DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT

Good day

14 January 2022

Dear sir/madam

RE: DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT FOR AN APPLICATION IN TERMS OF SECTION 102 OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002), AND ENVIRONMENTAL AUTHORISATION IN TERMS OF SECTION 24 OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998 NEMA) AS WELL AS THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED 2017) SUBMITTED BY ZANDBERG SANDPUT (PTY) LTD. REFERENCE NUMBER: WC 30/5/1/2/2/87 MR & WC 30/5/1/2/2/10080 MR.

The draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Zandberg Sandput (Pty) Ltd mining area on a portion of Portion 4 of the farm Zandberg Fontein 97, Robertson Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com/section-102-applications/.

Should you be interested your comments are kindly requested on the DEIAR. A thirty-day commenting period, ending on **17 February 2022**, will be allowed for comments. Your comments must be in writing and can be submitted via facsimile, e-mail and/or post. Please do not hesitate to contact us in the event of any uncertainties and please ensure that your contact details are included with your comments.

If we do not receive any comments from you before the end of the commenting period, it will be accepted that you do not have any additional comments with regard to the project. We trust that you find it in order and kindly await your comments on this report.

Attention: Christine Fouche

COMMENTS ON THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR THE PROPOSED EXPANSION OF THE ZANDBERG SANDPUT (PTY) LTD MINING AREA ON PORTION 4 OF THE FARM ZANDBERG FONTEIN 97, ROBERTSON.

The Breede-Gouritz Catchment Management Agency (BGCMA) has received documents for the above mentioned application on the 17/01/2022, requesting comments.

BGCMA has no objection to the proposed application; however, has the following comments:

- It is noted that the proposed mine expansion sites are within 500 m radius of wetlands. Please note that any activity within the 1:100 year floodline or within 100 metres of a watercourse (river, spring, natural channel, a lake or dam) or within a 500 m radius from the delineated boundary (extent) of any wetland or pan triggers a water use activity in terms of Section 21 (c) & (i) of the National Water Act, 1998 (Act 36 of 1998). A Water Use Authorisation Application needs to be lodged with the Department of Water and Sanitation by following this link: <http://www.dwa.gov.za/ewulaasprod/Register.aspx> .
- It is noted that there is a dam on site which is not authorised and not registered in BGCMA records. The source of water to fill the dam, the purpose of the dam and size of the dam is not indicated. This information should be submitted to this office before Section 21(c) & (i) Water Uses Authorisation Application is lodged in order to determine if there will be a need to include this water use in the application.
- Disposal of sewage must at all times comply with the requirements of Sections 22 and 40 of the National Water Act of 1998, (Act 36 of 1998).

- All relevant sections and regulations of the National Water Act, 1998 (Act 36 of 1998) regarding water use must be adhered to.
- No water must be taken from a water resource for any purpose without authorisation from the National Water Act, 1998 (Act 36 of 1998).
- No waste or water containing waste may be disposed without authorisation from the National Water Act, 1998 (Act 36 of 1998) and National Environmental Management: Waste Act, 2008 (Act 59 of 2008).
- The minimising of waste must be promoted and alternative methods for waste management must be investigated.
- No pollution of surface water or groundwater resources may occur.
- Stormwater management must be addressed both in terms of flooding, erosion and pollution potential.
- No stormwater runoff from any premises containing waste, or water containing waste emanating from industrial activities and premises may be discharged into a water resource. Polluted stormwater must be contained.

Please be advised that no activities may commence without the appropriate approvals/authorisations where needed from the responsible authority. The onus remains with the registered property owner to confirm adherence to any relevant legislation that such activities might trigger and/or need authorisation for.

This office reserves the right to amend and revise its comments as well as to request any further information.

Please do not hesitate to contact this office if you have any further queries. Please ensure to quote the above reference in doing so.

Yours faithfully,

JAN VAN STADEN
CHIEF EXECUTIVE OFFICER (ACTING)

Dear Mashudu,

Greenmined herewith acknowledges, and thank you for, the comments submitted on the DEIAR for the proposed expansion of the Zandberg Sandput (Pty) Ltd mining area on Portion 4 of the farm Zandberg Fontein No 97 in the Robertson area.

Your comments will be incorporated into the final Environmental Impact Assessment Report to be submitted to the DMRE for decision making, and will also be shared with the consultants responsible for the Water Use Authorisation Application for their attention and handling in terms of the NWA, 1998.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Dear Christine

Revised Draft Environmental Impact Assessment Report & Environmental Management Programme Report for the Expansion of the Sand Mine on Portion 4 of the Farm Zandbergfontein 97, Zandberg Sandput, Robertson (DMR ref. no.: WC 30/5/1/2/2/87 MR & WC 30/5/1/2/2/10080 MR)

CapeNature would like to thank you for the opportunity to comment on the application and would like to make the following comments. Please note that our comments only pertain to the biodiversity related impacts and not to the overall desirability of the application.

Background

CapeNature did not support the application as initially presented in the Draft Environmental Impact Assessment (EIA) Report and Environmental Management Programme Report (EMPr) as the proposal would result in the loss of approximately 27 ha of Critical Biodiversity Area (CBA) verified as high sensitivity habitat in the botanical assessment. Subsequent to this a biodiversity offset study was commissioned which has resulted in a revised mining proposal and additional ecological specialist assessments. CapeNature provided a preliminary response regarding the proposed biodiversity offset which has been included in the comments and response report. It should however be noted that our initial comments did not only pertain to the biodiversity offset.

As a result of the implementation of the mitigation hierarchy which is central to biodiversity offsets the proposed mining area has been reduced from 108 ha to 4 ha which is a significant reduction. The proposal will still result in the loss of 4 ha of CBA for which a biodiversity offset is proposed. Due to the relatively large remaining extent of natural habitat on the property outside of the current and proposed mining area the proposed offset could be accommodated on the same property. In addition to the reduced area, the mining

methodology has been amended to provide for a bench mining method whereby each bench is mined and progressively rehabilitated.

Botanical Assessment

The botanical assessment has been amended to reflect the revised proposal. A second site assessment was undertaken in a more optimal time of year (August) and included the entire property which could also then be used to inform the location of the offset. This resulted in an increase of the plant species list from 63 species to 109 species, with 56 of these species within the Breede Sand Fynbos habitat which is targeted for mining and the offset. Detailed descriptions are however only provided for the habitat units within the Breede Sand Fynbos which would be affected by the mining. Two additional Species of Conservation Concern (SCCs) were encountered, but do not occur within the affected footprint.

The botanical assessment recommended that Alternative 1 is the preferred alternative as the fewest individuals of SCCs would be affected, although Alternative 3 would still be acceptable. Alternative 2 is least preferred as this will impact on the highest number of SCCs. We wish to query the impact assessment section for the potential impacts on vegetation and SCCs, which was rated as high negative before mitigation and medium negative after mitigation, which was the same as the previous assessment. The impacts will be reduced compared to the previous proposal as a result of the greatly minimized footprint and the implementation of a biodiversity offset.

The proposed mitigation measures in the botanical assessment are supported. Search and rescue of geophytes and succulents through translocation has been included and these specimens should be kept at an on-site nursery and used in the rehabilitation of the mine and other disturbed areas on site. We recommend that the Karoo Botanical Gardens should be contacted to determine if they wish to obtain any plant material for cultivation, in particular SCCs and including collection of cuttings and seed for species which are not suitable for translocation (e.g. the microphyllous shrub SCCs).

Rehabilitation of the mined area will also play an important role in determining the long term impact of the activity. The revised botanical assessment has included rehabilitation specifications which are supported. A list of species has been included, which should be integrated with the search and rescue programme as listed above. Collection of seed and cuttings can be extended beyond the mining footprint, provided the permits are obtained from CapeNature. The rehabilitation would need to take cognisance that pioneer species are required for initial establishment and therefore the SCCs should be carefully located.

The closure plan has been amended to include the recommendations of the botanical assessment with the aim of re-establishing Breede Sand Fynbos on the mined area. The report indicates that this is challenging which we agree with. The succession of the vegetation from establishment of pioneer vegetation to the establishment of the original sand fynbos vegetation has not been fully described. We recommend that a restoration specialist should be appointed to advise regarding the rehabilitation on site with the aim of re-establishing Breede Sand Fynbos on site.

Terrestrial Fauna Assessment and Butterfly Survey

A terrestrial fauna assessment was undertaken as a result of the screening tool which identified the possibility of the presence of the following threatened fauna species Black Harrier (*Circus maurus*, Endangered), Verreaux's Eagle (*Aquila verreauxii*, Vulnerable) and Riverine Rabbit (*Bunolagus monticularis*, Critically Endangered). Butterfly species were assessed in a separate assessment. The assessment indicated that the mining footprint is unlikely to provide important habitat for the two bird species as the adjacent mountains are more

suitable habitat for the Verreaux's Eagle and the Black Harrier requires relatively dense cover. The mining footprint is small relative to the home ranges of these species and the remaining surrounding habitat. Of the bird species of conservation concern, the Agulhas Long Billed Lark (*Certhilauda brevirostris*) was the only one rated as high likelihood of occurrence. It is noted that the species is largely restricted to the Agulhas Plain and Overberg wheatbelt and reportedly occurs within the Breede Valley to Worcester although this has not been confirmed by bird atlas data (Peacock 2015)

All of the mammal species of conservation concern which could occur on the site are rated as low likelihood, which included the Riverine Rabbit. We recommend that the rating for Riverine Rabbit should rather be noted as unknown than low, as consultation with the Endangered Wildlife Trust (EWT) has revealed that the lack of records within the Breede Valley may be as a result of low sampling effort rather than real absence. Previous surveys in 2006 and 2007 resulted in only one unconfirmed debatable sighting. The habitat selection in areas outside the Nama Karoo (e.g. Little Karoo) has revealed a wider range than only riparian vegetation. We therefore recommend that the ecological monitoring requirements for the offset should include an additional activity of camera trap surveys specifically targeted at Riverine Rabbits, but should also include other fauna species. No other faunal groups were highlighted or discussed.

The findings of the fauna assessment are that the proposed mine is acceptable provided the proposed mitigation measures are implemented. CapeNature wishes to recommend that mitigation measures are put in place for fossorial (i.e. burrowing) faunal species in areas proposed to be mined. The preferred alternative is Alternative 3, as this will have reduced edge effects.

A separate butterfly assessment was undertaken for *Aloeides lutescens* (Endangered) which was flagged in the screening tool. Four site surveys were undertaken between September and December, including surveys during the flight period of *A. lutescens*, however this species was not encountered. *Chrysochrysis rileyi* (Endangered) was however recorded on site, which was not flagged in the screening tool. A second potential SCC occurs on site, namely an undescribed subspecies of *Chrysochrysis pyrois* which has not been evaluated. Detailed surveys for these two species revealed the presence of *C. rileyi* within Alternative 1 and both species in the northern part of Alternative 2, however none were encountered within Alternative 3.

The proposed offset area was confirmed to contain habitat for the two butterfly SCC species recorded and is therefore a suitable mitigation measure if Alternative 3 is selected. We wish to note that *Thestor kaplani* (Critically Endangered) was mentioned in the terrestrial fauna assessment as a species flagged in the screening tool, however this species is not mentioned in the butterfly survey report. It is noted that there is at least one record of *C. rileyi* within an area disturbed by mining. We recommend that the lepidopterist should be consulted to advise regarding the rehabilitation of the mining area to optimise the rehabilitated area as habitat for the SCC butterfly species occurring on site.

Watercourse Delineation and Habitat Assessment and Floodline Determination Study

A new watercourse delineation and habitat assessment was undertaken in addition to the previous wetland delineation report. The study encompassed the regulated 500 m buffer around the proposed alternative footprints and identified the presence of an artificial wetland within the footprint of the mined area downslope of the proposed extension area leading into

an artificial dam. In addition to this, an unchanneled valley bottom wetland was identified to the south of the proposed mining area.

The description of the freshwater features within the current mining area in the new watercourse delineation report differs from the previous wetland delineation report. CapeNature supports the findings from the new report as these appear more accurate than the descriptions from the previous report. The new report describes the wetland as artificial as a result of the mining activity which has lowered the ground level exposing the groundwater at the base of the slope, following which the water is then directed to the dam whereas the previous report only referred to artificial trenching of water into the dam.

The presence of wetlands within the alternative footprints for expansion was investigated, in particular Alternative 3 which contains the thalweg (lowest point) along the slope with a watercourse mapped dissipating upslope of this. The report states that there was no evidence of the presence of wetlands based on soil indicators. The report further indicates that there is no evidence of an episodic drainage line which transports water only during rainfall events (e.g. signs of run-off), due to the sandy substrate which promotes infiltration of water flow into the dune sand and groundwater interflow.

As indicated the other method of wetland delineation apart from soils is the presence of hydrophilic vegetation, particularly in sandy soils which don't always have well developed mottling under wetland conditions. The report indicates that only dryland species were encountered and that "the brown grass contributes to the appearance of a drainage line". It should however be noted that the botanical assessment mapped this as a drainage line, which was one of the three habitat units assessed in detail. The recommendation in the botanical assessment for drainage lines is that they should be regarded as no-go areas unless approved by the hydrologist/wetland specialist.

The recommendation of the watercourse delineation and habitat assessment is that all three alternatives are acceptable as they will not impact directly on any watercourses or wetlands. The artificial wetland has resulted due to the mining activities and therefore no specific mitigation measures are proposed. CapeNature wishes to query whether the feature mapped as a drainage line in the botanical assessment requires any specific mitigation in particular related to drainage whether it is defined as a watercourse in terms of the National Water Act or not.

A floodline determination study was undertaken which refers to the feature described above as a drainage line however it confirms that this is an ephemeral feature and further that this is not a defined feature. The floodline determination does not further assess the freshwater features or hydrology on site, but instead determines the 1 in 100 year floodline for the Breede River which is a fair distance and elevation downslope from the site which is unsurprisingly well outside of the floodline.

We therefore wish to query the discrepancy between the mapping and definition in the botanical assessment, the watercourse delineation and habitat assessment and floodline determination study regarding the potential freshwater feature traversing Alternative 3. The stormwater management plan has been amended from the previous version in accordance with the revised proposal. However, we recommend that this needs to be finalized based on the outcome of the determination of the presence of a drainage line or not, as the run-off from this feature would need to be adequately managed and mitigated.

Biodiversity Offset Report

CapeNature commented previously on the biodiversity offset as referred to above, however prior to the compilation of the biodiversity offset report. The biodiversity offset report has

taken into account all of the ecological specialist studies referred to above. Rehabilitation has been discussed as a step in the mitigation hierarchy. The biodiversity offset report has recommended Alternative 3 as the preferred alternative weighing up the various impacts as described above, even although not the preferred alternative from a mining perspective. Alternative 3 has accordingly also been recommended as the overall preferred alternative in the Draft EIA Report/EMPr which CapeNature agrees with pending the outcome from the further investigation regarding the potential drainage line as discussed above.

The offset requirements at a ratio of 1:30 for the loss of 4 ha was 120 ha. The area of remaining Breede Sand Fynbos on site apart from the small, degraded patch in the north amounts to ±120 ha. This has been included in the offset area along with adjacent vegetation types to create a less convoluted conservation area configuration resulting in a total offset area of 169 ha. Targeting Breede Sand Fynbos will ensure “like for like” and provide protection for this poorly protected vegetation type under increasing threat and proposed to be listed as Critically Endangered. CapeNature supports the proposed biodiversity offset area as indicated in our initial comments and in the minutes of the stewardship review committee meeting on 1 February 2022.

Preliminary costing and proposed conditions of approval have been provided in the offset study. These conditions will ensure that the operational arrangements regarding the implementation of the offset will be realized. This is an important component of the long term feasibility of the offset. CapeNature has clarified that all costs associated with the biodiversity offset are to be provided by the applicant in accordance with the “polluter pays” principle enshrined in NEMA.

Conclusion

CapeNature does not object to the revised development proposal and associated biodiversity offset as currently proposed, which is a significant improvement on the previous proposal. There are however several issues as discussed above that must be addressed before the submission of the Final EIA Report/EMPr. In particular, the presence of the drainage line and associated mitigation measures must be clarified. Should this be satisfactorily addressed, CapeNature agrees with the selection of Alternative 3 as the preferred alternative.

CapeNature reserves the right to revise initial comments and request further information based on any additional information that may be received.

Yours sincerely

Rhett Smart

Dear Rhett,

Greenmined herewith acknowledges, and thank you for, the comments submitted on the revised DEIAR for the proposed expansion of the Zandberg Sandput (Pty) Ltd mining area on Portion 4 of the farm Zandberg Fontein No 97 in the Robertson area.

Your comments were incorporated into the final Environmental Impact Assessment Report to be submitted to the DMRE for decision making. A copy of the FEIAR & EMPr will be published on the Greenmined website (www.greenmined.com) after 25 February 2022, should you like to obtain a copy.

As commenting authority, CapeNature will be informed of the DMRE's decision on the application once it is received.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Dear Adri

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Zandberg Sandput (Pty) Ltd mining area on a portion of Portion 4 of the farm Zandberg Fontein 97, Robertson Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com/section-102-applications/.

By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application

Dear Madam

COMMENTS ON THE REVISED DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT FOR LISTED ACTIVITIES ASSOCIATED WITH THE PROPOSED MINING RIGHT EXPANSION ON A PORTION OF PORTION 4 OF THE FARM ZANDBERG FONTEIN NO. 97, ROBERTSON (DMRE REF: WC 30/5/1/2/2/87 MR & WC 30/5/1/2/2/10080 MR)

The Draft Scoping Report dated June 2020, the Department's comments thereto dated 20 July 2020, the Draft Environmental Impact Assessment ("EIA") Report dated October 2020, the Department's comments thereto dated 02 December 2020, and the e-mail notification of 14 January 2022 regarding the availability of the Revised Draft EIA Report, refer.

Please find consolidated comments from various directorates within the Department on the Revised Draft EIA Report dated January 2022 that was downloaded from the website of the environmental assessment practitioner.

1. Directorate: Development Management (Region 1) – Ms Ayesha Hamdulay (Email: Ayesha.Hamdulay@westerncape.gov.za; Tel.: (021) 483 0756):

1.1. This Directorate notes that the proposed mining expansion area has been reduced to approximately 4ha with a proposed 169 ha biodiversity offset area, based on comments received from CapeNature. Final comments from CapeNature must be obtained and included in the Final EIA Report.

- 1.2. All the mitigation measures as proposed in the various specialist reports must be implemented.
- 1.3. Should the competent authority grant the amendment of the mining right; it should be noted that this Directorate deems the best practicable environmental option to be Site Alternative 3.
2. Directorate: Development Facilitation – Mr Ralph van Delin (Email: Ralph.vandelin@westerncape.gov.za; Tel.: (021) 483 5574):
 - 2.1. This Directorate notes that its comments on the Draft EIA Report have been adequately responded to and proof of relevant documentation were provided. This Directorate has no further comments on the Revised Draft EIA Report.
3. Directorate: Pollution and Chemicals Management – Ms Shehaam Brinkhuis (Email: Shehaam.Brinkhuis@westerncape.gov.za; Tel.: (021) 483 8309):
 - 3.1. This Directorate previously commented on the Draft EIA Report and notes the responses provided in combination with the additional information, as contained in the Revised Draft EIA Report and Environmental Management Programme (“EMPR”), Comments and Response Report, and additional specialist input, which largely address the comments raised by this Directorate. It is recommended that the proposed mitigation measures be strictly implemented and always adhered to. This Directorate therefore has no further comment at this stage of the application.
4. Directorate: Waste Management – Mr Lance Anders (Email: Lance.Anders@westerncape.gov.za; Tel.: (021) 483 2891):
 - 4.1. This Directorate has no further comments on the Revised Draft EIA Report.
5. Directorate: Air Quality Management – Mr Sibusiso Sinuka (Email: Sibusiso.Sinuka@westerncape.gov.za; Tel.: (021) 483 3463):
 - 5.1. This Directorate notes that all environmental impacts associated with the proposed activity relating to air quality have been adequately addressed. This Directorate has no further comments on the Revised Draft EIA Report.
6. The applicant is reminded of its “*general duty of care towards the environment*” as prescribed in section 28 of the National Environmental Management Act, 1998 (Act No. 107 of 1998) which states that “*Every person who causes, has caused or may cause significant pollution or degradation of the environment must take reasonable measures to prevent such pollution or degradation from occurring, continuing or recurring, or, in so far as such harm to the environment is authorised by law or cannot reasonably be avoided or stopped, to minimise and rectify such pollution or degradation of the environment.*”

Please direct all enquiries to the commenting officials should you require any clarity on any of the comments provided.

The Department reserves the right to revise initial comments and request further information based on any or new information received.

Yours sincerely

Thea

Subject: RE: Comment : Comments on the Revised Draft EIA Report for the proposed mine expansion on a portion of Portion 4 of the Farm Zandberg Fontein 97, Robertson

Dear Me Jordan,

Greenmined herewith acknowledges, and thank you for, the Department's comments submitted on the revised DEIAR for the proposed expansion of the Zandberg Sandput (Pty) Ltd mining area on Portion 4 of the farm Zandberg Fontein No 97 in the Robertson area.

The comments will be incorporated into the final Environmental Impact Assessment Report to be submitted to the DMRE for decision making. A copy of the FEIAR & EMPR will be published on the Greenmined website (www.greenmined.com) after 25 February 2022, should the Department like to obtain a copy.

As commenting authority, the DEA&DP will be informed of the DMRE's decision on the application once it is received.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

Dear Marlene,

Your email dated 14 January 2022 refers.

Cognisance is taken of the draft EIA report.

The Branch offers no objection to the proposal to expand the mine.

Best regards

Faisal Fakier Pr. Eng.

Dear Abbygail,

Thank you for the comments and map that you send regarding this application. The Eskom requirements will be incorporated into the final Environmental Impact Assessment Report of the project, to be submitted to the DMRE for decision making.

As interested party, Eskom will be informed of the departmental decision in due course.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

WAYLEAVE APPLICATION: Proposed expansion of Mining area. Farm 4/97, Robertson

YOUR REF: ZANDBERG WC

ESKOM REF: 04235-22

THIS IS NOT AN APPROVAL TO START CONSTRUCTION

I hereby inform you that Eskom has no objection to the proposed work indicated on your drawing in principle. This approval is valid for **12 months** only, after which reapplication must be made if the work has not been completed.

1. **Eskom services are affected by your proposed works and the following must be noted:.**

- a) Eskom has no objection to the proposed work and include a drawing indicating Eskom 11kV/LV underground services in close proximity.
- b) Please note that underground services indicated are only approximate and the onus is on the applicant to verify its location.
- c) There may be LV overhead services / connections not indicated on this drawing.
- d) The successful contractor must apply for the necessary agreement forms and additional cable information not indicated on included drawing, in order to start construction.

Application for Working Permit must be made to:

Customer Network Centre: WORCESTER
Adrian Issel
IsselAF@eskom.co.za
+27 23 346 8655

Include Eskom Wayleave as-built drawings and all documentation, when applying for Working Permit.

Should it be necessary to move, relocate or support any existing services for possible future needs, it will be at the developer's cost. Application for relocating services must be made to Sabelo Potela on 084 745 8990 / PotelaS@eskom.co.za.

2. Underground Services

The following conditions to be adhered to at all times:

- a) Works will be carried out as indicated on plans.
- b) No mechanical plant to be used within 3.0m of Eskom underground cables.
- c) All services to be verified on site.
- d) Cross trenches to be dug by hand to locate all underground services before construction work commences.
- e) If Eskom underground services cannot be located or is grossly misplaced from where the wayleave plan indicates, then all work is to be stopped and Graham Hector from the Land Development Office to be contacted on 021 980 3551 / HectorG@eskom.co.za, to arrange the capturing of such services.
- f) In cases where proposed services run parallel with existing underground power cables the greatest separation as possible should be maintained with a minimum of 1000mm.
- g) Where proposed services cross underground power cables the separation should be a minimum of **300mm** with protection between services and power cables. (Preferably a concrete slab)
- h) No manholes; catch- pits or any structure to be built on top of existing underground services.
- i) Only walk-behind (2 ton Bomac type) compactors to be used when compacting on top of and 1 metre either side of underground cables.
- j) If underground services cannot be located then the Customer Network Centre (CNC) should be consulted before commencement of any work.

3. O.H. Line Services:

- a) a) The following building and tree restriction on **either side of centre line** of overhead power line must be observed:

Voltage	Building restriction either side of centre line
11 / 22kV	9.0 m
66kV	11.0 m
132kV	15.5 m

- b) No construction work may be executed closer than **6 (SIX) metres** from any Eskom structure or structure-supporting mechanism.
- c) No work or no machinery nearer than the following **distances from the conductors**:

Voltage	Not closer than:
11 / 22kV	3.0 m
66kV	3.2 m
132kV	3.8 m

- d) Natural ground level must be maintained within Eskom reserve areas and servitudes.
- e) That a **minimum ground clearance** of the overhead power line must be maintained to the following clearances:

Voltage	Safety clearance above road:
11 / 22kV	6.3 m
66kV	6.9 m
132kV	7.5 m

- f) That existing Eskom power lines and infrastructure are acknowledged as established infrastructure on the properties and **any rerouting or relocation would be for the cost of the applicant/developer.**
- g) That Eskom rights or servitudes, including agreements with any of the landowners, obtained for the operation and maintenance of these existing power lines and infrastructure be acknowledged and honoured throughout its lifecycle which include, but are not limited to:
 - i. Having 24 hour access to its infrastructure according to the rights mentioned in (a) above,

- ii. To perform maintenance (structural as well as servitude – vegetation management) on its infrastructure according to its maintenance programmes and schedules,
 - iii. To upgrade or refurbish its existing power lines and infrastructure as determined by Eskom,
 - iv. To perform any other activity not listed above to ensure the safe operation and maintenance of the Eskom power lines or infrastructure.
- h) Eskom must have at least a 10m obstruction free zone around all pylons (not just a 10m radius from the centre).
 - i) Eskom shall not be liable for the death or injury of any person, or for loss of or damage to any property, whether as a result of the encroachment or use of the area where Eskom has its services, by the applicant, his/her agent, contractors, employees, successors in title and assignee.
 - j) The applicant indemnifies Eskom against loss, claims or damages, including claims pertaining to interference with Eskom services, apparatus or otherwise.
 - k) Eskom shall at all times have unobstructed access to and egress from its services.
 - l) Any development which necessitates the relocation of Eskom's services will be to the account of the developer.
 - m) Lungile Motsisi, Eskom: Transmission must be contacted on 011 800 5734 to comment on behalf of the 400 kV OVERHEAD POWERLINES, NO WORK WITIN THIS SERVITUDE OR UNDERNEATH POWERLINES IS ALLOWED until comment from Eskom Transmission has been obtained.

4. **NOTE**

Wayleaves, Indemnity form (working permit) and all as-built drawings issued by Eskom to be kept on site at all times during construction period.

Yours faithfully

LAND DEVELOPMENT (BRACKENFELL)

**CORRESPONDENCE BETWEEN LANGEBERG
LOCAL MUNICIPALITY AND GREENMINED
ENVIRONMENTAL**

Marlene van den Berg

From: Tracy Brunings <tbrunings@langeberg.gov.za>
Sent: 17 February 2022 01:33 PM
To: Greenmined Comments
Cc: Langeberg Municipality
Subject: RE: DEIAR Zandberg WC 30/5/1/2/2/87 MR & WC 30/5/1/2/2/10080 MR - LLM

Good day,

I refer to your email below.

The original proposal to expand the Zandberg Sandput mining area by more than 100ha. was not supported (refer to email dated 10/11/2020).

The current application for the expansion of the Zandberg Sandput mining area by 4ha. (Alternative Site 1) is supported, subject to compliance with the EMPr and the relevant mitigating measures and monitoring programmes (including buffer areas, rehabilitation requirements and biodiversity offsets). These measures will assist in aligning the proposal more closely with the Langeberg SDF, 2015 and the WC Rural Development Guidelines, 2019 which aim to minimise loss of habitat and ecosystem functionality in Core 1 SPCs.

The application in terms of the LLUP Bylaw, 2015 is awaited.

(Note: P2 of the report, third paragraph refers to 0,25m² - should be 0,25ha?).

Regards,

Tracy Brunings Pr.Pln A/951/1997

Dear Tracy

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Zandberg Sandput (Pty) Ltd mining area on a portion of Portion 4 of the farm Zandberg Fontein 97, Robertson Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com/section-102-applications/.

Dear Tracy,

Greenmined herewith acknowledges, and thank you for, the municipality's comments submitted on the revised DEIAR for the proposed expansion of the Zandberg Sandput (Pty) Ltd mining area on Portion 4 of the farm Zandberg Fontein No 97 in the Robertson area.

The comments will be incorporated into the final Environmental Impact Assessment Report to be submitted to the DMRE for decision making. A copy of the FEIAR & EMPR will be published on the Greenmined website (www.greenmined.com) after 25 February 2022, should you like to obtain a copy.

As commenting authority, the Langeberg Local Municipality will be informed of the DMRE's decision on the application once it is received.

We trust you will find this in order. Please do not hesitate to contact me in the event of any uncertainties.

Kind Regards / Vriendelike Groete

CaseHeader **LocationInfo** **Admin**

Status: SUBMITTED

HeritageAuthority(s): HWC
SAHRA

Case Type: Section 38 (8) - Statutory Comment Required

Development Type: Mining

ProposalDescription:

The MR Holder intends submitting an application for consent of the minister to expand the existing mining right footprint of the Zandberg sand mine with 108.3851 ha, in terms of Section 102 of the MPRDA, 2002. The proposed expansion area will be developed over an area currently used for agricultural purposes. Should the S102 application be approved mining will progress into the expansion area as the current mining footprint is mined-out. The mining method will remain the same as the method currently implemented by the MR holder. No infrastructure will be established in the extension area.

ApplicationDate: Wednesday, January 29, 2020 - 14:45

Attachments: DEIAR - Zandberg S102 - 2022.pdf

Good day,

Please find attached notification that the draft Environmental Impact Assessment Report (DEIAR) and Environmental Management Programme (EMPR) for the propose expansion of the Zandberg Sandput (Pty) Ltd mining area on a portion of Portion 4 of the farm Zandberg Fontein 97, Robertson Municipal District, is now available for your perusal. A copy of the document can be obtained from Greenmined Environmental upon request, or downloaded from the company website at www.greenmined.com/section-102-applications/.

By taking part in this process, the undersigned hereby consents, in terms of the Protection of Personal Information Act 4 of 2013 ("POPIA"), to the lawful processing of his/her personal information by Greenmined Environmental (Pty) Ltd, which personal information may be used as part of documentation pertaining to the Environmental Authorisation and/or Mining or Prospecting Right and/or Mining Permit application process. This is a public process and will become public information upon receipt thereof by the competent authority, which information will no longer be controlled by Greenmined Environmental (Pty) Ltd. Any interested and affected party should be provided with the information contained in this application, upon request, during any stage of the application and therefore your information may be made available to third parties. By providing your details below and by taking part in this process you authorise such information to be shared for the purpose of this application

Kind Regards/Vriendelike Groete
