PROJECT PROPOSAL

World Focus 1143 CC applied for a sand mining permit on 1.16 ha of the farm Niagara No 380 in the Joe Gqabi Magisterial District of the Eastern Cape. The property is ±20 km north-west of Maclear/Nqanqarhu near the R56 on the banks of the Tsitsa River.

The objective of the project is to extract sand from the Tsitsa River and riverbank. The proposed project will be of small scale where the mineral (sand) will be mined with a TLB (and/or excavator) that will stockpile it on the nearby riverbank until it is loaded onto trucks that will transport it from the site to clients.

No infrastructure will be established, and the sand will not be washed/screened. The existing roads on the property will be used to gain access to the proposed mining area. Where needed the Applicant will upgrade the roads and maintain it for the duration of the operational phase.

PUBLIC PARTICIPATION

Interested and Affected Parties (I&AP's) and stakeholders are invited to provide written comments before the closing date of 24 January 2023. Should additional information be required it can be obtained from Greenmined. ISIPHAKAMISO SEPROJEKTHI

I-World Focus 1143 CC yenza isicelo semvume yokomba wesanti kwi-1.16 hektare yefama iNiagara enguNombolo 380 kwiSithili sikaMantyi saseJoe Gqabi eMpuma Koloni. Lo mhlaba umalunga neekhilomitha ezingama-20 kumntla-ntshona weMaclear/Nqanqarhu kufutshane no-R56 kunxweme loMlambo iTsitsa.

Injongo yale projekthi kukukhupha isanti kumlambo iTsitsa nonxweme lomlambo. Iprojekthi ecetywayo iya kuba yeyomlinganiselo omncinci apho izimbiwa (isanti) ziya kombiwa nge-TLB (kunye/okanye i-excavator) eya kuzigcina kunxweme lomlambo okufutshane de zifakwe kwiilori eziya kuzithutha zisuka kwindawo ziyise kubathengi.

Akukho ziseko zophuhliso ziya kusekwa, kwaye nesanti ayiyi kuhlanjwa/ihlolwe. Iindlela ezikhoyo kulo mhlaba ziza kusetyenziselwa ukufikelela kwindawo yemigodi ecetywayo. Apho kuyimfuneko uMfaki-sicelo uya kuphucula iindlela kwaye azigcine ngexesha lesigaba sokusebenza.

INXAXHEBA YOLUNTU

Ingxelo eyiDrafti yoVavanyo oluSisiseko (DBAR) kunye neNkqubo yoLawulo lokuSingqongileyo (EMPR), iya kufumaneka ukuze uluntu luhlomle ukususela ngomhla nge-05 kaDisemba 2022. Iikopi zalo zingafunyanwa kwiGreenmined xa ziceliwe okanye zikhutshelwe ku-<https://www.greenmined.com/mining-permits/>. Amaqela anomdla naChaphazelekayo ayamenywa ukuba anike izimvo ezibhaliweyo. Umhla wokuvala ukungeniswa kwezimvo nge-24 kaJanuwari 2023. Ukuba ulwazi olongezelelweyo luyafuneka, okanye incwadana yesiNgesi ingafumaneka kwaGreenmined. Nceda usebenzise **i-EC 30/5/1/3/2/10749 MP** njengesalathiso xa uphawula.

Ngokuthatha inxaxheba kule nkqubo, uyavuma, ngokoMthetho woKhuseleko lweNgcaciso yoMntu wesi-4 ka-2013 ("POPIA"), ukusetyenzwa ngokusemthethweni kolwazi lwakho lobuqu nguGreenmined, olunokuthi lusetyenziswe iinkcukacha zakho njengenxalenye yamaxwebhu. ngokunxulumene nenkqubo yesicelo soGunyaziso lokuSingqongileyo. Ngokubonelela ngeenkukacha zakho kwaye ngokuthatha inxaxheba kule nkqubo ugunyazisa ulwazi olunjalo ukuba kwabelwane ngalo ngenjongo yesi sicelo.

Irejista yee-I&AP's engenise izimvo ezibhaliweyo okanye ecelwe ukuba ibhaliswe iya kuvulwa. Onke amaqumrhu karhulumente anegunya lolawulo malunga nalo msebenzi nawo aya kudweliswa kwirejista. Emva kokuphela kweli xesha lezimvo likhankanywe ngasentla, iDBAR iya kuhlaziywa ukuze ibonise izimvo ezifunyenweyo ngexesha lokunikwa kwezimvo zoluntu. Emva koko, iNgxelo yokuGqibela yoVavanyo oluSisiseko (FBAR) iya kungeniswa kwi-DMRE ukuze kwenziwe izigqibo. Ikopi ye-FBAR iya kufumaneka kwiwebhusayithi yeGreenmined. Onke ama-I&AP abhalisiweyo kunye nabachaphazelekayo baya kwaziswa ngembalelwano kwiintsuku ezili-14 zomhla wesigqibo sesiphumo sesicelo, kubandakanywa nezizathu zesigqibo kunye nelungelo lokubhena.

UNksz Tuurman othandekayo,

IGreenmine apha yamkela i-imeyile yakho yomhla wama-23 kuDisemba 2022, kwaye enkosi ngomdla wakho kwiprojekthi. Sizamile ukukufowunela, kodwa inombolo yefowuni, enikezwe kwi-imeyile yakho, ngelishwa ayikhali. Ubhalisiwe njengomntu onomdla kunye neqela elichaphazelekayo kwiprojekthi kwaye uya kwaziswa ngokuqhubekayo ngexesha lenkqubo yesicelo.

Umsebenzi wemigodi ocetywayo uya kuba ngowomlinganiselo omncinci (i-1.6 yeehektare) apho intlabathi iya kususwa emlanjeni kunye/okanye elunxwemeni lomlambo nge-TLB (kunye/okanye i-excavator), ifunjwe kufuphi nomlambo, emva koko ithuthelwe kubathengi ngeelori. Umgodi uya kuba nobomi obungaphezulu kweminyaka emi-5. Iprojekthi ecetywayo iza kudala ± 8 amathuba emisebenzi kubantu basekuhlaleni. Iprojekthi iya kuba negalelo kuqoqosho lwengingqi, ngokuthe ngqo kunye nangesiphumo sokuphindaphinda ubukho bayo obuya kudala, njengoko izixhobo kunye nezibonelelo zithengwa ekuhlaleni, kwaye imivuzo ichithwa kumashishini asekhaya, ukuvelisa zombini imisebenzi kunye nengeniso kwindawo.

Umnini-mhlaba uya kufumana imbuyekezo, kwaye ukuthengiswa kwezinto eziphathekayo kuya kukhuthaza ngokuthe ngqo nangokungathanga ngqo uqoqosho lwaloo ndawo. Ngaphaya koku isicwangciso sokuqhubela phambili kwentengo yoMfaki-sicelo sixhasa amashishini asekuhlaleni, apho ukhetho lunikwa i-HDSA kunye nababoneleli basekhaya abangabasetyhini (apho kunokwenzeka).

Siyathemba ukuba uya kukufumana oku ngokufanelekileyo. Nceda ungalibazisi ukuqhakamshelana nam ukuba ungathanda ukuxoxa ngakumbi ngalo mba.

Dear Sir/Madam

RE: DRAFT BASIC ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR A MINING PERMIT APPLICATION ON A PORTION OF THE FARM NIAGARA NO 380, JOE GQABI DISTRICT, EASTERN CAPE PROVINCE.

Reference is made to the above-mentioned document received. The Department of Water and Sanitation has the following comments with regards to the proposed development:

1. Water Quality Management

- ❖ The chemical toilets should be emptied/serviced on regular basis and under no circumstances should the effluent from the chemical toilet be disposed of anywhere except at an approved facility for effluent disposal.
- ❖ All spills must be reported immediately, and incident management protocol be submitted to this office.
- ❖ Please take note that the ablution facilities must be located outside of the 1:100-year flood line and regular monitoring of the facilities must be on daily basis and human waste must be disposed of at permitted or registered wastewater treatment works and a letter of agreement between applicant and concerned local municipality must be forwarded to the Department.
- ❖ Any incidents that would occur and have potential to pollute water resources be it surface, or ground water must be reported to this Office.
- ❖ Elundini Local Municipality should be notified of this proposed activity for noting.
- ❖ That the closure and rehabilitation programme on the site be done in accordance with the Environmental Management Plan (EMP).

2. Resource Protection Directorate

In terms of Section 21(c) and (i) i.e., ***“impeding or diverting the flow of water in a watercourse”*** and ***“altering the bed, banks, course or characteristics of a watercourse”*** respectively under the provisions of the National Water Act, 1998 (Act No. 36 of 1998), hereinafter referred to as the NWA.

2.1. Water Uses and Water Use Authorisations

- ❖ The applicant must note that if any of the activities for the proposed mining occur within the **regulated area i.e. 1:100 year flood line, riparian habitat or within 100m from the edge of a watercourse (whichever is the greatest)**, requires a water use authorisation in terms of Section 21(c) and (i) and must be authorised by this Department, under the provisions of the National Water Act, 1998 (Act No. 36 of 1998), hereinafter referred to as the NWA.
- ❖ If there are wetlands at the proposed construction location, the applicant will require authorisation from the Department for **any activity within a wetland or 500m radius from the boundary of a delineated wetland**.
- ❖ **Flood line determination:** The applicant must note that no activities should occur within a 1:100-year flood line, unless authorised.
- ❖ The Applicant shall conduct a preliminary legal assessment to identify **all** the water use activities associated with the proposed project that will require authorisation by the Department of Water and Sanitation (DWS) and the applicant is hereby referred to Section 22(1) of the National Water Act, 1998 (Act 36 of 1998).
- ❖ Water use authorisation enquiry can be lodged through e-WULAAS online system for further processing.
- ❖ The river, stream and associated **buffers** must be treated as sensitive environment areas: caution must be exercised near the watercourses.
- ❖ Applicant should **identify alternatives** with the aim of protecting water resource.
- ❖ **Please note that no person may use water unless permitted under the NWA.** Should the applicant engage in any water use activity without the necessary water use authorisation, it will be regarded as an unlawful water use. The Applicant will thus be **guilty** of an offence and liable for a fine or imprisonment as stipulated in Section 151 of the NWA.

2.2. Solid Waste Management

- ❖ The requirements of this Department with respect to solid waste must be strictly enforced and complied with.
- ❖ The Applicant should note that contaminated soil or other hazardous material must be disposed of at a permitted hazardous landfill site that is authorized to accept the said material and proof of this must be made available to this Department when required.

- ❖ Should private contractors be used, all solid waste must be disposed of at permitted landfill site and proof of this must be made available to this Department when required.
- ❖ The recycling of suitable material is encouraged by this Department, provided it is properly managed.

2.3. Sewage and Wastewater Management

- ❖ Washing, refuelling, maintaining of vehicles or the transfer of hazardous substances must be conducted within a bunded area. All drainage arising from the bunded area must be treated as a water containing waste and disposed of safely.
- ❖ The Applicant must note that the use of any temporary, chemical toilet facilities must not cause any pollution to a water resource or pose a health hazard. In addition, these toilets must not be situated within 100m from a watercourse or within the 1:100-year flood line (whichever is the greatest). Furthermore, no form of secondary pollution should arise from the disposal of refuse or sewage from the temporary, chemical toilets. Any pollution problems arising from the above are to be addressed immediately by the Applicant.

The following is applicable should small volumes of wastewater be generated during the construction phase:

- Water containing waste must not be discharged into the natural environment, and
- Measures to contain the water containing waste and safely dispose thereof must be implemented.

2.4. Stormwater Management

- ❖ It is imperative that there is proper management of storm water at the project site. This Department requests a Stormwater Management Plan.
- ❖ The Engineer or Contractor must ensure that only clean Stormwater runoff enters the environment.
- ❖ Drainage must be controlled to ensure that runoff from the project area does not culminate in off-site pollution, flooding or result in any damage to properties downstream of any Stormwater discharge point(s).

2.5. Erosion Control

- ❖ Erosion control measures must be put in place to minimise erosion along the proposed construction areas. Extra precautions must be taken in areas where the soils are deemed highly erodible.
- ❖ Soil erosion onsite must be always prevented, i.e., pre-, during- and post-construction activities. Erosion control measures must be implemented in areas prone to erosion such

as near water supply points, edges of slopes, etc. These measures could include the use of sandbags, hessian sheets, bidim, retention or replacement of vegetation.

- ❖ Where the land has been disturbed during construction/excavation it must be re- habilitated and re-vegetated back to an acceptable state after construction/ excavation.
- ❖ Stockpiling of soil or any other materials used during the construction phase must not be allowed on or near steep slopes, near a watercourse or water body. This is to prevent pollution or the impediment of surface run-off. The Applicant must control and establish suitable mitigation measures to prevent the erosion of stockpiles.

2.6. Spillages Management

- ❖ There must be no unacceptable impact on the quality of both surface and groundwater in the area. If pollution of any surface or groundwater occurs, it must be immediately reported to this Department and the appropriate mitigation measures must be employed. In addition, should the proposed development impact on any groundwater and/or surface water users, then water of equal quality and quantity must be provided to the affected users.
- ❖ Storage of material, chemicals, fuels etc. must not pose a risk to the surrounding environment, and this includes surface and groundwater. Temporary bunds must also be constructed around chemical or fuel storage areas to contain possible spillages.
- ❖ Such storage areas must be located outside the 1:100-year flood-line of the water source and must be fenced to prevent unauthorized access into the area.
- ❖ It is important that any significant spillage of chemicals, fuels, etc. during the construction phase and/or operational phase is reported to this Office and other relevant authorities. In the event of a spill, the following steps can be taken:
 - Stop the source of the spill,
 - Contain the spill,
 - All significant spills must be reported to this Department and other relevant authorities,
 - Remove the spilled product for treatment and authorised disposal,
 - Determine if there is any soil, groundwater, or other environmental impact,
 - If necessary, remedial action must be taken in consultation with this Department, and
 - Incidents must be documented.

2.7. General

- ❖ No form of secondary pollution should arise from the disposal of sewage and refuse. The contractor must be clearly briefed on the method of disposal of such waste and compliance must be ensured/ monitored. Any pollution problems arising from the above project is to be addressed immediately by the Applicant.

- ❖ This Office reserves the right to inspect the site without prior notice to ensure that its requirements, as mentioned above, are adhered to. Should any problems be noted, measures must be undertaken immediately to rectify the situation.
- ❖ This Department reserves the right to revise/withdraw these comments and request further information from the applicant should any other information that contradicts the above comes to light.
- ❖ Notwithstanding the above, the responsibility rests with the Applicant to identify all sources or potential sources of pollution from his undertaking and to take appropriate measures to prevent any pollution of the environment. Failure to comply with the requirements of the NWA could lead to legal action being instituted against the Applicant.

Should you have concerns and queries in relation to these comments, please do contact this office.

Yours faithfully,

ASSISTANT DIRECTOR: WATER USE AUTHORISATIONS
