DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT NOTICE

Good day

21 July 2021

Dear sir/madam

RE: DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR AN APPLICATION IN TERMS OF SECTION 102 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002), AND ENVIRONMENTAL AUTHORISATION IN TERMS OF SECTION 24 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED) SUBMITTED BY WANSLEY SIYAKHULA (PTY) LTD. REFERENCE NUMBER: EC30/5/1/2/2/228MR.

The draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Wansley Siyakhula (Pty) Ltd mining area on a portion of Portion 1 of Farm No 652, East London Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

Should you be interested your comments are kindly requested on the DEIAR & EMPR. A thirty-day commenting period, ending on **24 August 2021**, will be allowed for comments. Your comments must be in writing and can be submitted via facsimile, e-mail and/or post. Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments.

If we do not receive any comments from you before the end of the commenting period, it will be accepted that you do not have any additional objections/comments with regard to the project. We trust that you find this in order and kindly await your comments on the report.

Please contact Christine Fouche at 082 811 8514 (Cell) or 021 851 2673 (Tel), 086 546 0579 (Fax), or christine.f@greenmined.co.za should you require any additional information.

Your feedback is valued and will be addressed appropriately.

Kind Regards

A handwritten signature in black ink, appearing to read 'Fouche', with a stylized flourish at the end.

Hi Marlene.

I'm still waiting for reply on my questions i asked over the phone.
Especially about the rezoning being of importance to this project going through or not.
You told me you would check with Christine.
Please let me know.

Thank you

Kind regards
Mette Pi la Cour Nielsen

Dear Me la Cour Nielsen

With reference to your telephonic discussion with Marlene, and your email sent 12 August, herewith please find our response:

- **Zoning:**
DBP Consulting (the town and regional planners) submitted the zoning application on 26 March 2021. The application is still in the review process, and has therefore not yet been approved.
- **Waste handling:**
Your earlier enquiry regarding the handling of waste at Wansley Quarry was incorporated and responded to in the draft environmental impact assessment report (DEIAR). Herewith please find an extract of the information as presented in the DEIAR: *"As mentioned earlier, the mining activities generate very little general- and/or hazardous waste as the workshop and storerooms are located off-site, and no routine servicing takes place at the mine. The general waste generated at the mine is kept in general waste bins until a full load is available, upon which it is transported to the Berlin landfill site. Further to this, the quarry has oil spill kits that can be used to clean accidental hydrocarbon spills. The hazardous waste generated by the mine is kept in hazardous waste bins in a bunded area (at the workshop); when a full load is available the hazardous waste is removed from the farm by East London Bricks (Gonubie). Wansley Quarry makes use of general- and hazardous waste registers to monitor the waste loads removed from the farm. Safe disposal certificates are also filed for auditing purposes."* Further to this, the DEIAR proposes various mitigation measures and/or conditions of how waste must be handled on site. No waste may be buried/burned on the farm.

Please do not hesitate to contact me should you need further assistance.

Dear Madam,

I am really sorry to hear about you and your family being ill!

The EIA Regulations stipulates very strict timeframes regarding the submission of each subsequent report to the DMRE, that we as consultants also have to adhere to. In light of this, I need to submit the final Environmental Impact Management Report (EIAR) and Environmental Management Programme (EMPR) to the DMRE by the 15th of September 2021.

However, I would like to assist you by extend the commenting period until the 02nd of September 2021 to provide you with a few extra commenting days. That will then give me a week to incorporate the additional comments into the final EIAR & EMPR before it needs to be submitted to the DMRE.

Further to this, attached hereto please find a copy of a summary I made for Mr Masters upon his request that may possibly also assist you in finding summarised answers.

I trust you will find this in order, and look forward to receiving your comments.

Subject: Extending commenting phase

Hi Christine.

I know it is very last minute, but is there any chance the commenting phase could be extended?

We have been trying to catch up with all the information given and get our comments in order.

My husband and i tested positive for corona the same time the report was released for commenting.

Being pregnant with a young toddler and having corona doesn't leave a lot of energy or tome for reading/writing, so we have felt a bit behind.

Let me know if it will be possible.

Thank you very much.

Comments to Draft Environmental Impact Assessment Report

As a direct neighbour we object to the expansion of the quarry to 37+ Ha. When moving to our farm 4.5 years ago we knew we moved in next door to a quarry, it didn't have the best reputation but as we knew nothing about their mining rights and built up a good relationship with the quarry as neighbours we didn't think too much about it.

With this expansion proposal a lot of information of the quarry's past operation has been brought to the surface. This is part of the reason we object.

The general agenda in the report leads to a positive community need and trust for the quarry, but that is hardly how it is in reality, the community in the Holmhill area do not generally trust them (this feeling comes from talking to neighbours that have lived here a lot longer than us).

It does bring work to people and that is of course very important, but if the regulations of an operating quarry isn't and hasn't been followed it can have extreme consequences for the environment and people around it we believe.

On a social level a general trust to the management is lost.

In the report we are shown that the quarry has already been mining way out of their allowed mining footprint, which should be absolutely unacceptable.

We raised this issue in the very beginning and the response we got was this "Should the Section 102 application be approved the areas that were mined outside the boundaries of the current mining right will be incorporated into the amended footprint of the mine."

Which is useless information in our opinion. It doesn't tell us what the consequences are for mining illegally for such a long time. The rights were renewed in 2016 when the new company was formed if we understand correctly. Now surely the footprint and lifespan of the mine should have been looked in to back then. I don't know where within the footprint they were mining back then, but like I said all this information only came to out attention with the current request for expansion.

Is there really no penalty for this action? It feels like the comment sent to us is trying to sweep the situation under the carpet to be honest.

The same issue is raised with their water rights. The quarry has been operating for 20 years is says, which means the started in 2000/2001 (we believe that you need water rights after 1998 to operate, but could be wrong). Why have there never been talk about any water rights before? Is says the water is mainly for dust suppression on haul roads: "The water requirements mainly consist of water needed for dust suppression on the haul roads and the processing plant"

But that surely would mean the W rd would be managed with water on a regular basis, which I don't think I have ever experienced. If the management of the roads doesn't meet requirements as they where in their previous rights, what makes me as a neighbour trust that they will do it the future with even more trucks on the road? Again where is the penalties for not applying with the regulations set in previous rights?

When writing about water we also want to make sure we understand how the mining is going to have an impact on the water-table and the boreholes in the area. Many of the small farms in the area, including us are relying on use of a borehole in the dry season. It is written that the mining will go to a depth of 120m maximum as that is where the water-table is. Should mining be allowed to go all the way to the water-table? Should there not be a buffer distance in case the mining has a negative effect on the water quality if that close to the table? And if the water being extracted in the mining process is believed to lower the water-table, do they know how much and how it would affect our borehole (since we are right next door) water level and quality over the years? And have the drought that we are currently in and have been in for years been taken in to consideration when looking at the effect the mining would have to the water-table?

We where contacted directly from the quarry regarding rezoning the property to an industrial zone instead of agricultural and we didn't give consent as we appreciate the farming/agricultural environment we are surrounded by. It was a part of the reason we bought our property here in the first place. Close enough to town but still have natural surroundings. We asked Greenminded about this and got the following answer: "DBP Consulting (the town and regional planners) submitted the zoning application on 26 March 2021. The application is still in the review process, and has therefore not yet been approved." But this doesn't answer my question to how much the consent of the

neighbours weigh in, in the application? And how important is this change for the project to proceed to the size they want?

The report shows an most preferred alternative which is the wished new operation. It shows a no go alternative which would leave everything as is and since the quarry already exceeded their mining footprint it can only lead to the closing of the mine. Where is the less preferred alternative? Looking at the size of the wished expansion, why has a smaller mining area not been proposed? Leaving some of the dolerite as is on the farm, we don't always have to maximize our operations to thrive as a company. And maybe that can just leave a little bit more to the natural habitats. I have been advised that a less preferred alternative is essential in a report like this so please respond to why it has no such alternative here?

Our farm leads up to the W rd on the quarry property. The road that will have to change when the mining reaches the northern points. Our fence runs along the top of a beautiful hill filled with indigenous bush and lots of wildlife. There is not really any talk about where the new road is going to be when the mining footprint reaches that far. And we find it hard to see how many meters from our boundary fence the mining will be taking place, which will guide where the new road will have to be as well. We would like a drawing of where the new road is going to be exactly and to know how many meters from our beautiful hill the mining and blasting is going to take place, as we worry about the life in that bush. We did read the blasting information and understand the surroundings are taken in to consideration, but it is mainly just that corner we would like to have more clear information about.

It has been brought to our attention that the vegetation and biodiversity report is invalid, as old data sets have been used. When doing a report like this surely the newest and correct information must be used to assess the information and evidence gathered on site. We believe a data set from 2007 was used instead of the 2019 conservation plan. These protocols must be used in an assessment like this and has not been referred to. The national web-based tool has also not been used and protocol has not been followed. Even if with these newer protocols the outcome would be the same, it is not trustworthy to have a report using wrong information. As a neighbour and normal citizen we need to be able to rely on that the information gathered and given in these reports are true and done properly, otherwise we can not trust the results of the EIA itself. We would like to see a new report being made regarding this matter and believe the existing one to be invalid, which makes the entire EIA invalid if we understand the guidelines of the EIA process correctly.

We understand that at the moment one audit a year is being done, we do not agree that this is enough. There should be more focus on yearly audits and check up on management as the quarry already have been mining outside the area they have rights to, have been using water without rights for a mining operation for years. We believe this audit will done by a third party that has no gains or attachments to the quarry, can I suggest the surrounding community is being involved/informed when this happens, as we can make sure they stay within their rights and management promises. Being able to have a contact if anyone has any reason/evidence that the management has gone of tracks.

The reports says that no neighbour within 1 km of the quarry is bothered by visuals: **“No permanent residences, within <1 km, were identified on the northern and/or eastern neighbouring properties that could be negatively affected by the potential visual impact associated with the proposed activity and therefore the potential visual impact is deemed to be of medium significance.**

We just want to understand how you can rely only on distance and not landscape. We are not bothered visually on our farm, but have good friends across the valley from the quarry, where a small community is placed. This is maybe 2 km away, but is linked to the quarry by a long valley where visuals and noise pollution is a big factor. So if this could please be taken in to consideration when looking at noise and visual pollution of the quarry. Not only distance but actual landscape shapes and wind directions.

The amount of vehicles the report predicts is based on a count of vehicles of different sizes moving on the two roads (b and w road). We do not understand how a valid understanding of the traffic can be based on a 12 hr period in one random day. The quarry has always been less or more busy with traffic depending on the amount of work/contracts they have. Which means that there have been days where trucks have been lining up to go in and out the quarry all day and late in to the night (which you can clearly here from our farm) and then there will be more quiet periods with less traffic. That is life of any quarry, but we don't feel that the traffic readings for a report like this can be accurate counting the vehicles in the way it was done.

All in all we feel like there is still a lot of unclear information or information that is not following the regulations, which makes us not trust the report fully. We understand the quarry needs an expansion to continue operating but a mine makes big scares in an environment over many years and we want to make sure all these things have been taken in to consideration before being approved - especially the fact that the operation was not following it's regulations as is and is therefore questionable already.

Dear Madam,

Thank you for your comments submitted on the DEIAR of the Wansley Siyakhula (Pty) Ltd Section 102 amendment application.

We have received your comments and incorporated it into the final EIAR & EMPR (FEIAR & EMPR) that will be submitted to the DMRE for their decision making. A copy of the FEIAR & EMPR will be published on the Greenmined website in due course, and you will be informed of the availability of the report.

Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Hi Marlene,

I also want it known that I can see the quarry from my home and that Mr Alfred Wild's photo of the cleared section is actually my property situated between him and the quarry and that I could also be affected by the visual expansion and would also like it corrected.

Thanking you,

Penny Stapleton

Good day Marlene,

Thank you for youe e-mail, and the reports relating to Wansley Siyakhula (pty) Ltd mining.

I have to bring to your attention an error in the report, which I regard as a grossly incorrect report relating to "Site Specific Visual Characteristics".

On page 158, fig 32 is far from correct, by showing that I will not be able to see the quarry from my hemestead SSE of the quarry. I will attach a photograph taken from my lounge window, which shows the quarry mining area clearly, and disputes the report statement or claim that I will not be affected by the visual characteristics of the planned mining expansion.

I am situated 790 meters SSE of the quarry (130 deg True from the quarry). at farm 821 portion 46.

Please make sure your report is altered to correct the error, and confirm with me.

Thank you, and regards,

A W WILD

Dear Mrs Stapelton

Greenmined herewith thank you for, and acknowledges receipt of your correspondence dated 25 July 2021 and listed below.

We take note that the quarry is visible from your home, and will update the final Environmental Impact Assessment Report (EIAR) accordingly.

A copy of the final EIAR will be available on our company website and as a registered I&AP you will be informed of its availability for your perusal.

Kind Regards / Vriendelike Groete

Attachments: DEIAR Notice - Wansley S102.pdf

Good day Mr Leon Joubert

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Wansley Siyakhula (Pty) Ltd mining area on a portion of Portion 1 of Farm No 652, East London Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application.

Subject: Re: DEIAR Wansley Siyakhula (Pty) Ltd EC 30/5/1/2/2/228 MR - Alfred Willem Wild

Good day Marlene,

Thank you for your e-mail, and the reports relating to Wansley Siyakhula (pty) Ltd mining.

I have to bring to your attention an error in the report, which I regard as a grossly incorrect report relating to "Site Specific Visual Characteristics".

On page 158, fig 32 is far from correct, by showing that I will not be able to see the quarry from my homestead SSE of the quarry. I will attach a photograph taken from my lounge window, which shows the quarry mining area clearly, and disputes the report statement or claim that I will not be affected by the visual characteristics of the planned mining expansion.

I am situated 790 meters SSE of the quarry (130 deg True from the quarry). at farm 821 portion 46.

Please make sure your report is altered to correct the error, and confirm with me.

Thank you, and regards,

A W WILD

Dear Sir

Greenmined herewith thank you for, and acknowledges receipt of your correspondence dated 22 July 2021 and listed below.

We take note of the photo and accompanying information that you submitted, and will update the final Environmental Impact Assessment Report (EIAR) accordingly.

A copy of the final EIAR will be available on our company website and as a registered I&AP you will be informed of its availability when applicable.

Kind Regards / Vriendelike Groete

Subject: DEIAR Wansley Siyakhula (Pty) Ltd EC 30/5/1/2/2/228 MR - Trevor and Tammy Boniface
Attachments: DEIAR Notice - Wansley S102.pdf

Good day Mr Trevor and Mrs Tammy Boniface

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Wansley Siyakhula (Pty) Ltd mining area on a portion of Portion 1 of Farm No 652, East London Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application.

Kind Regards/Vriendelike Groete

Find out

Good day to you Marlene,

Thank you for this information received, however, you need to understand that this process is somewhat overwhelming for most of us living on the hill, I would imagine most are really just trying to live a life of existence in these very challenging times, and we don't fully understand the implications and what the protocols would need to be followed, for something as complicated as this to be able to eventually take place.

What I am asking of you now, is that there have been number of very concerning objections levelled at this proposed Wansley development, and yet I still cant seem to locate the answers to these objections and the appropriate much needed responses to answer our respective questions?

How do we simplify this process, and where do we see the objections levied and the appropriate answers from the developer in order to give us a clearer understanding of what is been done to alleviate all our concerns and fears? We don't have the time and or understanding to sift through all these surveys, reports and assessments, we're just looking for the simple answers to our questions?

Can someone please do a revised schedule of the many concerns and objections raised, which would be very similar in concern, and to please just give us a two or three pager with your qualified response, simple as that? Eg: we're

worried about the volume of traffic and safety issues this may cause our community.....and your answer could be something like.....we're only going to be using the W road for ALL transportation of material to and from this new proposed development, and in this way, we'd have a very clear understanding of what is going to be done to alleviate our concerns.

I'd like to propose that maybe we could hold some type of "informative meeting" that gives the Residence of Holm Hill the opportunity to get absolute clarity on what the process are for going forward and a time line of when this uncertainty could be finalised?

My concerns are that people are been bombarded with reports that have very little meaning when it comes to their full understanding of what's happening, and so won't bother to respond to your "clearly outlined deadlines", but not the answers to our concerns, and so you'll simply use the excuse that "YOU WERE ALL NOTIFIED", as per your recent e-mail, and you'll eventually simply "steam roll" this process through. People don't read this stuff, it's too complicated!!

I look forward to your response to this e-mail?

Have a nice day further.
Regards,

Rob Masters.

Dear Sir

Attached please find a copy of Appendix G1 to the draft environmental impact assessment report (DEIAR) that summarises the comments/objection and response thereto received to date. I also attached the relevant pages of the DEIAR to this email for ease of reference.

Should you like to download the entire DEIAR it can be accessed at the following link: https://www.greenmined.com/projects/Wansley_2021/Draft%20Environmental%20Impact%20Assessment%20Report%20-%20EC%2030-5-1-2-2-228%20MR.pdf

We do not seem to have any record of your son registering on this project. I have however copied him into this email, and should he like we will add him to our list of registered I&AP's to ensure that he also receives the project related emails.

I am available at 9:00 tomorrow morning to give a call and discuss the project, if that will suite you?

Looking forward to our discussion.

Kind Regards / Vriendelike Groete

Hi Christine,

Thank you for acknowledging my e-mail sent. You are welcome to call me at any time, just that I don't have a copy if the concerns raised, maybe you might access to that info?

Also, my Son Luke said that he never received that e-mail I responded to, can you please confirm that one was actually sent and to what address?

Thank you.

Dear Sir

Greenmined herewith acknowledges receipt of your below correspondence dated 27 July 2021.

I would like to discuss the said email with you in person at your earliest convenience. Can you please provide me with a date and time that a phone call from me would suite you?

Looking forward to your reply.

Kind Regards / Vriendelike Groete

Good day to you Marlene,

Thank you for this information received, however, you need to understand that this process is somewhat overwhelming for most of us living on the hill, I would imagine most are really just trying to live a life of existence in these very challenging times, and we don't fully understand the implications and what the protocols would need to be followed, for something as complicated as this to be able to eventually take place.

What I am asking of you now, is that there have been number of very concerning objections levelled at this proposed Wansley development, and yet I still cant seem to locate the answers to these objections and the appropriate much needed responses to answer our respective questions?

How do we simplify this process, and where do we see the objections levied and the appropriate answers from the developer in order to give us a clearer understanding of what is been done to alleviate all our concerns and fears? We don't have the time and or understanding to sift through all these surveys, reports and assessments, we're just looking for the simple answers to our questions?

Can someone please do a revised schedule of the many concerns and objections raised, which would be very similar in concern, and to please just give us a two or three pager with your qualified response, simple as that? Eg: we're worried about the volume of traffic and safety issues this may cause our community.....and your answer could be

Importance: High

Dear Sir,

Trust you had a good weekend.

I have not yet heard back from you following our telephonic discussion on the 3rd of August 2021 regarding a possible meeting (physical/virtual) to discuss the findings of the DBAR for the proposed expansion of Wansley Quarry. Have you discussed the matter with the rest of the Holm Hill residents that you mentioned during our discussion, and will a meeting be required?

Looking forward to hearing from you as soon as possible, as we as the consultants are also bound to very strict timeframes by the Department of Mineral Resources and Energy.

Dear Sir

Our previous correspondence, and your email received 10 August 2021, regarding the above mentioned project has reference.

Attached hereto please find a summary of the main concerns received during the course of the EIA process, that also includes a summarised response to these concerns.

Further to this, we would like to draw your attention to the fact that the environmental impact assessment report, that was distributed for comments, was a draft report with the aim of providing the public with an opportunity to comment on the presented facts. We appreciate the feedback that was received on the document, especially the part on the quarry being visible from additional properties. This is valuable information that will be incorporated/addressed before the final report is submitted to the DMRE for their perusal and decision making.

We trust that the attached summary addresses your concerns regarding simplifying the responses.

Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Good Morning Christine,

Thank you for the reminder received, we trust all is well with you at this time?
I have chatted to one of the residence concerned, and he feels that after having read through the documents referred to in your latest communication, that your organisation is merely doing a job for which you are been paid, and that we are simply “bumping our heads” when expecting anything to come of these objections?

It’s our understanding that the current operation is in breach of existing environmental laws, and yet nothing is either mentioned or being done about this, and the mere fact that some of the reporting being done by your organisation is in fact a misrepresentation of the facts, like “not been able to see the mining done within quarry from our houses”. We are of the opinion that this whole exercise is going to be done in such a manner, as previously eluded to and documented in one of my earlier e-mails, and that the reports are so lengthily and complicated to understand, and will eventually be “steamed rolled” through because our people are simply overwhelmed with this reporting and paperwork.

What I’d really like to ask you at this time, is have you guys heard of “Derek Watts”, because if you watched Carte Balance this past Sunday, you’ll have a pretty good idea of where this is all going. We just don’t want to be in a similar situation where this “proposed” development is done and finalised by “your company” for “your client”, when there is misleading reporting and where there are blatant infringement of environmental issues that are simply been ignored!
Please understand that we are a concerned residence group living here on Holm Hill, and we all have a right to a safe and healthy existence, within this peaceful agricultural area, and the existence of our lifestyle it’s not up for profit, we need someone to address this thoroughly and professionally for the sake of all parties concerned.

Thank you for your support and understanding.

Best regards,

Rob Masters.
Farm B12a Holm Hill.

GREENMINED ENVIRONMENTAL

PROPOSED EXPANSION
OF WANSLEY QUARRY

EC 30/5/1/2/2/228 MR

greenmined
9
environmental

SUMMARY OF PUBLIC CONCERNS

ALTERNATIVES:

- ❖ **Concern:** Have alternatives been considered?
- ❖ **Response:** 1 Site- (S1), 2 Project- (P1 & P2), 2 Technology (T1 & T2) alternatives and the No-go option were considered during the EIA:
 - S1 = Extension of the mining footprint within the proposed GPS coordinates;
 - Only viable site alternative as the position of the dolerite deposit and property boundaries dictate the outline.
 - P1 = Use of only the W-Road;
 - P2 = Use of both the B-Road & W-Road;
 - P1 preferred option following public comments and traffic impact assessment study
 - T1 = Blasting;
 - T2 = No Blasting;
 - T1 preferred option as no blasting will result in ±67% of the available dolerite resources not being mined (cannot be removed by mechanical methods only). Preliminary modelling predicted disturbance levels will be below the USBM standards.

SUMMARY OF PUBLIC CONCERNS

ALTERNATIVES:

- No-go Option = Mining footprint not extended & no blasting allowed;
 - 22 job losses;
 - Discontinuation of community upliftment projects;
 - Loss of local economic contributions;
 - W-Road not paved by mine;
 - Intersection between W-Road & N6 not improved;
 - Continued use of the B-Road;
 - Vertical face at quarry pit cannot be made safe (blasting needed);
 - Loss of income to Wansley Siyakhula.

- DMRE has the final say on which alternative/s are approved.

SUMMARY OF PUBLIC CONCERNS

BLASTING:

- ❖ **Concern:** Damage to surrounding infrastructure.
- ❖ **Response:** The following mitigation measures proposed:
 - Prior to first blast, the structural integrity of the infrastructure within 500 m be determined;
 - Surrounding landowners & Eskom informed prior to each blast;
 - Blasting done by qualified blaster;
 - During each blast, ground vibration monitoring to be done at strategic points;
 - All blasts to comply with USBM standards;
 - Structural damage caused by blasting will be repaired at the cost of the quarry.

SUMMARY OF PUBLIC CONCERNS

NOISE

- ❖ **Concern:** Quarry working at all hours & trucks using the roads at night.
- ❖ **Response:** If expansion (and therefore the EIAR & EMPR) is approved the work hours will change to:
 - Mining Operations (incl. crushing): Mon – Fri 06:00 to 18:00; Sat 06:00 to 13:00;
 - Blasting: Weekdays before 15:00;
 - Trucks transporting material: Mon – Fri 06:00 to 20:30; Sat 06:00 to 16:00;
 - No work on Sundays.
- ❖ **Concern:** Blasting noise impact on residents.
- ❖ **Response:** Modelling (by Cambian CC) showed that the predicted disturbance levels will be within acceptable limits at 500 m from the quarry. As distance increase the disturbance levels will decrease. Airblast & ground vibrations of each blast will be monitored (by seismograph) to constantly inform the blasting plan & keep limits below the USBM standards.

SUMMARY OF PUBLIC CONCERNS

DUST:

- ❖ **Concern:** How will dust be mitigated?
- ❖ **Response:** The legally binding (once approved) dust related mitigation measures include (amongst others):
 - Water spraying with a truck (roads, stockpile area, denuded areas);
 - Water sprayers on the crushing plant;
 - Water to be used for dust suppression will be from the stormwater dams;
 - Speed restrictions on gravel roads;
 - Regular removal of compacted dust from equipment such as crusher;
 - Covers on trucks;
 - Formal monthly fallout dust monitoring by a specialist;
- ❖ **Concern:** Blasting related dust.
- ❖ **Response:** Based on prevalent wind direction (SE in summer / SW in winter) a blasting related dust plume may cause hindrance to properties 5 & 6 (see following figure) from ±Dec – Feb, where after seasonal change in wind direction will most likely move the dust away from the neighbouring properties. Fallout dust monitoring will indicate problem areas.

SUMMARY OF PUBLIC CONCERNS

DUST CONTINUES:

Figure 34: Schematic representation of the potential direction that a dust plume may travel following a blast, where the red arrows represents a south-eastern wind, the orange arrow representing a southern wind and the blue arrows indicating the prevalent direction of a south-western wind. (Image obtained from Google Earth)

SUMMARY OF PUBLIC CONCERNS

LIFESTYLE / LAND USE:

- ❖ **Concern:** Quarry extension will affect current lifestyle and decrease in property value.
- ❖ **Response:** Wansley Quarry has been operational for past 20+ years. Proposed expansion into a previously cultivated area – not a greenfield development. According to DBP Consulting the proposed expansion aligns with the 5 SPLUMA principles that guide land development matters. DBP Consulting is of the opinion that the proposed project has no associated risk to the community from a land use or spatial planning point of view.
- ❖ **Concern:** Should the mining area be rezoned/subdivided?
- ❖ **Response:** No subdivision is needed. DBP Consulting was appointed as the town and regional planning consultant that is responsible for the land use application. The application was submitted on 26 March 2021 – outcome pending.

SUMMARY OF PUBLIC CONCERNS

ROADS / TRAFFIC:

- ❖ **Concern:** Location of road to be realigned.
- ❖ **Response:** The part of the W-Road that passes through Portion 1 of Farm No 652 – blue line in following image.

SUMMARY OF PUBLIC CONCERNS

ROADS / TRAFFIC CONTINUES:

- ❖ **Concern:** Is there regulations on how many meters a road is allowed to a boundary fence?
- ❖ **Response:** No set distance according to road engineer. The realignment of the road will be prescribed by the provincial road authorities that will be contacted prior to any realignment.

- ❖ **Concern:** Mining related traffic on the W-Road (dust, noise, safety).
- ❖ **Response:** Recommendations of the traffic impact assessment to be implemented:
 - Road to be surfaced and upgraded to provincial standards (within 3 years of approval) = address dust, reduce noise, improve safety;
 - Intersection between the W-Road and the N6 to be improved = improve safety;
 - No trucks outside proposed work hours = reduce noise, improve safety;
 - Covers on trucks = reduce dust;
 - Maintenance of the road surface until it is paved (re-gravelling once/year, vegetation clearance, side drain clearance, dust suppression) = improved road condition, reduced stormwater problems, reduced dust.

- ❖ **Concern:** Mining related traffic on the B-Road (dust, noise, safety).
- ❖ **Response:** If EIAR & EMPR approved = no mining related trucks allowed on the B-Road.

SUMMARY OF PUBLIC CONCERNS

ROADS / TRAFFIC CONTINUES:

- ❖ **Concern:** B- and W-Roads are private servitude roads.
- ❖ **Response:** Road Engineer confirmed that:
 - B-Road = Municipal Road;
 - W-Road = Class 5 Provincial Minor Road.

SUMMARY OF PUBLIC CONCERNS

ANIMALS:

- ❖ **Concern:** Impact on the habitat, breeding and movement of known buck species in area.
- ❖ **Response:** The ecological study concluded that the current faunal component of the farm has, to a certain degree, become desensitized and adapted to the operations. The riparian fringes (Qinira River), that falls outside the earmarked mining footprint, are of higher importance as it presents the natural fauna with a more intact habitat. Proposed development will not disrupt the connectivity of the landscape for fauna / impair their ability to respond to environmental fluctuations.

- ❖ **Concern:** Impact of blasting on caged exotic birds.
- ❖ **Response:** Due to insufficient scientific data, there may be a real potential for blasting having a negative impact on caged birds. Baseline vibration- and noise monitoring is proposed at the bird enclosures prior to the first blast, and thereafter with each blast to determine the exact ground vibration and noise levels experienced during a blast. Following the first readings (after the first blast) guidance could be obtained from an ornithologist regarding the best way forward to minimise the potential impact of blasting on the caged birds in question.

SUMMARY OF PUBLIC CONCERNS

WATER:

- ❖ **Concern:** Locality of proposed dams.
- ❖ **Response:** The dams will be placed along the NE boundary of the proposed mining footprint see following image. Dam 1 = 2 680 m³; Dam 2 = 5 685 m³.

SUMMARY OF PUBLIC CONCERNS

WATER CONTINUES:

- ❖ **Concern:** Impact of proposed development on downstream river/users.
- ❖ **Response:** The freshwater study concluded that the proposed expansion will not contribute significantly to the hydrological character of the Qinira River, and rated the impact as Low (after mitigation). The water uses at the mine will also be separately assessed/audited by the Department of Water and Sanitation. No water related development/use allowed prior to water use licence being issued.

- ❖ **Concern:** Blasting affecting groundwater availability.
- ❖ **Response:** The depth of the quarry pit will be limited to 120 m to keep it above the groundwater level of the immediate area. Vibration levels will be monitored with each blast. The mine will have to comply with the conditions of the Water Use Licence.

SUMMARY OF PUBLIC CONCERNS

VEGETATION:

- ❖ **Concern:** Mitigation of encroaching onto potentially protected plant species required
- ❖ **Response:** Vegetation removal restricted to mining footprint (no protected plants identified during study). A pre-construction walk-through of the final mining footprint, by qualified botanist, for species of conservation concern must be done.

- ❖ **Concern:** Mining area within a STEP vegetation corridor.
- ❖ **Response:** The ecologist used the more updated Eastern Cape Biodiversity Conservation Plan that incorporates the spatial data from the STEP project.

SUMMARY OF PUBLIC CONCERNS

WASTE MANAGEMENT:

- ❖ **Concern:** How does the quarry dispose of waste?
- ❖ **Response:** Mine generates little general- and/or hazardous waste as the workshop and storerooms are located off-site, and no routine servicing takes place at the mine. General waste is kept in refuse bins until disposed at the Berlin landfill site. Hazardous waste (such as contaminated soil) is kept in hazardous waste bins in a bunded area (at the workshop), until removed by East London Bricks (Gonubie). General- and hazardous waste registers are used to monitor the waste loads removed from the farm & safe disposal certificates are filed for auditing purposes.

SUMMARY OF PUBLIC CONCERNS

SAFETY:

- ❖ **Concern:** Shear faces not demarcated.
- ❖ **Response:** Interim: Mine to place white painted boulders 1 m from the edge of the quarry as well as caution signs. If the EIAR & EMPR approved: quarry developed according to the proposed mine plan:
 - Perimeter berm 3 m from the crest of the quarry;
 - Benches of 8 m wide x 12 m high at a slope of 55°.

SUMMARY OF PUBLIC CONCERNS

SAFETY CONTINUES:

- ❖ **Concern:** Expansion will affect the safety and security of the area.
- ❖ **Response:** Mitigation measures proposed:
 - New employees vetted prior to appointment;
 - Training of employees to report suspicious persons/matters in surrounding area;
 - No unauthorised people allowed in mining area;
 - If the quarry is extended, full time security will be employed on site that will also be in contact with a boomgate attendant at the entrance to the farm and watch tower where the B- and W-roads intercept. These will mainly be manned by a night guard in constant communication with site management.
 - Wansley Quarry is already part of the Holm Hill Residents community group where safety matters are discussed and site management takes part in farm patrols.

SUMMARY OF PUBLIC CONCERNS

MONITORING / COMPLIANCE:

- ❖ **Concern:** Who will monitor compliance?
- ❖ **Response:** Once approved the EIAR & EMPR is a legal document. The mine must by law submit annual compliance audits to DMRE compiled by independent auditor. The I&AP's must (according to law) be notified within 7 days of submission of the report to the DMRE & report must be published on a publically accessible website. Compliance inspections and -monitoring remains ultimately the responsibility of the DMRE.

- ❖ **Concern:** Mining outside approved boundary.
- ❖ **Response:** Current mining operations do extend across the approved mining boundaries. This is a compliance matter to be attended to by DMRE, as Greenmined does not have the authority to address this matter. The current application (if approved) will however rectify the matter.

THANK YOU

Good day Me Debbie Reynhardt

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Wansley Siyakhula (Pty) Ltd mining area on a portion of Portion 1 of Farm No 652, East London Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application.

Kind Regards/Vriendelike Groete

Good day Me Debbie Reynhardt

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Wansley Siyakhula (Pty) Ltd mining area on a portion of Portion 1 of Farm No 652, East London Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

Dear Me Reynhardt,

Thank you for letting us know that the link was down. It seems that there was a temporary problem with our website, but the matter has been rectified and the website has been restored.

I have attached the main document to this email for ease of reference, but due to size limitations could not attach all the appendices.

As mentioned, the website is up and running again and you are welcome to download the remaining documents from the website at: <https://www.greenmined.com/section-102-applications/> under the heading *Wansley Siyakhula (Pty) Ltd EC 30/5/1/2/2/228 MR*.

Alternatively, we will gladly provide you with a WeTransfer link from where the documents could also be downloaded. Please let me know should you prefer such a link to be send to you.

Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Hi Christine

Thank you for the extension and the summary document. I will send my comments as soon as possible before the 2nd September.

Regards
Debbie

On Mon, Aug 23, 2021 at 3:44 PM Christine Fouche <Christine.F@greenmined.co.za> wrote:

Dear Mrs Reynhardt,

Your trailing email has reference.

The EIA Regulations stipulates very strict timeframes regarding the submission of each subsequent report to the DMRE, that we as consultants also have to adhere to. In light of this, I need to submit the final Environmental Impact Management Report (EIAR) and Environmental Management Programme (EMPR) to the DMRE by the 15th of September 2021.

However, even though the website was repaired the same day that you informed us it was down, I would like to assist you by extend the commenting period with an additional 9 days until the 02nd of September 2021.

Further to this, attached hereto please find a copy of a summary I made for Mr Masters upon his request that may possibly also assist you in finding summarised answers.

I trust you will find this in order, and look forward to receiving your comments.

Kind Regards / Vriendelike Groete

Christine Fouche

Subject: RE: DRAFT EIA - proposed Rehab of wansley siyakhula Mine query
Attachments: Financial Provision Calculation Extract.pdf

Dear Mrs Reynhardt,

Further to our previous correspondence, and your trailing email below, herewith please find my response to your questions:

1. Attached hereto please find an extract from the DEIAR (pages 379 – 380) of how the rehabilitation cost amount was calculated. The calculations was done in accordance with the Guideline Document for the Evaluation of the Quantum of Closure-Related Financial Provision Provided by a Mine as published by the DMRE in 2005. The master rates used in the calculation are annually published by the DMRE for the use in the prescribed Calculation of the Quantum.
2. We do confirm that the mine planner proposed a maximum depth of 120 m for the quarry pit. However, since the publication of the DEIAR, the Department of Human Settlements, Water and Sanitation (DWS) stipulated that the depth of the quarry pit may not extend below the groundwater table. This condition will be added to the FEIAR & EMPR. An additional condition will also be added to the FEIAR & EMPR that when the excavation reaches a depth of ±80 m, a groundwater specialist will have to confirm the exact depth of the groundwater table, and advise on the maximum depth of the excavation to prevent it dropping below the groundwater table. The findings of the specialist will be submitted to both the DWS and DMRE for their approval. Should the groundwater specialist reduce the maximum depth of the quarry, the mining plan will be updated accordingly. The excavation will therefore not be mined deeper into the groundwater table.

Kind Regards / Vriendelike Groete

Subject: DRAFT EIA - proposed Rehab of wansley siyakhula Mine query

Hi Christine

On page 7 of the Draft EIA an financial provision amount of R844320.39 is given for closure and rehabilitation. Could you provide a rough breakdown of how this amount was reached please.

On page 25 of the closure plan it refers to final mining depth being limited to 120m , because that is where the watertable is intersected. Surely there should be a buffer and the final mining depth should not reach the watertable?..or is it a case of that extraction of water during operations will further lower the water table so that it will be at a greater depth when excavation reaches that far? How will this impact the capacity of the many boreholes in the area that surrounding properties rely on for their water source?

Regards
Debbie Reynhardt

Subject: Re: DRAFT EIA - proposed Rehab of wansley siyakhula Mine query

Categories: Wansley

Hi Christine here with are my comments on the Wansley Quarry expansion proposal.
regards
Debbie.

Wansley Quarry
Dear Christine

Objection to the proposed expansion of Wansley Siyakula mining operations.

Please accept my letter of absolute objection to the proposed expansion of mining area and type of operation, incorporating blasting , of the Wansley Siyakula Quarry operations for the reasons as set out hereunder.

1. It is disingenuous to state in your executive summary of the Draft Environmental Impact Assessment Report that “ Wansley Siyakhula (Pty) Ltd has been a **trusted** suppliers of weathered dolerite in the greater East London area for the past 20 years” in that:
 - they are clearly, currently , as per various map attachments in IAP responses and in specialist appendices, already operating in contravention of their existing authorisation in terms of authorised mining area and have been doing so for some time without indication of remorse,
 - existing agreements regarding dust suppression by watering the road are not being adhered to
 - inadequate management of mining traffic speeds and driving etiquette already negatively impacts local residents on a relatively frequent basis.
 - The material from unsecured loads and partial lost loads carries seed material of the uncontrolled invasive species on the quarry (for example Xanthium sp.) and is a significant contributing factor to spread of invasive species along the W and B, as well as other roads , which impacts grazing and land management in the area and to which the quarry does not contribute.
 - Appendix H2 clearly notes the lack of/inadequate current implementation of invasive species control in terms of an existing IAS management plan or compliance with an existing environmental management plan.

2. With regard to executive summary page 2 statement that project /site alternatives do not apply to this site I disagree. Why has the alternative of phased mining extension (excluding dolerite and therefore no blasting required) not been explored. In a possible proposed scenario, gravel is continued to be mined, in expanded areas but that rehabilitation takes place as the the mining footprint expands , such that at any point not more than approximately 5.2Ha is exposed and unrehabilitated. In this manner , a closer to 'true total cost' product lifecycle cost of extraction (which incorporates rehabilitation and/or biodiversity offset costs) would be attained.

Alternatively a lesser overall footprint such as not mining beyond the existing road and excluding watercourse A3 (as per the appendix H2 from the mining footprint) could be considered.

3. NEMA regulations require operations to be carried out and regulated by competent authorities. Given that the current Wansley Quarry is not listed on the DMR website's list of EC mines, and that it appears that both EC regional manager posts are vacant according to the DMR website, and that the quarry has not been stopped from mining outside its current permit authority, as well as no response being received from a number of pertinent government departments according to appendices G2 , it brings into question the capacity of those authorities to carry out their duties. In such a situation of uncertainty I would propose , as per NEMA and NEMBA, that the precautionary principle be applied.

4. It is totally unacceptable that your document proposes that the neighbours existing exotic bird and egg production businesses should be experimented on by blasting first and studying to see how much damage is done before mitigation factors can be applied. Blasting is completely incompatible with the surrounding land use and will ruin the sense of place for residents as well as further impact negatively on the safety of horseriding in the area, the latter of which is already severely curtailed by the trucks often reckless driving.

There have been unsettling and unpleasant incidences of blasts in the area already and if these were , those referred to in appendix K as the " modelling of blasting" , then it was unacceptable to not notify residents of the experiment . What guarantees can be given that blasting will not negatively impact boreholes and springs in the area?

There are the effects on bee hives ,(there are beekeepers in the area) which were not considered in Appendix K. According to Manciel al 1988 Blasting has a negative impact on beehives.

5. The vegetation report Appendix H1 is a 2007 document , which was prepared for a proposed housing development on the same property and does not meet the reporting requirements for specialist reports as per Appendix 6 – GN R326 EIA Regulations of 7 April 2017 , nor does it utilize data from the latest edition of the industry standard 2018 VEGMAP and should therefore be scrapped and a compliant updated Vegetation report done. This report must take into account permitting requirements for all indigenous trees that would be removed if the mining operation were to be approved, in terms of the National Forestry Act regulated by DFFE.

The National Forestry Act acknowledges various definitions of forest which includes rehabilitating woodlands and forest, which if one looks at an aerial view of vegetation in areas of adjacent properties one can see a more advanced stage of woodland/forest development.

6. The Ecological and freshwater resources study and assessment study, Appendix H2, likewise does not reference the latest data from the 2019 Eastern Cape Biodiversity Conservation plan and should be amended to do so.

7. Should the mining expansion be approved I object to the W road not being surfaced prior to mining expansion commencing. A maximum of 3 years is an unacceptable impact in terms of dust pollution on grazing, air quality and livelihoods.

I disagree with the statement on page 2 of the appendix H2 regarding “the proposed extension of mining area will not require any additional water usage as the mining method concerning water needs will remain unchanged” in that there is significant dust mitigation control measures required during a proposed maximum 3 year period where the mine intends for the Wrd access road to be sprayed with water.

In order to control dust during the increasingly hot and dry spells the road may have to be sprayed multiple time a day , every day with a water truck during unknown length of periods of time. (E.g. page 438 and 439 of volume 107 of the Journal of The Southern African Institute of Mining and Metallurgy states that the period of effectiveness of watering as dust suppression can range from 30 minutes to 3 hours depending on the weather, wearing course and traffic volumes.

As a rough estimate : if an average 1,5l of water is applied per m² of road , over an area of approximately (2.95km length x8m road width) 23600m² , then one application requires 35400l of water.

If it's a very hot dry day and this is applied every hour (more conservatively than twice per hour required in cases where it dries out every 30mins) over 8 hours then that amounts to **potential requirement daily of 283200 litres of water a day** just to suppress dust on the road. What water use licenses are in place for existing use and operations and how would the quarry sustain the proposed usage for future expansion and how would that affect the current water draw down rates and groundwater availability in the area?

8. The inadequate provision of figures for water usage in dust suppression brings into question as to whether adequate finances have been calculated for rehabilitation and closure.

The stated rehabilitation objectives are inadequate in that no funding appears to be in place for control of invasive species , which will certainly be required if , as the plan is for benches to be “vegetated with an appropriate grass mix if vegetation does not naturally establish in the area within six months of the replacement of the topsoil.” The reality is, is that if the replaced topsoil (after the estimated 60 years of mining dust landing on it) is not immediately seeded with an appropriate covering, for example by hydroseeding, invasive species will be the first to proliferate. Additionally trees and other suitable species should be re-introduced minimize the net loss of biodiversity. Biodiversity should be enhanced on the remainder of the area on the property during operations in order to offset biodiversity loss.

Consensus on closure plans and objectives aligned with the EMP must be reached through a public participation process before permission to mine is granted. The physical actions of rehabilitation cannot be dealt with in isolation from the associated planning and permitting actions.

Rehabilitation is an expensive business and can account for as much as 10% of the mining costs in certain circumstances, the majority of which are incurred after a significant portion of mining is completed and no form of guarantee has been given to ensure that these costs are catered for. Likewise where is the financial assurance that the costs of rehabilitation will be met in the case of early or unplanned closure. Have the costs for rehabilitation of early closure been estimated for different stages of the mine life.

Also, if the this mine expansion is not approved, has the cost of rehabilitation been estimated for the closure of the current mining operation, and are those finances earmarked in a trust fund for that?

Section 43 of the MPRDA has been amended to provide that the holder of a mining right remains liable forever and has to retain its pecuniary provision for rehabilitation for a period of 20 years after issue of a closure certificate. Does the mining right owner have the funds for that?

9. There has been an inadequate public participation process in that the definition of *"interested and affected persons"* includes any person (**including** on adjacent and **non-adjacent properties**) whose socio-economic conditions may be directly affected by the proposed prospecting or mining operation. Given the negative impacts associated with the increased noise, air shockwave impact from blasting, truck traffic congestion, dust pollution, it will impact on sense of place and lower the property values in the area, therefore all landowners in Holm Hill are impacted socio-economically.

The current practise of attempting to control existing mining operations reactively has proven to not be working, and I am not in favour of any reactive management of pollutant, environmental /livelihood damage and nuisance factors, and would like them to be addressed proactively instead prior to the actions potentially being approved and taking place.

Regards

Debbie Reynhardt.

Hi Christine

In addition to the mail sent earlier outlining my objections, regarding the Wansley quarry draft EIA , I am concerned that appendix F2 appears to be riddled with logical fallacies and seems to be an attempt at greenwashing. This project proposal may be fatally flawed.

regards
Debbie Reynhardt

Dear Madam,

Thank you for your comments submitted on the DEIAR of the Wansley Siyakhula (Pty) Ltd Section 102 amendment application.

We have received your comments & objections and incorporated it into the final EIAR & EMPR (FEIAR & EMPR) that will be submitted to the DMRE for their decision making. A copy of the FEIAR & EMPR will be published on the Greenmined website in due course, and you will be informed of the availability of the report.

Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Christine Fouche

Good day Mr Andrew Moss

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Wansley Siyakhula (Pty) Ltd mining area on a portion of Portion 1 of Farm No 652, East London Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application.

Kind Regards/Vriendelike Groete

Dear Christine

Many thanks for your reply and willingness to extend the commenting period. This is very much appreciated. I was able to get onto the website at c. 15:30 and read through about 40% of the document this afternoon and this evening but still have a long way to go.

Should I send my comments to you when I have completed reading through the rest of the report?

With best wishes
Phil

Dear Sir,

My apologies for the temporary break in the website, it has been restored and is back up and running again.

For ease of reference I have attached the DEIAR & EMPR (without appendices) to this email. Please let me know should you like me to send you any of the other documents as well.

I would also like to assist you by extending the commenting period until the 02nd of September 2021 to provide you with a few extra commenting days. Unfortunately, I cannot extend it more than that as I need to submit my final report to the DMRE by the 15th of September 2021.

Should you experience any more difficulties in accessing the reports please feel free to let me know.

Dear Christine

I was hoping to submit comments on the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the proposed expansion of the Wansley Siyakhula (Pty) Ltd mining area but am unable to access the greenmine.com website. I am getting the following error message "The server is temporarily unable to service your request due to the site owner reaching his/her bandwidth limit. Please try again later".

I shall keep trying but if I am not able to access the site would it be possible to submit comments before the end of this week?

With best wishes

Dear Sir

Greenmined herewith acknowledge receipt of your correspondence regarding the proposed Section 102 amendment application of Wansley Siyakhula (Pty) Ltd in the East London area.

Approval of the Scoping Report is still awaited from the Department of Mineral Resources and Energy (DMRE).

However, we have registered you as an Interested and Affected Party on the project, and will henceforth keep you posted on the progress of the Environmental Impact Assessment process as well as inform you of the availability of the draft environmental impact assessment report (DEIAR) for your perusal and commenting.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Cc: Marlene Lingenfelder <admin@greenmined.co.za>
Subject: RE: Section 102 application: EC30/5/1/1/2/228 MR

Dear Sir,

Section 102 application: Wansley Siyakhula Ltd.

Comments: P.A. Whittington

Main document

1. Acronym list: there are two different acronyms with the initials ESA.
2. Acronym list: Is the National Road Traffic Act (NRTA) 1996 or 1999? Both are indicated.
3. Figure 6: indicate in the title what is meant by RT, LT and TH.
4. Section 2.3.3 Blasting, paragraph 2: if there is any risk whatsoever of structural damage to property (other than the applicant's) this cannot be approved.
5. Looking at the comments made by people living within the vicinity of the current Wansley mine there seems to be a trend that suggests non-compliance with current conditions and lack of responsibility towards other residents. At least five parties attest to the size of the current mine exceeding the limit set by the existing mining licence. Eight parties mention trucks operating outside of normal working hours and at least ten parties to trucks being driven irresponsibly and at high speeds suggesting that a serious accident is just waiting to happen. This does not inspire confidence that conditions and mitigation measures laid down by Environmental Authorisation will necessarily be adhered to. I am concerned as to who is going to ensure that such measures are complied with, given that the mine will be operating on private property? If such compliance cannot be assured by way of monitoring by an independent party then the Section 102 application should not be granted.
6. The proposed operating hours for the mine are a step in the right direction but are of little use if they are not adhered to.
7. The suggested limits on when loading can take place and when trucks can operate is welcome, though they still don't seem to offer much respite to the local residents. It is vital that these time limits and adherence to the speed limit are strictly enforced but who is going to do it? The current situation is clearly untenable. If the contractor providing the transport cannot ensure that their drivers observe speed limits and drive responsibly then the mine must make it clear that they will seek an alternative contractor.
8. Does the current mine have an Environmental Control Officer (ECO)? If not, is there any likelihood of one being employed? It will be necessary to have an independent ECO to ensure that mitigation measures and other conditions, such as not entering no-go areas, are complied with.
9. Under the heading of Vegetation, pages 147 & 148: What does "(d)" that follows some species names signify?
10. Page 197, under the heading Stone Age, paragraph 3, line 7: The location of the Nahoon footprints site is given incorrectly. It is west of Gonubie. 10 km east north east of the centre of East London perhaps?
11. Page 222: The explanation of the methodology used to determine the ranking should precede the table with the ranking values that presently starts on P.204.
12. Due to the prevailing drought any water used for dust suppression should not be potable water. BCM is targeting a 35% reduction in water usage to try and avoid "day zero" from occurring.
13. Appendix H2, Page 55, under Ecosystem Functions, bullet 5: I don't think anything will discharge into the Orange River from Wansley!
14. Appendix H2, Table 21: the rating for High should presumably be >60.
15. Appendix H2 provides an extensive botanical, ecological and hydrological assessment, but relatively little attention has been paid to fauna. I believe a more thorough faunal survey needs to be carried out involving specialists in entomology and herpetology as a minimum.

Dear Sir,

Thank you for your comments submitted on the DEIAR of the Wansley Siyakhula (Pty) Ltd Section 102 amendment application.

We have received your comments and incorporated it into the final EIAR & EMPR (FEIAR & EMPR) that will be submitted to the DMRE for their decision making. A copy of the FEIAR & EMPR will be published on the Greenmined website in due course, and you will be informed of the availability of the report.

Please do not hesitate to contact me in the event of any uncertainties.
