10 July 2020

To Whom It May Concern:

Dear sir/madam

RE: NOTICE OF AN APPLICATION IN TERMS OF SECTION 102 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED 2017).

PROJECT INFORMATION

Mr David Hayes intends submitting a Section 102 ("S102") amendment application to amend the mining method by increasing the blasting frequency as well as including primary processing crushing and screening of aggregate to the mining activities over a portion of Portion 5 of the farm Latham 205, Queenstown, Eastern Cape Province (hereinafter referred to as "Whittlesea Quarry" ("WQ")). The S102 application necessitates an application for a Part 2 amendment of the mine's EMP in terms of GNR 326 Section 31. The proposed S102 application does not constitute a listed or specified activity in terms of the NEMA EIA Regulations, 2014 (as amended).

the goal isn't to live forever, it is to protect a planet that will

Greenmined Environmental (Pty) Ltd | Tel: 021 851 2673 | Fax: 086 546 0579
Office No 36, MO1 Baker Square Block, De Beers Avenue, Paardevlei, Somerset West, 7130
Postnet Suite 62, Private Bag x15, Somerset West, 7129
Directors: S Smit; C Weideman | Reg No: 2012/055565/07 | VAT No. 4040263032

LEGAL COMPLIANCE

The Section 102 (MPRDA) application necessitates a Part 2 amendment of the holder's EMP in terms of Section 31 of the NEMA: EIA Regulations, 2014 (as amended 2017).

- GNR 326 Section 31 Amendments to be applied for in terms of Part 2:

An environmental authorisation may be amended by following the process prescribed in this Part if the amendment will result in a change to the scope of a valid environmental authorization where such change will result in an increased level or change in the nature of impact where such level or change in nature of impact was not:

- a) assessed and included in the initial application for environmental authorization; or*
- b) taken into consideration in the initial environmental authorization;*

and the change does not, on its own, constitute a listed or specified activity.

PUBLIC INVOLVEMENT

The draft Basic Assessment Report and Environmental Management Programme (BAR & EMPR) for the proposed amendment is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

Interested and Affected Parties (I&AP's) are invited to provide written comments regarding the application. I&AP's must provide their comments with their name and contact details to the environmental consultant indicated below by **12 August 2020**. Should you require the documentation in another language or need additional information please contact Greenmined Environmental.

A register of I&AP's that submitted written comments or requested to be registered will be opened. All organs of state which have jurisdiction in respect of the activity will also be listed on the register. Upon lapse of the commenting period the DBAR & EMPR will be updated to reflect the comments received during the public commenting period. Thereafter, the final BAR & EMPR will be submitted to DMR for its consideration as part of the authorization process in terms of the MPRDA, 2002 and NEMA, 2014 regulations (as amended 2017). A copy of the final BAR & EMPR will be published on the Greenmined

Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal.

Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments. If we do not receive any comments from you before the end of the commenting period it will be accepted that you do not have any additional objections/comments with regard to the project. We trust that you find it in order and kindly await your comments on this report.

Please contact Murchellin Saal at 076 792 6327 (Cell) or 021 851 2673 (Tel), 086 546 0579 (Fax), or murchellin.s@greenmined.co.za should you require any additional information.

Good Day

Please find attached notification that Mr David Hayes intends submitting a Section 102 ("S102") amendment application to amend the mining method by increasing the blasting frequency as well as including primary processing crushing and screening of aggregate to the mining activities over a portion of Portion 5 of the farm Latham 205, Queenstown, Eastern Cape Province (hereinafter referred to as "Whittlesea Quarry" ("WQ")). The S102 application necessitates an application for a Part 2 amendment of the mine's EMP in terms of GNR 326 Section 31. The proposed S102 application does not constitute a listed or specified activity in terms of the NEMA EIA Regulations, 2014 (as amended).

Subject: RE: Whittlesea Section 102 - SANRAL

Importance: High

Good day Ms. Marlene

Hope all is well.

Below are SANRAL comments with regards to the Whittlesea Quarry along the National Road:

The South African Roads Agency SOC Limited (SANRAL) has the following comments with regards to the various projects along the National Road:

- No structure shall be erected closer than 30 metres from the national road reserve fence and 500 metres from any point of intersection.
- If access is required from the National Road, an approval from SANRAL is required, otherwise access can be obtained from the nearest numbered route, which SANRAL must be consultant for approval as the development will have impact on the traffic on the National Road.
- The developer will accordingly be required to establish and maintain a pedestrian proof brick/concrete wall along the full extent of the development to prevent pedestrian access onto the National Road.
- Only where drainage crosses the boundary wall, a non-solid boundary is accepted. Any future negative impacts in this regard will be considered to be the responsibility of the developer to correct.
- SANRAL shall not be held liable should it be found at any future time that noise emanating from the national road, presents a problem in the development adjacent to the national road.
- All storm water discharged or diverted from the national road shall be received and disposed of. A drainage plan has to be submitted to this office for consideration.
- No advertising shall be directed or displayed to be visible from the national road during the development or construction of this development. All advertising shall be subject to SANRAL's approval.
- A formal application together with the plans of the proposed development must be submitted to SANRAL for approval
- Construction of all works may only commence after a written approval has been obtained by SANRAL.

Please note that these are only comments for the application of the Environmental Authorisation for the proposed quarry along the National Road.

Keep safe and kind regards
Chumisa

LEGAL COMPLIANCE

The Section 102 (MPRDA) application necessitates a Part 2 amendment of the holder's EMP in terms of Section 31 of the NEMA: EIA Regulations, 2014 (as amended 2017).

- GNR 326 Section 31 Amendments to be applied for in terms of Part 2:

An environmental authorisation may be amended by following the process prescribed in this Part if the amendment will result in a change to the scope of a valid environmental authorization where such change will result in and increased level or change in the nature of impact where such level or change in nature of impact was not:

- a) assessed and included in the initial application for environmental authorization, or
 - b) taken into consideration in the initial environmental authorization;
- and the change does not, on its own, constitute a listed or specified activity.

PUBLIC INVOLVEMENT

The draft Basic Assessment Report and Environmental Management Programme (BAR & EMPR) for the propose amendment is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

Interested and Affected Parties (I&AP's) are invited to provide written comments regarding the application. I&AP's must provide their comments with their name and contact details to the environmental consultant indicated below by **12 August 2020**. Should you require the documentation in another language or need additional information please contact Greenmined Environmental.

A register of I&AP's that submitted written comments or requested to be registered will be opened. All organs of state which have jurisdiction in respect of the activity will also be listed on the register. Upon lapse of the commenting period the DBAR & EMPR will be updated to reflect the comments received during the public commenting period. Thereafter, the final BAR & EMPR will be submitted to DMR for its consideration as part of the authorization process in terms of the MPRDA, 2002 and NEMA, 2014 regulations (as amended 2017). A copy of the final BAR & EMPR will be published on the Greenmined

Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal.

Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments. If we do not receive any comments from you before the end of the commenting period it will be accepted that you do not have any additional objections/comments with regard to the project. We trust that you find it in order and kindly await your comments on this report.

Please contact Murchellin Saal at 076 792 6327 (Cell) or 021 851 2673 (Tel), 086 546 0579 (Fax), or murchellin.s@greenmined.co.za should you require any additional information.

ATTENTION: Murchellin Saal

PER EMAIL: murchellin.s@greenmined.co.za

Dear Madam

RE: NOTICE OF AN APPLICATION IN TERMS OF SECTION 102 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) AND THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT NO 107 OF 1998) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS 2014 (AS AMENDED 2017)

We refer to the above mentioned application "to amend the mining method by increasing the blasting frequency as well as including primary processing crushing and screening of aggregate to the mining activities" and wish to record our objection to this amendment. Our objection to this is based on the following.

1) Existing Mines

There are already two existing commercial mines, of which Civil and General Contractors operates one, who operate under mining rights in the area of the applicants permitted mine. These mines both have permanent screening and processing facilities in operation to supply the area with aggregate. These mines which operate under mining rights have to remain economically viable as a requirement of their mining right. It is very difficult for these mining right holders to remain economically viable when new permits are issued for services that they can supply each time a new contract for infrastructure is concluded in our area. The sole purpose of this amendment is to supply the 3 year contract for the upgrade of the road from Swart Kei River to Queenstown. Over and above the above mentioned there is a third semi-permanent mine operating in the area with a crushing and processing plant under permit which under current conditions is not operating viably and has been closed for a couple of months. This is another indication that there is no requirement for an additional mine in the area.

2) Employment

The contractor who will be conducting the mining operations for the permit holder are not from our area and thus will employ very few, if any, of the local population. The existing mining rights holders in our area have permanent operations in the area and all employees employed are from the local population. One of the main objectives of mining rights is job creation and therefore by continually introducing temporary operations who employ mainly from other parts of the country it defeats the objectives of job creation in the local area and will result in loss of permanent employment for the local population.

3) Health and Safety / Social and Labour Plan

The permanent mining right holders in the area are required to invest large sums of financial resources into the health and safety and social and labour plans which are not required by permit holders. Once again the establishment of new temporary operations who are not subject to investment in the above mentioned is to the detriment of the permanent operations as regardless of the economic conditions investment in the above mentioned is required. The opening of temporary operations, where the permanent operations have the capacity to supply local contracts, detracts from the ability of the permanent operations' ability to meet the financial requirements as set out by their mining rights.

In closing we believe that under the depressed economic climate we are experiencing in our area with huge unemployment, it is not within the interest of the local population and regional economy to introduce temporary operations that will have little economic benefit to our area, and that will jeopardise the longevity of the permanent operations in the area.

Yours Faithfully

I.G. MCEWAN

LEGAL COMPLIANCE

The Section 102 (MPRDA) application necessitates a Part 2 amendment of the holder's EMP in terms of Section 31 of the NEMA: EIA Regulations, 2014 (as amended 2017).

- GNR 326 Section 31 Amendments to be applied for in terms of Part 2:

An environmental authorisation may be amended by following the process prescribed in this Part if the amendment will result in a change to the scope of a valid environmental authorization where such change will result in and increased level or change in the nature of impact where such level or change in nature of impact was not:

- a) assessed and included in the initial application for environmental authorization; or*
- b) taken into consideration in the initial environmental authorization;*

and the change does not, on its own, constitute a listed or specified activity.

PUBLIC INVOLVEMENT

The draft Basic Assessment Report and Environmental Management Programme (BAR & EMPR) for the propose amendment is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com.

Interested and Affected Parties (I&AP's) are invited to provide written comments regarding the application. I&AP's must provide their comments with their name and contact details to the environmental consultant indicated below by **12 August 2020**. Should you require the documentation in another language or need additional information please contact Greenmined Environmental.

A register of I&AP's that submitted written comments or requested to be registered will be opened. All organs of state which have jurisdiction in respect of the activity will also be listed on the register. Upon lapse of the commenting period the DBAR & EMPR will be updated to reflect the comments received during the public commenting period. Thereafter, the final BAR & EMPR will be submitted to DMR for its consideration as part of the authorization process in terms of the MPRDA, 2002 and NEMA, 2014 regulations (as amended 2017). A copy of the final BAR & EMPR will be published on the Greenmined

Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal.

Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments. If we do not receive any comments from you before the end of the commenting period it will be accepted that you do not have any additional objections/comments with regard to the project. We trust that you find it in order and kindly await your comments on this report.

Please contact Murchellin Saal at 076 792 6327 (Cell) or 021 851 2673 (Tel), 086 546 0579 (Fax), or murchellin.s@greenmined.co.za should you require any additional information.

NOTICE OF SECTION 102 AMENDMENT APPLICATION

Notice is hereby given in terms of the Mineral and Petroleum Resources Development Act (MPRDA), 2002 (Act No 28 of 2002) and the National Environmental Management Act, 1998 (act 107 of 1998 NEMA) as well as the Environmental Impact Assessment Regulations, 2014 (amended 2017) that Mr. David Hayes intends submitting:

a Section 102 ("S102") amendment application to amend the mining method by increasing the blasting frequency as well as including primary processing crushing and screening of aggregate to the mining activities over a portion of Portion 5 of the farm Latham 205, Queenstown, Eastern Cape Province (hereinafter referred to as "Whittlesea Quarry" ("WQ"), in terms of Section 102 of the MPRDA, 2002

The approved mining permit was granted for gravel through mechanical excavation. The mining method did not require any crushing to be done and blasting was only to be done if needed (limited to one blast.)

The Section 102 (MPRDA) application necessitates a Part 2 amendment of the holder's EMP in terms of Section 31 of the NEMA: EIA Regulations, 2014 (as amended 2017).

GNR 326 Section 31 Amendments to be applied for in terms of Part 2:
An environmental authorisation may be amended by following the process prescribed in this Part if the amendment will result in a change to the scope of a valid environmental authorization where such level or change change will result in and increased level or change in the nature of impact where such level or change change in nature of impact was not: a) assessed and included in the initial application for environmental authorization; or b) taken into consideration in the initial environmental authorization; and the change does not, on its own, constitute a listed or specified activity

The draft Basic Assessment Report and Environmental Management Programme (DBAR & EMPR) is available to the public for a 30 days review period. An electronic copy of the report will be published on the Greenmined Environmental website (www.greenmined.com). Interested and Affected Parties on the Greenmined Environmental website (www.greenmined.com). Interested and Affected Parties (I&AP's) are invited to provide written comments. I&AP's must provide their comments with their name and contact details to the environmental consultant indicated below within 30 days from the date of this notice. Should you require the documentation in another language or need additional information please contact Greenmined Environmental.

A register of I&AP's that submitted written comments or requested to be registered will be opened. All organs of state which have jurisdiction in respect of the activity will also be listed on the register. Upon lapse of the commenting period the DBAR & EMPR will be updated to reflect the comments received during the public commenting period. Thereafter, the final BAR & EMPR will be submitted to DMR for its consideration as part of the authorization process in terms of the MPRDA, 2002 and NEMA, 2014 regulations (as amended 2017). A copy of the final BAR & EMPR will be published on the Greenmined Environmental website. The lockdown has been a dream without end for pets who have had their humans work beside them day after day.

But, as we slowly return to business as usual, more and more pet owners will have to bid their good boys goodbye as they head back into the workplace.

For pets with anxiety issues, this can lead to expensive consequences for their owners.

To help homeowners out, RE/MAX of Southern Africa suggests the following tips so that our faithful companions do not tear the house down when we leave for work.

Lack of house training or separation anxiety?

The first thing homeowners need to discern is whether their pet is displaying signs of true separation anxiety or just needs to be properly house-trained. Pets who suffer from separation anxiety will display more distressing

PET PREP: To help homeowners prepare for leaving their pets at home as they return to work, RE/MAX has come up with handy tips
Picture: SUPPLIED

signals, such as trying to prevent their owner from leaving, barking incessantly when their owner is away, urinating or defecating frequently trying to escape to reach their owner.

Protect your pet and your home

It will take some time for a pet to adjust to a homeowner's new schedule. In the meanwhile, homeowners should make some adjustments to their

home to protect their pet and their property. To start, if a pet urinates or defecates when left alone, keep him or her away from rooms with fitted carpets, wooden floors, or loose mats, as these will be harder to clean.

If a pet tries to escape often, inspect the boundary walls and fences to make sure there are no weak spots or places where the dog could hurt itself, for example, on spiked edges or protruding nails.

Recondition your pet

When a pet displays signs of separation anxiety, they need to be taught how to enjoy or at least endure being left alone. A good way to achieve this is to counter-condition your pet so that they associate being alone with things they enjoy, like a tasty treat.

Every time a homeowner leaves the house, offer the pet a puzzle toy stuffed with food that will take at least 20 to 30 minutes to complete.

As a final recommendation, Adrian Goslett, regional director and CEO of RE/MAX of Southern Africa, suggests that homeowners not ignore the destructive behaviour — not only to protect their home, but also their pet.

"Responsible pet owners should prioritise the wellbeing of their pet above the state of their home."

"However, if a pet is destroying the property, there is often a bigger cause behind the bad behaviour and can even be an underlying health issue."

"I recommend that homeowners not ignore the destructive behaviour of their pets, but rather seek professional help to ensure the health and safety of their pet," Goslett says.

NOTICE OF SECTION 102 AMENDMENT APPLICATION

Notice is hereby given in terms of the Mineral and Petroleum Resources Development Act (MPRDA), 2002 (Act No 28 of 2002) and the National Environmental Management Act, 1998 (act 107 of 1998 (NEMA) as well as the Environmental Impact Assessment Regulations, 2014 (amended 2017) that Mr. David Hayes intends submitting:

- a Section 102 ("S102") amendment application to amend the mining method by increasing the blasting frequency as well as including primary processing crushing and screening of aggregate to the mining activities over a portion of Portion 5 of the farm Latham 205, Queenstown, Eastern Cape Province (hereinafter referred to as "Whittlesea Quarry" ("WQ"), in terms of Section 102 of the MPRDA, 2002

The approved mining permit was granted for gravel through mechanical excavation. The mining method did not require any crushing to be done and blasting was only to be done if needed (limited to one blast.)

The Section 102 (MPRDA) application necessitates a Part 2 amendment of the holder's EMP in terms of Section 31 of the NEMA: EIA Regulations, 2014 (as amended 2017).

- GNR 326 Section 31 Amendments to be applied for in terms of Part 2:**
An environmental authorisation may be amended by following the process prescribed in this Part if the amendment will result in a change to the scope of a valid environmental authorization where such change will result in and increased level or change in the nature of impact where such level or change in nature of impact was not: a) assessed and included in the initial application for environmental authorization; or b) taken into consideration in the initial environmental authorization; and the change does not, on its own, constitute a listed or specified activity

The draft Basic Assessment Report and Environmental Management Programme (DBAR & EMPR) is available to the public for a 30 days review period. An electronic copy of the report will be published on the Greenmined Environmental website (www.greenmined.com). Interested and Affected Parties (I&AP's) are invited to provide written comments. I&AP's must provide their comments with their name and contact details to the environmental consultant indicated below within 30 days from the date of this notice. Should you require the documentation in another language or need additional information please contact Greenmined Environmental.

A register of I&AP's that submitted written comments or requested to be registered will be opened. All organs of state which have jurisdiction in respect of the activity will also be listed on the register. Upon lapse of the commenting period the DBAR & EMPR will be updated to reflect the comments received during the public commenting period. Thereafter, the final BAR & EMPR will be submitted to DMR for its consideration as part of the authorization process in terms of the MPRDA, 2002 and NEMA, 2014 regulations (as amended 2017). A copy of the final BAR & EMPR will be published on the Greenmined Environmental website. All registered I&AP's and stakeholders will be notified in writing within 14 days of the date of the decision of the outcome of the application, including the reasons for the decision and the right of appeal.

The lockdown has been a dream without end for pets who have had their humans work beside them day after day.

But, as we slowly return to business as usual, more and more pet owners will have to bid their good boys goodbye as they head back into the workplace.

For pets with anxiety issues, this can lead to expensive consequences for their owners.

To help homeowners out, RE/MAX of Southern Africa suggests the following tips so that our faithful companions do not tear the house down when we leave for work.

Lack of house training or separation anxiety?

The first thing homeowners need to discern is whether their pet is displaying signs of true separation anxiety or just needs to be properly house-trained. Pets who suffer from separation anxiety will display more distressing

PET PREP: leaving the work, RE/MAX Picture: SUPA

signals, such as to prevent the from leaving, incessantly w owner is away urinating or d when left alone frequently try escape to reach owner.

Protect your and your home

It will take time for a pet to a homeow schedule. In t meanwhile, homeowners make some adjustments t
