant in order to fulfil the Broad-Based Black Economic Empowerment requirements
- Change of the Environmental Assessment Practitioner (EAP) and appointment of a new EAP (Shango Solutions) to initiate a new Mining Right application process
- Pre-application meeting with the Department of Water and Sanitation to determine a new mining footprint with minimal risks to water resources
- Meeting with the Local Municipality to align the associated Social and Labour Plan with the relevant Local Economic Development projects
- Unprecedented number of objections from I&APs due to the sensitivity of the mining footprint

A new application under a new company, Monte Cristo Commercial Park (Pty) Ltd (wholly owned by the VLDC Group - to be empowered according to the BEE requirements) was submitted on the 24th August 2018 and has been allocated the reference number: FS 30/5/1/2/2/10048 MR.

PROJECT LOCATION AND DESCRIPTION
The application area borders the Vaal River and covers an aerial extent of 858.5825 hectares (ha). It extends over three farm portions, namely the (i) Remaining extent (Re), (ii) Remainder of Portion 1 and (iii) Portion 3 of the farm Woodlands 407, and is situated approximately 15 kilometres (km) northwest of the town of Sasolburg. It falls under the Ngwathe Local Municipality, within the jurisdiction of Fezile Dabi District Municipality, in the Free State Province of South Africa.

Mining under the Mining Right will be undertaken by a "truck and shovel" method utilising suitably sized diesel driven equipment, and a 363.5 ha area will be demarcated for open pit mining and associated infrastructure. The following infrastructure components will be established for the mining process:

- Dams
- Wash plant for sand mining
- Rotary pan processing plant for alluvial diamond mining
- Potential alluvial diamond X-ray and/or flow sorting facility
- Clean and dirty water management infrastructure (pollution control dam, water recycling plant settling ponds, storm water runoff structures, water pipeline network as well as pump stations)
- Drying and screening plants
- Topsoil and run-of mine stockpiles

Additional mining and processing infrastructure will include haul roads, workshops, weigh bridge and offices, conveyors, powerlines, offices, change houses, dormitory and recreation facilities and portable chemical ablution facilities for employees during the construction and operational phases.

Any mining or mineral processing related material that cannot be sold will be used to backfill the mined out pits during rollover rehabilitation. The anticipated life of the mine is 30 years with an option to renew if the mining programme is not yet complete.

The closure objective is to develop the farm portions as an eco-estate with residential and hospitality facilities on the banks of the Vaal River. The application area is currently utilised as a game farm and this will continue to remain the primary land use with other agricultural activities such as crop production. Mining is an interim land use and it will be conducted in a sensitive manner that will not have a negative impact on the game.
