BACKGROUND INFORMATION DOCUMENT

11 September 2020

To whom it may concern

RE: NOTICE OF APPLICATION IN TERMS OF SECTION 102 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED 2017).

BACKGROUND INFORMATION

Wansley Quarries has been a trusted suppliers of weathered dolerite in the greater East London area for the past 19 years. A mining licence was issued to David Peter Coetzer (trading as Wansley Quarries) that was converted to a new order mining right in 2016. In 2020, the mining right was ceded, in terms of Section 11 of the MPRDA, 2002, to Wansley Siyakhula (Pty) Ltd that is the current mining right holder (hereinafter referred to as the "MR Holder"). The mining right is valid until 16 June 2026, with an approved footprint of 5.2149 ha over an area of Portion 1 of Farm No 652, in the East London magisterial district of the Eastern Cape Province.

To date the mining method entailed removal of the weathered dolerite through direct extraction with an excavator. Mining focused on the soft material as blasting was not approved for the mining right. Upon excavation of the gravel, a limited stockpile was established as most material was directly loaded onto haul trucks that transported it to the clients. A crushing and screening plant was established to process material when needed.

PROJECT PROPOSAL

The MR Holder intends submitting a Section 102 ("S102") amendment application, in terms of the MPRDA, 2002, to the DMR to:

- align the mining documentation with the above mentioned Section 11 approval;
- comply with the latest department and legislative requirements;
- add blasting and processing of material to the EMPR; and
- expand the mining footprint to 37.8575 ha.

the goal isn't to live forever, it is to protect a planet that will

BACKGROUND INFORMATION DOCUMENT

LEGAL COMPLIANCE

The proposed Section 102 (MPRDA) amendment application triggers the following listed activities in terms of the National Environmental Management Act, 1998 (Act 107 of 1998) and the Environmental Impact Assessment Regulations 2014 (as amended 2017) and therefore requires an environmental impact assessment (EIA) (full EIA) that assess project specific environmental impacts and alternatives, consider public input, and propose mitigation measures, to ultimately culminate in an environmental management programme that informs the competent authority (Department of Mineral Resources) when considering the environmental authorisation:

■ GNR 324 Listing Notice 3 of 2017 Activity 4:

The development of a road wider than 4 meters with a reserve less than 13.5 meters.

a) *Eastern Cape*

i) *Outside urban area:*

(ee)Critical biodiversity areas as identified in systematic biodiversity plans adopted by the competent authority or in bioregional plans.

■ GNR 324 Listing Notice 3 of 2017 Activity 12:

The clearance of an area of 300 square meters or more of indigenous vegetation except where such clearance of indigenous vegetation is required for maintenance purposes undertaken in accordance with a maintenance management plan.

a) *Eastern Cape*

ii) *Within critical biodiversity areas identified in bioregional plans.*

■ GNR 324 Listing Notice 3 of 2017 Activity 14:

The development of-

(i) dams or weirs, where the dam or weir, including infrastructure and water surface area exceeds 10 square meters; or

(ii) infrastructure or structures with a physical footprint of 10 square metres or more;

where such development occurs-

(a) within a watercourse;

(b) in front of a development setback; or

(c) if no development setback exists, within 32 meters of a watercourse, measured from the edge of a watercourse.

excluding the development of infrastructure or structures within existing ports or harbours that will not increase the development footprint of the port or harbour.

a) *Eastern Cape*

BACKGROUND INFORMATION DOCUMENT

i) *Outside urban areas:*

(ff) *Critical biodiversity areas or ecosystem service areas as identified in systematic biodiversity plans adopted by the competent authority or in bioregional plans.*

■ GNR 325 Listing Notice 2 of 2017 Activity 15:

The clearance of an area of 20 hectare or more of indigenous vegetation, excluding where such clearances of indigenous vegetation is required for –

- (i) the undertaking of a linear activity; or*
- (ii) maintenance purposes undertaken in accordance with a maintenance management plan.*

■ GNR 325 Listing Notice 2 of 2017 Activity 17:

Any activity including the operation of that activity which requires a mining right as contemplated in section 22 of the mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002), including-

- (a) associated infrastructure, structures and earthworks, directly related to the extraction of a mineral resources;*
or
- (b) the primary processing of a mineral resource including winning, extraction, classifying, concentrating, crushing, screening or washing.*

but excluding the secondary processing of a mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource in which case activity 6 in this Notice applies.

■ GNR 327 Listing Notice 1 of 2017 Activity 12:

The development of-

- (i) dams or weirs, where the dam or weir, including infrastructure and water surface area, exceeds 100 square meters; or*
- (ii) infrastructure or structures with a physical footprint of 100 square metres or more;*
where such development occurs-
 - (a) within a watercourse;*
 - (b) in front of a development setback; or*
 - (c) if no development setback exists, within 32 meters of a watercourse, measured from the edge of a watercourse.*

excluding –

- (aa) the development of infrastructure or structures within existing ports or harbours that will not increase the development footprint of the port or harbour;*
- (bb) where such development activities are related to the development of a port or harbour, in which case activity 26 in Listing Notice 2 of 2014 applies;*

BACKGROUND INFORMATION DOCUMENT

- (cc) activities listed in activity 14 in Listing Notice 2 of 2014 or activity 14 in Listing Notice 3 of 2014, in which case that activity applies;*
- (dd) where such development occurs within an urban area;*
- (ee) where such development occurs within existing roads, road reserves or railway line reserves; or*
- (ff) the development of temporary infrastructure or structures where such infrastructure or structures will be removed within 6 weeks of the commencement of development and where indigenous vegetation will not be cleared.*

■ GNR 327 Listing Notice 1 of 2017 Activity 13:

The development of facilities or infrastructure for the off-stream storage of water, including dams and reservoirs, with a combined capacity of 50 000 cubic meters or more, unless such storage falls within the ambit of activity 16 in Listing Notice 2 of 2014.

■ GNR 327 Listing Notice 1 of 2017 Activity 19:

The infilling or depositing of any material of more than 10 cubic meters into, or the dredging, excavation, removal or moving of soil, sand, shells, shell grit, pebbles or rock of more than 10 cubic meters from a watercourse; but excluding where such infilling, depositing, dredging, excavation, removal or moving—

- (a) will occur behind a development setback;*
- (b) is for maintenance purposes undertaken in accordance with a maintenance management plan;*
- (c) falls within the ambit of activity 21 in this Notice, in which case that activity applies;*
- (d) occurs within existing ports or harbours that will not increase the development footprint of the port or harbour;*
or
- (e) where such development is related to the development of a port or harbour, in which case activity 26 in Listing Notice 2 of 2014 applies.*

■ GNR 327 Listing Notice 1 of 2017 Activity 22:

The decommissioning of any activity requiring –

- (i) a closure certificate in terms of section 43 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002); or*
- (ii) a prospecting right, mining right, mining permit, production right or exploration right, where the throughput of the activity has reduced by 90% or more over a period of 5 years excluding where the competent authority has in writing agreed that such reduction in throughput does not constitute closure.*

but excluding the decommissioning of an activity relating to the secondary processing of a –

- (a) mineral resource, including the smelting, beneficiation, reduction, refining, calcining or gasification of the mineral resource; or*
- (b) petroleum resource, including the refining of gas, beneficiation, oil or petroleum products; –*

BACKGROUND INFORMATION DOCUMENT

in which case activity 31 in this Notice applies.

■ GNR 327 Listing Notice 1 of 2017 Activity 24:

The development of a road –

(ii) with a reserve wider than 13.5 meters, or where no reserve exists where the road is wider than 8 meters; but excluding a road –

(a) which is identified and included in activity 27 in Listing Notice 2 of 2014;

(b) where the entire road falls within an urban area; or

(c) which is 1 kilometre or shorter.

■ GNR 327 Listing Notice 1 of 2017 Activity 28:

Residential, mixed, retail, commercial, industrial or institutional developments where such land was used for agriculture, game farming, equestrian purposes or afforestation on or after 01 April 1998 and where such development:

(ii) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare;

excluding where such land has already been developed for residential, mixed, retail, commercial, industrial or institutional purposes.

OTHER LEGISLATION TRIGGERED BY THE PROPOSED PROJECT:

- An application for the amendment of the mining right in terms of Section 102 of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) will be submitted to the Department of Mineral Resources – Eastern Cape Province.
- The MR Holder is in the process of registering the various water uses in terms of Section 21 of the National Water Act, 1998 (Act No 36 of 1998) with the Department of Water and Sanitation.
- An application for consent of the Minister to review the Social and Labour Plan, as set out more fully in Part II of the Amendments to the Mineral and Petroleum Resources Development Regulations, 2020 and in line with the NEMA EIA Regulations, 2014 (as amended).

BACKGROUND INFORMATION DOCUMENT

BRIEF SITE DESCRIPTION

GEOLOGY AND SOIL:

A sequence of sedimentary rock such as mudstones, sandstones and shales of the Beaufort Group and Karoo Supergroup underlie the East London area. Dolerites, the parent material of weathered dolerite are poorly represented in surface outcrops and mostly form sheets, which are seldom concordant and most of the time tip at both steeper and shallower altitude than the surrounding sediments. At Wansley Quarry, the weathered dolerite is restricted to the top of the production face with a sandstone or shale layer. The dome like structure of the weathered dolerite outcrop at the mining area dips to the sides which have a shale layer at the bottom. Boulders are common in the weathered dolerite outcrop with more solid dolerite found beneath the outcrop.

HYDROLOGY:

Wansley Quarry (including the proposed expansion area) falls within the Amatola Sub-Water Management Area which is managed as part of the Mzimvubu to Kies Kamma Water Management Area by the Department of Water and Sanitation (DWS). Two drainage lines cross through the proposed extension footprint and the area is classified as a River FEPA (Freshwater Priority Area) according to the National Wetlands and NFEPA map of SANBI. The importance of the drainage lines and conservation status of the area will be assessed by a specialist and discussed during the EIA process of this application.

FAUNA AND FLORA:

According to Mucina and Rutherford (2012) the expansion area extends over the vegetation type known as the Albany Coastal Belt (AT 9). The Albany Coastal Belt is classified as Least Threatened. According to the Eastern Cape Biodiversity Conservation Plan (as shown in the figure below), the Eastern Cape Biodiversity Conservation Plan (ECBCP) – Terrestrial Critical Biodiversity Area (CBA) extends across the earmarked area. An ecologist was appointed to conduct a vegetation study of the proposed footprint area. This report will be available as part of the EIA documentation.

BACKGROUND INFORMATION DOCUMENT

Figure 2: Image showing the presence of the ECBCP CBA (green shading) in relation to the proposed expansion footprint (crossed polygon).

Fauna present within the boundaries of the property comprise of natural occurring small rodents, reptiles and various bird species. No protected or red data faunal species were identified within the earmarked footprint, and the project is expected to have a negligible impact in this regard.

LAND USE:

The project area is located in the Buffalo City Metropolitan Municipality, with East London being the nearest town. East London is the second largest industrial centre in the province. The land use of the earmarked property mainly comprises of grazing, mixed with dolerite mining. The surrounding properties are mainly used for a variety of mixed agricultural purposes.

AIR AND NOISE QUALITY:

The wind patterns in the East London area are highly influenced by seasonal variations. According to the wind statistics as presented on Windfinder.com the prevalent wind direction distribution is in a west to southern direction from April to October. From November to March the wind mainly blows in a south-eastern direction. The ambient noise levels of the greater surrounding area are low representing that of a rural area, with the noise levels of the study area (immediate surroundings) impacted on by farming- and mining operations.

BACKGROUND INFORMATION DOCUMENT

HERITAGE:

The proposed expansion area where selected over an area that was historically used for pineapple cultivation extending towards the north-west of the current mining area. No known areas of heritage, archaeological and/or palaeontological importance were identified within the earmarked footprint. However, this will be confirmed by appropriately qualified specialists.

FINAL REHABILITATION

Upon closure of the mining operation the entire footprint area will be rehabilitated so as to allow the affected area to return to agricultural use. At this stage the following baseline rehabilitation actions are proposed from which a detailed closure plan will be developed:

- Rehabilitation of all the disturbed surface areas shall entail landscaping, levelling, sloping, top dressing, land preparation, seeding (if required), and weed / alien clearing.
- All infrastructures, equipment, and other items used during the mining period will be removed from the site in accordance with section 44 of the MPRDA, 2002.
- Waste material of any description, including receptacles, scrap, rubble and tyres, will be removed entirely from the mining area and disposed of at a recognized landfill facility. It will not be permitted to be buried or burned on the site.
- The rehabilitation area will be cleared of weeds and invader plant species. Priority will be given to species regarded as Category 1a and 1b invasive species in terms of NEM:BA (National Environmental Management: Biodiversity Act 10 of 2004 and regulations applicable thereto).
- Final rehabilitation shall be completed within a period specified by the Regional Manager.

APPLICATION FOR CLOSURE

Once the full mining area was rehabilitated the MR Holder will submit a closure application to the Department of Mineral Resources in accordance with section 43(4) of the MPRDA, 2002 that states: *“An application for a closure certificate must be made to the Regional Manager in whose region the land in question is situated within 180 days of the occurrence of the lapsing, abandonment, cancellation, cessation, relinquishment or completion contemplated in subsection (3) and must be accompanied by the prescribed environmental risk report”.*

The Closure Application will be submitted in terms of Regulation 62 of the MPRDA, 2002, and Government Notice 940 of NEMA, 1998.

BACKGROUND INFORMATION DOCUMENT

PUBLIC INVOLVEMENT

This document is to inform you about the proposed activity and to determine whether there are any concerns or objections from interested and affected parties (I&AP's) that need to be considered.

As interested and affected party you are kindly requested to complete the comments form and give any comment/concern or input with regard to the current land use of the area, the environment as well as socio-economic conditions that you feel might be affected by the proposed activity. When submitting response please provide suggestions to mitigate the anticipated impact of each identified activity.

Please contact Christine Fouche at the contact details as presented in the letterhead or at christine.f@greenmined.co.za through any means should you need more information, have additional language requirements, have concerns or comments that need to be considered or if you want to be registered as an interested and/or affected party and would like to receive a copy of the Draft Scoping Report (DSR) and/or the Draft Social and Labour Plan (DSLPL) on or before 13 October 2020. If we do not receive any comments from you on or before 13 October 2020, it will be accepted that you do not have any objections/comments with regard to the project and do not require any further documentation.

A register of interested and affected parties (I&AP's) will be opened and maintained containing the names, contact details and address of all persons who have submitted written comments, attended meetings or have in writing requested to be registered and all organs of state which have jurisdiction in respect of the activity. Please note that only registered I&AP's and stakeholders will be entitled to comment on reports and plans to be submitted to the Department provided that the party provide its name, contact details and address and discloses any direct business, financial, personal or other interest which he/she may have in the approval or refusal of the applications.

The Draft Scoping Report (DSR) and Draft Social and Labour Plan (DSLPL) will be submitted to the Department of Mineral Resources and Energy – Eastern Cape (DMRE) for review purposes. This report and plan will also be available to the public for a 30 days review period. An electronic copy of the report and plan will be published on the Greenmined Environmental website (www.greenmined.com). All registered I&AP's and stakeholders will be notified of the commenting period in advance as above.

The DSR and DSLPL will then be updated to reflect the comments received during the public commenting period. Thereafter, the Final Scoping Report (FSR) and Final Social and Labour Plan (FSLPL) will be submitted to DMRE for its consideration as part of the authorization process in terms of the NEMA, 2014 regulations (as amended 2017). A copy of the FSR and FSLPL will be made available on the Greenmined Environmental website. Once the Final Scoping Report has been accepted by the DMR, the Draft Environmental Impact Assessment Report (DEIAR) will be prepared, inclusive of the specialist studies (if applicable), and also made available to the public for a 30-day commenting period. An electronic copy of the DEIAR report will also be published on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified of the commenting period in advance.

BACKGROUND INFORMATION DOCUMENT

Upon expiry of the commenting period the DEIAR will be updated to reflect the comments received during the public commenting period. Thereafter, the Final EIAR will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA 2014 regulations (as amended by GNR 326 effective 07 April 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 (fourteen) days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal. Once the FSLP has been approved by the DMRE it will be published, in both English and isiXhosa, on the Greenmined Environmental website and made available to the public as prescribed in the Amendments to the Mineral and Petroleum Resources Development Regulations, 2020

BACKGROUND INFORMATION DOCUMENT

Upon expiry of the commenting period the DEIAR will be updated to reflect the comments received during the public commenting period. Thereafter, the Final EIAR will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA 2014 regulations (as amended by GNR 326 effective 07 April 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 (fourteen) days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal. Once the FSLP has been approved by the DMRE it will be published, in both English and isiXhosa, on the Greenmined Environmental website and made available to the public as prescribed in the Amendments to the Mineral and Petroleum Resources Development Regulations, 2020

Dear Me

Greenmined herewith acknowledge receipt of your correspondence received 14 September 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered the Department of Water and Sanitation (DWS) as a stakeholder on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal.

We trust you find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Status: SUBMITTED

HeritageAuthority(s): SAHRA

Case Type: Section 38 (8) - Statutory Comment Required

Development Type: Mining

ProposalDescription:
 Wansley Quarries has been a trusted suppliers of weathered dolerite in the greater East London area for the past 19 years. A mining licence was issued to David Peter Coetzer (trading as Wansley Quarries) that was converted to a new order mining right in 2016. In 2020, the mining right was ceded, in terms of Section 11 of the MPRDA, 2002, to Wansley Siyakhula (Pty) Ltd that is the current mining right holder (hereinafter referred to as the "MR Holder"). The mining right is valid until 16 June 2026, with an approved footprint of 5.2149 ha over an area of Portion 1 of Farm No 652, in the East London magisterial district of the Eastern Cape Province.

Subject: Regarding the Wansley quarry extension

Categories: Wansley

Dear Christine.

As a neighbour to the existing quarry my husband and I are worried about the proposed extension. I have gathered some thoughts and questions regarding the proposed extension and would like more information as the background information seemed vague on many important points.

Please know that even with more information we both object to this extension. We bought our farm to live on a small farm surrounded by nature and the proposed size of the quarry will make it impossible. The quarry has been working at odd hours of the day and in weekends. One of my main worries as a neighbour is how and who is going to monitor the operation, since it's already not following it's regulations.

Please note the following concerns and questions:

- 1- The Listed Activities triggered by the proposed extension note the construction of a road, kindly indicate on a plan where the expected roads will be placed/ constructed?
- 2-The Listed Activities triggered by the proposed extension note the construction of dams/ weirs, kindly indicate on a plan where the expected dam/ weirs will be placed/ construct?
- 3-It appears from aerial imagery that the extension area has been recently burnt. Please confirm if this was routine burning or uncontrolled fire? Please describe the circumstances surrounding the fire.
- 4-Please elaborate, if one can at this stage, proposed operational times should the mining right be approved? Further to this, please clarify times that trucks will utilise haul roads, blasting times, crushing and screening times etc?
- 5-Please clarify management measures that are and will be in place to mitigate dust emanating from haul roads and crushing and screening operations?
- 6-Will there be an independent organisation that will routinely monitor compliance with the various approvals? And also, has there been audits done to date on the current mining operations and the associated compliance of such with the current approvals? It must be noted that the BID clearly shows the current mining approved mining area (in red) having been exceeded by the mining operations. It is concerning that the current approved area has been exceeded of which the likelihood of the extended mining area being exceeded is a potential risk that should be addressed with routine compliance audits.
- 7-The BID notes that the extent of the proposed extension area is ±37.8575 ha. This is significantly larger than the current footprint. Has the proponent investigated any alternatives (site and layout)? We would like to propose that the proponent presents alternatives for the extension.

8-The activities are taking place on Portion 1 of Farm 652. The extent of the property is approximately 133 ha. The area to be mined will comprise almost 30% of the property. Is there a requirement for the area where the property is to be mined to be rezoned and or/ subdivided for a specific land use? Or a departure

from the land use be required for the duration of the mining licence? It is assumed the property has an agricultural zoning and the mining operations on the specific portion of the property don't comprise agricultural zoning activities.

9-Whilst we note the 2012 vegetation map used identifies the area as falling within Albany Coastal Belt vegetation type, we are aware that there is a more updated vegetation map available (2018 version). This is the third and latest update to the original 2006 Vegetation Map of South Africa, Lesotho and Swaziland. Changes made in the 2009 and 2012 versions were retained and additional portions of the 2006 map have been mapped at a finer scale, with 47 new vegetation types mapped since 2012. Based on this, the new vegetation type name that the site falls in is the "South Eastern Coastal Thornveld" vegetation type. Please update your information. This vegetation unit has a range of endemic (to South Africa) species that are often found in this vegetation type and the area that was burnt (intentionally or not) may have included such species. It is also noted that the extension area encroaches on "intact" vegetated area and clarification regarding the management/ mitigation of encroaching onto potentially protected (forest or non-forest) plant species is required.

10-While it is noted that the various water use approvals/ registration processes are underway, adding more dams and water uses when there is no current valid water use licence in place seems risky when the current water uses have yet been approved. Please advise the stage of water use application phase that the current water use applications are at?

11-Given that the BID does not provide a location for the proposed dams, we are assuming the location of the dams are on the same drainage line that two existing dams are located on. Placing additional in stream structures to store water is expected to reduce water further from accessing the catchment downstream and the associated water uses. Clarification regarding the exact size of the dam as well as the locality of the dam is requested.

12-The following fauna species are often seen in this area:

Bushbuck
Common Duiker
Blue Duiker
Blesbok

All these species are protected under the Provincial Nature Conservation Ordinance and further investigation regarding the impact of the mining operations on the habitat, breeding and movement of the above species is requested to be investigated, especially since the boundary of the extension area is encroaching on areas where vegetation is relatively thick in some sections. It must be further noted that the first three species are shy and sensitive species.

Thank you for taking our worries, questions and objection in to consideration when continuing the report.

Kind regards
Mette Pi la Cour Nielsen and
Vaughn Bruce

Dear Madam & Sir

Greenmined herewith acknowledge receipt of, and thank you for your detailed correspondence received 08 October 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered you both as Interested and Affected Parties on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal.

We acknowledge your concerns and have forwarded it to the project team for consideration and assessment. Our response to your concerns will be discussed in the EIA documents that will follow in due course, that will also be available to you for commenting. All your comments will be included in the Draft Scoping Report and discussed and assessed in the Environmental Impact Assessment Report that will all be available for your perusal and commenting.

Further to this, please feel free to send us your suggestions regarding operational hours.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

ON 28 SEPTEMBER 2020**

BACKGROUND INFORMATION DOCUMENT

Upon expiry of the commenting period the DEIAR will be updated to reflect the comments received during the public commenting period. Thereafter, the Final EIAR will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA 2014 regulations (as amended by GNR 326 effective 07 April 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 (fourteen) days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal. Once the FSLP has been approved by the DMRE it will be published, in both English and isiXhosa, on the Greenmined Environmental website and made available to the public as prescribed in the Amendments to the Mineral and Petroleum Resources Development Regulations, 2020

Dear Sirs

Greenmined herewith acknowledge receipt of your objection received 28 September 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered you as an Interested and Affected Party on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal.

We acknowledge your concerns regarding the noise, dust and mining related traffic and have forwarded it to the project team. The access road and traffic impact has been identified as a matter of importance and the project team is in the process of investigating the best possible options. All your comments, and the findings of the project team will be discussed in the EIA documents that will follow in due course, on which you will be able to comment.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Subject: Concerns re proposed activity by Wansley Quarry
Categories: Wansley

Dear Christine,

Our property was purchased by us for the purpose of not only living out of town for the peace and quiet, but also for our exotic bird business, therefore we cannot accept the plans of extending the size of the quarry.

When we first settled down, we had no concerns as the road was well maintained for our vehicles, but now the amount of trucks that are utilizing the W road are not only causing the road to worsen over time, but they are also driving irresponsibly as well as driving up and down late at night to sometimes early morning (this includes Saturdays and Sundays) which breaks our pattern of sleep and we have to work the next day. The noise, dust and no respect from the truck drivers are not acceptable.

The constant up and down of the trucks are not only making our farm living noisy, but it is also depreciating the value of all of our lands and homes as it is no longer peaceful and well maintained. Apart from my family and I coming in to close contact and almost having accidents with these trucks, we cannot afford any farm animal to be on the road as it is too dangerous. As to Francois birds, they are very sensitive to loud noise as it is, we cannot have any birds stressed out as this will affect his business, we have invested up to R3 million for his birds as well as all the aviaries, we cannot allow any more noise and disruptions as this is a source of income for us.

Farm living is supposed to provide us with the peace and tranquility that cannot be found in town, this extension will take the last bit of quiet that we have away from us, we should be looking forward to coming home and relaxing without constant noise and our animals cannot afford to be affected by any more blasting, noise and traffic by the trucks.

Regards,
Francois Paula Boniface
W9

Subject: Wansley Quarries

Herewith my issues:-

1. As I am the direct neighbour to the right of this quarry how are all these changes i.e. blasting, crushing and general noise etc going to impact on me and to the value of my property? I already hear work going on all hours and weekends.
2. The B Road, always in a shocking state with constant usage of huge trucks, this is a narrow road with many resident's living along it having to put up with alot of dust, noise, arrogant drivers who have had and caused many accidents in the past and still do, and our vehicles that take huge strain. I want this road closed to these trucks as they have a perfectly good other option, the W road which is much wider and they seem to be able to keep it in a better condition ie.grading it, and it is shorter and goes directly out on to the N6.
3. Safety and security, has also become a problem because this area has been opened up to many undesirables which also think using these once unknown roads attractive.

I could go on infinitem but I will stop for now.

Penny Stapleton

Subject: PORTION 41 of FARM 821 - Concerns re proposed activity by Wansley Quarry

Dear Christine

I absolutely object to the plans of extending the size of the quarry. Living on the W road has been nothing short of hell.

The amount of crush and sabunga going out from the quarry is going to increase substantially. The amount of trucks using the road is going to increase as well.

The trucks do not have any respect for the resident drivers, there have been quite a few near accidents. The speed the trucks drive is dangerous. As the trucks do not belong to the Quarry they do not really care what happens after a truck leaves their property. Even after being assured that matters would be attended to nothing does happen. Even us residents phoning the truck owners has had no effect on the speed limit driven by these trucks.

These trucks also operate till late night hours sometimes only ending at 10 or 11pm. They are definitely removing sabunga. Coming in empty and going out full again. Trying to sleep is impossible. The noise and dust is appalling . This area is a lifestyle smallholding area, we live here for peace and quiet, which is just impossible as the quarry has become so busy.

We bought our properties for the lifestyle of living on farmland with our horses, ducks, goats, pigs and other farm animals. The first few years of living here were quite pleasant even though there were some rogue drivers we could at least ride our horses around the area. This cannot be done now unless you have a death wish. Our quality of life has gone down the drain. It's not pleasant living here anymore.

Regarding the road used by the trucks and I can only comment on the W road as this is where I live. The dust created by these trucks is something terrible. Normal traffic does not travel at that speed so in that instance the dust is not a problem. The Quarry owners have only just recently made an effort to fix the road properly. Before that it resembled a cattle track. We once out of our own pockets paid to have someone grade and camber the road. That cost us R10,000 which I know is nothing but at least the road was good for a while.

Once the quarry increases in size I cannot imagine how many trucks are going to be using the road to the N6. I don't need to spell it out to you what a disaster our lives will be. The amount of smallholding owners around the area of the Quarry are going to be badly affected. By the blasting, by the noise, by the traffic caused by the trucks.

Well, these are my objections.

Could you please reply that you have received my email.

Yours sincerely

MICHELE ADRIANA LENNARD

BACKGROUND INFORMATION DOCUMENT

Upon expiry of the commenting period the DEIAR will be updated to reflect the comments received during the public commenting period. Thereafter, the Final EIAR will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA 2014 regulations (as amended by GNR 326 effective 07 April 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 (fourteen) days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal. Once the FSLP has been approved by the DMRE it will be published, in both English and isiXhosa, on the Greenmined Environmental website and made available to the public as prescribed in the Amendments to the Mineral and Petroleum Resources Development Regulations, 2020

Dear Me Lennard

Greenmined herewith acknowledge receipt of, and thank you for your detailed correspondence received 06 October 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered you as an Interested and Affected Party on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal and commenting.

We acknowledge your concerns and have forwarded it to the project team for their consideration and assessment. The access road and traffic impact have been identified as a matter of importance and the project team is in the process of investigating the best possible options. Their findings will be discussed in the EIA documents that will follow in due course, and on which you will be able to comment. The rest of your comments will also be included in the Draft Scoping Report and discussed and assessed in the Environmental Impact Assessment Report that will all be available for your perusal and commenting.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Attachments: I&AP Details.pdf

Categories: Wansley

Good day Marlene/Christine

The attached document below was made out to my father (Deon Cilliers), but he asked me to take over from him with the correspondence for the matter.

Attached is my completed I&AP from (Please let me know if the completed form is incorrect in any way). I would please like to be registered as and interested and affected party.

Me and my father live on Farm 73/821 on B Road which is roughly 500m from Wansley Quarry. I have read through the Background Information Document and I would just like to raise some concerns as summarised in my completed I&AP form:

1. The state of the B Road is of great concern. It is safe to assume that the high volumes of tipper/haulage trucks moving to and from Wansley quarries with their heavy loads, has a great part in the deterioration of the B Road. The road is becoming undriveable and the tipper/haulage trucks moving on it also makes driving difficult and dangerous. The B Road is narrow and has deep erosions next to and on it. Wansley does supply material to fill some of these erosions, but the rain washes it away each time and it is only a short term solution.

The only suggestion is for the trucks to drive only on the W Road, which is in a better state and also wider. This suggestion unfortunately, is also dependent if the residents on W Road will accept the trucks driving only on that road.

2. We do not border the quarry directly, so a direct concern with blasting would only be the sound/shockwave.
3. The noise levels can possibly become a major concerning factor because the quarry operating hours might alter and run throughout the night? Are there any set regulations for the operating hours and types of operation to minimize the noise?
4. As for the dust, East London does have notoriously strong and sporadic wind patterns. There is no mention on mitigations for dust and can become problematic if not addressed properly.
5. Also a concern to note is that with the possible blasting, dust, noise and unbearable road conditions, the property value might decline. All of these factors can make the property less attractive to any potential buyer in the future.
6. Can I also ask for clarification on the actual footprint of the mining size that is allocated? I noticed on Fig 1 of WC 30/5/1/2/2/8/7 that the size of excavations seems to be larger that the allocated size on the red polygon?

Thank you and regards.

Regarding the environmental study - Wansley Quarry

One very important and very worrying question..... Why haven't all the residents living on the B Road not been notified of this study and how it will impact on them living here. This specific road is a "private Servitude" road for the residents living along the road. Surely they also have a say in this matter?

Please revert back to me if you are needing e-mail addresses.

Dear Cathy

Thank you for your enquiry.

Thus far the publishing of the proposed activity (initial public participation process) included the following:

- an advertisement in The Rep,
- three A2 notices that were placed at:
 - the turnoff from the N6 onto the MN10118 St,
 - the turnoff from the R102 onto the B road,
 - the T-junction where the MN10118 St and B road meets.
- Background Information Documents (BID's) that were send directly to the neighbouring landowners as well as a few additional residents in the area that we were requested to include;
- BID's that were send to all the relevant State Departments.

The reasoning behind the initial public participation process is to inform the public of the proposed project and allow a registration and commenting period. Each person that registers his/her interest in the project are listed on a register, and they will be kept informed throughout the entire EIA process that will follow.

For ease of reference I have attached a copy of the BID and Project Map to this email. As mentioned on page 12 of the BID, we gladly invite you to provide us with the contact details of persons you feel should be contacted. Therefore, in answer to your question, we would highly appreciate it if you can provide us with the email addresses of the people you feel should be contacted.

Regarding the B road – the use of the road has been highlighted by a few I&AP's (interested and affected parties). The matter has therefore been directed as a priority to the project team that will assess the various possibilities and propose the best possible option. The findings of the project team will be discussed and assessed in the Draft Basic Assessment Report (DBAR) that will be published for public review and commenting over a further 30-days period. The comments received on the DBAR will then be incorporated into the Final Basic Assessment Report that will be submitted to the Department of Mineral Resources and Energy for decision making.

We trust you find this in order, and thank you for your participation.

Regarding the environmental study - Wansley Quarry

One very important and very worrying question..... Why haven't all the residents living on the B Road not been notified of this study and how it will impact on them living here. This specific road is a "private Servitude" road for the residents living along the road. Surely they also have a say in this matter?

Please revert back to me if you are needing e-mail addresses.

Hi Christine

Thanks for the feedback.

In answer to your question regarding any other party's that are directly or indirectly affected with the expansion of the the Wansley quarry ... no I think all the parties that wanted to give feedback have (hopefully) done so by now.

Thank you again

Regards

CATHY

Good Morning Cathy

Thank you for your comments received yesterday.

We will include your comments into the Scoping Report (next report), forward it to the project team (including specialists), and discuss and assess it in the Environmental Impact Assessment Report that will follow once the DMR accepts the Scoping Report and allows the Environmental Impact Assessment Process to continue (this is not an approval of the mining application yet). Both the Scoping Report and the Environmental Impact Assessment Report will be available for your perusal and commenting.

I can also confirm that we have contracted the expertise of a road engineer that will be looking at both the B- and W roads and make recommendations regarding the traffic management of the access roads. The findings of the Traffic Impact Assessment will also be incorporated into the Environmental Impact Assessment Report.

Regarding our previous correspondence, are there any other residents/interested and affected parties that you would like us to contact/register on the project?

Importance: High

This is our issues regarding the Up grading of the Wansley Quarry

1. Blasting, crushing and general noise is going to make a huge impact on our property value? They have already started increasing production as work is going on all hours and weekends which never was the case before....ie. trucks up and down the B road all the time
2. The B Road is in a shocking state with constant usage of huge trucks, The B road was originally a tarred road but due to the constant trucks up and down carrying huge loads the tar has disintegrated and now it is just a huge disaster called a road!!!!!! It is also has become very dangerous because of these trucks speeding up and down and has caused many accidents ... to name but a few....writing off a residents vehicle as they were turning out of the driveway, damaging numerous fences due to brake failures, killing pets in the road, almost writing me off a few times just coming out of my driveway.....I can go on and on>

3. Safety and security, has also become a problem because this area has been opened up to many undesirables which also think using these once unknown roads attractive.

Dear Cathy

Apologies for this, but just a correction to my previous email:

This project will not have a DBAR and Final Basic Assessment as mentioned earlier.

We will incorporate the initial comments into the **Draft Scoping Report** that will be published for a 30 days commenting period, upon which the additional comments will be added to the Final Scoping Report (FSR). The FSR will then be submitted to the DMRE for decision making.

Should DMRE approve the FSR, we will continue with the draft Environmental Impact Assessment Report (DEIAR) that will contain amongst others the findings of the specialists. The DEIAR will again be published for a 30 days commenting period and the comments received on the DEIAR will be incorporated into the Final EIAR that will be submitted to the DMRE for decision making.

The matter of the access roads will be added to the DSR and FSR and will be assessed in detail in the DEIAR and FEIAR.

Kind Regards / Vriendelike Groete

Subject: RE: Wansley EC 30/5/1/2/2/228

Dear Cathy

Thank you for your enquiry.

Thus far the publishing of the proposed activity (initial public participation process) included the following:

- an advertisement in The Rep,
- three A2 notices that were placed at:
 - the turnoff from the N6 onto the MN10118 St,
 - the turnoff from the R102 onto the B road,
 - the T-junction where the MN10118 St and B road meets.
- Background Information Documents (BID's) that were send directly to the neighbouring landowners as well as a few additional residents in the area that we were requested to include;
- BID's that were send to all the relevant State Departments.

The reasoning behind the initial public participation process is to inform the public of the proposed project and allow a registration and commenting period. Each person that registers his/her interest in the project are listed on a register, and they will be kept informed throughout the entire EIA process that will follow.

For ease of reference I have attached a copy of the BID and Project Map to this email. As mentioned on page 12 of the BID, we gladly invite you to provide us with the contact details of persons you feel should be contacted. Therefore, in answer to your question, we would highly appreciate it if you can provide us with the email addresses of the people you feel should be contacted.

Regarding the B road – the use of the road has been highlighted by a few I&AP's (interested and affected parties). The matter has therefore been directed as a priority to the project team that will assess the various possibilities and propose the best possible option. The findings of the project team will be discussed and assessed in the Draft Basic Assessment Report (DBAR) that will be published for public review and commenting over a further 30-days period. The comments received on the DBAR will then be incorporated into the Final Basic Assessment Report that will be submitted to the Department of Mineral Resources and Energy for decision making.

We trust you find this in order, and thank you for your participation.

**RESPONSE RECEIVED FROM MR AW WILD ON 30
SEPTEMBER 2020**

30 September 2020

For attention **Christine Fouche**

DEPARTMENTAL REFERENCE NO: EC 30/5/1/2/2/228 MR

WANSLEY QUARRIES

1. I hereby acknowledge receipt of your document referenced above.
2. The information supplied in the form of headings such as “QNR 324 Activity 4” are extremely vague and do not detail exactly what the intentions of the applicant are. I am concerned about any activity which will affect the water run off quantity and quality. This includes construction of dams / weirs, washing of mined product, movement of material from or into FEPA pronounced waterways. I would like more specific information to be made available.
3. It is noted that the existing mining licence gives authority for 5.2149 ha to be mined, but in fact mining is taking place over an area of some 11 plus ha, which surely places Wansley Quarries in serious breach of their mining licence. Your satellite view photo (fig 1) clearly shows the extent of mining in breach of the existing licence. It also shows excavation that has been carried out through one of the two FEPA on the property, which I believe is also a breach of regulations. The photograph below shows the extent of “overmining” if you can call it that, outside the white outlined licenced area.

4. The neighbouring farms (W-6 / B-23 and B-17), and servitude are in the immediate area of the current mining, and proposed extended mining area, and have animals and people moving on them at any time. Blasting at the quarry would therefore pose a physical danger to both people and animals unless restrictions are applied. My understanding is that regulations state no blasting may

take place within 500 feet of persons, and so I recommend that a restriction of “no blasting within 500 feet of the Wansley farm boundary may be undertaken”, if a blasting licence is granted.

5. The degradation of the “B road” due to the heavy truck traffic to and from Wansley Quarry is of great concern to all residents in the area. Although Wansley do supply Subunga and grade sections of the road occasionally, the danger posed by speeding and inconsiderate truck drivers are a constant danger to pedestrians, motorists, and animals in the area, which is zoned as agricultural. The local municipality and Provincial authority refuse to carry out any maintenance on this road. I believe that all heavy trucks should be routed via the “W road”, which is wider, and does not travel through the centre of any owner’s farm.

6. Property values in the immediate vicinity of the increase proposed mining will be adversely affected, due to noise, dust, potential blasting dangers.

7. Please register me as I&AP.

Dear Sir

Greenmined herewith thank you for your participation and acknowledge receipt of your correspondence received 30 September 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered you as well as Me Stapleton as Interested and Affected Parties on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal and commenting.

We acknowledge and take note of your concerns regarding the possible impact on water quality, extent of the mining footprint, potential blasting impact, access road and property values and have forwarded your comments to the various specialists that form part of the project team. Further to the above, please note that all your comments will be included in the draft scoping report, and will be discussed and assessed (once feedback from the various specialists were received) in the Environmental Impact Assessment Report that will follow once the Scoping Report was approved by the Department of Mineral Resources and Energy. You will be notified as soon as the above mentioned reports are available for your perusal and commenting.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

**RESPONSE RECEIVED FROM MR & MRS BONIFACE
(TREVOR & TAMMY) ON 12 OCTOBER 2020**

From: Tammy Boniface [<mailto:tammy@halfin.co.za>]
Sent: 12 October 2020 07:08 PM
To: Marlene Lingenfelder <admin@greenmined.co.za>
Subject: FW: Wansley EC 30/5/1/2/2/228

Dear Christine,

Thank you for the opportunity to provide comment regarding the attached application for Wansley Quarries.

Kindly receive this as an official objection to the expansion of the Wansley Siyakhula (Pty) Ltd quarry.

We are direct fence sharing neighbours with Wansley and will be greatly affected should the quarry expand by any degree.

We have chosen to live in Holm Hill for the lifestyle benefits of the lower noise levels and quiet surroundings. The wild animal life which we enjoy is already diminishing and will decrease even further if the quarry is given a greater area to mine.

Currently the traffic flow on the W road is very high due to the cartage trucks, many of which speed and disregard other vehicles.

These heavily loaded trucks are causing damage to the road and create constant dust for the adjacent properties. The noise from these cartage vehicles is also an issue as they often run before and after normal business hours.

It is important to note that the W road, as we refer to it, is a PRIVATE road.

It is merely a servitude for Wansley Farm as noted in our title deeds (our boundary is on the other side of the road). Permission has not been granted to Wansley Quarries for their business use and they do have an alternative route available.

It is also of concern that as per the aerial image (Figure 1) on your report it seems that the quarry has already exceeded their current approved mining area.

Rehabilitation of the land does also not appear to have been done.

Please acknowledge and confirm receipt of our objection as the environment and lifestyle in this area will be greatly affected should the expansion be approved.

Kind regards,
Trevor and Tammy Boniface

Dear Mr and Mrs Boniface

Greenmined herewith acknowledge receipt of, and thank you for your detailed correspondence received 12 October 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered you as an Interested and Affected Party on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal and commenting.

We acknowledge your concerns and have forwarded it to the project team. The access road and traffic impact have been identified as a matter of importance and the project team is in the process of investigating the best possible options. Their findings will be discussed in the EIA documents that will follow in due course, and on which you will be able to comment. The rest of your comments will also be included in the Draft Scoping Report and discussed and assessed in the Environmental Impact Assessment Report that will all be available for your perusal and commenting.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Hi Christine

Regarding the study being done and the extension of quarry and Usage of W road to connect to N6, I would like to object to this project as I am the resident and we were never all consultant and given an opportunity to voice out the impact of this to us.

The Portion on W road is on my property which I still need to sort out as surveyors recommendation last year.

I would like to put it on record we will not approve any extension unless a different route is use not W or C road

Thanks
LIZ and Mteto
C12 farm

Dear Madam

Greenmined herewith acknowledge receipt of your correspondence received 16 September 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered you as an Interested and Affected Party on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment (EIA) process as well as supply you with a copy of the draft scoping report (DSR) for your perusal and commenting.

Further to the above, I have also attached a copy of the Background Information Document and Project Map should you like to share it with additional interested parties. Alternatively, please feel free to provide me with the contact detail of the person/s you wish to be included and we will gladly supply them with the documents.

We acknowledge your concern regarding the access road and have forwarded it to the project team. The access road and traffic impact have been identified as a matter of importance and the project team is in the process of investigating the best possible options. Their findings will be discussed in the EIA documents that will follow in due course, and on which you will be able to comment.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Hi Christine,

Please can you forward the following onto the relevant department for lodging the following objections on my behalf? Attached is my objection to the further expansion and development of Wansley Quarry. We require detailed feedback on how certain issues objected to are going to be dealt with? If unsatisfactory, we will further object.

Thank you

Rob Masters.

BACKGROUND INFORMATION DOCUMENT

Upon expiry of the commenting period the DEIAR will be updated to reflect the comments received during the public commenting period. Thereafter, the Final EIAR will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA 2014 regulations (as amended by GNR 326 effective 07 April 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 (fourteen) days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal. Once the FSLP has been approved by the DMRE it will be published, in both English and isiXhosa, on the Greenmined Environmental website and made available to the public as prescribed in the Amendments to the Mineral and Petroleum Resources Development Regulations, 2020

Dear Christine

Thank you for your response.

I require an extension of the period for comment, as I haven't received the DSR yet.

Just briefly though, my objections and concerns are related to loss of sense of place, in holm hill ; additional noisy road traffic, (as the truck load bodies and tail gates rattle terribly as they go down the b road) and it makes it unpleasant and unsafe to cycle, run or ride horses on our farm roads. Speeding of the trucks has also been an issue in the past.

Additionally the proposed footprint is in a STEP vegetation corridor and Insufficient detail has been given regarding a number of pertinent issues, regarding water, wildlife, blasting magnitudes, frequency, times etc. and other impacts; alternatives, monitoring, compliance, etc.

I would like to submit more detailed comment. Could you advise if there will be opportunity to do this? And will there be a public meeting regarding this?

Regards
Debbie Reynhardt.

Dear Debbie

We are still in the process of drafting the Scoping Report, and therefore it has not yet been published for comments. As soon as the document is ready we will inform all the registered interested and affected parties (I&AP's) (of which you form part) and stakeholders and allow for another 30-days commenting period.

We do take note of the concerns you listed below, and will include them in the Scoping Report. Your concerns will also be forwarded to the project specialists (for instance ecologist, road engineer etc.) that will consider and assess them. The outcome of the specialist studies will be included in the Draft Environmental Impact Assessment Report (DEIAR) that will follow should the Department of Mineral Resources and Energy accept the Scoping Report. The DEIAR will once again be distributed to all the registered I&AP's and stakeholders for another 30-days commenting period.

You will therefore still have at least two more opportunities to provide us with your comments.

Due to the uncertainties/difficulties regarding COVID, we do not at the moment plan to hold a community meeting. However, should you wish to meet we are happy to arrange a virtual meeting with you to discuss the project.

Kind Regards / Vriendelike Groete

Thank you.

The access road is a real concern.

Currently, Wansley farm hold a servitude to utilise a road over my land. We will not extend the use of the road to a business being conducted on Wansley farm. Please, we must make this point very clear.

Categories: Wansley

I have received the message below via a friend.

We have requested to be included in the list of interested and affected parties. We are the owners of the remainder of portion 2 of farm 652.

I note that you refer to " the expertise of a road engineer that will be looking at both the B- and W roads and make recommendations regarding the traffic management of the access".

We again confirm that the W road is on private land. It is not a public road. The road engineer would have no business looking at the W road. In terms of our title deed. The quarry does not hold a servitude to use the road.

Unless we receive as a matter of urgency confirmation that the quarry will immediately desist from using the road, we will be physically closing the road for all cartage vehicles.

WANSLEY QUARRY

We will include your comments into the Scoping Report (next report), forward it to the project team (including specialists), and discuss and assess it in the Environmental Impact Assessment Report that will follow once the DMR accepts the Scoping Report and allows the Environmental Impact Assessment Process to continue (this is not an approval of the mining application yet). Both the Scoping Report and the Environmental Impact Assessment Report will be available for your perusal and commenting.

I can also confirm that we have contracted the expertise of a road engineer that will be looking at both the B- and W roads and make recommendations regarding the traffic management of the access roads. The findings of the Traffic Impact Assessment will also be incorporated into the Environmental Impact Assessment Report.

Regarding our previous correspondence, are there any other residents/interested and affected parties that you would like us to contact/register on the project?

Good morning Christine

I have 3 questions that I am putting to you to better understand this Wansley issue:

1. Are you situated in East London?
2. Did you visit Wansley Farm before compiling the document you sent to Boniface Trust?
3. Did you consider having a meeting with the residents of Holm Hill, specifically all those on the B and W roads, before compiling the above document?

I await your valued response.

Andre Scheun

Subject: Wansley EC 30/5/1/2/2/228 MR

Good morning Christine

I have 3 questions that I am putting to you to better understand this Wansley issue:

1. Are you situated in East London? I am situated in Ballito, and the rest of the project team are from various areas including East London, Johannesburg, Bloemfontein, Somerset-West, and Cape Town.
2. Did you visit Wansley Farm before compiling the document you sent to Boniface Trust? I have visited the farm before.
3. Did you consider having a meeting with the residents of Holm Hill, specifically all those on the B and W roads, before compiling the above document? The Background Information Document that was sent out forms part of the initial public participation phase associated with a Section 102 amendment application (such as this one). The reasoning behind an initial public participation process is to identify and notify the interested and affected parties (I&AP's) and stakeholders and provide the public with a period to register on the EIA process (still to follow). As the initial public participation phase takes place at the onset of the EIA (environmental impact assessment), the technical information regarding the project still needs to be obtained as well as the input of the specialists. Once this information was obtained it is presented in a report (environmental impact assessment report) that is then circulated to the registered I&AP's and stakeholders for their perusal and commenting. In light of this it is (in our opinion) more effective to meet with interested parties once the technical information is available and the recommendations of the specialists were received. However, should you wish so we will gladly set up a virtual meeting with you to discuss the project.

I await your valued response.

Andre Scheun

Wansley road farmer.

public participation phase?

The document that was put up at the entrance to W-road, and most probably at the other entrances to Holm Hill too, was put up on a S-turn in the road at an uphill opposite an informal settlement. There is no way that I would stop to read the notice that, as you know, was small print on a small temporary board.

If it were not for the community of Holm Hill spreading the document amongst ourselves, very few members of the public would actually have known about this project and able to participate - that includes immediate neighbours and private road owners.

No further response required.

Regards

Andre Scheun

COMMENTS

Object / No Objection	Object
Request additional information	No idea what all the references to roads in your document means. I assume they refer to roads on the premises – Wansley Farm When do you expect the proposed MR will expire?
Concerns	See below

1. I have come to the conclusion that your MR holder has not been acting in good faith over the years and that they are not following good business practice.

- 1.1 According to your document and maps it is obvious that the current mining footprint is already far greater than the “approved mining area”, which is in violation of the mining rights issued
- 1.2 According to your document the distance from city centre to Wansley farm is ± 30 kilometers.
 - 1.2.1 East London Tourism (Argyle street) to Wansley Quarries via North East Expressway and Lavender Blue is 15,5kms
 - 1.2.2 East London Tourism to Wansley Quarries via North East Expressway and the N2 and B-road is 16.5kms
 - 1.2.3 East London Tourism to Wansley Quarries via Vincent, N2, Meiseshalt, and B-road is 18,1kms
 - 1.2.4 East London Tourism to Wansley Quarries via North East Expressway, the N6, and W-road is 15,4kms.
 - 1.2.5 Outer edge of Beacon Bay to Wansley Quarries is 6,2 kms and possibly only 5 kms as the crow flies.
- 1.3 Blasting has been taking place from time to time which is in violation of the mining rights issued.
- 1.4 Promised road maintenance to the private roads being used is not being done properly.
- 1.5 Watering the W-road on Mondays, Wednesdays, and Fridays to curb dust as was agreed by the owner of Wansley Farm in 2007 is not being done.

- 1.6 Oil spills due to accidents where cartage vehicles overturned on the private road were not attended to in an environmentally friendly way. On one instance the oil spill was covered with soil in a ditch that is a waterway to one of our dams.
- 1.7 The MR holder has no concern for the rights and expectations of its neighbours and the local community at large. Complaints, even on WhatsApp groups of which the MR holder and staff are participants, fall on deaf ears. Here they have dropped the ball and the opportunity to involve the community in addressing issues affecting the community.

2. Noise Pollution

- 2.1 As of late up to 35 cartage trucks have been counted over an hour and a half period using the W-road passing our homesteads that are right next to the road. I have requested records from the MR holder to see how many cartage trucks actually use our private road on average per day, but that has not been forthcoming.
- 2.2 The excavators and crushes and blasting can be heard from our property depending on the wind or lack thereof.
- 2.3 The operation is not limited to office hours as vehicles could be on the road from sun rise to after 20h00, and even over weekends. It is all dependent on customer demands.

3. Dust Pollution

- 3.1 The cartage trucks cause dust pollution on/in:
 - 3.1.1 Grazing to the effect that certain areas next to the road cannot be grazed due to the build-up of dust and dying vegetation.
 - 3.1.2 Building roofs from where water runs into our water tanks for household use.
 - 3.1.3 Our homes and other buildings and laundry, as our buildings are right next to the W-road.

4. Traffic

- 4.1 Excessive speeds by the cartage drivers on our private road
- 4.2 Reckless driving by the cartage drivers on our private W-road sometimes literally forcing vehicles off the road
- 4.3 High volumes of cartage trucks
- 4.4 Long hours of cartage trucks on the road
- 4.5 Loads are not secured and lost partial loads are not attended to.

5. Other

- 5.1 When the MR holder does work on the road, they continuously block the under-road drainage pipes to our dam and block the road run-offs to our property.
- 5.2 When the MR holder has idle cartage trucks, they will dump loads of sabunga on the road surface for later use which is a risk to all road users as these dumped loads could lie there for weeks on end.
- 5.3 The deteriorating condition of our roads due to the heavy traffic has a very negative effect on our own vehicles.
- 5.4 Horse riding on our roads has come to an end due to the cartage truck traffic.

Please treat this document as signed on this day, October 2, 2020 in East London.

34.

**RESPONSE RECEIVED FROM MR D WEBBER ON 18
SEPTEMBER 2020**

Marlene Lingenfelder

From: Dean Webber <totaldean@gmail.com>
Sent: 18 September 2020 12:12 PM
To: Christine Fouche
Subject: Holmhill Quarry Input

Categories: Wansley

Hi Christine,

My family have been living on Farm B1 since the sixties (One of the first families to settle in this area.)

Regarding the quarry....

TRUCKS

It is blatantly obvious that the quarry trucks that move the earth from the quarry have the following effect on us...

Destruction of the B Road (my parents along with Ray Rogers and one or two other residents pooled their hard earned cash together and had a large portion of the B Road tarred. The tar did not last long due to the quarry trucks.

It would seem that a fair way to deal with the transport of earth from the quarry by the trucks to the main roads should be controlled by the quarry - / **speeding** - / **what routes the trucks should take etc** (Lip service does not do it for me..I am talking about a system in place that is controlled and monitored by the quarry and a third party that has an interest in the community of Holmhill.

It is suggested that the trucks delivering to Gonubie use the B road only. Trucks delivering anywhere else, should use the W Road. Why can this not be implemented and monitored by the quarry (+3rd party) since the **only** people who benefit from the transport of this earth is the quarry.

Discipline and control of the drivers from the quarry to the main roads should be monitored and controlled by the quarry (+3rd party).

The quarry brushes off any incident or problem caused by the truck drivers and pass the responsibility onto the truck drivers. Once again, the **only** people benefiting from the trucks is the quarry, so it seems fair that they should be responsible for monitoring and discipline of the truck drivers and also give **feedback** as to the actions taken regarding any incidence regarding the trucks.

ROAD (If you can call it that)

Since the quarry is directly responsible for the majority of destruction of B Road, it is only fair that the quarry does **regular maintenance to the B Road**. The quarry should not call on the residence to contribute to any repairs.

DUST

We already live in a permanent dust cloud caused mainly by the quarry trucks. Should the quarry expand, the dust will increase due to more traffic. Clearly, I am opposed to the quarry expansion.

NOISE

Same points as above.

BLASTING

Absolutely opposed to this. It will be like a mini earthquake. Noise pollution in a rural setting with a lot of animals and residents living here. **Absolutely opposed to this.**

SPEEDING TRUCKS

Same story...

Bottom line is that, I have the impression from all that has happened on Holmhill, that the quarry is only focused on activities of the quarry and anything that happens outside of the quarry property is **brushed off** by putting the blame on the contracted truck drivers and have no interest in anything that outside of that. This has to change.

I am not against progress, but when it is done for profit and **no consequences** for the people dealing with the negative side of that progress, I am highly opposed to any support for that progress and am willing to personally get involved to adjust those dynamics by any means necessary.

Dear Sir

Greenmined herewith acknowledge receipt of, and thank you for your detailed correspondence received 18 September 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We registered you as an Interested and Affected Party on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal.

We acknowledge your concerns and have forwarded it to the project team. The access road and traffic impact have been identified as a matter of importance and the project team is in the process of investigating the best possible options. Their findings will be discussed in the EIA documents that will follow in due course, and on which you will be able to comment. The rest of your comments will also be included in the Draft Scoping Report and discussed and assessed in the Environmental Impact Assessment Report that will all be available for your perusal and commenting.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

BACKGROUND INFORMATION DOCUMENT

Upon expiry of the commenting period the DEIAR will be updated to reflect the comments received during the public commenting period. Thereafter, the Final EIAR will be submitted to the DMR for its consideration as part of the authorization process in terms of the NEMA 2014 regulations (as amended by GNR 326 effective 07 April 2017). A copy of the final report will be made available on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 (fourteen) days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal. Once the FSLP has been approved by the DMRE it will be published, in both English and isiXhosa, on the Greenmined Environmental website and made available to the public as prescribed in the Amendments to the Mineral and Petroleum Resources Development Regulations, 2020

Signature: _____

Annexure 1

Objection – Departmental Reference No: EC 30/5/1/2/2/228 MR

Applicant: Wansley Siyakhula (PTY) LTD

With reference to the Background information Document dated 11th September 2020, I, Andrew Moss, hereby submit my objections to the project proposal as the property owner of Portion 13 (A Portion of Portion 2) Farm 652 – Farm W8.

W Road

With reference to the attached Title Deed for the property, there is a servitude at the top of the property which allows access to Portion 1 Farm 652. This servitude is termed “W Road” and is linked to the servitudes of the two adjacent properties and is in essence a private road. The servitude is intended for access to Portion 1 Farm 652 and not for haulage vehicles belonging to Wansley Siyakhula (WS), which are in breach of the conditions of the Title Deed.

The haulage vehicles cause excessive damage to the rural road which is not designed for over usage by heavy vehicles. WS does not adequately maintain the road which is used by the surrounding property owners for access to and from their properties.

Safety of other road users

The haulage vehicles are a threat to the safety of other road users. Every road user has a “near miss” story to tell when avoiding a collision with a haulage vehicle driving at excessive speeds. Mothers transporting young children to and from school activities during the day are the most vulnerable. It is a matter of time before a serious incident does happen, which unfortunately will be too late.

Groundwater

Most properties in the area rely on boreholes for their water supply, which are at risk of being damaged due to the proposed blasting activities.

Conclusion

W Road and the surrounding properties are already under stress due to the current operations of Wansley Siyakhula, an extension to the project area and the introduction of blasting will have a severe effect on the area and the inhabitants. Wansley Siyakhula have not adhered to any agreements with regards to the safe usage and maintenance of W Road to date and are unlikely to do so in the future.

The existing quarry area has already exceeded the approved demarcated boundary, which is a clear indication of Wansley Siyakhula’s attitude towards the environment.

**RESPONSE RECEIVED FROM UNKNOWN ON 13
OCTOBER 2020**

Marlene Lingenfelder

From: Developmeant <info@developmeant.co.za>
Sent: 13 October 2020 03:36 PM
To: Christine Fouche
Subject: Expansion of Wansley Quarries

Categories: Wansley

To whom it may concern

It is with great concern that I write to you regarding the expansion of Wansley Quarries.

We have long had a strained view of the quarry which has a habit of working after reasonable hours, on weekends, on public holidays and with heavy industrial equipment making an extremely loud noise. This noise pollution, dust, constant heavy vehicles traffic as well as the unsightly industrial view only negatively affects our future plans and our property value. We would never have bought our property had we known that this quarry, which is in the middle of a smallholder, residential farming community, would be allowed to expand as such.

It is inconceivable that this expansion is even being considered without sufficient review of the environmental and community impacts. We live across the valley and probably have more noise pollution and disruption from quarry as an eyesore than the neighboring farms and yet we were never consulted. It is through the farming community that we have been alerted of such expansions.

The negative impact on the surrounding area and community needs to be thoroughly assessed. Our very own business plan, job creation plan through eco-tourism in the surrounding area will be seriously negatively affected and the very viability of these plans will be in question because of the expansion of such an unsightly, invasive industry on our doorstep.

Thank you in advance for your consideration of our concerns.

To whom it may concern

Greenmined herewith acknowledge receipt of your correspondence received 13 October 2020 on the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

We would like to register you as an Interested and Affected Party (I&AP) on the project and keep you posted on the progress of the Environmental Impact Assessment process as well as supply you with a copy of the draft scoping report (DSR) for your perusal and commenting, however we did not receive any contact details (apart from your email address) with the below listed correspondence. Can you please supply me with a contact person that we can register as I&AP on our spreadsheet?

We acknowledge your concerns and forwarded it to the project team for their attention. Their findings and response will be discussed in the EIA documents that will follow in due course, and on which you will be able to comment. Your comments will be included in the Draft Scoping Report and discussed and assessed in the Environmental Impact Assessment Report that will all be available for your perusal and commenting.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.
